1971-72

PRESENTED BY
THE HONOURABLE B. M. SNEDDEN, Q.C., M.P.,
TREASURER OF THE COMMONWEALTH,
FOR THE INFORMATION OF
HONOURABLE MEMBERS ON THE OCCASION
OF THE BUDGET 1971-72

COMMONWEALTH GOVERNMENT PRINTING OFFICE
CANBERRA: 1971

FOREWORD

This Paper is a revised version of similar Papers issued in connexion with the Budgets of recent years and provides a survey of payments made by the Commonwealth to assist the States. The main body of the Paper describes the payments currently being made to the States. In Appendices some of the earlier history of these payments is outlined. Details are also given of payments of interest and repayments of capital by the States on loans made by the Commonwealth for specific purposes.

The Paper includes a Chapter outlining the general purpose capital funds available to State Governments and their authorities under the Loan Council arrangements and the Commonwealth's role in helping to finance the borrowing programmes approved by Loan Council for State Governments.

A brief account of Commonwealth payments to or for the States is also given in Statement No. 4 accompanying the Budget Speech for 1971-72. The total figures shown there are somewhat lower than the totals shown herein because in the Budget payments for the maintenance of tuberculosis hospitals and assistance for deserted wives are charged to the National Welfare Fund, contributions towards the cost of development of an integrated township at Exmouth are charged to Defence Services and payments for Aboriginal advancement are charged to Other Expenditure.

It might be noted that rounded figures have normally been used in the text and that details in tables may not add to totals.

CHAPTER I—OUTLINE OF COMMONWEALTH ASSISTANCE

Since Federation the Commonwealth has made payments of various descriptions to the States. Prior to World War II, Commonwealth payments were mainly of a marginal character and were confined, for the most part, to special grants to assist the financially weaker States, and to certain specific purpose grants such as Commonwealth assistance for roads and contributions under the Financial Agreement.

Since World War II and the immediate post-war period there has been a marked increase in the amount and scope of Commonwealth assistance to the States. This has reflected, amongst other things, increases in the range and variety of governmental activities that have accompanied economic and social developments in this period of rapid growth of the Australian economy; greater participation by the Commonwealth in matters that were previously considered to be the sole responsibility of the States; and the effects of the introduction and continuation of uniform income tax and of other changes in the allocation of financial resources between the Commonwealth and the States.

In this document Commonwealth payments to or for the States are classified under two main heads: general revenue grants and specific purpose payments.

The general revenue grants arrangements are discussed in Chapter II and further details are given in Appendix II. The general revenue grants, which comprise about 70 per cent of the total payments to the States, are provided as general subventions to the State budgets. The States are therefore free to use them as they see fit. The financial assistance grants, formerly called tax reimbursement grants, make up the bulk of the general revenue grants. These financial assistance grants are determined annually on the basis of a formula that is normally subject to review at five-year intervals. In some years, however, the Commonwealth has provided special assistance in various ways to supplement the amounts produced by the formula. In addition to the financial assistance grants, special grants have been paid over the years to certain States on the recommendation of the Commonwealth Grants Commission.

The specific purpose payments to the States are discussed in Chapter IV and further details are given in Appendix IV. These specific purpose payments fall into two categories, namely grants to meet *current* expenditures and grants (both repayable and non-repayable) for *capital* purposes. Included in the first category is assistance provided for current expenditure on universities, contributions under the Financial Agreement to interest and sinking fund charges on State debts, and specific assistance to help the States relieve the effects of natural disasters. Payments for capital purposes, some of which complement specific purpose revenue grants, include assistance with roads, railways, universities and certain other education services, and a number of other capital purposes.

In addition to making these payments to or for the States, the Commonwealth assists in financing *capital* expenditure by the States through the assistance provided in financing the annual borrowing programmes approved by the Loan Council for State works and housing. Chapter III provides information on these borrowing programmes which represent capital funds available to the States for *general* purposes, plus Commonwealth advances to the States for housing purposes. Information on borrowings by State semi-government and local authorities is also included in Chapter III.

The table below summarises the funds available to the States for revenue and capital purposes from Commonwealth payments and Loan Council borrowing programmes for the years 1969-70 to 1971-72 (estimated). Further details, including figures for earlier years, are given in subsequent Chapters and in Appendices.

TABLE 1—COMMONWEALTH PAYMENTS TO OR FOR THE STATES AND LOAN COUNCIL BORROWING PROGRAMMES

	1969-70		1970-71		1971-72 (Estimate)

* On preceding year.

(a) Includes debt charges assistance of \$11.5 million in 1970-71 and \$23.0 million in 1971-72.

(b) Those authorities borrowing more than \$300,000 in a financial year.

(c) Those authorities borrowing \$300,000 or less in a financial year. From 1962-63 the Loan Council has not set an overall limit on borrowing by these authorities.

(d) Assumed to be the same as in the previous year.

CHAPTER II—THE GENERAL REVENUE GRANTS ARRANGEMENTS

Grants for general revenue purposes are, as the name implies, subject to no conditions as to the purpose for which they may be spent. In one form or another, they have been paid by the Commonwealth to the States since Federation. Some of the history of these grants, and background to the present arrangements, is given in Appendix II. This Chapter outlines the present basis of the general revenue grants.

In recent years three main types of grants have been paid to the States for general revenue purposes. First, there are the financial assistance grants paid to every State. Secondly, there are the special grants paid on the recommendation of the Commonwealth Grants Commission. Thirdly, special revenue assistance has been provided in some years in addition to the financial assistance and special grants. These three types of payments are discussed below in turn.

THE FINANCIAL ASSISTANCE GRANTS

1959–60 to 1964–65

The financial assistance grants, which were instituted under arrangements agreed at a Premiers' Conference in June 1959, replaced the tax reimbursement grants and supplementary grants that had been paid to the States under earlier arrangements. The new arrangements provided for the grants to be determined by a formula under which the grant paid to each State in each financial year was calculated by taking the grant paid to it in the previous year and increasing that grant in proportion to the increase in the preceding financial year in both the State's own population and in the level of average wages for Australia as a whole—increases in population and average wages being the two main factors affecting State current expenditure. In addition, to assist the States to improve the standard and range of their services, a 'betterment factor' was introduced equal to 10 per cent of the increase in average wages; for example, an increase of 4 per cent in average wages was raised to 4.4 per cent. Subject to certain modifications to the grants in 1961–62 (*see* Appendix II), this formula determined the financial assistance grant payable to each State in each of the years 1960–61 to 1964–65 inclusive.

1965–66 to 1969–70

The 1959 grants arrangements were discussed at Premiers' Conferences in April and June of 1965 and the decisions reached at the June Conference were embodied in the *States Grants Act 1965*. The main change under these arrangements was that the betterment factor was fixed at 1.2 per cent per annum regardless of the

size of the increase in average wages. As a result of this change the effective size of the betterment factor over the five years 1965-66 to 1969-70 was on average approximately double what it would have been if the previous arrangements had continued unaltered. The increase in each State's population used to calculate the grant for each year was changed from that in the preceding financial year to that in the year ending December in the year of payment.

Mainly in recognition of Queensland's large area and relatively small population it was also decided that there would be an addition of \$2 million each year to the base on which that State's grant was calculated. In addition, to reduce the difference between the per capita grants for New South Wales and Victoria, the latter State received an addition of \$1.2 million to its 1965-66 financial assistance grants and this amount was incorporated into the base for calculating its grants for later years.

As a result of discussion at Premiers' Conferences in February and June of 1967 two alterations were made to these arrangements. First, for purposes of calculating the grants for 1966-67 and subsequent years, the increase in average wages became that for the year ending March in the year of payment, instead of that for the preceding financial year. Secondly, special revenue assistance totalling \$5 million paid to the States in 1966-67 was added into the 'base' for that year for purposes of calculating the formula grants for 1967-68 and subsequent years.

With this last qualification, the formula grant to each State in the years from 1965-66 to 1969-70 was determined by taking that State's grant for the previous year (with the addition of \$2 million each year in the case of Queensland) and:

- (a) increasing it by the percentage change in the population of that State during the year ending 31 December in the year of payment;
- (b) increasing the amount so obtained by the percentage increase in average wages for Australia as a whole for the year ending 31 March in the year of payment (except for 1965-66, when the increase was for the previous financial year); and
- (c) increasing this amount by the betterment factor of 1.2 per cent.

Following discussions at the June 1968 Premiers' Conference, Western Australia ceased to receive special grants on the recommendation of the Commonwealth Grants Commission after 1967-68 and was paid additional financial assistance grants of \$15.5 million in 1968-69 and 1969-70 in lieu thereof.

NEW REVENUE ASSISTANCE ARRANGEMENTS

The 1970 Premiers' Conferences

The 1965 grants arrangements were discussed at Premiers' Conferences in February and June 1970. Prior to the February Conference the six State Premiers presented a joint statement entitled 'The Financial Relationship of the Commonwealth and the States' in which they requested that Commonwealth and State Treasury officers be instructed to devise a scheme to give the States access to income tax 'broadly along the lines of the system presently operating in Canada, but adapted to Australian circumstances and to the recognised needs of the less populous States'. Details of the discussions at the Conferences are given in Appendix II.

At these Conferences the Prime Minister indicated that, while the Commonwealth did not accept re-entry of the States to the income tax field, it did accept that there was a need for a significant increase in revenue assistance. The Commonwealth offered improvements in the arrangements estimated to render the rate of growth in such assistance between $2\frac{1}{2}$ and 3 per cent per annum faster than if the previous arrangements had continued unchanged. As the grants under the previous arrangements had been increasing at a faster rate than gross national product, this represented a most significant improvement. The improvement has been effected in four main ways.

First, while retaining the basic elements in the formula used to determine each year's grants as set out in the preceding section, the betterment factor has been increased from 1.2 per cent to 1.8 per cent for purposes of determining the grants for 1971-72 and subsequent years.

Secondly, an addition of \$40 million was made to the 1970-71 grants calculated under the existing formula and this amount has been incorporated in the base used to determine the grants for 1971-72 and subsequent years.

Thirdly, new interest-free capital grants are being made to the States each year in lieu of portion of moneys previously obtained by the States from borrowings. Over the five years 1970-71 to 1974-75 it is estimated that these grants will relieve the States of debt charges of about \$150 million which they would otherwise have had to pay, thus freeing State funds for other purposes. Further details of these grants are given in the following Chapter.

Fourthly, new grants are being made to the States in each of the five years of the arrangements equal to the debt charges payable on an increasing proportion of a specified parcel of State debt totalling \$1,000 million. Further details of these grants, which will total nearly \$173 million over the five year period, are given in Chapter IV.

In addition to the foregoing, further grants are being paid to four States in each of the five years of the arrangements, namely:

- Queensland is continuing to receive an annual addition of \$2 million to the base on which its formula grant is calculated, to improve its share of the grants. The resultant addition to the State's grants over the five years is estimated at about \$38 million.
- Western Australia is receiving grants which started at \$12.5 million in 1970-71 and which are being reduced by \$3 million per annum in each of the remaining four years of the arrangements. These grants are in lieu of the annual special grant previously received on the recommendation of the Commonwealth Grants Commission and the progressive reduction is being made because of the relative improvement in the State's revenue position following its withdrawal from claimancy.
- New South Wales and Victoria are receiving new annual grants, equal to \$2 per head of their respective populations at 31 December each year, estimated to total about \$48 million and \$37 million respectively over the five year period: those States argued at the June 1970 Premiers' Conference that the absolute difference between their per capita grants and those of the other States was becoming larger year by year.

As to this last point, at the June 1970 Conference the Prime Minister stated that, if any of the four less populous States considered that the additional per capita grants to New South Wales and Victoria would adversely affect their ability to provide services of a standard comparable with the services provided in those two States, it would be open for them to make an application to the Grants Commission for a special grant in addition to their share of the financial assistance grants: under the previous arrangements the Commonwealth had indicated that it expected each of the four non-claimant States not to avail themselves of special grants for the period of the arrangements. South Australia applied for a special grant early in 1970-71 (*see below* under 'The Special Grants').

At the June 1970 Premiers' Conference the Prime Minister also suggested that it might be helpful for the Grants Commission to be given the additional task of investigating and recommending on the distribution of the general revenue grants between all the States for purposes of the quinquennial reviews of the arrangements. The States did not comment on this suggestion at the Conference.

Subsequent to the June 1970 Premiers' Conference, the Commonwealth agreed to transfer \$10 million of Tasmania's special grant to the State's financial assistance grant (*see below* under 'The Special Grants').

These arrangements for the payment of general revenue grants were agreed to by the Commonwealth on the basis that there were no significant changes in the existing division of financial responsibilities between the Commonwealth and the States during the period of the arrangements, that the distribution of tax resources remained unchanged and that the States and their authorities continued to pay pay-roll tax. The arrangements were embodied in the *States Grants Act 1970*, which repealed the *States Grants Act 1965-1968*.

Developments Following the June 1970 Premiers' Conference

Following the settling of the new grants arrangements at the June 1970 Premiers' Conference there were four main developments in 1970-71 affecting the arrangements:

- (a) The constitutional validity of Commonwealth pay-roll tax as it applied to State Governments was challenged in the High Court by Victoria.
- (b) Duty ceased to be levied on receipts after 30 September 1970 and the Commonwealth agreed to compensate the States for the resultant loss of revenue.
- (c) In recognition of budgetary difficulties faced by the States as a result of abnormally large increases in wage costs incurred after their 1970-71 budgets had been brought down, the Commonwealth agreed to provide special revenue assistance of \$43 million in 1970-71.
- (d) The Commonwealth agreed to transfer pay-roll tax to the States as from a date to be agreed in 1971-72.

These developments are discussed in more detail below.

Legal Challenge to Pay-Roll Tax

In the Victorian Budget for 1970-71 no appropriation was made to meet Commonwealth pay-roll tax and, on 6 October 1970, the State Government took out a writ in the High Court challenging the constitutional validity of the *Pay-roll Tax Assessment Act 1941-1969* as it applied to the State Government. On 26 November 1970 South Australia intervened to support Victoria's challenge.

In a statement in Parliament on 30 September 1970 the Prime Minister said that, as the revenue grants arrangements were conditional on the States and their authorities continuing to pay pay-roll tax, the Commonwealth could not accept the position taken by the Victorian Government and would consider what course of action it should take in order to see that the Commonwealth Budget was not impaired. On 10 May 1971 (judgment in the case not having been delivered by

that time), the *States Grants Bill* 1971 was introduced into Parliament to provide against the various possible situations that could be envisaged at that time. The Bill authorised, inter alia, deductions to be made from the grants otherwise payable to a State under the *States Grants Act* 1970 in the event that a State or its authorities failed to pay pay-roll tax to the Commonwealth. The Bill also authorised the Commonwealth Statistician, in calculating the increase in average wages for purposes of the grants formula, to take account of wages and employees not included in pay-roll tax returns where this occurred because an employer failed to lodge returns, as the Victorian Government and some of its authorities had done during 1970–71. The Bill was passed by the Parliament without amendment.

On 14 May 1971 the High Court unanimously ruled that the *Pay-roll Tax Assessment Act* 1941–1969 was valid in its application to State Governments.

On the understanding that the arrears of pay-roll tax payable to the Commonwealth by Victoria would be paid by the State as soon as appropriation authority could be obtained following the reconvening of the State Parliament, no deductions from the grants payable to any State in 1970–71 were made under the *States Grants Act* 1970–1971.

Cessation of Receipts Duty

At the February 1970 Premiers' Conference the Premiers asked that, in the light of recent decisions by the High Court invalidating State receipts duty in its application to certain types of receipts, the Commonwealth confirm an undertaking given at a Premiers' Conference held in November 1969 that, in the event of the receipts duty being found invalid in some or all respects, the Commonwealth would introduce legislation, to operate retrospectively to 18 November 1969, to impose a like tax for the benefit of the States. The Premiers also asked that the Commonwealth legislation should have continuing operation beyond 30 June 1970.

The Prime Minister agreed to the Premiers' requests on the basis that the Commonwealth legislation would apply only to business receipts. Commonwealth legislation was accordingly introduced in the latter part of 1969–70 but was rejected by the Senate.

At the June 1970 Premiers' Conference, and in the Budget Speech on 18 August, it was stated that the Commonwealth proposed to re-introduce the receipts duty legislation during the Budget session of Parliament. On 1 October the Prime Minister announced that the legislation would be limited to imposing a duty on moneys received during the period 18 November 1969 to 30 September 1970, and that the Commonwealth would make good the reasonable losses of State revenue thereafter resulting from the termination of the legislation on 30 September.

At a Premiers' Conference on 8 October 1970 it was agreed that receipts duty would not be imposed after 30 September 1970 even in those areas where the States were legally able to do so, and that the whole of the resultant loss of revenue to the States in 1970-71 would be made good by way of additional Commonwealth grants. In addition, Queensland would receive an additional grant to allow for the fact that in the first quarter of 1970-71 the Queensland rate of duty was only 0.02 per cent compared to 0.1 per cent in all other States. The Commonwealth also agreed that, for 1971-72 and subsequent years, the amounts of receipts duty which it was estimated would have been collected by the States in 1970-71 had it been a 'normal' year would be added to the base used in determining the financial assistance grants payable under the grants formula. By this means the Commonwealth in effect provided for the continued payment to the States of compensation for loss of receipts duty revenue.

Commonwealth legislation imposing duty on business receipts up to 30 September 1970 was introduced and passed in November 1970. The *States Grants Act 1971*, referred to in the preceding section, was passed in May 1971 and embodied the receipts duty compensation arrangements. For purposes of the Act, estimates of receipts duty that would have been collected in the whole of 1970-71 had it been a 'normal' year, and in the last three-quarters of the year had Commonwealth and State legislation continued in operation, were agreed to in discussions between Commonwealth and State Treasury officials. The figures are shown below in the section entitled 'Calculation of Financial Assistance Grants for 1970-71 and 1971-72 (estimated)'.

Transfer of Pay-Roll Tax to States

At the June 1970 Premiers' Conference the Commonwealth offered to examine with the States any proposals put forward by them for a new growth tax. No such proposals were put forward. However, at a Premiers' Conference in April 1971 (the main purpose of which was to discuss short term budgetary difficulties the States were facing—see below under 'Other General Revenue Assistance') the Prime Minister informed the States that the Commonwealth had under examination alternative means by which the States might be given access to a new growth tax.

At a Premiers' Conference in June 1971 the Commonwealth agreed to transfer pay-roll tax to the States on the basis that, subject to certain qualifications noted below, the resulting losses to the Commonwealth budget, and gains to the States, would be offset by reductions in the financial assistance grants. In making this

offer, the Prime Minister pointed out that the constitutional position debarred the States from imposing virtually any form of sales taxes. He also stated that, in the Commonwealth's view, it would not be advisable to re-open the field of personal income tax to the States. The Prime Minister said that pay-roll tax therefore appeared to be the sole remaining practicable possibility. While the Commonwealth did not regard this as an ideal tax, it was broadly-based, grew almost directly in line with the economy, was relatively simple to administer and offered 'some prospect for raising additional revenue should States wish to use it for that purpose'.

The Prime Minister indicated that the transfer could only be effected if all the States agreed to take over the tax and to do so on a common date. He said that the Commonwealth would continue to operate the export incentive scheme so as to give exporters the same benefits, based on the pay-roll tax rate of 2.5 per cent, as they enjoyed under the existing scheme. The Commonwealth would continue to impose its own tax in the Territories at the existing rate of 2.5 per cent, with the rate being subject to review in the light of any changes the States might make in their individual rates of tax.

The Premiers re-affirmed their previously expressed views that the States needed access to a new area of growth taxation to assist them in financing improvements in the services which State Governments provide. They indicated that, while some of them would prefer that the States be given access to income tax, they accepted that pay-roll tax would constitute a useful addition to their resources for revenue-raising purposes. At the same time, they also said that, due to the unavoidable full year costs of the abnormally high wage and salary awards granted to State government employees in 1970-71, they would still find it very difficult to cope with their prospective 1971-72 budgetary situations.

After discussion, it was agreed that the tax would be transferred on the basis that the deductions from the States' financial assistance grants in 1971-72 would be less than the amount of pay-roll tax receivable by them (at the existing 2.5 per cent rate) by:—

- (a) An amount of \$20 million to be distributed between the States in proportion to pay-roll tax collections in 1971-72 at the rate of 2.5 per cent and a further amount, estimated at the time of the Conference at \$2.7 million, to be distributed between the four less populous States so as to bring their allocations to what they would have been if the amount of \$20 million had been distributed in proportion to the financial assistance

grants. In addition to the amount, estimated at the time of the Conference at \$22.7 million, the Commonwealth agreed that it would provide special revenue assistance of \$40 million in 1971-72 in the form of a non-recurring grant (*see* section on 'Other General Revenue Assistance' below).

- (b) An amount equal to the estimated pay-roll tax payable in respect of non-business activities of local authorities in 1971-72 subsequent to the date of transfer of the tax.
- (c) An amount equal to the administrative expenditure incurred by the States in 1971-72 as a result of their imposing pay-roll tax.

For 1972-73 and subsequent years, it was agreed that the deductions from the States grants would be effected by reducing the 1971-72 base used to determine the formula grants for those years. The deductions to the 1971-72 base would, however, be less than the amount of the pay-roll tax receivable³ in 1971-72 from a full year's collections at the tax rate of 2.5 per cent by:—

- (a) The amount, estimated at the time of the Premiers' Conference at \$22.7 million, by which the States would gain in 1971-72, thus ensuring that this amount would continue and escalate in future years.
- (b) An amount equal to the estimated tax payable in respect of non-business activities of local authorities in the whole of 1971-72. In this way, the Commonwealth would, in effect, continue to meet the cost of exemption in future years by way of higher financial assistance grants to State Governments than would have been paid if the authorities were not exempted.
- (c) An amount of \$3 million, this being a rough allowance to take account of the probability that revenues from pay-roll tax would grow a little more slowly than the financial assistance grants the States would be losing would have done.
- (d) An amount equal to the administration expenditure that would have been incurred by the States in 1971-72 if they had imposed pay-roll tax for the whole of the year.

Details of the estimated amounts involved are given in the section below on 'Calculation of Financial Assistance Grants for 1970-71 and 1971-72 (estimated)'.

After the June 1971 Conference, it was announced that the States had agreed among themselves to increase the rate of tax from 2.5 per cent to 3.5 per cent as from the date of transfer. At the time this document was prepared it was expected that the Commonwealth and the States would legislate to transfer the tax with effect as from 1 September 1971.

Commonwealth legislation to amend the pay-roll tax legislation and the *States Grants Act 1970-1971* will be introduced in the Budget Session of Parliament.

Calculation of Financial Assistance Grants for 1970-71 and 1971-72 (estimated)

The following tables show details of the calculation of the financial assistance grants for 1970-71 and 1971-72 (estimated).

TABLE 2—CALCULATION OF FINANCIAL ASSISTANCE GRANTS FOR 1970-71

\$'000

	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
'Base' Grants(a) ..	373,908	280,008	178,522	125,706	123,335	46,340	1,127,819
Plus Additions under Formula(b)	50,420	36,824	23,808	16,774	18,690	5,763	152,279
Plus Additional Grants(c)	13,259	9,900	6,322	4,452	4,438	1,628	40,000
Formula Grants ..	437,587	326,732	208,652	146,932	146,463	53,731	1,320,098
Plus Additional Grants to Particular States ..	(d)9,248	(d)6,962	(e)12,500	(f)10,000	38,709
Plus Receipts Duty Compensation Grants ..	24,000	17,330	8,020	4,670	4,350	1,340	59,710
Total Financial Assistance Grants	470,835	351,024	216,672	151,602	163,313	65,071	1,418,518

(a) Financial assistance grants paid in 1969-70 under the *States Grants Act 1965-1968* other than the additional grant of \$15.5 million paid to Western Australia in lieu of its previous special grant, plus \$2 million in the case of Queensland.

