#### **1989-90 BUDGET PAPERS**

Budget Speech

No. 1 Budget Statements 1989-90

Contains detailed information on the Budget figuring and measures, an historical perspective and explanatory material on the broader economic context.

No. 2 The Commonwealth Public Account 1989-90

Contains information relating to the Consolidated Revenue Fund (including the Appropriation Bills Nos 1 and 2 and Appropriation (Parliamentary Departments) Bill), the Loan Fund and the Trust Fund.

- No. 3 Portfolio Program Estimates 1989-90 Presents an analysis of appropriations, outlays and staffing for each portfolio in program format. It also provides information on running costs and staffing by department and agency.
- No. 4 Commonwealth Financial Relations with other levels of Government 1989-90

Provides information on Commonwealth financial relations with the States, Territories and local government, and on budget developments in the State/local sector.

# **1989-90 BUDGET RELATED PAPERS**

- No. 1 Government Securities on Issue at 30 June 1989 Provides data on the structure and movement of securities of the Commonwealth, the States and the Northern Territory.
- No. 2 National Income and Expenditure 1988-89 Gives estimates of gross domestic product, gross national expenditure and national income for the last five years.
- No. 3 Income Tax Statistics 1987-88 Income Year Contains a summary of certain income tax data for individuals and companies for the income year 1987-88.
- No. 4 Australia's Overseas Aid Program 1989-90 Details Australia's overseas aid programs.
- No. 5 Commonwealth Capital Works Program 1989-90 Contains details of medium and major budget-funded capital works.
- No. 6 Women's Budget Statement 1989-90 An assessment of the impact on women of the 1989-90 Budget.
- No. 7 Portfolio Explanatory Notes 19 Volumes—Presents details of 1988-89 expenditure and estimates for 1989-90 on a program basis and relates these figures to program performance.
- No. 8 Towards a Fairer Australia: Social Justice Budget Statement 1989-90 Contains a summary of 1989-90 Budget measures relating to social justice.
- No. 9 Towards Social Justice for Young Australians Contains a summary of 1989-90 Budget social justice measures for young Australians.
- No. 10 Science and Technology Budget Statement 1989-90 Outlines Commonwealth support for science and technology with a particular focus on major Commonwealth research agencies and programs supporting research-related activities.
- Report of the Auditor-General

A report on the Financial Statements prepared by the Minister for Finance for the year ended 30 June 1989.

(This document is to be released in November 1989).

#### PREFACE

This Paper presents information on the Commonwealth Government's financial relations with State, Territory and local governments.<sup>(1)</sup>

#### **Relationship with Other Budget Papers and Terminology**

When examining government finances, the most relevant aggregates for economic analysis are usually those relating to payments on a net basis—that is, after repayments of Commonwealth Government loans and sinking fund contributions by the States and the Territories in respect of borrowings by the Commonwealth on their account. This approach is adopted in other budget papers and the national accounts. However, repayments tend to lag the initial advances and, in many cases, are made in respect of programs which have already terminated. Moreover, repayments can be met from a variety of funds and their direct relationship to the programs to which they nominally relate is not always clear. Largely for these reasons, this Paper records payments on a gross basis, although tables showing repayments are included to enable net figures to be derived.

In Budget Paper No. 1, the term 'payment' is used as a gross measure and the term 'outlay' as a net measure. In this Paper, 'payment' is used also as a generic term to describe the flow of both grants and advances (loans) from the Commonwealth to the States, the Territories and local government authorities (for example, specific purpose payments). The use of the term 'payment' in this manner is consistent with this Paper's emphasis on gross flows and with the use in Budget Paper No. 1. In instances where the net measure is more appropriate, the term 'net payment' is used.

Statement No. 6, 'Transactions of the Public Sector as a Whole' of Budget Paper No. 1 discusses developments in the State/local sector in a broader context. That discussion principally turns on the distinction between general government and public trading enterprises, and complements the discussion in Chapter II of this Paper on the 'Structure and Trends in State and Local Government Finances'.

#### **Treatment of the Territories**

The Northern Territory (NT) became a self-governing Territory on 1 July 1978 under the *Northern Territory (Self-Government) Act 1978.* It has outlays responsibilities and revenue raising powers similar to those of a State, although the NT is not a State under the Constitution. It operates under financial arrangements that are the same as, or modelled on, arrangements with the States.

The Australian Capital Territory (ACT) became a self-governing Territory on 11 May 1989 under the Australian Capital Territory (Self-Government) Act 1988. The ACT has responsibility for functions carried out by both State and local governments. Some State-type functions (policing and the judiciary) are yet to be transferred to the

<sup>(1)</sup> Information for earlier years is contained in previous issues of Budget Paper No. 4, Commonwealth Financial Relations with Other Levels of Government, and in the predecessor to that Paper, Budget Paper No. 7, Payments to or for the States, the Northern Territory and Local Government Authorities. The 1975-76 issue of the latter Paper contained a consistent series of aggregate figures from 1956-57, details of borrowing programs from 1951-52 and details of the various specific purpose payments from their inception. The 1981-82 issue contained a historical summary of general purpose assistance showing general revenue payments from 1950-51 and special grants from 1910-11.

ACT. No specific timetable has been established for the transfer of policing but the transfer of judicial functions is to be complete by 1992. Commonwealth expenditures in the ACT for national purposes will continue to be financed from the Commonwealth Budget; maintenance of the Parliamentary Triangle, for example, is to be undertaken by the ACT on an agency basis, with the ACT recovering costs from the Commonwealth. Similarly, the Commonwealth is providing some services (for example, auditing and administrative review functions) on an agency basis to the ACT.

Like the NT, the ACT is not a State under the Constitution. Under self-government, however, the Commonwealth's financial relations with the ACT and arrangements for borrowings by ACT semi-government authorities, government-owned companies and trusts are to be comparable to those for the States.

Prior to May 1989, the ACT finances were included in the Commonwealth Budget. In preparation for self-government, a separate system of ACT accounts within the Commonwealth Budget—an ACT 'fiscus'—was established on 1 July 1988. ACT territorial and municipal taxes, charges and other receipts were paid into these accounts and expenditures made from them until 'Self-Government Day' on 11 May 1989. The Commonwealth's subventions to the ACT fiscus took the form of payments analogous to those made to the States and the NT.

The subventions made prior to self-government are classified in Budget Paper No. 1 as internal budget transfers and not as outlays; outlays from the ACT fiscus are treated as outlays by the Commonwealth. On Self-Government Day, balances held in the Commonwealth's ACT accounts were transferred to the ACT Government. In Budget Paper No. 1, the payments of these balances and all Commonwealth assistance paid after 11 May 1989 have been classified as transfers to other governments.

Because of the difficulties in making comparisons between 1988–89 and 1989–90 on the basis of the treatment adopted for Budget Paper No. 1, ACT payments are generally excluded from summary tables in this paper (ie the summary tables relate only to the States and the NT). However, so that data presented separately for the ACT are on a more comparable basis:

- amounts paid into the ACT fiscus prior to self-government are treated as payments to the ACT in 1988–89; and
- to avoid double-counting, payments to the ACT of the balances held in the Commonwealth's ACT accounts on Self-Government Day are not treated as payments to the ACT, as these amounts reflect receipts of payments and own source revenues into the ACT fiscus prior to self-government.

The footnote to Table 54 in Appendix III provides a reconciliation between 1988–89 ACT payments in this Budget Paper and Budget Paper No. 1. Even after adjusting for these factors, however, it should be noted that comparisons between years for the ACT are affected by the provision of a number of transitional payments to the ACT in 1988–89 on a 'once only' basis as well as 'base' adjustments for payments in 1989–90. It is intended that the treatment of the ACT in this Paper will reflect the treatment in Budget Paper No. 1 from the 1990–91 issue, when comparable data will be published for 1989–90 and 1990–91.

#### **Population Figures Used in this Paper**

The population series underlying *per capita* figures in this Paper are, with the exception of 1988–89 and 1989–90, the mean resident populations for the financial year published by the Australian Bureau of Statistics (ABS) in *Australian Demographic Statistics* (Catalogue No. 3101.0). The ABS estimates of population at 31 December 1988 have been used for 1988–89 and Treasury projections of population at 31 December 1989 have been used for 1989–90. Those population figures are in Table 8.

#### **Further Information**

A number of ABS publications provide information that is relevant in analysing Commonwealth financial relations with other levels of government, including:

- Government Financial Estimates, Australia (5501.0);
- Commonwealth Government Finance (5502.0);
- State and Local Government Finance, Australia (5504.0);
- Taxation Revenue, Australia (5506.0);
- Public Sector Debt, Australia, 30 June 1987 (5513.0); and
- Classifications Manual for Government Finance Statistics, Australia (1217.0).