(b) Due to population increases in each State in the year ended 31 December 1970 (the weighted average of these increases was 2.09 per cent), to an increase in average wages in Australia as a whole in the year ending March 1971 of 9.86 per cent, and to the betterment factor of 1.2 per cent.

(c) Additional grants provided as part of the revised revenue assistance arrangements settled at the June 1970 Premiers' Conference.

(d) Equal to \$2 per head of these States' populations at 31 December 1970.

(e) Additional grant reduced from the \$15.5 million paid in 1968-69 and 1969-70 in lieu of the special grant previously received by the State.

(f) Transferred from the States' special grant.

TABLE 3—CALCULATION OF FINANCIAL ASSISTANCE GRANTS FOR 1971-72 (ESTIMATED)

\$'000

	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
'Base' Grants—							
1970-71 Formula Grants(a) ..	437,587	326,732	208,652	146,932	146,463	53,731	1,320,098
Additions	2,000	(b)10,000	12,000

Total Base Grants ..	473,587	352,732	221,552	153,932	152,963	65,731	1,420,498
Plus Additions under Formula(d)	65,277	47,440	30,207	21,000	23,646	8,369	195,938
Plus Additional Grants to Particular States	(e)9,440	(e)7,085	(f)9,500	..	26,025
SUB-TOTAL	548,304	407,257	251,759	174,932	186,109	74,100	1,642,461
Less estimate of pay-roll tax at 2.5 per cent and on present assessment provisions on wages and salaries paid in the period 1.9.71 to 31.5.72 (g) (h)	106,500	75,500	28,200	21,200	20,400	7,200	259,000
Plus estimate of pay-roll tax at 2.5 per cent on 'non-business' wages and salaries of local authorities in the period 1.9.71 to 31.5.72 (g) (h)	2,300	1,400	1,400	200	500	144	5,944
Plus administration costs of pay-roll tax (g)	240	200	55	45	35	20	595
Plus share of \$22.4 million (i) ..	8,225	5,833	3,065	2,130	2,266	902	22,421
TOTAL FINANCIAL ASSISTANCE GRANTS (j) ..	452,600	339,200	228,100	156,100	168,500	68,000	1,412,500

(a) See previous table for derivation.

(b) Transferred from the State's special grant in 1970-71.

(c) Estimates of duty that would have been collected in the whole of 1970-71, had it been a 'normal' year. Amounts are those set down in the *States Grants Act 1970-1971*.

(d) Estimated by assuming that the increase in each State's population in the year ending December 1971 is the same as in the previous year and that the increase in average wages in Australia as a whole in the year ending March 1971 is 9.5 per cent. The betterment factor is 1.8 per cent.

(e) Equal to \$2 per capita of the States' estimated populations at 31 December 1971.

(f) Additional grant reduced from the \$12.5 million paid in 1970-71—see footnote (e) to Table 2.

(g) Approximate estimates only. Figures relate to payments of pay-roll tax in the States only, i.e. excluding the Australian Capital Territory and the Northern Territory.

(h) The bulk of pay-roll tax is paid in the month following payment of the wages and salaries to which it relates. These figures therefore represent estimated collections up to 30 June 1972.

(i) For method of calculation see text above. This amount was estimated at \$22.7 million at the time of the June 1971 Premiers' Conference.

(j) Calculated on figures shown above and then rounded to nearest \$100,000.

The following table shows the financial assistance grants paid to each State from 1959-60, including the grants estimated to be payable in 1971-72, on the assumptions set out in footnote (d) to the previous table and other assumptions incorporated in that table. Annual payments of tax reimbursement and supplementary grants prior to 1959-60 are given in Table 46 following Appendix II.

TABLE 4—FINANCIAL ASSISTANCE GRANTS

\$'000

	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
1959-60 ..	166,900	121,250	72,750	55,350	50,924	21,826	489,000
1960-61 ..	183,977	134,743	79,901	61,454	55,954	23,960	539,989
1961-62 ..	198,498	146,029	87,460	66,451	60,171	25,671	584,280
1962-63 ..	206,642	152,267	91,083	69,552	62,480	26,616	608,640
1963-64 ..	215,712	159,482	94,821	72,729	65,597	27,626	635,967
1964-65 ..	230,537	171,750	101,111	78,155	70,498	29,297	681,349
1965-66 ..	255,001	191,922	(a)113,356	86,467	78,474	32,131	757,351
1966-67 ..	276,794	208,790	(a)125,514	94,346	86,396	34,773	(b)826,613
1967-68 ..	302,827	228,254	(a)139,601	102,738	96,152	37,968	907,539
1968-69 ..	333,393	250,563	(a)155,963	112,768	(c)123,796	41,710	1,018,193
1969-70 ..	373,908	280,005	(a)176,522	125,706	(c)138,835	46,340	1,141,319
1970-71(d) ..	(e)470,835	(e)351,024	(a)216,672	151,602	(c)163,313	(f) 65,071	1,418,518
1971-72(d)(g)(est.)	(e)452,600	(e)339,200	(a)228,100	156,100	(c)168,500	68,000	1,412,500

(a) Includes additional assistance as a result of the addition of \$2 million to the base on which Queensland's grant for each year is calculated.

(b) Includes special assistance of \$5 million paid in 1966-67 and subsequently incorporated into the base for purposes of determining grants for 1967-68 and later years.

(c) Includes \$15.5 million to Western Australia in lieu of a special grant in 1968-69 and 1969-70, \$12.5 million in 1970-71 and \$9.5 million in 1971-72.

(d) Includes receipts duty compensation grants.

(e) Includes additional grants of \$2 per capita to New South Wales and Victoria.

(f) Includes \$10 million transferred from Tasmania's special grant for 1970-71.

(g) After deductions in accordance with the arrangements for transferring pay-roll tax to the States.

It will be noted from this table that, under the arrangements proposed, New South Wales and Victoria are estimated to receive in 1971-72 less by way of financial assistance grants than they received in 1970-71, whereas the other States will receive more. The reason for this is to be found in the fact that New South Wales and Victoria will derive relatively more revenue from the transfer of the pay-roll tax than the less populous States, and the arrangements for transfer implicitly take account of this fact.

THE SPECIAL GRANTS

Before the establishment of the Commonwealth Grants Commission in 1933, grants comparable with what are now called special grants were made to South Australia, Western Australia and Tasmania (*see* Appendix II); special grants were paid to these three States on the recommendation of the Commission from 1934-35 to 1958-59, when South Australia ceased to apply. Western Australia withdrew from the special grants system as from 1968-69.

The Grants Commission, which was established under the *Commonwealth Grants Commission Act* 1933, consists of three members who are appointed by the Governor-General for terms not exceeding three years at a time. The members of the Commission serve on a part-time basis and are assisted by a full-time staff. The present members are Sir Leslie Melville, K.B.E. (Chairman), Mr H. J. Goodes, C.B.E., and Mr W. R. Lane.

During the initial period of its work the Commission considered 'compensation for disabilities arising from federation' as a possible basis for its recommendations. It considered also the basis of 'financial need'. In its Third Report (1936), the Commission finally chose the principle of financial need, which was expressed in the following terms:—

'Special grants are justified when a State through financial stress from any cause is unable efficiently to discharge its functions as a member of the federation and should be determined by the amount of help found necessary to make it possible for that State by reasonable effort to function at a standard not appreciably below that of other States.'

In arriving at its recommendations, the Commission each year makes a detailed comparison between the budget results and standards of effort and of services provided in the claimant State and those in the 'standard' States. Prior to 1959-60 the Commission used a standard derived from the experience of New South Wales, Victoria and Queensland; from 1959-60 the standard States have been New South Wales and Victoria.

Since 1949 each recommendation by the Commission for payment of a special grant has consisted of two parts. One part is based on an estimate of the claimant State's financial need in the current financial year, and is treated as an advance payment subject to adjustment two years later when the Commission has compared in detail the audited budget results and standards of effort and of services provided in that year for both the claimant State and the standard States. The other part represents the final adjustment to the advance payment made two years earlier and is now known as the completion payment.

Under the 1965 grants arrangements the Commonwealth indicated that it expected each of the four non-claimant States not to avail themselves of special grants for the period of the arrangements. However, at the June 1970 Premiers' Conference the Prime Minister said that all of the four less populous States were free to apply for special grants and, following this statement, South Australia again applied for a special grant early in July 1970.

Tasmania has continued to apply for special grants and, following a request by the Premier of Tasmania made subsequent to the June 1970 Premiers' Conference that part of the special grant recommended by the Grants Commission for payment to Tasmania in 1970-71 be treated instead as a permanent addition to the financial assistance grant to that State, the Commonwealth agreed to transfer an amount of \$10 million from the advance special grant of \$22 million that would otherwise have been payable to Tasmania in that year. The \$10 million will form part of the base for purposes of calculating Tasmania's financial assistance grants for 1971-72 and subsequent years. This arrangement did not affect the total of the

general revenue grants paid to Tasmania in 1970-71, nor will it do so in 1971-72 or later years. That total will continue to be determined, in effect, by the special grant recommended each year by the Grants Commission.

In 1970-71 special grants totalling \$18.68 million were paid, consisting of advance payments of \$5.0 million to South Australia and \$12.0 million to Tasmania and a completion payment to Tasmania of \$1.68 million in respect of 1968-69. The grants were authorised by the *States Grants (Special Assistance) Act 1970*.

For 1971-72 the Commission has recommended advance payments of \$7.0 million and \$11.0 million to South Australia and Tasmania respectively and a negative completion payment to the latter State in respect of 1969-70 of \$3.2 million. The Government has accepted these recommendations.

The special grants paid in each year since 1910-11 are shown in Table 47 following Appendix II. Table 5 below shows the *final* amount of special grants paid *in respect of* each of the years 1959-60 to 1969-70 inclusive—that is, the advance payment paid in the year concerned and the completion payment actually paid two years later. The table also shows the advance payments for 1970-71 and 1971-72.

TABLE 5—SPECIAL GRANTS
\$'000

	South Australia			Western Australia			Tasmania		
	Advance Payment	Completion Payment ^(a)	Total	Advance Payment	Completion Payment ^(a)	Total	Advance Payment	Completion Payment ^(a)	Total

1971-72 ..	7,000	^(c)	^(c)	11,000	^(c)	^(c)

^(a) Actually paid two years subsequent to the year shown.

^(b) No completion payment made—see page 97 below.

^(c) Not yet determined—see explanation in text above of the Commission's two-part system.

^(d) Grant recommended by the Commission was \$22 million of which \$10 million was transferred to Tasmania's financial assistance grant for 1970-71. See text above.

OTHER GENERAL REVENUE ASSISTANCE

From time to time the Commonwealth has provided general revenue assistance to the States additional to that payable under the financial assistance grants arrangements or by way of special grants recommended by the Grants Commission. Between 1949-50 and 1958-59, for instance, the Commonwealth made ad hoc grants to each State to supplement the amount yielded by the formula then operating. (For further details see Appendix II and Table 46). Some of the additional assistance grants paid in the years 1957-58, 1961-62, 1962-63 and 1963-64 were also available for use by the States for general revenue purposes. Table 42 in Appendix I shows the amounts of additional assistance grants in those years identified as having been allocated by the States, on the one hand for general revenue purposes and on the other hand for expenditure on capital works. Details of the grants paid in each of the years concerned are given in 'Commonwealth Payments to or for the States, 1967-68'.

In 1966-67 and 1967-68 amounts of \$10.7 million and \$14 million respectively were paid as special revenue assistance to States affected by drought. In 1966-67 the Commonwealth also provided special assistance of \$5 million which was subsequently incorporated into the base used in calculating the formula grants for later years and is therefore included in Table 4 above. In 1968-69, \$14 million was paid in recognition of budgetary difficulties being experienced by the States. For further details of these payments in the years 1966-67, 1967-68 and 1968-69 see page 18 of 'Commonwealth Payments to or for the States, 1969-70'.

In 1969-70 special assistance of \$26 million was paid, of which \$10 million was a special repayable advance to Victoria made on 30 June 1970 to help the State finance its revenue deficit for that year. This advance bears interest at 6.5 per cent, being the rate of interest on short-term bonds offered in the May 1970 cash loan. No interest was payable on the loan in 1970-71. Interest is payable semi-annually on 31 December and 30 June in each of the subsequent four years on the reducing balance of the loan. The advance is repayable over five years by annual instalments of \$2 million on 30 June each year with the provisos, first, that Victoria undertakes to repay more than \$2 million in any year if its budgetary position permits; and secondly, that the Commonwealth will agree to postponement of an annual instalment if it is satisfied that the Victorian budgetary position in the year concerned does not permit repayment to be made without deficit financing. This latter proviso, however, does not affect the requirement that the whole of the loan be repaid by 30 June 1975. In June 1971, the Treasurer agreed to a request by the State that the first repayment due on 30 June 1971

be postponed. Details of the remaining \$16 million of special assistance provided in 1969-70 are given on page 21 of 'Commonwealth Payments to or for the States, 1970-71'.

Special Assistance in 1970-71 and 1971-72

A Premiers' Conference was called by the Prime Minister in February 1971 to discuss the effects on the States' budgets of the national wage decision announced in December 1970. The States presented information showing that the cost to their budgets of that and other wage awards for State government employees brought down since their budgets was much greater than in previous years and they requested special revenue assistance to help meet those costs. The Commonwealth, while conceding that the States were facing budget difficulties, asked at that time that they examine the possibility of taking measures to cope with these financial difficulties from their own resources. However, it agreed that a further Conference would be held in April at which the States would present revised estimates for 1970-71, as well as estimates for 1971-72, in the light of any measures they may have been able to take in the interim.

Subsequent to the February Conference all the States took special action to improve their financial positions. In most but not all States this action mainly took the form of cuts in expenditure below the levels estimated in February. However, this still left the States facing substantial prospective budget deficits in 1970-71.

At the Premiers' Conference in April the Commonwealth agreed to provide the States with additional revenue assistance of \$43 million in 1970-71 on the understanding that the States used this assistance to reduce their prospective budget deficits rather than add to their expenditures. Payment of this assistance, which was distributed between the States in proportion to their financial assistance grants (other than receipts duty compensation grants), was authorised by the *States Grants Act 1971*.

At the Premiers' Conference in June 1971 the States argued that, even after taking into account additional revenue they might be able to raise from their existing taxes and charges, they would find it very difficult to cope with their prospective 1971-72 budget deficits which, they said, were abnormally high due largely to the unavoidable 'full-year' costs of the abnormal wage and salary awards granted in 1970-71.

After discussion, the Commonwealth agreed to provide special revenue assistance in 1971-72 in the form of a non-recurring grant of \$40 million to be distributed between the States in proportion to their financial assistance grants. The Commonwealth also agreed, as part of the arrangements to transfer pay-roll tax to the States, to provide additional revenue assistance in 1971-72, estimated at the time of the Conference at \$22.7 million but now estimated at \$22.4 million (*see* section on 'The Financial Assistance Grants' above).

CHAPTER III—GENERAL PURPOSE CAPITAL FUNDS

The most important source of general purpose capital funds available to State Governments is the annual borrowing programme approved by the Loan Council for State works and housing. As explained below, the Commonwealth undertakes, subject to certain conditions, to assist in financing this programme as well as providing assistance for the various specific types of capital expenditure by the States described in Chapter IV. Annual borrowing programmes are also approved by the Loan Council for larger State semi-government and local authorities but there is presently no overall limit on borrowings by smaller State authorities (those borrowing \$300,000 or less in a financial year).

The Loan Council, which is constituted under the 1927 Financial Agreement between the Commonwealth and the States, is composed of representatives of the Commonwealth and each State Government. Under the terms of the Financial Agreement borrowings by the Commonwealth and State Governments are, with certain exceptions, subject to approval by the Loan Council. Accordingly, the Loan Council determines the annual borrowing programmes of the Commonwealth and the States, together with the terms and conditions on which loans to finance these programmes are to be raised. Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth and, with minor exceptions, the State Governments and for all conversions, renewals, redemptions and consolidations of the public debts of the Commonwealth and of the States.

The borrowing programmes approved for 1971-72 at the June 1971 Loan Council meeting are compared in Table 1 with the programmes for 1970-71 and 1969-70. Further details of the programmes are given in the tables contained in Appendix III. On the assumption that the approved 1971-72 borrowing programmes for larger State authorities are achieved and that borrowings by smaller authorities in 1971-72 are the same as the borrowings achieved in 1970-71, total capital funds available to State Governments and their authorities from Loan Council borrowing programmes and from the specific purpose capital payments set out in Chapter IV are estimated to be \$1,798 million in 1971-72. This would mean an increase of \$105 million, or 6.2 per cent, on the funds available from these sources in 1970-71.

STATE WORKS AND HOUSING PROGRAMMES

The annual borrowing programme for State works and housing may be treated as comprising two main elements—the interest-free capital grant provided by the Commonwealth and the proceeds of public borrowings arranged by the Commonwealth on behalf of the States or advanced from other Commonwealth sources. The total programme approved for 1971–72 is \$860 million, an increase of \$37 million or 4.5 per cent on the 1970–71 programme.

Under successive Commonwealth/State Housing Agreements operative between 1 July 1956 and 30 June 1971, such amounts as were nominated for housing by each State Government out of its total approved borrowing programme became, formally, the borrowing programme of the Commonwealth (or part thereof) and were provided by the Commonwealth as advances, repayable over fifty-three years, at concessional rates of interest. Under new arrangements applying as from 1971–72 the States will continue to determine the amount of their annual borrowing programmes to be allocated to housing. However, these amounts will no longer form part of the borrowing programme of the Commonwealth and, in lieu of the interest concession on such allocations, the Commonwealth will provide direct grants to help the States continue to provide housing for lower income groups. Further details of the new arrangements are given on page 54.

Capital Grant

Commencing in 1970–71, the Commonwealth is providing each year an interest-free capital grant which is designed to help the States finance capital works from which debt charges are not normally recovered, such as schools, police buildings, and the like. The grant is, however, subject to no specific conditions as to the purposes for which it may be expended. As it replaces amounts which the States would otherwise have obtained as loans, there is a substantial saving to the States in debt charges. Over the five years 1970–71 to 1974–75 it is estimated that the grants relieve the States of debt charges of about \$150 million. There was no saving to the States in 1970–71 but the estimated saving in 1971–72 is about \$12.8 million.

The capital grant in 1970–71 was \$200 million out of the total State works and housing programme of \$823 million and, in accordance with the undertaking given by the Commonwealth at the June 1970 Premiers' Conference to increase the grant in proportion to the increase in the total programme (excluding a special allocation of \$3 million for Western Australia included in the 1970–71 total) the grant in 1971–72 will be \$209.8 million of the total programme of \$860 million. It was agreed at the June 1971 Loan Council meeting that the capital

grant for 1971-72 be distributed between the States in the same proportions as the total works and housing programme: the distribution of the 1970-71 grant was in proportion to the total programmes excluding the special loan allocation for Western Australia.

The table below shows the capital grant paid to each State in 1970-71 and the amount payable in 1971-72:—

TABLE 6—CAPITAL GRANTS TO THE STATES

\$'000

	1970-71	1971-72
New South Wales	63,610	66,730
Victoria	51,020	53,520
Queensland	25,290	26,530
South Australia	27,420	28,760
Western Australia	18,680	19,600
Tasmania	13,980	14,660
Total	200,000	209,800

Financing of State Works and Housing Programmes

The approved borrowing programmes for State works and housing are financed from the proceeds of public borrowings remaining after meeting redemptions not covered by sinking fund contributions and after any allocation of such borrowings for Commonwealth purposes. When the remaining public borrowings are insufficient to finance the full amount of the State works and housing programmes approved by the Loan Council, as has been the case in all but two years since 1951-52, the Commonwealth makes up the shortfall by subscribing amounts to special loans. These special loans are made at the end of each financial year on terms and conditions similar to those offered in the final Commonwealth public loan raised in Australia during that year. The effect of this arrangement is that, where required, the Commonwealth contributes amounts from revenue to help finance the borrowing programmes for State works and housing, including now the interest-free capital grant.

In all but two years since 1951-52 the proceeds of public borrowings allocated to the States fell short of the full amount of the approved Loan Council programme for State works and housing. The assistance provided by the

Commonwealth for works and housing purposes by way of special loans in each year from 1951-52 is shown in the following table:—

TABLE 7—SPECIAL LOANS APPLIED TO STATE WORKS AND HOUSING PROGRAMMES^(a)

	Special Loans Applied to Programmes (1)	Works and Housing Programmes (2)	(1) as Percentage of (2)
	\$m	\$m	Per cent
1951-52	305,730	454,120	67
1952-53	263,060	380,364	69
1953-54	148,706	400,000	37
1954-55	98,946	360,000	27
1955-56	176,490	380,000	46
1956-57	183,771	384,000	48

1966-67	89,922	645,000	14
1967-68	192,550	677,000	28
1968-69	111,443	710,000	16
1969-70	355,000	758,000	47
1970-71	(b)199,908	823,000	24
Total	2,852,903	10,425,484	27

(a) For further details of the financing of the States' works and housing programmes, including the derivation of the amounts shown above, see Table 53 in Appendix III.

(b) In addition, the Commonwealth paid \$200 million to the States as a capital grant, of which \$116,665,000 was met from Consolidated Revenue Fund and \$83,335,000 from the proceeds of the issue of Treasury Notes.

The provision of Commonwealth assistance in financing whatever is finally agreed between the Commonwealth and the States at the Loan Council meeting as the State works and housing programme is conditional on the States agreeing to certain conditions designed to promote the raising of governmental loans to help finance the programme. On this basis the Commonwealth agreed at the June 1971 meeting of the Loan Council to support a 1971-72 borrowing programme of \$860 million (including an interest-free capital grant of \$209.8 million) in the following ways:—

- (i) to leave to the States, to the extent necessary to complete the borrowing programmes for State works and housing purposes, the whole of the proceeds derived from public loan raisings in Australia (other than the net proceeds of Drought Bonds, Treasury Note issues, and other borrowings for temporary purposes; amounts required to meet encashments of Special Bonds; and amounts applied to redemptions of public securities that cannot be financed out of the National Debt Sinking Fund);

- (ii) to arrange, to the maximum possible extent, for the redemption of maturing but unconverted State debt that cannot be met from State sinking funds; and
- (iii) to make monthly advances for the first eight months of the financial year against the State works and housing programme at an annual rate not exceeding \$650.2 million, the position then to be reviewed and a tentative determination made, not later than February 1972, of the amount of any special loan assistance the Commonwealth may provide from its own resources.

STATE AUTHORITIES

Under a 'Gentlemen's Agreement', originally entered into in 1936, the Loan Council approves an aggregate annual borrowing programme for larger State semi-government and local authorities. From 1967-68 larger authorities have been defined as those borrowing more than \$300,000 in a year. From 1962-63 no overall limit has been set on the annual borrowings by smaller State authorities (defined from 1967-68 as those borrowing \$300,000 or less in a year).

In the case of the larger authorities, it is a matter for each State to determine the allocation to individual authorities within the overall borrowing programme approved by the Loan Council for such authorities in the State. The terms and conditions of each loan raised by such authorities are subject to Loan Council approval.

Loans by smaller State authorities are also subject to the terms and conditions ruling under the Gentlemen's Agreement and it is the responsibility of the States to ensure that the smaller authorities conform with these terms and conditions.

The Commonwealth Government accepts no responsibility for ensuring the completion of the borrowing programmes approved by Loan Council for State authorities. However, the approved borrowing programmes for larger State authorities have been filled in recent years.

For 1971-72 the Loan Council has agreed to a borrowing programme for larger State authorities of \$426.7 million, which is \$27.5 million or 6.9 per cent higher than the 1970-71 programme. This includes special allocations totalling \$11.7 million, of which \$4 million and \$3 million are permanent additions to the

programmes for New South Wales and Western Australia respectively, \$3 million is a further temporary allocation for Western Australia and \$1.7 million is a temporary allocation to Tasmania to assist in financing the development of hydro-electricity production in that State.

The Loan Council also agreed at its June 1971 meeting that the policy adopted in recent years of not placing any overall limit to borrowings by smaller State authorities would be continued in 1971-72.

CHAPTER IV—SPECIFIC PURPOSE PAYMENTS

For many years the Commonwealth has provided financial assistance for certain specific types of expenditure, both current and capital, by the States. For example, assistance for expenditure on roads has been provided from 1923–24 and payments have been made under the Financial Agreement from 1927–28 in respect of interest and sinking fund charges on State debt. Further substantial assistance will be provided towards State debt charges as a result of the decisions taken at the June 1970 Premiers' Conference to provide grants to meet the debt charges on \$200 million of State debt in 1970–71 and an additional \$200 million in each of the four years 1971–72 to 1974–75, and to provide annually an interest-free capital grant to assist the States in financing their capital works programme.

In recent years there has been a considerable expansion in specific purpose assistance. Apart from the assistance provided for education, this increase has been mainly directed towards assisting the States in the provision of facilities for the development and conservation of resources.

The following sections outline the payments at present being made to the States for current and capital purposes. Appendix IV outlines some of the history of assistance for roads and universities as well as assistance provided in respect of projects completed in recent years. Tables 54 and 55 following Appendix IV classify specific purpose payments according to the nature of the payment and the type of State expenditure the payments are intended to assist.

DEBT CHARGES

Payments Under the Financial Agreement

Contributions to Interest on State Debts

Under the Financial Agreement, entered into by the Commonwealth and the States in 1927, the Commonwealth makes payments to the States expressed as a contribution towards interest payable on State debts. They are therefore treated here as a specific purpose grant, although they have some of the characteristics of a grant for general purposes. In fact, the payments superseded the general revenue grants of \$2.50 per head of the population of each State made in the period 1910–11 to 1926–27 under the *Surplus Revenue Act* 1910. (See Appendix II.)

Each year the total contribution is \$15.17 million, the amount that was payable in 1926–27 under that Act. The contribution is apportioned between the States in

the same way as the 1926-27 *per capita* grant, and is to continue for fifty-eight years from 1 July 1927 (that is, until 1985). It is distributed among the States as follows:—

TABLE 8—INTEREST PAYMENTS ON STATE DEBTS

						\$'000
New South Wales	5,834
Victoria	4,254
Queensland	2,192
South Australia	1,408
Western Australia	948
Tasmania	534
Total	<u>15,170</u>

Sinking Fund Contributions

The sinking fund contributions on State debt made by the Commonwealth under the Financial Agreement vary according to the date and nature of the borrowings. On States' debts existing at 30 June 1927 the Commonwealth is making contributions at the rate of 0.125 per cent per annum for a period of fifty-eight years, and on cash loans raised for the States since that date the Commonwealth contributes for fifty-three years at the rate of 0.25 per cent per annum. Each State is obliged to make sinking fund payments for corresponding periods at the rate of 0.25 per cent per annum of the debt, regardless of the date on which it was incurred. The main exception is in relation to debt incurred for the purpose of funding revenue deficits. In these instances, the Commonwealth makes no sinking fund contribution and the States are obliged to make contributions to the sinking fund of not less than 4 per cent per annum. However, for Treasury Bills totalling \$86 million that were issued to cover State revenue deficits accruing between July 1927 and June 1935, special arrangements were made under which the Commonwealth contributes 0.25 per cent per annum until June 1983 on the amount outstanding.

The following table shows the Commonwealth's contributions to the sinking fund on States' debts from 1964-65, including the estimated contribution in 1971-72. The interest and sinking fund payments made by the Commonwealth for the States under the Financial Agreement in each year from 1927-28 are shown in Table 56 following Appendix IV.

TABLE 9—SINKING FUND PAYMENTS UNDER THE FINANCIAL AGREEMENT

\$'000

—	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
1964-65 ..	5,662	3,937	2,109	2,193	1,616	1,129	16,646

Grants for Debt Charges

As outlined in Chapter II, the Commonwealth has undertaken to make grants to meet the debt charges on \$200 million of State debt in 1970-71 and an additional \$200 million each year from 1971-72 to 1974-75 so that, from the commencement of 1974-75, the Commonwealth will have taken over full responsibility for the debt charges on \$1,000 million of existing State debt. The grants are to meet interest and sinking fund charges on the following securities:—

	\$'000
7 per cent May 1989	50,000
6.8 per cent August 1978	38,000
6.5 per cent July 1973	203,000
6 per cent October 1991	10,000
5.9 per cent July 1977	4,000
5.4 per cent May 1987	50,000
5.4 per cent May 1990	50,000
5.25 per cent February 2004	100,000
5 per cent May 1984	200,000
5 per cent September 1985	196,000
4.5 per cent July 1986	79,000
4.5 per cent February 1987	20,000
	1,000,000

These securities carry an average interest rate of 5.5 per cent, compared with the average for all State Government securities on issue at 30 June 1970 of 5.1 per cent. The Commonwealth will also take over responsibility for the States' sinking fund contributions of 0.25 per cent per annum on these securities.

The basis for the take-over of responsibility for debt charges is to be that, as from the commencement of each year, \$200 million of debt will be notionally taken over by the Commonwealth. Special arrangements are to apply in relation to the 6.5 per cent July 1973 securities, as these will mature before

the end of the five-year period. The formal transfer of the \$1,000 million debt from the States to the Commonwealth will be effected in June 1975.

The distribution of the debt charges assistance (and hence the distribution of the debt notionally taken over) is in proportion to the total outstanding debt of each State under the Financial Agreement as at 30 June 1970.

The following table shows the amount of debt charges assistance paid in 1970-71 and payable to each State in 1971-72 under this arrangement:—

TABLE 10—GRANTS FOR STATE DEBT CHARGES, 1970-71 AND 1971-72
\$'000

	1970-71	1971-72
New South Wales	3,800	7,600
Victoria	2,783	5,566
Queensland	1,525	3,051
South Australia	1,496	2,991
Western Australia	1,106	2,211
Tasmania	795	1,590
Total	11,504	23,008

The assistance will increase by a further \$11,504,000 in each of the subsequent three years. Over the five years 1970-71 to 1974-75, the total assistance provided will amount to \$172.56 million.

EDUCATION

Universities

Commonwealth assistance to the States for the *recurrent* expenditures of universities dates from 1951-52; in 1957-58 assistance was first given for the *capital* expenditures of universities. An outline of assistance prior to 1967 is given in Appendix IV.

The Commonwealth grants to the States for universities are subject to matching conditions. Grants in respect of recurrent expenditures are made at present on the basis of \$1 Commonwealth for each \$1.85 State grant and university fees combined. Grants for capital expenditures are provided on a \$1 for \$1 basis with grants made by the States for this purpose. In each case there is an upper limit to the total amount of Commonwealth assistance to be made available during the course of a triennium.

1967-69 Triennium

After consultation with State Governments, the Commonwealth agreed in September 1966 to support a total programme of assistance to State universities in the 1967-69 triennium amounting to \$446 million, of which the Commonwealth's share was approximately \$175 million. Although the total programme was approximately \$56 million less than that recommended by the Australian Universities Commission in its Third Report, it represented \$106 million more than the programme, as amended, for the 1964-66 triennium. The *Universities (Financial Assistance) Act* 1966 therefore authorised grants of \$116.9 million for recurrent expenditure and

\$58.7 million for capital expenditure, making total grants of \$175.6 million as the Commonwealth share of the total programme for the triennium. Of that amount, \$2.9 million related to half the cost of a \$5.8 million programme administered by the Australian Universities Commission for grants to universities for special research purposes associated with the training of postgraduate students in continuation of the provision made for this purpose in the 1964-66 triennium. The provision of this assistance in the 1967-69 triennium was, however, made conditional upon the States continuing to bear half the cost of research projects in State universities recommended by the Australian Research Grants Committee. (See later section entitled *Research Grants*.)

The level of Commonwealth grants for recurrent purposes during the triennium was increased to \$123.8 million by the *Universities (Financial Assistance) Act (No. 2) 1967* which made the legislative changes necessary to give effect to the decision by the Commonwealth to support, and contribute to, higher academic salaries in universities from 1 July 1967. The *Universities (Financial Assistance) Act 1968* was enacted to make minor technical changes to the 1966 Act relating to the building programmes of certain universities. In addition to the revised triennial programme totalling \$182.5 million covered by the *Universities (Financial Assistance) Act 1966-1968*, the *Universities (Financial Assistance) Act 1967* re-appropriated amounts totalling \$701,000 for the Great Hall at the University of Queensland and for certain halls of residence and residential colleges at other universities, which had been provided, but were not taken up, in the 1964-66 triennium. The *Universities (Financial Assistance) Act 1969* made a minor change to the basis upon which the Commonwealth provides matching recurrent funds for teaching hospitals associated with universities while the *Universities (Financial Assistance) Act (No. 2) 1969* made modifications to the building programmes of several universities; these changes, however, did not affect the amount of the triennial programme.

1970-72 Triennium

In August 1969 the Commonwealth agreed to support the recommendations contained in the Fourth Report of the Australian Universities Commission for a programme of assistance to State universities in the 1970-72 triennium amounting to \$586.4 million. In consequence, the *States Grants (Universities) Act 1969* authorises grants totalling \$226.8 million for the triennium, of which \$161.2 million is for recurrent expenditure, \$61.6 million for capital expenditure and \$4 million for a programme in support of research and research training to be financed on the same basis as applied prior to the 1967-69 triennium.

The level of Commonwealth grants for recurrent purposes during the triennium was increased to \$176.3 million by the *States Grants (Universities) Act (No. 2) 1970* which gave effect to the decision by the Commonwealth to support higher

academic salaries in universities from 1 January 1970. The levels of recurrent grants were further increased to \$180.2 million to allow for a flow-on of the 1970 National Wage Case decision to academic salaries and to provide the Commonwealth's contribution towards the cost of a scheme of external studies introduced at the University of Tasmania. These variations, together with some minor capital transfers in the programmes of certain universities, were incorporated in the *States Grants (Universities) Act 1971*. The Commonwealth has also offered to meet its share of supplementary recurrent grants in the last eighteen months of the triennium towards the cost of exceptional increases in non-academic salaries and wages.

In addition to the approved triennial programme, the *States Grants (Universities) Act 1970* re-appropriated amounts totalling \$502,000 for certain student residences at State universities; these amounts had originally been approved for the 1967-69 triennium but had not been taken up.

The table below shows grants to the States for both recurrent and capital expenditures of universities from 1964-65, including estimated grants for 1971-72. Annual figures of grants prior to 1964-65 are given in Table 57 following Appendix IV.

Colleges of Advanced Education

The Report of the Committee on the Future of Tertiary Education in Australia recommended the establishment of a new type of educational institution to supplement universities and to be developed from, and around, the tertiary segments of existing technical colleges. The Report also recommended that funds for the *capital* and *recurrent* purposes of these colleges should be provided by Commonwealth and State Governments on the same matching basis as for universities.

In March 1965, the Commonwealth accepted the Committee's approach in principle and, as an interim measure, agreed to pay capital grants totalling approximately \$5 million in the remainder of the 1964-66 triennium, subject to matching by the States on a \$1 for \$1 basis.

Subsequently, the Commonwealth established the Commonwealth Advisory Committee on Advanced Education. In broad terms, the responsibilities of this Committee are to promote the balanced development of non-university tertiary institutions in Australia and to advise the Commonwealth Government on proposals emanating from the States.

1967-69 Triennium

The recommendations in the First Report (and Supplement) of the Commonwealth Advisory Committee on Advanced Education relating to the level of assistance to be provided to Colleges of Advanced Education in the three calendar years 1967-69 were accepted and incorporated in the *States Grants (Advanced Education) Act* 1966. This Act provided, inter alia, for grants by the Commonwealth, on the same matching basis as for universities, for recurrent expenditures incurred by the States in excess of the level of such expenditures in the base year 1964-65.

Following discussions at the February 1967 Premiers' Conference, the Commonwealth informed the States that it would waive the 'base year' requirement in determining the amount of recurrent grants. The *States Grants (Advanced Education) Act* 1967, which repealed the 1966 Act, gave effect to this decision and also increased the recurrent grants to be paid for Tasmanian colleges. The 1967 Act provided for total grants of \$42.3 million in the 1967-69 triennium, of which \$17.8 million was for recurrent purposes and \$24 million was for buildings and equipment to be matched on a \$1 for \$1 basis by the States. An amount of \$500,000 was made available by the Commonwealth as an unmatched grant to improve library facilities in the colleges.

The *States Grants (Advanced Education) Act (No. 3) 1967* made provision for the Commonwealth to match privately raised subscriptions applied towards residential accommodation at Colleges of Advanced Education. This Act also provided, at the request of the State Government concerned, for adjustments in the building programmes of certain colleges. The Act did not, however, affect the level of grants approved earlier in 1967 for the triennium.

During the course of the triennium, a need arose to adjust the levels of recurrent grants because of increases in academic and non-academic salaries and other costs that the States had not foreseen and that could not be met from within the then existing programme. Some re-arrangement of approved building programmes was also found necessary. Following recommendations by the Commonwealth Advisory Committee on Advanced Education and agreement by the States, the necessary legislative changes were incorporated in the *States Grants (Advanced Education) Act (No. 2) 1969* which increased the level of Commonwealth grants for recurrent purposes over the triennium to \$19.8 million.

1970-72 Triennium

In August 1969 the Commonwealth accepted the financial recommendations contained in the Second Report of the Commonwealth Advisory Committee on Advanced Education for the 1970-72 triennium. The recommended programme amounts to \$222.4 million of which the Commonwealth's share is \$93.1 million, made up of \$43.2 million and \$49.4 million for recurrent and capital grants, respectively, and \$500,000 by way of unmatched grants for library facilities. Authority for the payment of these grants is contained in the *States Grants (Advanced Education) Act 1969*.

Amending legislation was subsequently introduced to provide for supplementary recurrent grants to meet the Commonwealth's share of increased academic salaries in colleges of advanced education. At the same time the opportunity was taken to re-arrange the approved building programmes of colleges in certain States within the amount of total grants already available and to provide, for the first time, recurrent grants to an affiliated residential college. The *States Grants (Advanced Education) Act 1970* incorporates these amendments and authorises a new level of Commonwealth grants for recurrent purposes during the triennium totalling \$49 million. The Commonwealth has also offered to meet its share of supplementary recurrent grants in the last eighteen months of the triennium towards the cost of exceptional increases in non-academic salaries and wages.

The following table shows grants to the States for both recurrent and capital expenditure from 1965-66, including estimated grants in 1971-72.

Teachers Colleges

The *States Grants (Teachers Colleges) Act 1967* provided for the payment of unmatched grants for the construction and equipping of colleges for the training of teachers. The Act authorised the payment to 30 June 1970 of grants totalling \$24 million of which not more than \$8 million could be authorised for payment before 30 June 1968 and \$16 million before 30 June 1969. The provision of this assistance was subject to the understanding that the States did not reduce their own expenditure on teacher training and to the condition that at least 10 per cent of the number of places arising from the accommodation so provided—whether new or replacement and whether teaching or residential—was to be available for student teachers not bonded to State Education Departments.

The *States Grants (Teachers Colleges) Act 1970* extends the operation of the scheme for a further period of three years to 30 June 1973. The Act provides for payments to the States totalling \$30 million over that period and authorises the payment of not more than \$11 million before 30 June 1971 and not more than \$22 million before 30 June 1972.

The following table shows payments made to the States since 1967-68 and estimated payments in 1971-72:—

TABLE 13—GRANTS FOR TEACHERS COLLEGES

Pre-school Teachers Colleges

The *States Grants (Pre-school Teachers Colleges) Act 1968* provided for capital grants totalling \$2.5 million to be made available to the States over the three financial years ending 1970-71 for the purpose of increasing the physical capacity of approved pre-school teachers colleges. Because of difficulties encountered in some States in proceeding with the building programmes, the *States Grants (Pre-school Teachers Colleges) Act 1971* was enacted to extend to 31 December 1972 the period over which these grants could be made available.

The following table shows payments to the States for this purpose since 1968-69 and estimated payments in 1971-72:—

TABLE 14—GRANTS FOR PRE-SCHOOL TEACHERS COLLEGES
\$'000

Science Laboratories and Equipment in Secondary Schools

Under the *States Grants (Science Laboratories and Technical Training) Act 1964* an amount of \$9.9 million was made available to the States in 1964-65 for science laboratories and equipment in secondary schools for the purpose of improving science teaching in those schools. The *States Grants (Science Laboratories) Act 1965* provided for the payment to 30 June 1968 of a further \$29.7 million, of which not more than one-third was to be authorised for payment before 30 June 1966 and two-thirds before 30 June 1967.

Both Acts provided that, of the basic grant of \$9.9 million per annum, an amount of \$7.2 million was to be available for government schools and \$2.7 million for non-government schools; the basis of this allocation was the number of secondary school pupils enrolled in each of these two types of schools at school censuses held in August 1963. The distribution of these two component amounts between the States was related to their populations. For the financial year 1967-68, the *States Grants (Science Laboratories) Act 1967* doubled the provision for non-government schools.

The *States Grants (Science Laboratories) Act 1968* extended the operation of this scheme for a further three years to 30 June 1971 and provided for a total payment of \$37.7 million over that period. The method of dissection of the basic annual grant of \$12.6 million between government and non-government schools was the same as applied in 1967-68 and the distribution of these two component amounts among the States was based on 1966 Census population figures. The component of the basic annual grant for non-government schools was allocated between groups of these schools on the basis of 1966 secondary school enrolment figures.

The *States Grants (Science Laboratories) Act 1971* extends for four years commencing 1 July 1971 the programme of unmatched grants for the improvement of science teaching facilities in secondary schools. The Act provides for the payment of \$43.3 million, of which not more than one-quarter is authorised for payment before 30 June 1972, one-half before 30 June 1973 and three-quarters before 30 June 1974.

The allocation of the \$43.3 million between government and non-government secondary schools will be broadly on the same basis as that which applied during the triennium just ended. As a result \$26.1 million will be available to government schools and will be divided between the States in proportion to their secondary school enrolments. The non-government schools will receive \$17.2 million which will be allocated to them on the basis of assessed actual needs.

Details of the distribution of the basic annual grant are given in the following table:—

TABLE 15—DISTRIBUTION OF BASIC ANNUAL GRANT FOR SCIENCE LABORATORIES

\$'000

Technical Training—Buildings and Equipment

The *States Grants (Science Laboratories and Technical Training) Act* 1964 also provided for grants to the States in 1964-65 of \$10 million towards the building and equipment costs of technical schools or colleges. The *States Grants (Technical Training) Acts* 1965 and 1968 each provided for the payment of \$30 million to the States for this purpose over further three year periods ended 30 June 1968 and 30 June 1971, respectively. This programme has been extended for a further

three years by the *States Grants (Technical Training) Act 1971* which provides for the payment of up to \$36 million, of which not more than one-third is authorised for payment before 30 June 1972 and two-thirds before 30 June 1973.

Grants for buildings and equipment for use in technical training may be applied only to schools or colleges conducted by the States. The distribution of the basic annual grant of \$12 million between the States is based on State population as at 30 September 1970 and is as follows:—

TABLE 17—DISTRIBUTION OF BASIC ANNUAL GRANT FOR TECHNICAL TRAINING

						\$'000
New South Wales..	4,440.0
Victoria	3,343.3
Queensland	1,750.0
South Australia	1,130.0
Western Australia	956.7
Tasmania	380.0
Total	12,000.0

The following table shows actual payments to the States for this purpose from 1964-65, including estimated payments in 1971-72:—

School Libraries

Under the *States Grants (Secondary Schools Libraries) Act 1968*, grants totalling \$27 million will be made available to the States over the three years commencing 1 January 1969 to finance buildings and associated capital facilities for libraries

in government and non-government secondary schools. The Act provides that of the amount of \$27 million, not more than one-third may be authorised for payment before 31 December 1969 and two-thirds before 31 December 1970.

The allocation of the basic annual grant of \$9 million between government and non-government schools is based on the number of secondary school pupils enrolled in each of these two types of schools at school censuses in August 1967. The distribution between the States of that amount is based on State populations as at 30 June 1967. Details of the distribution of the basic annual grant are shown in the following table:—

TABLE 19—DISTRIBUTION OF BASIC ANNUAL GRANT FOR SCHOOL LIBRARIES
\$'000

—				Government Schools	Non-Government Schools	Total
New South Wales	2,473.1	854.9	3,328.0
Victoria	1,880.2	650.0	2,530.2
Queensland	977.1	337.8	1,314.9
South Australia	638.2	220.6	858.8
Western Australia	503.2	174.0	677.2
Tasmania	216.2	74.7	290.9
Total	6,688.0	2,312.0	9,000.0

In April 1971 it was announced that the Commonwealth would make an additional \$30 million available to the States over the three years commencing 1 January 1972 to finance buildings and associated capital facilities for libraries in government and non-government secondary schools.

The following table shows actual payments to the States for this purpose since 1968-69, and estimated payments in 1971-72:—

TABLE 20—PAYMENTS FOR SCHOOL LIBRARIES

Research Grants

When the Report of the Committee on the Future of Tertiary Education in Australia was presented to Parliament in March 1965, it was announced that the Commonwealth would make available \$2 million in the remainder of the 1964-66 triennium in support of research projects, selected on the basis of relative merit, to be carried out in any academic field by individuals or research teams. Where a research project was to be carried out in a State university the provision of Commonwealth assistance was conditional on an equal matching grant to the university by the State Government concerned. These proposals were incorporated in the *States Grants (Research) Act 1965*.

The Australian Research Grants Committee was established to evaluate research projects and to make recommendations to the Government concerning the amount and disposition of grants in this field.

1967-69 Triennium

In September 1966 the Commonwealth agreed to support a research programme, the allocation of which was to be recommended by the Australian Research Grants Committee, to cost \$11 million in the 1967-69 triennium provided the States continued to meet 50 per cent of the cost of projects within that programme undertaken in State universities. As some States were no longer prepared to support the Australian Research Grants Committee programme after 31 December 1966 and as there was uncertainty concerning the position of other States, the Commonwealth further indicated that, to the extent that any State did not provide its share of costs in relation to this programme, the Commonwealth would reduce, to that extent, its support for the special research programme at universities for the 1967-69 triennium as envisaged in the *Universities (Financial Assistance) Act 1966*. (See earlier section relating to *Universities*.)

The *States Grants (Research) Act 1966* made the necessary legislative changes to the 1965 Act to enable this procedure to be followed. Two States agreed to meet half the costs of both research programmes but the other States declined to contribute to the Australian Research Grants Committee programme. In the light of this the Commonwealth decided to meet the full cost of the Australian Research Grants Committee programme, on which a ceiling of \$9 million had been set for the triennium, and to leave to the States the responsibility for financing the general university research programme. Four States financed in full the general university research programme and the remaining States met at least half the cost of that programme.

1970-72 Triennium

In August 1969 the Commonwealth Government announced that it would meet the full cost of a \$12.5 million programme for the 1970-72 triennium for the Australian Research Grants Committee. The cost of the programme has subsequently increased to \$13.3 million. The Commonwealth is also making available a further \$4 million for a special programme of research and research training in State universities. (See earlier section relating to *Universities*.)

The following table shows payments to the States for the Australian Research Grants Committee programme from 1965-66, including estimated payments for 1971-72:—

(a) The State distribution is notional only; it assumes that the proportional distribution will be the same as the average for the years 1970 and 1971.

Independent Schools

The *States Grants (Independent Schools) Act 1969* authorises payments to the States, for transmission to independent schools, as a contribution towards the running costs of those schools. The Act provides for this assistance to take the form of a subsidy at the rates of \$35 per primary pupil and \$50 per secondary pupil per annum as from the beginning of 1970. Payment at these rates is being made to each school for each student enrolled for full time education at the school census date in August of each year.