Much of the data presented in Chapter II are sourced from the ABS public finance statistics. Some of the data presented in Chapter III are also drawn from publications of the Commonwealth Grants Commission, including the *Report on General Revenue Grant Relativities 1989 Update*.

#### **Style Conventions**

The following style conventions are employed in this Paper.

- References to the 'States' do not include the NT or the ACT; references to the 'States and the Territories' include the six States, the NT and the ACT.
- The 'State and local government sector' is denoted as the 'State/local sector'. References to the 'State/local sector' and the 'State government sector' include the NT from 1978 but exclude the ACT. The ACT is to be transferred from the Commonwealth to the State/local sector after 1989–90.
- Figures in tables, and generally in the text, have been rounded. Discrepancies in tables between totals and sums of components reflect rounding. Percentage changes in all tables are based on the underlying unrounded amounts and not the rounded amounts.
- The following notations are used in the tables:
  - na not available or not applicable
  - ... zero, or rounded to zero

1.1.1

#### **CHAPTER I—INTRODUCTION**

The Commonwealth Government's financial relations with the States and the Territories involve:

• the provision of financial assistance from the Commonwealth Budget. This assistance may be classified as:

and a second state

A State of the second second

- general purpose or specific purpose payments;
- payments for current or capital purposes; and
- grants or advances (loans);
- borrowings undertaken by the Commonwealth on behalf of the States under the Financial Agreement. No new borrowings of this type have been undertaken since 1986–87; and
- the determination of Loan Council 'global' limits on borrowings by State and Territory semi-government and local authorities, and government-owned companies and trusts. Commonwealth authorities' borrowings are also subject to 'global' borrowing limits.

#### Forms of Commonwealth Financial Assistance to the States and the Territories

Payments to the States and the Territories accounted for about 30% of Commonwealth Budget outlays in 1988–89 and were equivalent to around 40% of State and Territory outlays; Commonwealth payments to local government amount to about 1.5% of Commonwealth Budget outlays and are equivalent to about 15% of local government outlays.

#### Financial Assistance to the States and the Territories

- General revenue assistance consists of untied grants to assist in meeting current outlays. They constitute the largest inter-government transfer, accounting for around 50% of estimated Commonwealth net payments to the States and the Territories in 1989–90.
- General purpose capital payments are untied payments to assist with outlays for capital purposes. They originally comprised advances at market interest rates of the proceeds of borrowings by the Commonwealth on behalf of the States. In recent years, however, they have comprised largely capital grants by the Commonwealth in *lieu* of borrowings and concessional loans nominated by the States and Territories for public housing purposes. The program for the States and the NT is to be provided completely by way of a capital grant in 1989–90, following the replacement of concessional loans for public housing with grants under the Commonwealth State Housing Agreement. (Some of the program for the ACT is still to be provided by way of advances.)

 Specific purpose payments are payments to assist in meeting expenditures for purposes designated by the Commonwealth and/or as a condition of the States and the Territories agreeing to undertake particular projects. In 1989–90, around 75% of specific purpose payments are for current purposes and virtually all are provided as grants. Some payments are passed on by the States and the NT to their local government authorities. The amounts passed to local government are generally determined by the State and NT Governments, although in certain instances (such as road funding) the amounts are subject to Commonwealth approval.

#### Financial Assistance to Local Government

In addition to the assistance passed on by the States and the NT at their discretion, local government is eligible for two direct forms of Commonwealth payments:

- general purpose assistance comprising untied grants which are the local government equivalent of general purpose assistance to the State government sector. The grants are paid initially to the States and the NT who are required to pass on the full amounts to local government authorities. The ACT Government (which has both territorial and municipal responsibilities) also receives comparable assistance in respect of its local government functions; and
- *direct payments* made to local government authorities under various programs (eg children's services).

Table 1 shows payments to the State/local sector categorised under these headings for the years since 1985–86. Table 2 shows some of the payments on a per capita basis. Additional details are provided in the appendices at the end of this Paper.

(a) Estimate.

#### State and Local Authority Borrowings

Each year, the Loan Council approves annual borrowing programs (comprising both new money borrowings and refinancings) by Commonwealth and State semi-government and local authorities, government-owned companies and trusts as well as by the NT and the ACT. Chapter IV provides more information about these arrangements.

#### **Institutional Arrangements**

The framework for the management of financial relations between the Commonwealth, States and Territories has evolved to cover the determination of both general purpose and specific purpose funding. The most important institutional arrangements dealing with general purpose funding are:

- the Premiers' Conference (which predates Federation in 1901);
- the Australian Loan Council (established informally in 1923 and formally in 1927); and
- the Commonwealth Grants Commission (established in 1933).

It is at the annual Premiers' Conference that the amount and distribution of general revenue assistance are determined. These payments are subject to negotiation among the Commonwealth, the States and the Territories at the Conference. The distribution among the States and the NT is generally determined having regard to the *per capita* relativities determined and periodically reviewed by the independent Commonwealth Grants Commission. These relativities are set with a view to compensating the States and the NT for relative revenue and expenditure disabilities in their current budgets; Chapter III provides more detail.

The amount and distribution of specific purpose payments is usually determined formally in the context of the Commonwealth's Budget deliberations. The details concerning program implementation are worked out with State, Territory and local governments. Such discussions are undertaken either on a bilateral basis between the Commonwealth and the relevant State, Territory or local government, or through more formal channels such as Commonwealth-State Ministerial Councils or Conferences. These Councils or Conferences deal with non-financial matters as well as with the funding of various programs. For example, meetings of Commonwealth and State Education Ministers (the Australian Education Council) have been considering recently a National Strategy for Schools, which has included proposals for common educational curricula.

Under the Financial Agreement of 1927, the Loan Council, which generally meets on the same day as the Premiers' Conference, has responsibility for determining the level of borrowings by the Commonwealth Government on its own behalf and on behalf of the State Governments. Except in limited circumstances, State Governments are not permitted to borrow directly in their own right. However, the development of State central borrowing authorities (CBAs) in recent years, has meant that State Governments can indirectly access the funds borrowed by CBAs under global borrowing limits through on-lending arrangements. While the ACT and the NT are not members of Loan Council, analogous arrangements apply. As noted above, general purpose capital assistance for the States and the NT is now provided wholly by way of capital grants. The ACT program is comprised largely of a capital grant, with the remainder provided as loans.

Borrowings by Commonwealth and State authorities (semi-government and local authorities, government-owned companies and trusts) are not subject to the Financial Agreement, although Loan Council also approves the annual borrowing program of these authorities. Under the present 'Global Approach', which has been in place since May 1985, all borrowings and related means of financing capital expenditure by authorities are subject to global limits covering new money raisings and the refinancing of existing debt (see Chapter IV for more detail).

# Summary of 1989 Premiers' Conference and Loan Council Meeting Outcome

#### Arrangements for the States and the NT

At the Premiers' Conference and Loan Council meeting on 18 May 1989, the principal decisions were:

- general revenue assistance to the States and the NT for 1989-90 would be based upon amounts \$550 million lower than included in the Commonwealth's forward estimates at the time. As a result, in nominal terms, general revenue grants are presently estimated to increase by 2.2% in 1989-90 (see Chapter III);
- general purpose capital grants to the States and the NT would be maintained at the same nominal level as in 1988–89 (\$310.5 million). In addition, from 1989–90 the concessional loans provided for public housing purposes in 1988–89 (\$310.5 million) would be replaced by additional grants under the Commonwealth State Housing Agreement (see Chapters IV and V); and
- the agreed global borrowing limits of State authorities for 1989–90 would total \$3750 million, or 23.7% less than the agreed limits for 1988–89 (the 1988–89 limits were agreed to by the Commonwealth and the States other than Queensland (QLD), see Chapter IV). The global borrowing limit for the NT was also reduced by \$14 million to \$81 million in 1989–90, bringing the total reduction in the limit for the States and the NT to \$1014 million.

On a comparable basis of measurement, these decisions imply that general purpose assistance will decline by 3.1% in real terms<sup>(2)</sup> in 1989–90, following a real decline of 6.8% in 1988–89.

#### Arrangements for the ACT

Under transitional financial arrangements for the ACT, general purpose funding (including general revenue grants, general purpose capital funding and general purpose assistance for local government functions) was to be maintained in real terms until 1990–91 and moved to a basis similar to the States and the NT during the following two years.

<sup>(2)</sup> In this Paper, all rates of change relating to real values are calculated using the non-farm product deflator, unless otherwise specified.