The following table shows payments made to the States for this purpose in 1969-70, 1970-71 and estimated payments for 1971-72:—

HEALTH AND WELFARE AND PUBLIC SAFETY

Tuberculosis Hospitals

Under the *Tuberculosis Act* 1948 the Commonwealth reimburses the States for *maintenance* expenditures they incur in the diagnosis, treatment and control of tuberculosis, to the extent that expenditures by the States in any financial year exceed those for the year 1947-48. Under this Act the Commonwealth also reimburses the States for all *capital* expenditure approved by the Commonwealth on buildings, furnishings, equipment and plant for the diagnosis, treatment and control of tuberculosis.

Reimbursements have been made to the States for both maintenance and capital expenditures in each year from 1949-50. Up to 30 June 1971 reimbursements for maintenance expenditure totalled \$187.9 million and for capital expenditure \$36.3 million. The table below shows Commonwealth grants for maintenance and capital expenditures from 1964-65, including estimated payments in 1971-72. Annual figures of payments in years prior to 1964-65 are given in Table 58 following Appendix IV.

Mental Health Institutions

Under the *States Grants (Mental Institutions) Act* 1955 the Commonwealth undertook to provide financial assistance of up to \$20 million towards capital expenditure on mental institutions incurred by the States where the project was approved by the Commonwealth. The Commonwealth assistance was on the basis of one-third of the total expenditures by the States with a specified limit for each State.

The 1955 legislation was repealed in 1964 by the *States Grants (Mental Health Institutions) Act* which authorized assistance to the States amounting to one-third of the total expenditure incurred by them on specific projects approved by the Commonwealth in building and equipping mental health institutions in the three year period ending on 30 June 1967. The 1964 Act preserved the States' right to receive at least the amount of their entitlements under the 1955 Act.

Amendments in 1967 and 1970 to the *States Grants (Mental Institutions) Act* authorised continued assistance on the previous basis. The 1970 amendment provided for assistance up to 30 June 1973 for projects approved by the Commonwealth not later than 30 June 1972.

The following table shows payments to each State under the scheme since 1964-65, including estimated payments in 1971-72. Details of annual payments prior to 1964-65 may be obtained from 'Commonwealth Payments to or for the States, 1969-70'.

Blood Transfusion Services

The Commonwealth commenced making grants to the States in 1953-54 for the purpose of assisting blood transfusion services conducted by the Australian Red Cross Society. The allocations to the States in the first year were on a

population basis, with a limit of \$100,000. In 1954-55 the basis of Commonwealth assistance was changed. Since then, the Commonwealth has reimbursed each State for one-third of the State's contribution towards the cost of the Society's blood transfusion services in the State, conditional on the State meeting in the first place 90 per cent of those costs.

Expenditure from 1964-65, including estimated expenditure in 1971-72, is shown in the following table. Details of annual payments prior to 1964-65 may be obtained from 'Commonwealth Payments to or for the States, 1969-70'.

Housekeeper Services

In 1951 the Commonwealth offered financial assistance to the States, up to a limit of \$30,000 a year, to encourage the development of housekeeper services conducted by approved organisations to provide assistance to families in emergencies. The offer was made on the basis that the sum of \$30,000 would be distributed among the States in proportion to their populations and that the States would not reduce their own expenditures on, or subsidies for, these services.

The State of Queensland declined the Commonwealth's offer and the Commonwealth made payments direct to emergency housekeeper services in Queensland. Total payments to the other States under this scheme amounted to \$432,000 up to 30 June 1969 of which \$224,200 was paid to New South Wales, \$155,800 to Victoria, \$34,000 to Western Australia and \$18,000 to Tasmania. South Australia did not participate in the scheme. Annual figures of payments to each State from 1959-60 are shown in the tables in Appendix V. From 1 July 1969, the assistance for housekeeper services has been subsumed in the assistance provided under the *States Grants (Home Care) Act* 1969.

Home Care Programme and Nursing Homes

Under a set of Acts effective from 14 June 1969—the *States Grants (Home Care) Act*, the *States Grants (Paramedical Services) Act* and the *States Grants (Nursing Homes) Act*—the Commonwealth undertook to provide funds, in association with the States, for the provision of a range of home care services, senior citizens' centres and nursing homes, mainly for aged persons.

Under the *States Grants (Home Care) Act* the Commonwealth shares on a \$1 for \$1 basis with participating States the cost of approved housekeeping or other domestic assistance provided wholly or mainly for aged persons in their homes. The Commonwealth also shares on a \$1 for \$1 basis with participating States up to a maximum of one-third of the capital cost of approved senior citizens' centres as well as meeting on a \$1 for \$1 basis with the States the cost of a salary of a welfare officer employed by such a centre. It is estimated that grants in 1971-72 will amount to \$890,000.

The *States Grants (Paramedical Services) Act* provides for the Commonwealth to share on a \$1 for \$1 basis with participating States the cost of approved paramedical services, such as chiropody, occupational therapy, physiotherapy and speech therapy, provided wholly or mainly for aged persons in their homes. There was no expenditure under the Act in 1970-71. It is estimated that grants in 1971-72 will amount to \$67,000.

The *States Grants (Nursing Homes) Act* provides for the Commonwealth to share on a \$1 for \$1 basis with the States the capital costs of approved nursing homes wholly or mainly for aged persons of limited means. The Act provides that the Commonwealth's share during the five year period ending 30 June 1974 is not to exceed \$5 million. Expenditure under the Act in 1970-71 amounted to \$337,000. It is estimated that grants in 1971-72 will amount to \$600,000.

Dwellings for Aged Pensioners

Under the *States Grants (Dwellings for Aged Pensioners) Act* 1969 grants totalling \$25 million will be made available to the States over the five financial years ending 1973-74 for the purpose of providing self-contained dwelling units at reasonable rentals for single aged pensioners or service pensioners who receive pensions on grounds of age and who have little or no means apart from pension. This amount has been allocated among the States broadly in the proportion that the number of aged pensioners receiving supplementary assistance in a State bears to the total number of those pensioners in the six States. The Act provides that payments shall not exceed \$5 million in 1969-70, \$10 million by 30 June 1971, \$15 million by 30 June 1972 and \$20 million by 30 June 1973.

Payments to the States in 1970-71 amounted to \$4.98 million and it is estimated that a further \$6.5 million will be made available in 1971-72.

Assistance for Deserted Wives

Under the *States Grants (Deserted Wives) Act* which became effective from 1 January 1968, the Commonwealth shares, on a \$1 for \$1 basis with participating States, the cost of helping certain mothers with dependent children who are ineligible for a Class A widow's pension.

The main groups of women assisted are deserted wives during the first six months of desertion, wives during the first six months of the husband's imprisonment, deserted de facto wives and de facto wives of prisoners.

The grant by the Commonwealth to a State is equal to half the cost of the approved assistance paid by the State to each eligible person but is not to exceed half the amount that would have been payable to such a person under the Social Services Act had she been eligible for a Class A widow's pension. The total amount paid to the States during the period 1 January 1968 to 30 June 1971 was \$6.9 million and the estimated payment in 1971-72 is \$4.7 million.

Housing Assistance Grants

As announced in the Budget Speech, the Commonwealth has decided to adopt a new approach to Commonwealth assistance to the States for housing.

Under the previous Commonwealth-State Housing Agreements such amounts as were nominated for housing by each State out of its annual Loan Council borrowing programmes were advanced by the Commonwealth at a rate of interest 1 per cent below the long-term bond rate. Under the new approach the States will continue to determine the amount of their annual Loan Council borrowing programmes to be allocated to housing. However, in lieu of the interest concession on such allocations, the Commonwealth will offer the States a basic grant of \$2.75 million a year, payable for a period of 30 years, in respect of housing being provided for low income groups and of Home Builders' Account operations in each year from 1971-72 to 1975-76.

Payment of the basic grant will be conditional upon a State continuing to pay to a Home Builders' Account at least 30 per cent of its annual allocation to housing from its approved borrowing programme and upon the same percentage of the grants in respect of a year's activity being paid to that Account.

The proposed basic grants will be distributed between the States in the same proportion as the annual housing allocation of a State from its approved borrowing programme in the preceding year bears to total State annual allocations for that purpose in that year.

The Commonwealth also intends to offer an additional housing grant of \$1.25 million each year for the next five years as a general Commonwealth contribution towards the cost of reduced rents charged to needy families occupying housing authority homes. This grant will be distributed among the States in the same proportion as the amount of a State's approved borrowing programme allocated to its housing authority in the preceding year bears to the total amount so allocated by all States to their housing authorities in that year.

The estimated amounts payable to each State in 1971-72 are as follows:—

TABLE 26—HOUSING ASSISTANCE GRANTS 1971-72

\$'000

	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total

Total ..	1,391.2	1,051.3	302.4	643.1	360.0	252.0	4,000

Aboriginal Advancement

Since 1968-69 the Commonwealth has provided for the payment to the States of grants for Aboriginal advancement, particularly in the fields of housing, education and health.

The *States Grants (Aboriginal Advancement) Act* 1969 provided for the payment of grants amounting to \$5.4 million to the States in 1969-70. The 1970 Act provided for the level of the grants in 1970-71 to be increased to \$7 million. Of this amount \$4.8 million was spent on housing.

For 1971-72, it is estimated that a further \$9.2 million will be paid to the States for Aboriginal advancement, including \$5.2 million for housing. The following table shows payments made to the States since 1968-69 and estimated payments in 1971-72:—

Promotion of Road Safety Practices

From 1947-48 the Commonwealth each year has provided amounts specifically for public education programmes for the promotion of road safety practices. In 1971-72 it is proposed to distribute \$150,000 among the States, the same amount as in 1970-71, for assistance towards local programmes. It is also proposed that

the Commonwealth itself spend \$400,000 in 1971-72 on promotion programmes having general application on a national basis, for assistance towards local programmes in the mainland Territories and towards road safety research.

Up to 30 June 1971 a total amount of \$3.05 million had been paid to the States to assist in road safety programmes. The following table shows the amounts paid to each State from 1964-65, including estimated payments in 1971-72. Annual figures of payments in years prior to 1964-65 may be obtained from 'Commonwealth Payments to or for the States, 1965-66'.

Disposal of Overseas Ships' Garbage

In 1965-66 the Commonwealth offered financial assistance to each State except Western Australia for the provision of facilities for the disposal of overseas ships' garbage with a view to improving existing measures against the entry of exotic diseases into Australia. The offer was extended during 1967-68 to Western Australia where the dumping of garbage at sea was no longer considered satisfactory. The offer provides for the Commonwealth to meet the full capital cost of incinerators and ancillary structures and half the cost of access roads, excluding land costs, at selected ports. The cost of maintaining and operating the incinerators and transporting garbage is a State responsibility.

Since 1966-67 an amount of \$610,000 has been paid to the States for the construction of incinerators and associated site works; \$124,000 to Victoria, \$336,000 to Queensland, \$48,000 to South Australia and \$102,000 to Tasmania. Payments in 1971-72 are estimated to total \$55,000.

NATURAL DISASTERS

When natural disasters of a major kind occur, the Commonwealth, upon request, normally joins with the State in which the disaster has taken place in financing schemes for the relief of personal hardship and distress, usually on a \$1 for \$1 basis. Such relief does not normally cover the cost of restoration of private assets damaged by natural disasters, it being regarded as the individual's responsibility to provide against such losses by way of insurance.

As to relief and restoration measures other than relief of personal hardship and distress, the Commonwealth regards the provision of such measures as being the responsibility of State Governments. However, recognising that the States have more limited financial resources on which they can draw in an emergency, the Commonwealth is prepared to assist in financing measures other than relief of personal hardship and distress where the States are involved in substantial expenditure of an abnormal nature.

In the case of particular disasters requiring substantial expenditure of an abnormal nature, the Commonwealth looks first to each State to contribute to the cost of relief or restoration measures. However, past policy under which, with certain qualifications which sometimes varied from case to case, State Governments were in most cases expected to contribute on a \$1 for \$1 basis, has given rise over the years to numerous difficulties, chiefly associated with the difficulty of obtaining, at the outset of a disaster, meaningful estimates of the amount of relief and restoration expenditure likely to be involved and hence of the real need for the Commonwealth's participation. Under current policy therefore each State is expected to acquit its own basic responsibility for meeting the costs of relief and restoration measures by meeting up to an initial 'base' amount of expenditure on eligible measures in each financial year on the disasters concerned, after which the Commonwealth is prepared to meet in full the remaining expenditures on eligible relief and restoration measures in that year in respect of such disasters.

Total natural disaster relief assistance paid to Queensland in 1970-71 amounted to \$14.4 million. For 1971-72 the Commonwealth has agreed to meet expenditure in 1971-72 by Queensland in excess of a base amount of \$2 million on drought and flood relief and restoration measures on the basis outlined below. As total State expenditure in 1971-72 on such eligible measures is estimated at \$6.2 million,

provision has therefore been made for Commonwealth assistance of \$4.2 million. An amount of \$2 million has also been included in the 1971-72 estimates as reimbursement of State expenditure in 1970-71 on flood restoration, details of which were not available in time to enable payment to be made in 1970-71.

The Commonwealth has also agreed to meet expenditure by New South Wales in 1971-72 in excess of a base amount of \$5 million on eligible relief and restoration measures in respect of the floods that occurred in the State early in 1971. However, as eligible State expenditure is estimated to be less than \$5 million, no provision has been made for Commonwealth assistance to New South Wales under this head in 1971-72. In 1970-71 the Commonwealth also agreed to meet all expenditure in excess of \$5 million by New South Wales in 1970-71 on eligible natural disaster relief and restoration measures. For this purpose eligible State expenditure included expenditure on certain drought and mouse plague relief measures as well as certain flood relief and restoration expenditure. The State estimated total expenditure in 1970-71 under these headings at about \$10 million and expenditure on relief of personal hardship and distress resulting from the floods at a further \$500,000. Pending submission of firm figures, the Commonwealth provided an advance of \$5.2 million, including \$250,000 for relief of personal hardship and distress, towards this estimated expenditure.

Total payments to the States for natural disaster relief were \$19.9 million in 1970-71 and it is estimated that \$6.3 million will be paid in 1971-72. Total assistance for natural disaster relief in the years from 1949-50 to 1971-72 (estimate) is shown in Table 59 in Appendix IV.

The following sections give details of payments to the States for natural disaster relief in 1970-71 and estimated payments for 1971-72. Details for previous years may be obtained from earlier issues of this document.

Drought

Within the context of the overall policy described above, Commonwealth drought relief assistance is provided on the basis of reimbursing the States for four main categories of relief measures, namely:

- (a) loans for carry-on and re-stocking purposes where credit is not available through normal commercial channels to those who have reasonable prospects of recovery;
- (b) rebates of freight for the transport of fodder and water to drought-affected areas, the transport of starving stock out of drought areas, and the transport of stock to areas that have recovered from the drought;

- (c) grants to local councils and other authorities to provide relief work for those unemployed in drought affected rural areas; and
- (d) certain minor miscellaneous items of expenditure associated with the drought.

Commonwealth reimbursements to the States under all drought relief arrangements take the form of interest-free loans, repayable over ten years with an initial two year repayment holiday period, where the States themselves make loans. Other reimbursements of expenditure take the form of grants.

Within the principle laid down for eligibility under each category of expenditures listed above, the Commonwealth normally imposes no limit on the amount of reimbursable expenditure on these measures by the State Governments concerned and it is left to each State Government to administer the scheme in the light of the particular circumstances in the State.

Queensland Drought

In view of the continuation of drought conditions over much of Queensland, the Commonwealth continued in 1970-71 to assist Queensland in the financing of drought relief measures on the same basis as in 1969-70 (see 'Commonwealth Payments to or for the States, 1970-71' page 44). The effect of this arrangement was that the Queensland Government contributed \$2 million from its own resources and the Commonwealth met the remaining expenditure on eligible measures. Drought was widespread throughout the State until early in the summer of 1970 when heavy rains brought much needed relief to coastal and some inland areas. During the remainder of the summer good rains fell over much of the State, alleviating drought conditions in all but the central and south-west inland.

As mentioned on page 57, for 1971-72 the Commonwealth has agreed to meet all State expenditure in 1971-72 on eligible natural disaster relief and restoration measures in excess of \$2 million. For this purpose, eligible State expenditure will include expenditure on normal drought relief measures up to end December 1971 in the remaining drought declared areas. The eligibility of State expenditure incurred after that date will be reviewed prior to 31 December 1971. State expenditure in 1971-72 on loans for restocking, and on normal freight rebates on restocking, for six months after an area has ceased to be drought declared will also be eligible. To meet the shortage of cattle in Queensland the freight subsidy scheme has been

extended to include subsidies on the transport of breeding and non-breeding stock purchased outside Queensland for restocking purposes for a distance of up to 300 miles from the point of pick-up to the Queensland border.

Drought relief assistance to Queensland in 1970-71 amounted to \$13.6 million. In 1971-72 total eligible State expenditure on drought relief is estimated at \$5 million and, on the basis of the general disaster relief arrangements outlined on page 57, the Commonwealth contribution towards this expenditure has been estimated at \$3.6 million within the total provision of \$6.2 million being made for expenditure on eligible relief and restoration measures in respect of drought and flood combined.

Other States

In 1970-71 the Commonwealth agreed that expenditure by New South Wales in 1970-71 on normal drought relief measures (and on mouse plague relief loans) would be eligible for Commonwealth assistance on the basis of the general disaster relief arrangements outlined on page 57. Under these arrangements the total Commonwealth advance of \$5.2 million included an estimated \$450,000 towards total estimated State expenditure of \$4.25 million on drought and mouse plague relief in 1970-71.

In 1970-71 the Commonwealth also agreed that expenditure in 1970-71 on normal drought relief measures by South Australia would be eligible for Commonwealth assistance if such expenditure exceeded the State's annual base natural disaster expenditure of \$1.5 million. However, as State expenditure was less than this base amount, Commonwealth assistance was not required.

In June 1970, the Western Australian Government requested Commonwealth assistance in financing drought relief expenditures in 1969-70 and 1970-71. However, as the estimate of expenditure on eligible relief measures in 1969-70 was within the base amount the State Government would be expected to meet from its own resources, and in view of the improvement in seasonal prospects for 1970-71 following receipt of the Premier's letter, the Commonwealth did not accede to the State's request.

A final payment of \$16,000 was made to Tasmania in 1970-71 in respect of the scheme of assistance to farmers on the east coast who were affected by drought in 1968-69.

The table below shows Commonwealth reimbursements for the main categories of drought relief expenditure by the States under the various arrangements which have applied since 1965-66.

(a) Subject to revision.
(b) Grants for local authority rates.

Floods

Widespread, and at times severe, flooding was experienced in New South Wales and Queensland early in 1971. The East Gippsland area of Victoria also experienced severe floods at that time.

Upon request, the Commonwealth offered to assist the New South Wales and Victorian Governments, on a \$1 for \$1 basis, in the relief of personal hardship and distress. An amount of \$250,000 was paid to New South Wales in 1970-71 for this purpose.

The Commonwealth also agreed that State expenditure in 1970-71 on the restoration of certain State and local government assets damaged by the floods in each of the three States, and on carry on loans, would be eligible for Commonwealth assistance where the total of such expenditure (and any other approved natural disaster relief expenditure) exceeded the base natural disaster relief expenditure for the State concerned in 1970-71.

Under these arrangements the total Commonwealth advance of \$5.2 million to New South Wales in 1970-71 included an estimated \$4.5 million towards total estimated State expenditure of nearly \$6 million on flood relief and restoration measures (other than relief of personal hardship and distress) in 1970-71.

Expenditure by Victoria in 1970-71 on eligible flood relief and restoration measures in East Gippsland was less than the State's base natural disaster relief expenditure of \$3.5 million and Commonwealth assistance was therefore not required.

In the case of Queensland, expenditure by the State on eligible flood relief and restoration measures amounted to \$2 million in 1970-71 and, as expenditure from State resources on drought relief exceeded the State's base natural disaster relief expenditure of \$2 million in 1970-71, this was eligible for full reimbursement by the Commonwealth. However, as expenditure details were not available in 1970-71, the payment will be made in 1971-72. For 1971-72 the Commonwealth has also agreed that State expenditure in 1971-72 on approved flood relief and restoration measures in respect of the 1971 floods will be eligible for Commonwealth assistance on the basis outlined on page 57. It is estimated that the Commonwealth contribution towards State expenditure in 1971-72 will be \$0.6 million.

In 1970-71 the Tasmanian Government requested Commonwealth assistance in restoring State and local government assets in the north-west of the State damaged by flooding late in August 1970. The State estimated that this expenditure would amount to about \$1.35 million and that there would be expenditure of about

\$200,000 on other relief measures which the State offered to meet itself. On the basis that restoration and relief expenditure would be spread over two years, and in keeping with the policy of requiring the State to meet an initial amount of expenditure, the Commonwealth offered to meet all such expenditure in excess of \$1 million and, in addition, expenditure estimated to total \$200,000 on other measures normally eligible for assistance. However, the State said that the restoration had to be made in the shortest possible time and offered to limit the Commonwealth contribution to \$300,000 in respect of State Government assets and \$300,000 in respect of local government assets if the Commonwealth would agree to a \$1 for \$1 sharing arrangement. As this approach implied that the State would be meeting a 'base' amount of expenditure on eligible measures consistent with the Commonwealth's general approach on natural disaster relief assistance, the Commonwealth agreed to assist on this basis. Payments under the arrangement amounted to \$268,000 in 1970-71 and it is estimated that a further Commonwealth contribution of \$142,500 will be required in 1971-72.

Bushfires

A final payment of \$43,000 was made to Victoria in 1970-71 in respect of expenditure on the relief of personal hardship and distress occasioned by the bushfires in that State early in 1969.

Earthquake

A final payment of \$31,000 was made in 1970-71 to Western Australia towards the cost of restoring State and local government assets damaged in 1968 by the Meckering earthquake.

Cyclone

In 1969-70 the Commonwealth agreed to assist Queensland in financing the relief of personal hardship and distress and the restoration of State and local government assets damaged by Cyclone Ada in January 1970. No payments were made in 1969-70 but assistance of \$733,000 was provided in 1970-71. No further payments will be required under this scheme.

DEVELOPMENT OF RURAL INDUSTRIES

Brigalow Lands Development Scheme

The *Brigalow Lands Agreement Act 1962-1967* approves an agreement with Queensland for the provision of financial assistance by the Commonwealth for the development of 11,176,000 acres described as Areas 1, 2, and 3 in the Fitzroy River Basin. The principal purpose of the assistance is to increase the production of beef cattle.

The Act provides for Commonwealth financial assistance, subject to an overall limit of \$23 million, to finance expenditure by the State on specified works during the thirteen years ending 30 June 1975. The assistance is in the form of interest-bearing loans repayable over twenty years. Payments by the Commonwealth to 30 June 1971 amounted to \$12.3 million. Payments in 1970-71 were \$300,000 and it is estimated that \$1.7 million will be provided in 1971-72. Annual payments prior to 1970-71 are shown in Table 70 in Appendix V.

Softwood Forestry

Under the *Softwood Forestry Agreements Act 1967* the Commonwealth provided financial assistance to all States during the five years ending 30 June 1971 for a programme of increased planting of softwood forests. The assistance to each State was by way of interest-bearing loans repayable over twenty-five years, with repayments and the payment of interest to commence approximately ten years after the date of each advance.

Payments by the Commonwealth to 30 June 1971 amounted to \$17.2 million including \$4.8 million in 1970-71.

The Commonwealth has offered the States financial assistance on the same terms for a further five-year programme ending on 30 June 1976. If the Commonwealth's offer is accepted and the necessary legislation is enacted by the Commonwealth Parliament, it is estimated that \$4.1 million will be paid to the States in 1971-72.

Details of the annual payments to each State and the estimated payments for 1971-72 are shown in the tables in Appendix V.

Agricultural Extension Services

From 1948-49 the Commonwealth has each year made grants to the States to promote improved farm practices in the dairy industry, and from 1952-53 the Commonwealth has also made grants for the purpose of stimulating the expansion of agricultural advisory services in the States. The moneys appropriated for these purposes are, in the main, paid to State Departments of Agriculture, but some expenditure is incurred directly by the Commonwealth on projects common to a number of States.

Up to 30 June 1971 a total amount of \$33.7 million had been made available to the States for these purposes. For the five-year period 1971-72 to 1975-76, the Commonwealth has undertaken to make additional funds of up to \$37 million available to the States for the same purposes. Payments made to each State

from 1964-65, and the estimated payments in 1971-72, are set out in the following table. Annual figures of payments in years prior to 1964-65 may be obtained from 'Commonwealth Payments to or for the States, 1965-66'.

TABLE 30—GRANTS FOR AGRICULTURAL EXTENSION SERVICES(a)

\$'000

	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total

(a) Excludes expenditure incurred directly by the Commonwealth on projects common to a number of States.

Minor Agricultural Research

Since 1960-61 the Commonwealth has made moneys available to finance special investigation and extension projects of a new, short-term nature on a \$1 for \$1 matching basis with the States and/or industry.

The payments to the States for this purpose were \$34,000 in 1964-65, \$28,000 in 1965-66, \$23,000 in 1966-67, \$30,000 in 1967-68, \$57,000 in 1968-69, \$98,000 in 1969-70 and \$68,000 in 1970-71. The estimated payment in 1971-72 is \$77,000. The amounts paid to each State are shown in the tables in Appendix V.

Cattle Tick Control and Research

Since the 1920's the Commonwealth has been contributing towards the cost of cattle tick control and research in New South Wales. From 1 July 1951 to 30 June 1971 an amount of \$11.6 million has been made available for this purpose.

The payment for this purpose in 1970-71 was \$388,000 and the estimated payment in 1971-72 is \$456,000. Commonwealth contributions to New South Wales towards the cost of cattle tick measures from 1959-60 are shown in Table 66 in Appendix V.

Eradication of Bovine Brucellosis and Tuberculosis

For a period of three years from 1 January 1970 the Commonwealth has agreed to join with the States in meeting the cost of an intensified campaign for the eradication of bovine brucellosis and tuberculosis.

The Commonwealth has undertaken to match the combined expenditure of the mainland States, provided it is maintained at least at the 1968-69 level. The matching contributions will be expended on approved eradication measures in these States. In the case of Tasmania the Commonwealth has agreed to meet all the costs associated with the campaign in excess of \$50,000 over the three-year period.

Payments in 1969-70 and 1970-71 amounted to \$203,000 and \$1.4 million respectively and it is estimated that payments of \$2.1 million will be made in 1971-72.

DEVELOPMENT AND CONTROL OF WATER RESOURCES

For some years the Commonwealth has been providing special financial assistance towards a number of projects designed to develop or control water resources in the States. Details of assistance so provided are set out below.

Chowilla Reservoir

In 1963 the River Murray Waters Agreement between the Commonwealth, New South Wales, Victoria and South Australia was amended to provide for the construction of the Chowilla Reservoir on the River Murray in South Australia.

Under the *Chowilla Reservoir Agreement Act* 1963 the Commonwealth also agreed to provide assistance in the form of interest-bearing loans to New South Wales to finance that State's share of the capital cost of the Chowilla Reservoir. Repayment of each loan commences ten years from the date on which it was made and will spread over a further period of ten years.

Payments by the Commonwealth to 30 June 1968 amounted to \$1.5 million. Annual figures of payments and debt charges are shown in Table 65 in Appendix V. No payments have been made since that date.

Because of significant increases in the estimated cost of the project since it was originally estimated in 1962, it was decided in August 1967 to suspend further work on the project. Following a reassessment by the River Murray Commission of the relationship between costs and benefits of the scheme, the Dartmouth project on the Mitta Mitta River in Victoria was selected as the next major project for development on the River Murray system.

Dartmouth Dam

The Commonwealth has offered financial assistance to New South Wales, Victoria and South Australia towards the States' shares of the cost of the Dartmouth Dam, which has been recommended by the River Murray Commission as the next project to be built on the River Murray system. The estimated cost of the dam at the time it was submitted to the Governments in 1969 was \$57 million.

Under the proposed financing arrangements, the Commonwealth would, in addition to meeting its own one-quarter share of the total cost of the project, lend to each of the States concerned one-half of each of their one-quarter shares of the construction costs. Interest would accrue from the date of payment of each advance at the long-term bond rate prevailing at the time of each advance. Capital repayments would be deferred for ten years and would take place over the subsequent fifteen years.

The construction of the dam and the proposed financing arrangements are subject to ratification by the Parliaments of the Commonwealth and the three States. The Parliaments of the Commonwealth, New South Wales and Victoria have ratified the decision to construct the Dartmouth reservoir. The South Australian Parliament has not ratified the Agreement in the form accepted by the other Governments.

No payments have yet been made to the States under the Agreement and, in the circumstances already mentioned, no provision has been made for payments to the States during 1971-72.

Ord River Irrigation Project

Details are given in Appendix IV of the earlier legislation under which grants totalling \$12.2 million were made to Western Australia for Stage I of the Ord River Irrigation Project.

Under the *Western Australia Agreement (Ord River Irrigation) Act* 1968 the Commonwealth is providing financial assistance of up to \$48.18 million to Western Australia for Stage II of the Ord River Irrigation Project. The financial assistance is on the basis of a grant for the construction of the dam, which is expected to cost in the vicinity of \$21 million, and interest-bearing loans for the irrigation works. Each loan is repayable over a period of fifteen years commencing approximately nine and a half years after the end of the financial year during which payment was made.

Financial assistance made available by the Commonwealth for Stage II to 30 June 1971 amounted to \$16.9 million which includes payments totalling \$4.9 million in 1970-71. The payments comprised \$16.8 million in the form of grants for the construction of the dam and \$140,000 in the form of loans towards the cost of construction of the irrigation works. It is estimated that \$4.9 million will be paid in 1971-72, of which \$400,000 will be part of the loan component of the financial assistance. Annual figures of payments and debt charges, including estimates for 1971-72, are given in Table 75 in Appendix V.

Western Australia Water Supply

Details are given in Appendix IV of the earlier legislation under which grants totalling \$10 million were made to Western Australia for the construction of a comprehensive water supply scheme.

Under the *Western Australia (South-west Region Water Supplies) Agreement Act 1965*, the Commonwealth is providing financial assistance of up to \$10.5 million by way of interest-bearing loans to Western Australia to accelerate works undertaken by the State to extend the comprehensive water supply scheme in the south-west portion of the State. The Commonwealth has also agreed to increase the amount of assistance to \$12.0 million to cover escalation in the cost of the scheme. The new areas to be served total approximately 4 million acres. The Commonwealth assistance will extend over an eight-year period from July 1965 and will be on a \$1 for \$1 basis. Repayments will be spread over fifteen years, commencing ten years after each advance is made. Payments by the Commonwealth to 30 June 1971 were \$9.8 million including \$1.8 million in 1970-71 and it is estimated that payments will amount to \$1.95 million in 1971-72. Annual figures of payments and debt charges, including estimates for 1971-72, are given in Table 75 in Appendix V.

Investigation and Measurement of Water Resources

In 1964-65 the Commonwealth agreed to provide grants to the States in order to accelerate their programmes of surface water measurement and investigation of underground water resources. The surface water programme is aimed at completing a basic network of stream gauges throughout Australia; the underground investigations involve a general speeding up of the work of locating and measuring underground water resources.

The *States Grants (Water Resources) Act 1964* authorised payments of up to \$2.8 million to the States for expenditure incurred by the States during the three years ending 30 June 1967. The payments were used mainly for capital works, although in both surface and underground programmes some current expenditure was involved. Total payments under the Act amounted to \$2.5 million.

The *States Grants (Water Resources Measurement) Act 1967* extended the arrangements for another three years by authorising further payments to the States of up to \$4.5 million. For details of the extension to these arrangements see page 71.

The following table shows the total payments to each State for both surface and underground investigations from 1964-65, including estimated payments in 1971-72:—

TABLE 31—GRANTS FOR INVESTIGATION OF WATER RESOURCES
\$'000

—	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total
1964-65 ..	133	90	256	72	136	..	687

1970-71 ..	863	420	516	187	572	64	2,622
1971-72 (estimate)	879	422	544	158	670	71	2,744

National Water Resources Development Programme

In 1966-67 the Commonwealth announced that it would be prepared to make available about \$50 million over the succeeding five years to assist the States with suitable projects for the conservation and use of water in rural industry. Up to the end of 1969-70 six projects involving a maximum Commonwealth commitment of \$54.4 million had been approved under this scheme.

Details of the projects selected for assistance under the scheme are set out below.

Fairbairn Dam (formerly Maraboon Dam)

Under the *Queensland Grant (Maraboon Dam) Act* 1968 the Commonwealth is providing grants of up to \$20 million to Queensland for the construction of the Fairbairn Dam on the Nogoa River near Emerald. Payments by the Commonwealth to 30 June 1971 amounted to \$11.1 million which includes a payment of \$4.8 million in 1970-71. It is estimated that \$5.25 million will be provided in 1971-72. Annual payments prior to 1970-71 are given in Table 71 of Appendix V.

River Murray Salinity Reduction

Under the *Victoria Grant (River Murray Salinity) Act* 1968 the Commonwealth is providing grants of up to \$3.6 million to Victoria for two salinity reduction projects on the River Murray. Payments by the Commonwealth to 30 June 1971 amounted to \$1.6 million which includes a payment of \$25,000 in 1970-71. It is estimated that \$70,000 will be paid in 1971-72. Annual payments prior to 1970-71 are given in Table 69 of Appendix V.

Copeton Dam

Under the *New South Wales Grant (Gwydir River Dam) Act* 1969 the Commonwealth is providing grants of up to \$20 million to New South Wales for the construction of a dam on the Gwydir River near Copeton. Payments by the Commonwealth to 30 June 1971 amounted to \$9.4 million, including a payment of \$5.75 million in 1970-71, and it is estimated that \$4.5 million will be paid in 1971-72. Details of annual payments are given in Table 67 of Appendix V.

King River Dam

Under the *Victoria Grant (King River Dam) Act* 1969 the Commonwealth is providing grants of up to \$4 million to Victoria for the construction of a dam on the King River south of Cheshunt. Payments by the Commonwealth to 30 June 1971 amounted to \$3.4 million, including a payment of \$2 million in 1970-71, and it is estimated that \$330,000 will be paid in 1971-72. Annual payments prior to 1970-71 are given in Table 69 of Appendix V.

Tailem Bend to Keith Pipeline

Under the *South Australia Grant (Tailem Bend to Keith Pipeline) Act* 1969 the Commonwealth is providing grants of up to \$6 million to South Australia for the construction of a pipeline and certain associated works, to carry water from Tailem Bend to Keith. Payments by the Commonwealth were \$1.5 million in 1969-70 and \$1.5 million in 1970-71 and it is estimated that a further \$1.5 million will be paid in 1971-72.

Cressy-Longford Irrigation Works

Under the *Tasmania Grant (Cressy-Longford Irrigation Works) Act* 1969 the Commonwealth is providing grants of up to \$750,000 to Tasmania for the construction of a channel system and associated works to carry water from the tailrace of the Poatina Power Station to supply rural holdings. A payment of \$200,000 was made by the Commonwealth in 1970-71 and it is estimated that \$550,000 will be paid in 1971-72.

In 1969-70 the Commonwealth announced that it would provide \$100 million over the next five years under a new National Water Resources Development Programme. Up to the end of 1970-71 four projects involving a maximum Commonwealth commitment of \$34.65 million had been approved under this programme.

Details of these projects are set out below.

Bundaberg Irrigation Works

Under the *Queensland Grant (Bundaberg Irrigation Works) Act 1970* the Commonwealth is providing grants of up to \$12.8 million to Queensland for the construction of the Monduran Dam on the Kolan River and associated works to regulate the flows of both the Kolan and Burnett rivers. Payments by the Commonwealth in 1970-71 amounted to \$1.9 million and it is estimated that \$3.25 million will be paid in 1971-72.

Flood Mitigation

Under the *New South Wales Grant (Flood Mitigation) Act 1971* the Commonwealth is providing grants of up to \$9 million to New South Wales towards the cost of further flood mitigation works on various coastal rivers in the State. Assistance of \$8 million has previously been provided under the *New South Wales Grant (Flood Mitigation) Act 1964-1968* (see page 114).

The new grant will assist in financing the cost of a further seven-year programme of additional works on the rivers covered under the previous legislation and of flood mitigation works on the Bellinger, Manning, Hawkesbury, Moruya and Hastings Rivers. A payment of \$1.1 million was made by the Commonwealth in 1970-71 and it is estimated that \$1.3 million will be paid in 1971-72. Annual payments to 1968-69 under the earlier programme are given in Table 66 of Appendix V.

Investigation and Measurement of Water Resources

Under the *States Grants (Water Resources Measurement) Act 1970* the Commonwealth is providing grants of up to \$8.2 million to the States towards a further three-year programme of surface water measurement and underground water resources investigations which commenced in 1970-71. Payments by the Commonwealth totalled \$2.6 million in 1970-71 and it is estimated that \$2.7 million will be paid in 1971-72. For details of the payments under this and the previous Acts and estimated payments for 1971-72 see page 68.

Pike Creek Dam

The Commonwealth Government has agreed to grant up to \$4.65 million to New South Wales and Queensland towards the cost of construction of a dam and associated works on Pike Creek in the border rivers region of the two States.

The financial assistance is to be shared equally by the two States and it is estimated that \$50,000 will be paid to each State in 1971-72.

ROADS

The Commonwealth has given assistance to the States for expenditure on roads from 1923–24. This assistance has taken two main forms—general assistance under the various Commonwealth Aid Roads Acts and comparable legislation, and assistance for specific roads or specific road projects.

Under the *Commonwealth Aid Roads Act 1964*, which expired on 30 June 1969, grants totalling \$750 million were paid to the States for roads during the five year period 1964–65 to 1968–69. The Act provided for a basic grant of \$660 million and an additional grant of \$90 million which was payable subject to State Governments meeting certain minimum requirements regarding roads expenditure from their own resources. The grants were distributed among the States on the basis of 5 per cent to Tasmania and the remainder shared among the other States, one-third according to population, one-third according to area and one-third according to registered motor vehicles. Additional details of this Act and of previous Aid Roads Acts are given in Appendix IV.

Commonwealth Aid Roads Act 1969

The arrangements for Commonwealth assistance to States for roads to apply after the expiration of the 1964 Aid Roads Act were announced at a special Premiers' Conference held in March 1969. Legislative effect has been given to these arrangements in the *Commonwealth Aid Roads Act 1969*.

In considering the new arrangements the Commonwealth was greatly assisted by the information and advice furnished by the Commonwealth Bureau of Roads which was set up, following the 1964 review of the roads arrangements, to undertake a thorough survey and appraisal of the existing roads system and of foreseeable roads requirements. The Commonwealth Government accepted the Bureau's assessment that, provided funds were applied economically, expenditure at a rate considerably higher than at present could be undertaken during the next five years. On this basis provision has been made for grants totalling \$1,252.05 million to be paid to the States over the five-year period commencing on 1 July 1969. This represents an increase of about 67 per cent on the amount provided in the preceding five years.

As was the case under the 1959 and 1964 Aid Roads Acts, the annual grants are not related to the amount of customs and excise duty collected on petrol and States are free to allocate to municipal or local authorities moneys received by them from the Commonwealth.

It is the aim of the new arrangements to bring the distribution of Commonwealth financial assistance for roads among the States more closely into accord with relative needs for roads expenditure, but the Commonwealth recognised the

problems that could be created for the smaller States by too rapid a change from the distribution formula that had applied over the previous five years. The total grant of \$1,252.05 million is therefore divided into two parts; a principal grant and supplementary grants.

The principal grant totalling \$1,200 million is distributed between the six States by giving equal weight to the distribution under the *Commonwealth Aid Roads Act* 1964 and the distribution indicated by the Bureau of Roads' analysis of the relative needs for roads expenditure.

In addition, South Australia, Western Australia and Tasmania receive supplementary grants totalling \$52.05 million which will be phased out by the end of the five-year period. The supplementary grants will ensure that the total of each State's grant will be increased by at least 50 per cent compared with the amounts received under the 1964 legislation.

The following table shows the principal and supplementary grants payable under the 1969 Act:—

TABLE 32—GRANTS PAYABLE UNDER COMMONWEALTH AID ROADS ACT 1969
\$'000

	Principal Grant	Supplementary Grant	Total
1969-70	180,000	13,000	193,000
1970-71	205,000	13,000	218,000
1971-72	235,000	10,250	245,250
1972-73	270,000	9,000	279,000
1973-74	310,000	6,800	316,800
Total	1,200,000	52,050	1,252,050

A feature of the new arrangements is that assistance is being directed more specifically than in the past to the development of particular classes of roads. The only condition imposed in the 1964 Act as to the direction of expenditure was that States were required to spend 40 per cent of their grant on roads in rural areas other than highways, main roads or trunk roads. The *Commonwealth Aid Roads Act* 1969 provides for specific allocations of the principal grant for urban arterial and sub-arterial roads, rural arterial roads, rural roads other than arterial roads, and for planning and research.

The amount allocated for planning and research is 1.5 per cent of the total principal grant, while the amount allocated for rural roads other than arterial roads was determined by increasing by 5 per cent each year the amount each State was required, under the 1964 Act, to spend on minor rural roads from its 1968-69 grant. Each State's share of the remainder of the principal grant has been allocated between rural arterial, and urban arterial and sub-arterial roads, in the same proportions as indicated by the Bureau of Roads' assessment of each State's road needs in these two categories. Provision is made in the legislation for limited transfers of grants from one class of roads to another but it is the Commonwealth's intention that requests from States for such transfers will be approved only in exceptional circumstances. The provision in the 1964 Act permitting expenditure of roads grants up to a total of \$2 million on works other than road works is not continued in the new Act.

The resultant allocations of the principal grant to the various classes of roads expenditure, and the distribution of the supplementary grants (which are available for expenditure on the construction and maintenance of any type of road), are shown in the following table:—

TABLE 33—GRANTS PAYABLE UNDER COMMONWEALTH AID ROADS ACT 1969
DIVISION BETWEEN CLASSES OF ROADS—1969-70 TO 1973-74
\$'000

	Principal Grant					Supplementary Grants	Total
	Urban Arterial and Sub-Arterial Roads(a)	Rural Roads		Planning and Research	Total Principal Grant

(a) Construction and reconstruction only.

(b) Construction, reconstruction and maintenance.

Under the 1964 Act, each State Government was required, in order to qualify for its share of the additional grant, to spend an equivalent amount from its own resources in excess of the amount it was required to spend in 1963-64. Under the 1969 Act each State Government is required to increase expenditure on roads from its own resources at the same rate as the increase in the number of motor vehicles on register in the State.

The following table shows the amount paid to each State for roads under the *Commonwealth Aid Roads Act 1964*, and the amounts paid in 1969-70 and 1970-71, and payable in 1971-72 under the *Commonwealth Aid Roads Act 1969*. Annual payments prior to 1964-65 are shown in Table 60 in Appendix IV.

Beef Cattle Roads

The Commonwealth has in recent years made available specific grants and loans for the construction and improvement of certain roads used for the transport of beef cattle. The construction of these roads is aimed particularly at increasing the turn-off of beef cattle for export.

Details are given in Appendix IV of the legislation under which payments of \$20.5 million were made to Queensland and of \$8.4 million to Western Australia in the period 1961-62 to 1966-67.

Under the *States Grants (Beef Cattle Roads) Act 1968* the Commonwealth is providing grants to Queensland, Western Australia and South Australia for a further programme of beef cattle road construction over a period of seven years from 1 July 1967. The amounts provided by the Act for each State are \$39.5 million for Queensland, \$9.5 million for Western Australia and \$1 million for South Australia.

The following table shows the payments made to the States for this purpose up till 1970-71 and the estimated payments for 1971-72:—

TABLE 35—PAYMENTS FOR BEEF CATTLE ROADS

(a) Details of debt charges on loans are given in Table 71 in Appendix V.

Maintenance of Eyre and Barkly Highways

Since 1947-48 the Commonwealth has provided financial assistance towards the cost of maintaining the Eyre Highway in South Australia and Western Australia and the Barkly Highway in Queensland. These payments were made from the Commonwealth Aid Roads Trust Account prior to 1959-60, and from annual appropriations since July 1959. The payments are currently at the rate of \$25,000 per annum each to South Australia and Western Australia, and \$14,000 to Queensland. Between July 1959 and June 1971 an amount of \$807,000 was paid to the three States. Annual figures of payments to each of the three States from 1959-60 may be obtained from the tables in Appendix V.

Promotion of Road Safety Practices

See section under 'Health and Welfare and Public Safety'.

RAILWAY PROJECTS

The Commonwealth has provided and is providing financial assistance to the States for expenditure on various railways projects. Brief notes on the projects which have been completed, and details of Commonwealth assistance provided for them,

are included in Appendix IV. Commonwealth financial assistance is currently being made available for the following projects:—

(a) *South Australia*

The *Railway Standardization (South Australia) Agreement Act 1949* provides for the carrying out of various rail gauge standardization works in South Australia, the Commonwealth being required to provide initially all the finance and the State to repay 30 per cent of this by instalments over a period of fifty years, plus interest on outstanding balances. Conversion of the 3ft 6in gauge lines of the South-eastern Division of the State to 5ft 3in gauge, pending conversion of the main South Australian and Victorian systems to standard 4ft 8½in gauge, was completed in 1959 and work is almost completed on the conversion to standard gauge of the Port Pirie-Cockburn railway. Payments by the Commonwealth for these purposes up to 30 June 1971 totalled \$48 million and provision has been made in 1971-72 for a further payment of \$200,000 under this Agreement.

The *Railway Agreement (New South Wales and South Australia) Act 1968* provided for the construction on behalf of South Australia of a standard gauge railway from Cockburn to Broken Hill together with various railway works associated with the standard gauge connection. This project has been completed to the stage where trans-continental trains were able to begin running during the early part of 1970. The Commonwealth is providing finance on the same terms as outlined above for the 1949 Agreement with South Australia. Payments by the Commonwealth up to 30 June 1971 totalled \$13 million and provision has been made for a further payment of \$1.2 million in 1971-72.

(b) *Western Australia*

Under the *Railway Agreement (Western Australia) Act 1961* the Commonwealth is providing financial assistance to Western Australia for the construction of a standard gauge railway from Kwinana to Koolyanobbing, with an extension to Kalgoorlie, and for the purchase of rolling stock for the railway. While the project is associated with the development of an iron and steel industry at Kwinana using iron ore from Koolyanobbing, the extension of the railway eastward to Kalgoorlie also provides a standard gauge link between Perth and the Trans-Australian Railway.

For financing purposes the cost of the project is divided equally into two parts, one of which is attributed to development and the other to the creation of a uniform gauge railway between Western Australia and the Eastern States. The Commonwealth will provide initially all of the finance for that part of the cost associated with railway standardization and the State will repay 30 per cent by

instalments over fifty years, plus interest on outstanding balances. The Commonwealth will provide finance initially for 70 per cent of the cost attributed to development and the State is to repay this in full over twenty years, plus interest on outstanding balances. Total payments by the Commonwealth to Western Australia to 30 June 1971 amounted to \$98.9 million and provision has been made for a further payment of \$3.5 million in 1971-72.

(c) *Tasmania*

The Commonwealth Government has agreed to provide up to \$4.25 million to Tasmania, of which \$2.975 million is for the construction of a new rail link between Nelson's Creek and Bell Bay and \$1.275 million is for the upgrading of the existing rail track between Launceston and Nelson's Creek and associated works.