The funding arrangements agreed at the Premiers' Conference for the ACT include provision to maintain the earlier funding guarantee but the actual amounts of general purpose assistance to be paid to the ACT Government in 1989–90 are to be based on comparability with the treatment afforded to the States and the NT. The difference between the forward estimates (based on the real terms guarantee) and amounts to be paid will be placed in a Commonwealth Trust Account, and the principal and accrued interest will be used to assist the ACT during its transition to State-like funding arrangements. The current estimate of the total amount to be paid into the ACT Transitional Funding Trust Account (excluding interest) in 1989–90 is \$21.3 million. The ACT Government may apply, over the next two years, to access the Trust Account for projects that assist the ACT in the transition to parity with State funding. (Chapters III and IV provide further detail.)

The ACT global borrowing limit was cut by 21% to \$39.5 million on its notional base limit for 1988–89 (see Chapter IV).

#### Other Decisions

Other decisions of the Premiers' Conference and Loan Council meeting were:

- to implement the updated relativities recommended in the Commonwealth Grants Commission's 1989 Report, subject to the NT receiving special revenue assistance (see Chapter III);
- to request reports from the Commonwealth Grants Commission on:
  - per capita relativities for the distribution of general purpose assistance to local government among the States and the Territories; and
  - the appropriateness of updates of *per capita* relativities (and their frequency if retained) and the appropriate period of review to be used by the Commission in assessing relativities (see Chapter III); and
- for the Commonwealth to examine a proposal from Victoria (VIC) and QLD that the Commonwealth waive or assume responsibility for certain State debt (see Chapter IV).

# CHAPTER II—STRUCTURE AND TRENDS IN STATE AND LOCAL GOVERNMENT FINANCES

This chapter provides an overview of the public sector; it outlines trends in the principal financial aggregates, public sector employment, the operating performance of public trading enterprises and gross/net debt for the State and local government sectors and for individual States and the NT.

# THE STRUCTURE OF THE PUBLIC SECTOR

Shares of the major financial aggregates and public sector employment in 1987–88 (the latest year for which data are available for each level of government) are shown in Table 3. The Commonwealth Government's share of revenue (about 75%) is much higher than its share of total public sector outlays (about 50%) when transfers to other levels of government are excluded. Payments to or for other levels of government account for the difference and represent about 30% of Commonwealth sector outlays. The State sector (excluding transfers to the local government sector) accounts for 43% of total public sector outlays, while the local government sector accounts for 6%.

Table 3-Public Sector Financial Aggregates and Employment: Shares of	of Each
Level of Government, 1987-88 (%)	

· · · · · · · · · · · · · · · · · · ·	(	Dutlays (a)		Final C	)wn-Source	Net PSBR	
	Current	Capital	Total	Demand (b)	Revenue	(c)	Employment
Commonwealth State Local Total	56 40 4 100	20 65 15 100	51 43 6 100	32 59 9 100	74 22 4 100	\$m (2,473) 3,610 117 1,254	25 66 9 100

(a) Current, capital and total outlays exclude payments to or for other levels of government.

(b) Final demand consists of final consumption expenditure and gross fixed capital expenditure.

(c) Net financing requirement as defined in the ABS publication Government Financial Estimates.

In 1988-89, the Commonwealth sector's surplus was \$5,489 million, while the State/local sector's net PSBR was \$2,250 million.

While representing about 50% of public sector outlays, the Commonwealth accounts for around 30% of public sector final demand for goods and services and only 25% of public sector employment. This essentially reflects the importance of personal benefit payments at the Commonwealth level (almost half of total outlays excluding transfers to or for other levels of government)—delivery of these payments is, of course, less labour intensive than the provision of education, health and police services at the State/local level.

The main sources of Commonwealth, State and local government funds in 1987–88 are shown in Table 4. Own-source revenue accounted for about 50% of State sector revenue in 1987–88 compared with 75% of local government revenue.

Total Revenue	-	100	<del>*</del>	100	-	100

# Table 4-Sources of Revenue for Each Level of Government, 1987-88 (%)

(a) Includes fringe benefits tax.

(b) Net operating surplus (NOS) is included as revenue in the ABS Government Financial Estimates. NOS is calculated as operating revenue (including subsidies received from the general government sector) less operating expenditure. Further detail on the operating performance of PTEs is presented later in this chapter and in Statement No. 6 of Budget Paper No. 1.