The proposed financial assistance will comprise \$2.5 million in the form of loans and \$1.75 million by way of grants.

It is estimated that the whole of the Commonwealth's financial assistance will be paid in 1971-72.

The table below shows payments by the Commonwealth to the States for railway projects from 1964-65, including estimated payments in 1971-72. Annual details prior to 1964-65 are given in Table 62, Appendix IV, which also includes a break-down of payments between grants and loans. Table 63 in Appendix IV shows debt charges associated with loans for railway projects.

TABLE 36—PAYMENTS FOR RAILWAY PROJECTS

1971-72 (estimate)	1,400	3,500	4,250	9,150

(a) Amounts provided from Loan Fund.

HARBOURS AND PORT FACILITIES

The Commonwealth has provided financial assistance to New South Wales and Queensland for the improvement of coal loading facilities in those States, to Western Australia for the improvement of port facilities at Derby, Broome and Wyndham and to Queensland for harbour works in Weipa. Details of this assistance are given in Appendix IV.

POWER AND FUEL

Tasmanian Power Development

Under the *Tasmania Agreement (Hydro-Electric Power Development) Act 1968* the Commonwealth is providing Tasmania with bridging financial assistance, subject to an overall limit of \$47 million for the financing of a five-year programme of accelerated electric power development based on the commencement of development of the Gordon River area in the south-west of the State. The financial assistance is by way of interest-bearing loans each repayable over a period of eight years commencing not later than 15 December 1975. Payments by the Commonwealth to 30 June 1971 amounted to \$21.4 million including \$3.2 million in 1970-71. It is estimated that \$2.5 million will be paid in 1971-72. Annual figures of payments and debt charges are shown in Table 77 in Appendix V.

South Australian Natural Gas Pipeline

Under the *Natural Gas Pipeline (South Australia) Agreement Act 1967* the Commonwealth is providing South Australia with bridging financial assistance, up to a maximum of \$15 million to help finance the construction of a natural gas pipeline from Gidgealpa-Moomba to Adelaide. The financial assistance is by way of interest-bearing loans each repayable over a period of eight years commencing 15 December 1972. Payments by the Commonwealth to 30 June 1971 amounted to \$13.25 million including \$2.25 million in 1970-71, and it is estimated that \$1.75 million will be paid in 1971-72. Annual figures of payments and debt charges are shown in Table 73 in Appendix V.

Gladstone Power Station

Under the *Gladstone Power Station Agreement Act 1970* the Commonwealth will provide financial assistance to Queensland by way of loans to help finance the construction of a thermal power station at Gladstone in Central Queensland. The amount to be provided by the Commonwealth for the project is proportionate to the total cost of the power station in the ratio of 80 to 155. The estimated total cost of the power station (together with local reticulation) at 1968 prices is \$155 million and on this basis the estimated total amount of the Commonwealth's financial assistance is \$80 million. It is estimated that \$2.3 million will be paid in 1971-72.

OTHER ASSISTANCE

Coal Mining Industry Long Service Leave

In the States where coal-miners have been awarded long service leave by industrial tribunals, the State Governments have agreed to reimburse employers the costs they incur in granting this leave. The Commonwealth has, in turn, agreed to reimburse the States for the amounts paid and the administrative costs incurred by them in giving effect to those arrangements. The funds required for these

purposes are obtained from an excise imposed on coal under the *Coal Excise Act* 1949–1968. The rate of excise on coal produced for home consumption was increased from 3.33 cents a ton to 4.4 cents a ton from 1 November 1968. At the same time, excise on coal produced for export was introduced at the rate of 1.1 cents a ton. The rate on coal produced for export was increased from 1 July 1969 to 2.2 cents a ton, from 1 July 1970 to 3.3 cents a ton, and from 1 July 1971 to 4.4 cents a ton.

Amounts equivalent to the proceeds of the excise have been appropriated each year from 1949–50 to a Trust Account under the *States Grants (Coal Mining Industry Long Service Leave) Act* 1949–1968 and, up to 30 June 1971, these appropriations totalled \$19.5 million. The appropriations in each year from 1964–65, including estimated payments in 1971–72, are shown in the following table. Annual figures of payments prior to 1964–65 are given in 'Commonwealth Payments to or for the States, 1965–66'.

TABLE 37
APPROPRIATIONS FOR COAL MINING INDUSTRY LONG SERVICE LEAVE(a)
\$'000

	New South Wales	Queensland	Western Australia	Tasmania	Total
1964–65	475	86	32	4	598
1965–66	483	98	34	4	619
1966–67	492	93	34	1	620
1967–68	478	99	40	3	620
1968–69	658	159	45	3	865
1969–70	850	259	47	4	1,160
1970–71	953	403	53	7	1,416
1971–72 (estimate)	1,358	612	92	8	2,070

(a) No appropriations are made for South Australia, or (since 1960–61) for Victoria.

State Migrant Centres

From 1947–48 the Commonwealth has met half of the capital costs incurred by the States in providing transient accommodation for State-nominated and other assisted migrants on their arrival in Australia. Commonwealth payments for this purpose up to 30 June 1971 totalled \$1.5 million. It is estimated that \$380,000 will be made available in 1971–72. Annual figures of payments to each State from 1958–59, including estimated payments in 1971–72, may be obtained from the tables in Appendix V. (Details of payments to each State before 1955–56 are not available and payments prior to 1955–56 are not reflected in the figures of payments to or for the States in this document.)

Exmouth Township

The Commonwealth has agreed to contribute, by way of grants and loans, towards the cost of development by the Government of Western Australia of a township at Exmouth to serve an integrated United States/Australian community associated with the United States Naval Communication Station 'Harold E. Holt' at North West Cape.

Payments by the Commonwealth to 30 June 1971 totalled \$4.14 million, including \$328,000 by way of loans, and it is estimated that \$3,400 will be provided in 1971-72. Annual figures of payments prior to 1970-71 are given in Table 74 in Appendix V.

(a) Comprising tax reimbursement and supplementary grants prior to 1959-60. See also footnotes to Table 4.
 (b) Additional assistance grant identified in State accounts and budget documents as being used for revenue purposes.
 (c) Special revenue assistance. See explanation of items included on page 25.
 (d) Amounts identified in State accounts and budget documents as being used for capital purposes.
 (e) No dissection is available of the use of this grant; not all of the grant was used for capital purposes.
 (f) See footnotes to Table 48.
 (g) See footnotes to Table 49.

(a) Excluding additional assistance grants used for general revenue purposes. See Table 42.
 (b) Includes special revenue assistance.

APPENDIX II—PART 1—HISTORY OF GENERAL REVENUE ASSISTANCE

INTRODUCTION

Under Section 87 of the Constitution the Commonwealth was required to pay to the States three-quarters of customs and excise revenue collected during the first ten years after the establishment of the Commonwealth 'and thereafter until the Parliament otherwise provides'. In addition, Sections 89, 93 and 94 of the Constitution provided that, for a certain period, and thereafter until Parliament otherwise provided, all surplus revenue not required by the Commonwealth was to be paid to the States.

Payments to the States of surplus revenue of the Commonwealth ceased in 1907–08 when the Commonwealth commenced to pay such surplus revenue into a trust account as a reserve for old age and invalid pensioners. However, payment of three-quarters of customs and excise revenue under Section 87 continued until 1909–10 and were then replaced by per capita payments under the *Surplus Revenue Act* 1910. The Act provided for the payment of \$2.50 (25s.) per head of its population to each State. Payments were made to the States on this basis in each year from 1910–11 to 1926–27 inclusive. In addition, 'special grants' were paid to Western Australia from 1910–11 and to Tasmania from 1912–13.

Under the 1927 Financial Agreement between the Commonwealth and the States it was provided that the Commonwealth would pay to the States for fifty-eight years from 1927–28 an annual amount of \$15.17 million as a contribution towards interest on State debts. These interest payments replaced the per capita grants and they were (and are) distributed between the States in the same proportions as the 1926–27 per capita grant. The Financial Agreement also provided for Commonwealth contributions towards sinking fund payments in respect of the States' debts existing at 30 June 1927 and those incurred after that date.

In 1929–30 payments of special grants to South Australia were commenced. From 1934–35 onwards these special grants to South Australia, Western Australia and Tasmania were paid on the recommendations of the Commonwealth Grants Commission which was established in 1933.

THE SECOND WORLD WAR

At the outbreak of the second world war, the financial resources available to the States were, for the most part, sufficient to enable them to meet their own expenditures principally from funds which they themselves were responsible for raising. Commonwealth payments to them, though they had increased over the years, were still relatively small and confined to a fairly narrow field, e.g., tiding the States over difficult periods, assisting the financially weaker States, or providing funds for purposes in which the Commonwealth had a common interest with the States.

The second world war radically changed this situation. To finance its greatly increased war-time expenditure, it was necessary for the Commonwealth to maximise its revenue from all sources. The incidence of State income taxes, which were then levied concurrently with Commonwealth income tax, differed widely between States and, as the Commonwealth is constitutionally forbidden from discriminating between States in the imposition of taxes, its rates were in practice limited by the scope available for additional tax in the State with the highest rate of tax at each income level. This, of course, meant that in other States there were large untapped sources of income tax revenue.

This problem was the subject of discussion between the Commonwealth and State Governments on a number of occasions during the early war years, but no mutually acceptable solution was reached.

THE COMMITTEE ON UNIFORM TAXATION

On 23 February 1942 the Commonwealth Treasurer appointed a Committee to consider the questions of the Commonwealth becoming the sole income taxing authority for the duration of the war and of payments, by way of grants, to the States for their retirement from the income tax field.

The Committee presented its report on 28 March 1942 and recommended that for the duration of the war and one year afterwards the Commonwealth should be the sole authority to impose taxes on income. It suggested that a scheme of uniform taxation should operate from 1 July 1942 and that the States should be compensated on retiring from the field of income tax.

THE INTRODUCTION OF UNIFORM TAXATION

In May 1942 legislation was introduced in the Commonwealth Parliament to implement, with minor amendments, the recommendations of this Committee. Under this legislation, a uniform income tax scheme came into operation on 1 July 1942.

In the same year the validity of the Commonwealth uniform tax legislation was challenged in the High Court by four of the State Governments. The challenge was unsuccessful, the High Court finding that the Commonwealth could enforce priority in the collection of its income tax and could make grants to the States under Section 96 of the Constitution on the condition that they vacated the field of income taxation.

Under this war-time uniform income tax scheme, therefore, the Commonwealth was the sole income taxing authority for the period of the war and one year thereafter. By way of compensation, the States were paid tax reimbursement grants (provided they did not impose taxes on income) based upon their average collections from taxes on income in the years 1939–40 and 1940–41.

Later in 1942 the Commonwealth, in agreement with the States concerned, established a uniform entertainments tax on a similar basis and provided for annual reimbursement grants, based on collections in 1941–42, to be paid to the five States which had previously levied entertainments tax.

TAX REIMBURSEMENT GRANTS—WAR-TIME BASIS

The tax reimbursement grants (less any arrears of income tax collected by or on behalf of the States) paid to the States in the period 1942–43 to 1945–46, inclusive, amounted to \$68.5 million, of which \$67 million was by way of income tax reimbursement grants and \$1.5 million by way of entertainments tax reimbursement grants. The amounts payable to each State in each year are shown in Table 46 following this Appendix.

Under the war-time legislation any State could apply for additional financial assistance if the income tax reimbursement grant appeared to be insufficient to meet that State's revenue requirements in any year. On the recommendation of the Commonwealth Grants Commission, the additional financial assistance given by the Commonwealth under this provision was \$1.1 million in respect of 1945–46 and \$4.3 million in respect of 1946–47. The amounts paid to the States concerned are shown in Table 46 following this Appendix.

THE CONTINUATION OF UNIFORM TAXATION AFTER THE WAR

At a Premiers' Conference in January 1946 the States were informed that the Commonwealth Government proposed to continue uniform income tax indefinitely. The Conference decided that the total tax reimbursement grants in both 1946–47 and 1947–48 should be \$80 million, and that the grants in subsequent years should be determined by means of a formula under which this base amount would be increased in accordance with variations in population and half of the percentage increase in average wages per person employed for Australia as a whole. The grants continued to be conditional upon the States refraining from levying income tax, but the condition requiring the States to refrain from imposing entertainments tax was discontinued. These provisions were incorporated in the *States Grants (Tax Reimbursement) Act 1946*.

Following further discussions with the States during the next two years, the total grant for 1947–48 was increased to \$90 million and the formula embodied in the 1946 Act was amended. Beginning in 1948–49, the aggregate grant payable to the States in each year under the Act, as amended, was determined by varying the sum of \$90 million in accordance with a formula which took account of—

- (a) variations in the total population of the six States since 1 July 1947; and
- (b) the full percentage increase in the level of average wages per person employed in Australia as a whole over the level of 1945–46.

The *States Grants (Tax Reimbursement) Act 1946* included a schedule determining the distribution of the aggregate grants in 1946–47 and 1947–48. It further provided that in each of the financial years, 1948–49 to 1956–57, inclusive, a percentage of the grant was to be distributed in accordance with this schedule and the remainder was to be distributed in proportion to the populations of the States adjusted for density and for numbers of children between 5 and 15 years of age. The percentage to be divided according to the schedule was 90 per cent in 1948–49, 80 per cent in 1949–50 and so on down to 10 per cent in 1956–57 and nothing in 1957–58. Thus, in 1957–58 and 1958–59 the whole of the tax reimbursement grants was distributed in proportion to the States' adjusted populations so that the distribution of the grants between States was no longer determined, directly or indirectly, by reference to the amounts of income tax collected by each State.

Although no change was made in the tax reimbursement formula after 1948-49, the Commonwealth made ad hoc grants to supplement the amount yielded by the formula in each subsequent year of its operation. These supplementary grants, which in some years took account of special circumstances, were distributed in some years in proportions which differed from those of the formula grants. The total amount of the tax reimbursement formula grants and supplementary grants paid to the States in 1946-47 was \$84.3 million. Between that year and 1958-59 the amounts made available by way of these grants increased year by year so that the total amount paid in 1958-59 was \$410 million. Details of the amounts paid each year are shown in Table 46 following this Appendix.

FURTHER DISCUSSIONS ON UNIFORM TAXATION

The question of resumption of State income tax was further discussed at the Premiers' Conferences of September 1950 and August 1951. In October 1952 Victoria took out a writ in the High Court challenging the validity of the uniform tax legislation. However, this challenge was not pursued.

In July 1952 the Commonwealth informed the States that it was willing to discuss with them the possibility of resumption of State income tax. A report subsequently prepared by Commonwealth and State Treasury officers on the technical problems involved was presented to a Premiers' Conference held in February 1953. At that Conference Commonwealth and State Treasury officers were asked to prepare a further report as a basis for discussions on the extent to which the Commonwealth might vacate the income tax field. This report was received at a Premiers' Conference held in August 1953, together with a report on the special problems facing Queensland in the event of the return of taxing powers. No agreement could be arrived at between the Commonwealth and the States on the extent to which the income tax field should be vacated by the Commonwealth.

FURTHER LEGAL CHALLENGE TO UNIFORM TAXATION

In December 1955 the Victorian Government took out a new writ in the High Court challenging the validity of the uniform tax legislation. In particular, Victoria disputed—

- (a) the power of the Commonwealth to make tax reimbursement grants conditional upon the States not levying income tax; and
- (b) the Commonwealth's power to provide an absolute priority for payment of Commonwealth income tax over income taxes levied by the States.

In November 1956 the New South Wales Government intervened to support Victoria's challenge. In August 1957 the High Court ruled—

- (a) unanimously, that the condition attaching to the tax reimbursement grants that the States should not levy income tax, was valid; and
- (b) by a majority of four to three, that section 221 (1.) (a) of the *Income Tax and Social Services Contribution Assessment Act 1936-1956*, which prohibited a taxpayer paying State income tax until Commonwealth income tax was paid, was invalid.

THE MARCH 1959 PREMIERS' CONFERENCE

At a special Premiers' Conference held in March 1959 all of the main aspects of Commonwealth-State financial relations were considered. In particular, extensive discussions took place on the question of the resumption of income tax by the States, but there were considerable differences of opinion on the complex issues involved and no acceptable solutions emerged.

The Conference then turned its attention to the question of revising the tax reimbursement arrangements, and it was suggested that the Commonwealth might closely examine the whole system of revenue grants to the States with a view to submitting precise proposals at the normal meeting of the Premiers in June 1959.

THE JUNE 1959 PREMIERS' CONFERENCE

The Commonwealth proposals submitted at the Premiers' Conference in June 1959 were for a new system of financial assistance grants to the States to replace the existing tax reimbursement arrangements.

The proposals were devised in the light of generally expressed dissatisfaction with the methods of determination and distribution of the tax reimbursement grants, and in the knowledge that two non-claimant States had applied for special grants subject to the recommendation of the Grants Commission. In particular, it was considered desirable—

- (a) to amalgamate within some new revenue grant arrangements the large grants which were then being paid to supplement the tax reimbursement formula grants, and to devise a more liberal formula which would avoid the necessity for supplementary grants;
- (b) to reduce to two the number of States which would in future continue regularly to apply for special grants recommended by the Grants Commission, and to reduce the dependence of these States on special grants to more marginal proportions; and
- (c) to arrive at a more generally acceptable basis of distribution as between the States of Commonwealth general revenue grants.

With these ends in view, the Commonwealth proposed that financial assistance grants amounting to \$485 million should be paid to the States in 1959–60. This compared with the sum of \$451.5 million paid to the States in 1958–59 by way of tax reimbursement, supplementary and special grants.

It was proposed that the shares of New South Wales, Victoria, Queensland, and South Australia in the sum of \$485 million be determined by rounding up to the nearest whole number the percentage shares of those four States in the sum of \$451.5 million paid in 1958–59, which comprised tax reimbursement, supplementary and special grants. As regards Western Australia and Tasmania, the effect of these proposed changes in the distribution would be to give them a slightly smaller share of the new financial assistance grants than their share of tax reimbursement and supplementary grants. However, as it was proposed that these two States would still have regular access to the Grants Commission, their shares of total general revenue grants (i.e. financial assistance grants and special grants) would continue to be determined, in effect, by the size of the special grants recommended by the Commission.

The Commonwealth further proposed that, in the years following 1959–60, the financial assistance grants payable to each State should be determined under a formula by which the grant paid to that State in the previous year would be varied in accordance with annual movements in the State's own population and annual increases in the level of average wages for Australia as a whole. In addition, to assist the States to improve the standard and range of services provided by them, it was proposed to introduce a 'betterment factor' equal to 10 per cent of the increase for the year in average wages; thus an increase of 4 per cent in average wages would be raised to 4.4 per cent.

In outlining these proposals the Commonwealth emphasized at the outset that it considered that the system of special grants, made upon the recommendation of the Grants Commission, should be continued. At the same time, the Commonwealth expressed the view that the machinery which had been developed over the years by the Grants Commission would become unworkable if it were to be asked to consider applications for special grants from as many as five States. Applications for special grants had recently been submitted to the Commonwealth by Queensland and Victoria.

The Commonwealth suggested that, so far as future arrangements for special grants were concerned, the States might be regarded as falling into three categories. At one extreme were the two wealthier States of New South Wales and Victoria, which should not participate in any arrangements for special grants, and at the other extreme were Western Australia and Tasmania, which for the time being might be regarded as having a continuing need for special grants. In an intermediate category were the States of South Australia, which had been a claimant State up to that time, and Queensland. The Commonwealth considered that, while these two States ought not be denied the right of access to the Grants Commission, the main revenue grants to them should be increased sufficiently to enable them, unless exceptional circumstances arose, to avoid applying for special grants.

This approach was accepted by the States and, in agreeing to the new revenue grant arrangements, the Premiers of Queensland and South Australia each gave an undertaking that his State would not exercise the right of applying for special grants in future unless special or unexpected circumstances endangered its budgetary position relative to that of other States.

The Commonwealth stated that its proposals were based on the assumptions that the States and their authorities would continue to meet Commonwealth pay-roll tax and that the distribution of taxing powers between the Commonwealth and the States would remain unchanged. If any changes in Commonwealth-State relations having a major effect on the finances of the States were to occur during the currency of the new revenue grant arrangements, they would be subject to review.

Following representations by New South Wales, the Commonwealth agreed to add \$2 million to that State's share of the proposed grants for 1959-60, mainly because the rounding of percentage shares had produced a decline in its share of the proposed grants *vis-a-vis* Victoria. South Australia was also given an extra \$2 million; it had argued that it could expect to receive about that amount in respect of 1958-59 by way of final adjustment to the advance payment of its special grant for that year. In the result, the distribution of general revenue grants between the four non-claimant States in 1959-60 was only slightly changed from the distribution in 1958-59; the distribution between New South Wales, Victoria and Queensland largely reflected the distribution of adjusted populations between those States; as South Australia's grant for 1959-60 was in effect determined on the basis of the total of its special grant and tax reimbursement grant for 1958-59, it received a share larger than its share of either adjusted or unadjusted population of the four non-claimant States.

After allowing for the additions of \$2 million to the proposed grants to New South Wales and South Australia, the total grant proposed for 1959-60 became \$489 million. With these adjustments to the grants for New South Wales and South Australia the proposals were unanimously accepted by the Premiers and were embodied in the *States Grants Act 1959*, which was passed by the Commonwealth Parliament in November of that year.

THE STATES GRANTS ACT 1962

In 1961-62, in addition to the amounts determined under the *States Grants Act 1959*, further amounts were paid to Victoria, Western Australia and Tasmania under the *States Grants Act 1962*.

This action was taken because the census held in June 1961 revealed that the populations of those three States as at 1 July 1960 had been over-estimated. Since the terms of the 1959 Act required the 1961 census results to be compared with unrevised estimates of population as at 1 July 1960 for the purpose of calculating the increase in population of each State during 1960-61, the resulting estimates of population increases for these States were lower than the actual increases. As these three States had framed their budgets on the basis of preliminary estimates made prior to the census results, the Commonwealth agreed to pay them grants equal to those preliminary estimates, revised to take account of the finally determined increase in average wages for Australia as a whole. As a result, an additional amount of \$2,048,000 was paid to Victoria, \$678,000 to Western Australia and \$194,000 to Tasmania.

The *States Grants Act 1962* also authorised, for the purpose of calculating Victoria's grant in 1962-63 and subsequent years, the adoption of a new 'base amount' for 1961-62. This new base amount of \$145.46 million represented the grant which would have been received in 1961-62 by Victoria had the financial assistance grants for that State been calculated, in each year since 1959-60, in accordance with estimates of the population of that State revised in the light of the 1961 census.

PROPOSAL FOR A 'MARGINAL' STATE INCOME TAX

In September 1964 the Victorian Government announced its intention of introducing a 'marginal' income tax to be payable by individuals living in Victoria to operate as from the beginning of 1965-66 and requested the Commonwealth Government to collect the tax on its behalf. The Commonwealth refused to accede to the Victorian request, pointing out that an arrangement involving the abandonment or modification of uniform taxation could only be contemplated if it was supported by all States, contained adequate safeguards for the interests of taxpayers and provided a sound basis for future financial relationships between the Commonwealth and each of the States. The Victorian Government then indicated that it did not propose to set up the machinery for assessment and collection of its own income tax. Although Victoria again raised the question at the Premiers' Conference held in June 1965, none of the other States supported the idea of a 'marginal' State income tax.

THE JUNE 1965 PREMIERS' CONFERENCE

This Conference followed an earlier Premiers' Conference held in April 1965 at which the States had expressed the view that the annual rate of growth of the financial assistance grants under the 1959 arrangements had been too slow when considered in relation to the rate of growth of their commitments for expenditure on important government services. Variations were suggested including proposals designed to increase the share of the grants going to particular States.

After considering in detail the proposals made by the States at the April Conference the Commonwealth put forward a scheme at the June 1965 Conference designed to meet the main points raised by the States.

It was proposed that the annual financial assistance grant payable to each State would continue to increase in proportion to variations in population and increases in wages—the two main factors affecting current expenditure of the States. However, it was proposed to improve the betterment factor by fixing it at 1.2 per cent per annum regardless of the size of the increase in average wages. During the period of the 1959 arrangements the betterment factor had resulted in an increase in the grants of only about 0.4 per cent per annum.

The Commonwealth also proposed that, in order to reduce the time lag before changes in population and wages were reflected in the grants, more up-to-date statistics for these two items should be used in calculating the grants. Specifically, it was proposed that the increase in average wages used to determine the grant for a financial year should be that for the year ending March in *that* financial year (instead of that for the *preceding* financial year) and that the increase in population used should be the increase during the year ending December in the financial year (instead of the increase during the preceding financial year).

It was suggested that the proposed new arrangements should continue for five years—from 1965–66 to 1969–70.

The proposals were acceptable to the States except that most of them did not favour the proposed reduction in the time-lag in average wages since, in that event, their 1965–66 grants would be determined without reference to the large rise in average wages which was expected to occur in 1964–65. It was therefore agreed that the increase in average wages would continue to be calculated as under the 1959 arrangements.

As regards the distribution of the grants between the States, it was agreed to increase Queensland's share of the grants by adding \$2 million to the amount on which Queensland's grant for each year would be calculated. This addition, which had the effect of progressively increasing Queensland's share of the grants relative to the other States, was made mainly in recognition of Queensland's large area and relatively small population. It was also agreed to make an addition of \$1.2 million to the grant which Victoria would receive in 1965–66 under the proposed new formula. This addition, which had the effect of reducing the difference between Victoria's grant per head and that of New South Wales, forms part of the base used in calculating the grant paid each year to Victoria under the grants formula.

Thus, the arrangements agreed at the June 1965 Premiers' Conference provided for two main improvements in the grants formula—the increase in the betterment factor and the reduction in the time lag before changes in population were reflected in the grants—as well as for special additions to the grants payable to Queensland and Victoria.

In outlining its proposals at the Conference the Commonwealth said that, while it envisaged that Western Australia and Tasmania would continue to be eligible to receive special grants, it expected that each of the other four States would agree to remain 'non-claimant' for the period of the new arrangements. However, the Commonwealth indicated that if there were a major change in the financial position of a State through circumstances beyond its control, it would be ready to review the position of that State under the financial assistance arrangements. In contrast to the action taken in 1959, it was agreed that no part of the existing special grants would be incorporated in the claimant States' financial assistance grants.

The Commonwealth also made it clear that, as in 1959, the new arrangements were based on the assumption that there would be no significant changes in the financial relationships between the Commonwealth and the States. In particular, the proposals were based on the understanding that the distribution of taxing powers would remain unchanged and that the States and their authorities would continue to pay pay-roll tax.

These arrangements were embodied in the *States Grants Act 1965*.

AMENDMENTS IN 1967

At a Premiers' Conference in February 1967 it was agreed to reduce the time lag before increases in average wages are reflected in the grants. The percentage increase in average wages used to calculate each year's grant (including the grants for 1966–67) became that for the twelve months ended March in the year of payment instead of that for the financial year immediately preceding the year of payment. The other elements of the formula were not altered.

The Commonwealth also agreed at that Conference to pay the States special assistance of \$5 million in 1966–67. This amount was distributed among the States in the same proportions as the grants produced by the formula.

At a Premiers' Conference in June 1967 the Commonwealth agreed that, for purposes of determining the formula grants for 1967-68 and future years, the special assistance of \$5 million in 1966-67 would be treated as part of the formula grant of that year.

These amendments were authorised by the *States Grants Act 1967* and the *States Grants Act (No. 2) 1967*.

THE JUNE 1968 PREMIERS' CONFERENCE

The Commonwealth made it clear at the Premiers' Conference in June 1968 that it regarded State receipts duties on wages and salaries and comparable payments such as superannuation and pensions as an income tax and, as such, in breach of the financial assistance grants arrangements. (Payments of the type mentioned had been made liable to the new form of receipts duty introduced in Western Australia and Victoria in 1966-67 and 1967-68 respectively.) The Commonwealth stated that it adhered firmly to the principle of uniform income taxation and was convinced of the desirability of avoiding multiplication of income taxes. If receipts duty on wages and salaries continued in existence when the grants arrangements were being reviewed in 1970, the Commonwealth would regard that as a decisive factor in determining its attitude on the allocation to a State imposing that form of taxation. In the meantime, should a State that continued the impost on wages and salaries impose it at a higher rate, the Commonwealth would move forthwith to amend its legislation and seek to reduce that State's grant. (The duty as it applied to wages and salaries was subsequently removed by Victoria as from July 1970 and by Western Australia as from January 1971. Receipts duties generally ceased to apply to receipts after the end of September 1970—see Chapter II.)

It was also stated at the Conference that the Commonwealth did not object in principle to modest extensions of State taxation into the general field of business receipts or business turnover, provided it was not carried to a point where it could significantly affect the Commonwealth's ability to carry out national policies or to raise Commonwealth revenue. However, the Commonwealth did not favour the imposition of a pay-roll tax by the States.

It was agreed at the Conference to meet Western Australia's request to withdraw from the special grants system as from 1968-69 but that this move should not disturb the existing formula grants arrangements. It was decided that—

- (a) in lieu of the special grant the Commonwealth would pay Western Australia the sum of \$15.5 million in each of the years 1968-69 and 1969-70 in addition to the State's formula grant;
- (b) the completion payment to be recommended by the Grants Commission in respect of 1966-67 would be paid in the normal way in 1968-69. However, it was agreed that the advance payment of \$15.5 million in respect of 1967-68 would be regarded as the final grant for that year; and
- (c) the sum of Western Australia's formula grant for 1969-70 and the amount of \$15.5 million would be regarded for purposes of the 1970 review of the financial assistance arrangements as constituting Western Australia's financial assistance grant for 1969-70.

The additional financial assistance grants payable to Western Australia in 1968-69 and 1969-70 under these arrangements were authorized by the *States Grants Act 1968*.

THE FEBRUARY 1970 PREMIERS' CONFERENCE

Prior to this Conference the six State Premiers presented a joint Statement to the Prime Minister entitled 'The Financial Relationships of the Commonwealth and the States'. The main argument put forward in this document was that the existing financial assistance grants formula produced an insufficient rate of growth in Commonwealth general revenue assistance to the States when considered in relation to their increasing expenditure commitments, particularly in the areas of debt charges and social services expenditure, and taking into account the restricted revenue fields open to the States.

The proposals advanced by the Premiers, and to which they sought the concurrence of the Commonwealth at the Conference, were summarised at the conclusion of the document as follows—

- (1) That the tax reimbursements grants for a transitional period from 1 July 1970, should be determined by adequately increasing the base total as determined under present arrangements, and adopting a new system of increases upon that base in line with the observed rate of growth in income tax yields.
- (2) That Commonwealth and State Treasury officers be instructed to devise a scheme whereby the States shall have access to income tax broadly along the lines of the system presently operating in Canada, but adapted to Australian circumstances and to the recognised needs of the less populous States.

- (3) Upon re-entry of the States into the field of income taxation appropriate adjustments be made to financial assistance grants to offset the effects of the lower *per capita* yields available to the less populous States from income tax, to preserve the financial equalization provisions presently available to the less populous States, and to provide for escalation of the continuing financial assistance grants in line with the expected yield of income taxation.
- (4) In the course of financial re-arrangements, consideration must be given to permitting participation by the States in such capital and developmental funds as may be secured from revenue sources; to a review of the recent trend to proliferation of Commonwealth "special purpose" grants; and to the possibility of the States securing access to wider revenue fields presently under the control of the Commonwealth, as well as to income tax.'

At the Conference, the Prime Minister said that the Commonwealth did not accept the proposal that the States re-enter the field of income taxation, or that the annual increases in the Commonwealth's general revenue grants to the States should be related to increases in Commonwealth income tax collections. Allowing the States access to income taxation could make the Commonwealth's task of managing the economy more difficult and, if a scheme along the Canadian lines were adopted, it could result in different rates of income tax applying in the various States. This would mean the end of uniform income taxation, which was beneficial and which the Australian people had come to accept. Further, as income tax collections fluctuated markedly from time to time, the adoption of the States' proposals could create difficult budgetary problems for the States in some years. In addition, the fact that the per capita yield of income tax varied markedly between the States would make it difficult to work out 'equalisation' grants satisfactory to the less populous States.

The Prime Minister agreed, however, that there was a need for a significant increase in Commonwealth revenue assistance to the States and outlined, in general terms, four ways in which this might be achieved. He proposed that the burden of State debt charges might be relieved by the Commonwealth taking over part of existing State debt and also by providing portion of future borrowing programmes for State works in the form of interest-free grants. In addition, the Commonwealth was prepared to increase the financial assistance grants by an immediate addition to the base level and also by increasing the betterment factor to provide for a faster rate of growth in the grants. The Prime Minister added that the Commonwealth was willing to join with the States in examining any proposals made by them for an alternative field of growth tax.

The Prime Minister suggested that the precise details of the Commonwealth proposals could be left to be settled at the usual Premiers' Conference in June and that, before then, Commonwealth and State Treasury officers could meet to discuss them. The Premiers accepted this suggestion and, at two subsequent meetings, Commonwealth and State Treasury officers reached tentative agreement on the procedures for the progressive take-over by the Commonwealth of responsibility for \$1,000 million of State debt and for an annual capital grant in lieu of loan raisings.

THE JUNE 1970 PREMIERS' CONFERENCE

At this Conference the Prime Minister gave details of four ways in which the Commonwealth was prepared to increase the revenue assistance to the States—

First, an interest-free capital grant would be made starting at \$200 million in 1970-71 and increasing in future years in proportion to the increase in the total Loan Council works and housing programme. This would relieve the States of debt charges they would otherwise have to pay and would free State funds for other purposes.

Secondly, grants would be made to meet the debt charges on \$200 million of existing State debt in 1970-71 and an additional \$200 million in each of the subsequent four years so that, as from the commencement of 1974-75, the Commonwealth would have taken over full responsibility for the debt charges on \$1,000 million of State debt, with this amount of debt being formally transferred to the Commonwealth in June 1975.

Thirdly, an addition of \$40 million would be made to the 1970-71 grants determined under the existing formula and this amount would be incorporated in the 1970-71 base for purposes of determining the formula grants for 1971-72 and later years. The amount of \$40 million would be distributed between the States in the same proportions as their 1970-71 formula grants.

Fourthly, there would be an increase in the betterment factor from 1.2 per cent to 1.8 per cent to apply from 1971-72.

The Prime Minister also made two proposals in relation to the grants to individual States.

First, there would be a continuation of the \$2 million addition that had been made to the base on which Queensland's grant was calculated in each of the five years of the previous arrangements. The Prime Minister stated that the Government had 'come to the conclusion that in spite of the considerable improvement that has been effected in Queensland's share of the grants over the last five years, the grants being received by that State are still too low compared to other States'.

Secondly, in addition to its formula financial assistance grant and in lieu of the amount of \$15.5 million paid in both 1968-69 and 1969-70, Western Australia would receive amounts starting at \$12.5 million in 1970-71 and reducing by \$3 million per annum in each of the subsequent four years. The Prime Minister said that the Government had 'noted that since 1967-68 there appears to have been a significant improvement in the relative capacity of Western Australia to finance its budget expenditure . . . ' and that 'if the State continued to receive its present share of the revenue grants, including the special amount of \$15.5 million, the situation would become increasingly unfair to the other States and could result in a significant distortion in the allocation of governmental funds between the States'. However, in recognition of the rapid rate of population growth and economic development in the State, the Commonwealth would, in the Loan Council, support increases in Western Australia's share of the borrowing programmes to offset the reductions in the revenue grants.

The Premiers regarded these proposals as inadequate and suggested a minimum increase in the 1970-71 grants of \$90 million and a minimum betterment factor of 3 per cent to apply from 1970-71.

After considering the States' arguments, and in particular the case put by New South Wales and Victoria that the absolute gap between their per capita grants and those of the smaller States was becoming larger year by year, the Prime Minister proposed that a grant of \$2 per capita be paid to New South Wales and Victoria in each of the next five years. This would be additional to the formula grants and would not be included in the base used to determine those grants. In the event that any of the four less populous States considered that the additional per capita grants would adversely affect their ability to provide services of a standard comparable with those in New South Wales and Victoria, the Prime Minister said that it would be open for them to make an application to the Grants Commission for a grant in addition to their share of the financial assistance grants. Under the previous arrangements the Commonwealth had indicated that it expected each of the other four States to remain non-claimant for the period of the arrangements.

The Prime Minister also suggested that it might be helpful for the Grants Commission to be given the additional task of investigating and recommending on the distribution of the general revenue grants between all the States for purposes of the quinquennial reviews of the arrangements.

The Prime Minister said that the new revenue assistance arrangements, including the special arrangements for Queensland and Western Australia, were to apply for the five years 1970-71 to 1974-75. As under the previous arrangements, they were proposed on the basis that there would be no significant changes in the existing division of financial responsibilities between the Commonwealth and the States during the period and on the understanding that the distribution of tax resources would remain unchanged and that the States and their authorities would continue to pay pay-roll tax.

On the question of State tax powers, the Prime Minister said that the Commonwealth would be prepared to have Commonwealth and State Treasury officials examine alternative possibilities for new growth taxes for the States.

At the Conference, figures were circulated showing that, on certain assumptions, the States would, under the new arrangements, receive an estimated \$70 million more financial assistance in 1970-71, and about \$800 million more over the five years as a whole, than they would have if the previous arrangements continued unaltered. These amounts include estimated savings in debt charges from the interest-free capital grant and from the grants to meet debt charges on existing State debt, together with the 'formula' financial assistance grants, the \$40 million addition to the 1970-71 grants and the additional grants for particular States. It was also shown that this section of the Commonwealth's revenue assistance to the States would grow at an average of probably between 2½ to 3 per cent per annum faster than if the previous arrangements had continued unchanged.

APPENDIX II—PART II—TABLES OF GENERAL REVENUE GRANTS

TABLE NO.	SUBJECT
45.	Total General Revenue Grants, 1944-45 to 1971-72.
46.	Tax Reimbursements Grants—Formula and Supplementary Grants, 1942-43 to 1958-59.
47.	Special Grants, 1910-11 to 1971-72.

Stat 1910-11

+ Special Grants from P104

R. R. R. 1910-11 1942-43

(a) In the years 1944-45 and 1945-46 the amounts include entertainments tax reimbursement grants. In 1945-46, 1946-47, 1949-50 and each subsequent year the amounts include supplementary grants where these were paid. See Table 46.
 (b) Excluding additional assistance grants used for revenue purposes. See Table 42.
 (c) Includes additional amounts of \$2,048,000 for Victoria, \$678,000 for Western Australia and \$194,000 for Tasmania paid under the States Grants Act 1962. See Appendix II Part I. (d) See footnotes to Table 4. (e) See footnote (a) to Table 47.
 (f) Includes special revenue assistance. For details, see Tables 66-77.

1957-58(c)	141,471	100,811	59,389	34,962	29,931	13,436	348,100
1958-59	152,188	109,165	63,789	37,969	32,349	14,540	380,000
							410,000

* Formula altered in these years.

(a) Includes annual amounts of entertainments tax reimbursement grants as follows:

	Income Tax Reimbursement	Entertainments Tax Reimbursement	Total Tax Reimbursement
	\$'000	\$'000	\$'000
New South Wales	30,712	322	31,034
Victoria	13,034	746	13,780
Queensland	11,642		11,642
South Australia	4,722	194	4,916
Western Australia	5,092	196	5,288
Tasmania	1,776	74	1,850
Total	66,978	1,532†	68,510†

† Because the legislation came into operation on 1 October 1942, the total amount paid as entertainments tax reimbursement in 1942-43 was in fact \$384,000 less than the amount shown here. The total tax reimbursement grant for 1942-43 was, therefore, \$68,126,000.

(b) Paid on recommendation of the Commonwealth Grants Commission.

(c) The Commonwealth also provided for the States in this year an additional assistance grant to meet special circumstances. See Chapter IV of "Commonwealth Payments to or for the States, 1967-68".

1971-72 (Recommended)	7,800	14,800
TOTAL	158,832	321,278	246,747	726,857

(a) From 1949-50 special grants have been paid in two parts. One part represents the advance payment for the current financial year; the other represents the adjustment to the advance payment made two years earlier and is now known as the completion payment. The figures shown here are the amounts actually paid each year. Figures of final special grants paid in respect of each year from 1959-60 are given in Chapter II. Figures for previous years may be found in the Thirty-seventh Report of the Commonwealth Grants Commission, page 119.

(b) Adjustments to special grants for 1957-58 and 1958-59. The amounts were \$798,000 and \$2,054,000, respectively.

(c) Completion payment in respect of 1966-67.

(d) Grant recommended by the Commission for Tasmania was \$23,680,000, of which \$10,000,000 transferred to Tasmania's financial assistance grant for 1970-71. See page 23.

APPENDIX III—TABLES OF LOAN COUNCIL BORROWING PROGRAMMES

TABLE NO.	SUBJECT
48.	Borrowing Programmes for State Works and Housing, 1948-49 to 1971-72.
49.	Borrowings Approved by Loan Council for Semi-Government and Local Authorities, 1948-49 to 1971-72.
50.	Borrowings Approved by Loan Council for Semi-Government and Local Authorities, per Head of Population, 1948-49 to 1971-72.
51.	Borrowing Programmes for State Works and Housing and for State Semi-Government and Local Authorities, 1948-49 to 1971-72.
52.	Borrowing Programmes for State Works and Housing and for State Semi-Government and Local Authorities, per Head of Population, 1948-49 to 1971-72.
53.	The Financing of State Works and Housing Programmes, 1959-60 to 1970-71.

(a) Excludes \$6,362,000 allocated to the Commonwealth for emergency wheat storage.

(b) Includes special allocation of \$4 million.

(c) Works programme includes interest-free capital grant of \$200 million for State works and \$3 million special allocation for Western Australia.

(d) Programmes approved at June 1971 meeting of the Loan Council. The Commonwealth and State Housing Agreements having expired on 30 June 1971, there was no separate allocation to the States for housing purposes in 1971-72.

(e) Excludes \$6,720,000 which was not used for advances to the States for housing until 1951-52.

(f) Tasmania withdrew from the Commonwealth and State Housing Agreement in 1950-51 and repaid all principal owing out of loan money allocated by the Loan Council to the State in that year. Tasmania's housing requirements in the period shown were included in the State Government's loan programmes. Tasmania has been a party to the Commonwealth and State Housing Agreements from 1956-57.

(g) Includes carry-over payment from 1950-51 of \$6,720,000.

(h) Includes \$4 million in respect of finance for the Olympic Village.

- (a) Up to 1961-62 larger authorities were those borrowing \$200,000 or more in a financial year; from 1962-63 to 1966-67 authorities borrowing more than \$200,000 in a financial year; from 1967-68 larger authorities are those borrowing more than \$300,000 in the year and smaller authorities \$300,000 or less. From 1962-63 no overall limit has been set by the Loan Council on borrowings by the smaller authorities.
- (b) Following a decision of the Loan Council in February 1963, smaller authorities were permitted to borrow in excess of \$200,000 during 1962-63, provided the excess was included in borrowings against the programme for the larger authorities. The excess is in the figures for the larger authorities.
- (c) Borrowing programmes approved by the Loan Council in June 1971.
- (d) Includes borrowings totalling \$16,744,000 which were made following the decision of the Loan Council at its February 1962 meeting to permit the smaller authorities to borrow an additional \$200,000 during the remainder of the financial year, subject to State Government approval.
- (e) Borrowings by smaller authorities for 1971-72 arbitrarily assumed to be the same as in the previous year.

- (a) Includes \$40 million to finance advances which the Commonwealth agreed to make to Queensland to assist in the rehabilitation of the Mount Isa—Townsville—Collinsville railway.
 (b) Includes \$10 million set aside in 1962-63 to finance advances to the States for housing in 1963-64. See (c).
 (c) Includes \$10 million set aside from Special Bond raisings to finance advances to the States for housing in 1963-64. See (b).
 (d) Excludes \$20,303,000 proceeds of February 1969 public loan in Germany which were retained in Loan Fund for the purpose of financing the Commonwealth's share of the 1969-70 works and housing programme.
 (e) Includes proceeds of February 1969 public loan in Germany referred to in footnote (d).
 (f) Includes \$95 million to redeem maturing debt.
 (g) Comprising \$116,655,000 financed directly from Consolidated Revenue Fund and \$83,335,000 from the proceeds of issue of Commonwealth Treasury Notes.

APPENDIX IV—PART I—HISTORY OF SPECIFIC PURPOSE PAYMENTS

Chapter IV outlines the payments currently being made to the States for specific purposes of a revenue and a capital nature. Tables 54 and 55 following this Appendix show specific purpose payments according, respectively, to the nature of the payment and the type of State expenditure it is intended to assist. Table 54 also includes details of debt charges paid by the States in respect of loans for specific purposes from 1955–56 to 1971–72 (estimated). The sections which follow outline in more detail the history of some of the specific purpose payments, including payments for projects that have been completed in recent years.

EDUCATION—UNIVERSITIES

Commonwealth assistance to the States for universities was first introduced in 1951–52. Details of payments in the period 1951–52 to 1965–66 are given below. The basis of payments made since 1967 is outlined in Chapter IV.

Under the States Grants (Universities) Acts of 1951, 1953, 1955, 1956 and 1957 the Commonwealth provided financial assistance to the States for the running expenses of universities, on condition that the level of university income from State grants and fees reached, and was maintained at, certain basic levels. Additional Commonwealth assistance up to certain fixed amounts was also payable to the States on the basis of \$1 for each \$3 of State grants and fees in excess of these basic levels. Under the *States Grants (Universities) Act 1957* an amount of \$4.6 million was made available on this basis in each of the years 1957 and 1958.

Following an inquiry in 1957 by the Committee on Australian Universities under the chairmanship of Sir Keith Murray, C.M.G., Commonwealth assistance to the States for universities was considerably expanded. The *States Grants (Universities) Act 1958*, which incorporated the main recommendations of the Committee, came into force on 1 January 1958 and authorised payments to the States for universities up to \$42.8 million over the three calendar years 1958 to 1960. Apart from increased contributions towards the running expenses of universities, the new basis of assistance included emergency grants. In addition, provision was made, for the first time, for grants for capital works and equipment. Under the *States Grants (Universities) Act 1960* Commonwealth assistance for the 1958–1960 triennium was increased to \$43.9 million.

1961–63 Triennium

An Australian Universities Commission was established by the *Australian Universities Commission Act 1959* to inquire into and make recommendations on the subject of Commonwealth financial assistance to the States for universities.

The main financial recommendations in the Commission's first report, which was presented in October 1960, were incorporated in the *States Grants (Universities) Act 1960*. This Act carried on the principles of grants for capital works and equipment introduced in the 1958 legislation and it authorised total payments by the Commonwealth of \$84.6 million for the three calendar years 1961 to 1963. Subsequent amendments to that Act in 1962, 1963 and 1964 increased the maximum Commonwealth assistance to \$89.9 million. The 1962 amendment, which followed the presentation of the report by the Committee on Teaching Costs of Medical Hospitals, introduced the principle of capital assistance by the Commonwealth to the States for university projects in teaching hospitals.

1964–66 Triennium

For the three calendar years 1964 to 1966 Commonwealth grants to the States were based largely on the recommendations contained in the Second Report of the Australian Universities Commission presented in August 1963. These were incorporated in the *Universities (Financial Assistance) Act 1963* which provided for grants totalling \$116.8 million during the triennium—\$76.8 million for recurrent expenditure and \$40 million capital. Subsequent amendments to that Act in 1965 and 1966 following acceptance of proposals in the Reports of three other committees had the effect of increasing the grants for the triennium. The three reports were—

- (a) Report recommending increased academic salaries presented in October 1964 by Mr Justice Eggleston;
- (b) Report of the Committee on the Future of Tertiary Education in Australia, certain of whose recommendations were accepted in early 1965; and

- (c) Second Report of the Committee on Teaching Costs of Medical Hospitals presented in May 1965 arising from which it was decided to pay for the first time grants for certain recurrent expenditures of teaching hospitals and additional grants towards specific university projects of a capital nature in those hospitals.

In addition, it was also agreed that the recurrent grant for the Townsville University College be increased by \$38,000 in the last year of the triennium.

Overall, the effect of these various amendments was to increase recurrent grants to \$86.6 million and capital grants to \$47.6 million, a total of \$134.2 million.

DEVELOPMENT OF RURAL INDUSTRIES

Encouragement of Meat Production

For the purpose of stimulating pastoral development in accordance with Australia's commitments under the Fifteen Year Meat Agreement with the United Kingdom, the Commonwealth agreed in 1949 to provide financial assistance for new and improved facilities for the movement of cattle in the channel country of Queensland and in the area serving the meatworks at Wyndham, Western Australia.

The Governments of Queensland and Western Australia were responsible for construction work within their respective States, and the Commonwealth undertook to provide them with grants amounting to \$4.3 million. This undertaking was written into the *States Grants (Encouragement of Meat Production) Act 1949-1954*.

Annual figures of the payments to each State from 1959-60 are given in the tables in Appendix V.

Recharging of Cattle Dips

Special payments of \$96,000 to New South Wales and \$10,000 to Queensland were made by the Commonwealth in 1962-63 towards the costs of changing the chemicals in cattle dips.

Tobacco Industry Extension Services

In each of the years 1962-63 and 1963-64 the Commonwealth made a grant of \$48,000 to the tobacco-growing States for additional extension services for tobacco growers. The distribution of this amount in each year was \$6,000 to New South Wales, \$16,000 to Victoria and \$26,000 to Queensland.

DEVELOPMENT AND CONTROL OF WATER RESOURCES

Ord River Irrigation Project

Under the *Western Australia Grant (Northern Development) Act 1958-1959*, grants totalling \$10 million were made available for development of the northern part of the State. The bulk of this assistance (\$8.1 million) was spent on the Ord River diversion dam and main irrigation channel (Stage 1). The remainder was spent on harbour works (*see below under 'Harbours and Port Facilities'*). Annual figures of grants paid under this Act from 1959-60 for the Ord project are shown in Table 74 in Appendix V. Figures for previous years are given in earlier editions of this document.

Under the *Western Australia (Northern Development) Agreement Act 1963* an amount of \$7 million was made available to Western Australia primarily for the construction of a new deep-water jetty at Broome and for the construction of further irrigation works within the first stage of the Ord irrigation project. Grants of \$4 million were provided for the Ord project, the final payment of \$1.1 million being made in 1965-66. (*See below under 'Harbours and Port Facilities'* for details of assistance for the Broome Jetty.) Annual figures of grants paid under this Act for the Ord project are shown in Table 74 in Appendix V.

For details of assistance under current legislation *see* Chapter IV.

Western Australia Water Supply

Under the *Western Australia Grant (Water Supply) Act 1948-1957* the Commonwealth provided \$10 million by way of non-repayable grants to finance the cost of construction of a comprehensive water supply scheme. The assistance partly financed the reticulation of water to townships and homesteads in a wheat belt area of about 4 million acres inland from Perth, and to towns along the Great Southern Railway from Beverley to Katanning. It also helped to finance an increased supply of water to the Eastern Goldfields area of the State. The final payment was made by the Commonwealth in 1961-62. Payments in each year from 1959-60 are shown in Table 74 in Appendix V.

For details of assistance under current legislation *see* Chapter IV.

Blowering Reservoir

The *Blowering Water Storage Works Agreement Act 1963* gave effect to an arrangement with New South Wales for the construction of the Blowering Reservoir on the Tumut River for the control and conservation of water released into that river as a result of the operation of the Snowy Mountains scheme. The reservoir commenced storing water in May 1968. The bulk of the work involved was undertaken by the Snowy Mountains Hydro-electric Authority at the expense of New South Wales. Under the Agreement, however, the Commonwealth financed half of the total expenditure incurred by the State, by means of interest-bearing loans. Repayment of each loan will commence ten years from the date on which it was made and will be spread over a further period of ten years.

Payments by the Commonwealth amounted to \$20.5 million. Annual figures of payments and debt charges are shown in Table 67 in Appendix V.

Flood Mitigation

The *New South Wales Grant (Flood Mitigation) Act 1964-1968* authorised the Commonwealth to provide grants of up to \$8 million to New South Wales, over the six-year period to 30 June 1969, to match the State's assistance to local government authorities for approved flood mitigation works on the Macleay, Clarence, Richmond, Tweed, Shoalhaven and Hunter Rivers.

Commonwealth payments amounted to \$8 million. Annual payments prior to 1968-69 are given in Table 66 in Appendix V. For details of assistance under current legislation see Chapter IV.

ROADS

Commonwealth Aid for Roads

Payments have been made by the Commonwealth to the States for expenditure on roads since 1923-24. Details of payments between 1923-24 and 1968-69 are given below. Payments under current legislation are dealt with in Chapter IV.

The *Main Roads Development Act 1923* provided for payment to the States of a single lump sum of \$1 million, subject to a \$1 for \$1 contribution by the States themselves. The basis of distribution of the total sum amongst the States, although not explicitly stated as such, was 5 per cent to Tasmania and the remainder divided on the basis of the 'two-fifths area, three-fifths population' formula which subsequently applied until 1959-60. Subsequent amendments to the Act increased the sum payable, first by \$1 million in 1924 and then by a further \$1.5 million in 1925.

Under the *Federal Aid Roads Act 1926* annual allocations of \$4 million were provided and were distributed amongst the States on the explicitly stated formula of 5 per cent to Tasmania and the remainder divided on the basis of two-fifths area, three-fifths population. Among other changes, the Act reduced the matching contribution required of the States to \$1.50 for each \$2 provided by the Commonwealth.

The *Federal Aid Roads Act 1931* amended the Act of 1926 by repealing the requirement for matching State contributions. Also, instead of the previous provision of a fixed annual amount, the allocations for roads were explicitly associated with the yield from petrol tax, being determined on the basis of 2.083 cents (2½d.) and 1.25 cents (1½d.) per gallon of petrol cleared for Customs duty and Excise duty purposes, respectively.

The *Federal Aid Roads and Works Act 1937*, while maintaining the previous rates of allocations to the States for road works, allocated the equivalent of an additional 0.416 cents (½d.) per gallon of petrol subject to either Customs or Excise duty to be used by the States either on road works or on other works connected with transport. Of this additional allocation, the States could be required to use up to one-twelfth on roads adjoining or approaching Commonwealth properties.

The *Commonwealth Aid Roads and Works Act 1947* provided for allocations of 2.5 cents (3d.) and 1.666 cents (2d.) per gallon of petrol subject to Customs duty and Excise duty, respectively. Of the proceeds of these allocations, the States could spend up to one-sixth on other works connected with transport. In addition, the Act provided a sum of \$2 million per annum to be spent on rural roads. By subsequent amendments to the Act in 1948 and 1949, this sum was raised to \$4 million and then to \$6 million. An amount of \$1 million per annum was also provided for Commonwealth expenditure on strategic roads and roads of access to Commonwealth properties. A further \$200,000 per annum was provided for the promotion of road safety measures.

The amounts per gallon of dutiable petrol allocated for roads were increased under the *Commonwealth Aid Roads Act* 1950 to 5 cents (6d.) and 2.91 cents (3½d.) respectively. The amount of \$1.2 million for expenditure by the Commonwealth on strategic roads and road safety, which had previously been provided separately by the Commonwealth, was now provided from the amounts allocated on the basis of petrol clearances. In addition, the former lump sum provision for expenditure by the States on rural roads was replaced by a new provision requiring at least 35 per cent of the total amount allocated to be spent on such roads.

In the *Commonwealth Aid Roads Act* 1954 the amounts allocated for roads in respect of petrol subject to duty, whether Customs or Excise, were raised to the uniform rate of 5.83 cents (7d.) per gallon. They were subsequently increased to 6.666 cents (8d.) per gallon in March 1956. The minimum proportion to be spent on rural roads was increased from 35 per cent to 40 per cent, and the total amount which could be spent on other works connected with transport by road or water was reduced to a flat sum of \$2 million per annum. From the total allocation, \$1.8 million per annum was reserved to the Commonwealth. This was raised to \$1.9 million in 1955.

In association with the imposition of a tax of 10 cents (1s.) per gallon on automotive diesel fuel consumed in road-using vehicles, the Commonwealth agreed to provide special assistance for roads of \$6 million in each of the years 1957–58 and 1958–59. The Commonwealth retained \$100,000 for Commonwealth road purposes and the balance of this special assistance was distributed between the States on an arbitrary basis.

Following a special conference on roads convened by the Commonwealth in February 1959, proposals for a new scheme of Commonwealth aid for roads were placed before State Premiers in March of that year. These proposals were later enacted in the *Commonwealth Aid Roads Act* 1959, which operated for five years commencing 1 July 1959. Under that Act the Commonwealth made payments totalling \$500 million to the States for roads, or almost \$200 million more than was provided during the five years of the previous legislation. This amount comprised basic grants totalling \$440 million and additional grants totalling \$60 million which were made available to the States, subject to certain annual limits, on the basis of \$1 for each \$1 allocated by the State Governments from their own resources for expenditure on roads over and above the amounts allocated by them for roads expenditure in 1958–59.

In the 1959 Act three important changes were made in the bases of road grants to the States. Commonwealth road grants to the States were no longer determined on the basis of petrol clearances; a change in the distribution of the grants between the States was effected by the inclusion of motor vehicle registrations in the distribution formula as a third and equal factor with area and population; and the condition of \$1 for \$1 matching expenditure by the States was introduced for that part of the financial assistance described as the additional grant.

The 1959 Act expired on 30 June 1964, and was replaced by the *Commonwealth Aid Roads Act* 1964, which operated for the five year period 1964–65 to 1968–69 inclusive. Under this Act, the main features of which were agreed at a special Premiers' Conference held in March 1964, payments totalling \$750 million were made to the States for roads. This amount was made up of a basic grant of \$660 million and an additional grant of \$90 million. As in the 1959 Act, the additional grants were payable on the basis of \$1 for every \$1 spent on roads by the State Governments from their own resources over and above certain base amounts. These base amounts were the sums required to be allocated by the States for roads expenditure in order to qualify for their additional grants in 1963–64, the last year of operation of the 1959 Act. The distribution of the grants among the States was on the same basis as under the 1959 Act outlined above.

Several provisions contained in both the 1954 and the 1959 Aid Roads Acts were repeated in the 1964 legislation. These included the requirement that not less than 40 per cent of the funds made available by the Commonwealth in each year be spent on roads in rural areas, other than highways, main roads and trunk roads. The States were also permitted to spend between them up to \$2 million each year out of the road grants on works, other than the construction of roads, connected with transport by road or water. The 1964 Act extended the provision in the 1959 legislation permitting the States to make payments for, or in connection with, research relating to the construction, maintenance or repair of roads so as to include research relating to the planning and design of roads.

The 1964 Act expired on 30 June 1969 and was replaced by the *Commonwealth Aid Roads Act* 1969 which will operate over the five year period 1969–70 to 1973–74, inclusive.

Table 60 following this Appendix shows annual payments to the States for roads from 1923–24. Prior to 1959–60 payments did not coincide exactly with allocations and figures of these are given in Table 61.

Beef Cattle Roads

(a) Queensland

The *Queensland Grant (Beef Cattle Roads) Act* 1961 provided for financial assistance to Queensland of \$10 million during the five-year period from July 1961 for the construction of beef cattle roads. Under the *Queensland Beef Cattle Roads Agreement Act* 1962, which superseded the 1961 legislation, the amount of assistance was increased by \$6.6 million to an amount not exceeding \$16.6 million in order to include the cost of bitumen sealing the roads. For amounts of Commonwealth assistance in excess of \$3.4 million, half was paid by way of grant and half by way of interest-bearing loans each repayable over 15 years. The last payment to Queensland under this Agreement was made in 1966-67.

The *Queensland Beef Cattle Roads Agreement Act* 1966 provided further financial assistance during 1966-67 of \$3.9 million, one half by way of grant and the other half by way of interest-bearing loans each repayable over 15 years.

(b) Western Australia

Under the Western Australia Grant (Beef Cattle Roads) Acts 1961 and 1962, grants were made to Western Australia of \$1 million in 1961-62, \$1.4 million in 1962-63 and \$1.5 million in each of the three succeeding years for certain beef cattle road works in the northern part of the State. The State was required to spend at least an equivalent amount in the aggregate from its own resources on roads generally in the north.

Under an amendment to this legislation, the Commonwealth provided a further grant of \$1.5 million in 1966-67 on the same terms as applied in previous years.

Payments by the Commonwealth under these Acts to Queensland and Western Australia for beef roads from 1961-62 until 1966-67 are shown in Table 35. For details of assistance under current legislation see Chapter IV.

Gordon River Road

Under the *Tasmania Grant (Gordon River Road) Act* 1964-1967 the Commonwealth provided financial assistance to Tasmania by way of a non-repayable grant of \$5 million to assist in financing the construction of a road, approximately fifty miles in length, into the Gordon River region of south-west Tasmania. The primary purpose of the road was to enable detailed investigation and development of a further stage of the Tasmanian hydro-electric system. The final payment of \$200,000 to Tasmania was made in 1967-68. Annual figures of payments prior to 1967-68 are given in Table 76 in Appendix V.

RAILWAYS

The Commonwealth has given assistance to the States for a number of railway projects that have now been completed. Details of this assistance are outlined below and Table 62 which follows this Appendix gives annual figures of payments to the States for the years 1951-52 to 1971-72 (Estimate). Details of payments made by the States for interest and repayment of loans (except debt charges in respect of loans for the Grafton-South Brisbane railway) are given in Table 63.

(a) Grafton-South Brisbane Railway

In 1924, the Commonwealth entered into an agreement with New South Wales and Queensland for the construction of a standard gauge railway between Grafton and South Brisbane. The railway was built at a cost of \$9 million and was opened for traffic in 1930. The project was regarded for financing purposes as part of a wider standardisation scheme, initiated in 1920 but later abandoned, under which 20 per cent of the cost was to have been met by the Commonwealth and 80 per cent by the five mainland States in proportion to their populations. In this instance, the Commonwealth agreed to meet the shares of the three non-participating States as well as its own. The approximate allocation of cost on this basis was—Commonwealth 56 per cent; New South Wales 32 per cent; and Queensland 12 per cent. All of the funds were provided initially by the Commonwealth but each party became responsible for meeting the debt charges on its agreed share of the cost.

(b) Albury-Melbourne Railway

Under the *Railway Standardization (New South Wales and Victoria) Agreement Act* 1958 the Commonwealth provided \$31.9 million for the construction of the standard gauge rail link between Albury and Melbourne. Each of the two States is repaying 15 per cent of the cost of construction by instalments over a period of fifty years, plus interest on outstanding balances.

(c) *Railway Equipment (South Australia)*

Under the *Railway Equipment Agreement (South Australia) Act 1961* the Commonwealth provided \$2.6 million to the State for the purchase of twelve diesel-electric locomotives and 100 wagons of 3 ft 6 in gauge for ore traffic on the Broken Hill-Port Pirie line. The Equipment Agreement required that the locomotives and wagons be readily convertible to standard gauge when the gauge of the railway is widened, and that the cost of conversion be met entirely by the State. The State is repaying 30 per cent of the cost of the equipment by instalments, with interest, over a period of fifty years.

(d) *Queensland*

The Commonwealth provided advances totalling \$35.1 million to Queensland under the *Railway Agreement (Queensland) Acts 1961 and 1968* for the reconstruction of the Mount Isa-Townsville-Collinsville railway. The State is repaying these advances with interest over twenty years.

(e) *Parkes-Broken Hill Railway*

Under the *Railway Agreement (New South Wales) Act 1968* the Commonwealth made a grant of \$10 million to New South Wales towards the cost of upgrading the railway line between Parkes and Broken Hill.

HARBOUR AND PORT FACILITIES

Loading Facilities for Export of Coal

(a) *New South Wales*

Under the *Coal Loading Works Agreement (New South Wales) Act 1961* the Commonwealth made financial assistance of \$5.3 million available to the State, on a \$1 for \$1 basis, towards the cost of improvements in coal loading works at the ports of Newcastle, Port Kembla and Balmain being undertaken by the State Government. Financial assistance by the Commonwealth was designed to expedite completion of the coal loading works and to facilitate expansion of coal exports through these ports. The State, for its part, undertook to carry out the coal loading works and related harbour improvements.

Of the assistance provided by the Commonwealth, \$2 million was made available by way of grant from the Coal Industry Fund of the Joint Coal Board. The remaining amount of \$3.3 million was provided in the form of interest-bearing loans each repayable over ten years.

Annual figures of payments to New South Wales for coal loading facilities, and of debt charges paid by the State, are given in Tables 66 and 67 in Appendix V.

(b) *Queensland*

Under the *Coal Loading Works Agreement (Queensland) Act 1962* the Commonwealth provided \$400,000 of the total estimated cost of \$810,000 for improvements to coal loading facilities at Gladstone. Coal from the Moura coal-fields in central Queensland is shipped from this port for export to Japan.

Of the total Commonwealth assistance of \$400,000 half was by way of grant and half by way of interest-bearing loans each repayable over fifteen years.

Annual figures of payments to Queensland for coal loading facilities, and of debt charges paid by the State, are given in Tables 70 and 71 in Appendix V.

Weipa Harbour Works

Under the *Weipa Development Agreement Act 1965* the Commonwealth provided \$3.3 million to Queensland during 1965-66 and 1966-67 to enable the State to finance the construction of harbour works at Weipa in north Queensland where large bauxite deposits are being exploited. The assistance was made available in the form of an interest-bearing loan repayable over thirty years commencing July 1967.

Annual figures of payments to the State and of debt charges paid by the State are shown in Tables 70 and 71 in Appendix V.

Western Australia Northern Harbours

Under the *Western Australia Grant (Northern Development) Act 1958-1959*, grants totalling \$10 million were made for development of the northern part of the State. While the bulk of this assistance (\$8.1 million) was spent on the Ord River diversion dam and main irrigation channel (Stage 1)—see above

under 'Development and Control of Water Resources'—the remaining \$1.9 million was spent on harbour works, mainly the Wyndham Jetty. Annual figures of grants paid under this Act from 1959–60 for harbour works are shown under the heading 'Northern Harbours' in Table 74 in Appendix V. Figures for previous years are given in earlier editions of this document.

Under the *Western Australia (Northern Development) Agreement Act* 1963 payments of \$7 million were made to Western Australia primarily for the construction of a deep-water jetty at Broome and the construction of further irrigation works within the first stage of the Ord irrigation project.

In the case of the Broome jetty a total of \$2.95 million was provided, 50 per cent by way of grant and 50 per cent by way of interest-bearing loans each repayable over fifteen years. The final payment of \$1.15 million was made in 1965–66. (Details of assistance for the Ord project are given above under 'Development and Control of Water Resources'.) Annual figures of loans and debt charges for the Broome Jetty are shown under the heading of 'Northern Harbours' in Table 75 in Appendix V.

Replacement of Derby Jetty

Under the *Derby Jetty Agreement Act* 1962 financial assistance of \$1.6 million was made available to Western Australia towards the cost of constructing a new jetty with improved facilities at Derby. Half of the assistance was provided by way of grant, the other half by way of interest-bearing loans each repayable over fifteen years. Annual figures of payments and debt charges are given in Tables 74 and 75 respectively in Appendix V.

APPENDIX IV—PART II—TABLES OF SPECIFIC PURPOSE PAYMENTS

TABLE NO.	SUBJECT
54.	Total Specific Purpose Payments, 1955-56 to 1971-72.
55.	Specific Purpose Payments by Function, 1957-58 to 1971-72.
56.	Interest and Sinking Fund Payments under the Financial Agreement, 1927-28 to 1971-72.
57.	Universities, Grants for, 1951-52 to 1971-72.
58.	Tuberculosis Hospitals, Grants for, 1949-50 to 1971-72.
59.	Natural Disasters, Payments in respect of, 1949-50 to 1971-72.
60.	Roads, Payments to States for, under Aid Roads Acts and Comparable Legislation, 1923-24 to 1971-72.
61.	Roads, Allocations for, under Aid Roads Acts and Comparable Legislation, 1923-24 to 1958-59.
62.	Railway Projects, Payments for, 1951-52 to 1971-72.
63.	Railway Projects, Debt Charges on Loans for, 1952-53 to 1971-72.

(a) Excludes the cost of emergency assistance provided by the Defence Services.

(b) Includes overpayment of \$21,000 refunded by the State in 1966-67.

(c) Includes overpayment of \$58,000 repaid by the State in 1968-69.

(d) The figures for these years include the following payments for roads purposes financed from the Commonwealth Aid Roads (Supplementary) Trust Account: 1956-57, \$324,000; 1957-58, \$670,000; and 1958-59, \$312,000.

(e) Includes overpayment of \$56,000 refunded by the State in 1969-70.

(f) Includes overpayment of \$1 million for bushfire relief refunded by the State in 1969-70.

(a) The amounts paid to the States under Aid Roads and comparable legislation did not coincide with allocations made by the Commonwealth under such legislation before 1959-60. Amounts allocated for roads by the Commonwealth under Aid Roads and comparable legislation in each year since 1923-24 are shown in Table 61.

(b) These figures do not include expenditure in the States on strategic roads, roads serving Commonwealth purposes and road safety.

(c) The figures for 1957-58 and 1958-59 include the following amounts which each State received from the \$6,000,000 special assistance grant for roads allocated in each of those years; New South Wales, \$1,600,000; Victoria, \$1,400,000; Queensland, \$1,000,000; South Australia, \$650,000; Western Australia, \$950,000; and Tasmania, \$300,000.

(d) These figures include a special adjusting payment of \$508,000 to Western Australia under Section 4 (3.) of the 1959 Act and a final adjusting payment of \$3,338,000 to complete commitments under the 1954 Act. This latter payment was distributed; New South Wales, \$916,000; Victoria, \$586,000; Queensland, \$642,000; South Australia, \$374,000; Western Australia, \$652,000; and Tasmania, \$168,000.

(a) Since 1958-59 the amounts allocated for roads under Aid Roads legislation have coincided with payments under such legislation. The actual payments made to the States under Aid Roads legislation in each year since 1923-24 are shown in Table 60.

(b) From 1947-48 to 1958-59 specific provision for these purposes was made in the various Commonwealth Aid Roads Acts; in other years any Commonwealth expenditures have been met from annual appropriations. Portions of the amounts shown in this column were used to finance grants for promotion of road safety practices and for maintenance of the Eyre and Barkly Highways.

(c) The figures for 1957-58 and 1958-59 include the \$6,000,000 special assistance grant for roads allocated in each of those years. This grant was arbitrarily distributed: New South Wales, \$1,600,000; Victoria, \$1,400,000; Queensland, \$1,000,000; South Australia, \$650,000; Western Australia, \$950,000; Tasmania, \$300,000; and Commonwealth purposes, \$100,000.

(a) No grants for railways made to Queensland.

(b) Figures for grants are increased and for loans decreased in each year after 1951-52 by the rebates allowable under clause 16 (3.) of the Agreement.

(c) Includes a contribution of \$28,000 towards preliminary survey work.

(d) Includes advance of \$16,000 repaid in 1964-65.

(e) Expenditure less repayment of advance of \$16,000 made in 1963-64.