(c) In 1987-88, Commonwealth payments to local government comprised general revenue assistance (11% of local government revenue), direct payments to local government (2% of local government revenue) and specific purpose payments to the States that were passed to local government (6% of local government revenue).

# TRENDS IN STATE AND LOCAL GOVERNMENT FINANCIAL AGGREGATES

This section discusses trends in the main financial aggregates and public sector employment in the State/local sector as a whole; it also briefly compares developments in the State and local government sectors.

# State/local Sector

The State/local sector continued to exhibit financial restraint in 1988–89. Charts 1, 2 and 3 and Tables 5 and 6 provide information on trends in State/local sector financial aggregates. The main points in respect of 1988–89 are:

- preliminary ABS estimates indicate that State/local sector total outlays declined by 3.3% in real terms, following a fall of 2.7% in 1987–88;
- own-source revenue increased by 3.8% in real terms, while net Commonwealth payments declined by 6.3%. As a result, total revenue fell slightly in real terms;
- the sector's net PSBR (which measures its direct call on financial markets) declined from 1.3% of GDP in 1987-88 to 0.7% of GDP in 1988-89 (the lowest level since 1975-76); and
- State/local sector employment decreased by 0.2% in the year to March 1989.

Several factors have contributed to the real declines in State/local sector outlays since 1987–88 and to the reduction in the sector's net PSBR as a proportion of GDP over this period (see Charts 1 and 2). The most important of these has been the cumulative impact of cuts in net Commonwealth payments and the sector's global borrowing limit since 1985–86. Over this period:

- net Commonwealth payments to the State/local sector were cut by 12.2% in real terms; and
- the sector's global borrowings were cut by over 30%, to \$4.7 billion in 1988-89.

The impact of cuts in net Commonwealth payments has been cushioned by strong growth in the State/local sector's own-source revenue, which has increased by about 20% in real terms since 1985–86. Even so, the sector's total revenue has fallen as a proportion of GDP over this period.

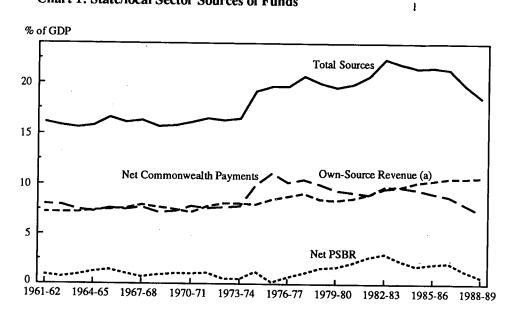

The State/local sector has adjusted to the decline in payments and borrowings primarily by cutting capital outlays. The restraint in capital outlays mainly reflects the progressive completion of economic infrastructure projects commenced in the early/mid 1980s and, in more recent times, an increased level of asset sales (which are recorded as an offset to capital expenditure). The sector's adjustment to a lower level of funding has also been facilitated by falling real wages (which account for about 50% of the sector's current outlays).

Chart 3 provides information on the State/local sector's final demand for goods and services which account for about three quarters of the sector's total outlays and about 70% of public final demand. The main features in State/local final demand, in constant prices, are:

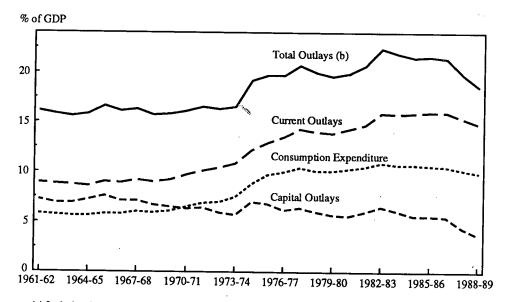

• final consumption expenditure continues to grow strongly in real terms, reflecting a trend that has been evident for most of the period since 1975–76. Over this period expenditure on health and welfare functions has increased more rapidly than expenditure on other major functions, such as education. Population growth has a substantial impact on the demand for State/local sector services; the sector's total consumption expenditure, however, has increased by an average of 2.5% per annum in real *per capita* terms since 1985–86; and

the increase in gross fixed capital expenditure in the early 1980s reflected increased expenditure on electricity generation capacity as well as other expenditure by PTEs, including on railways. Expenditure on electricity and railway operations in recent years has been well below their peak in 1982–83. General government capital expenditures increased in the mid–1980s but declined in 1987–88. Total capital expenditure declined sharply in the two years to 1988–89, to be around 17% below the level in 1986–87.

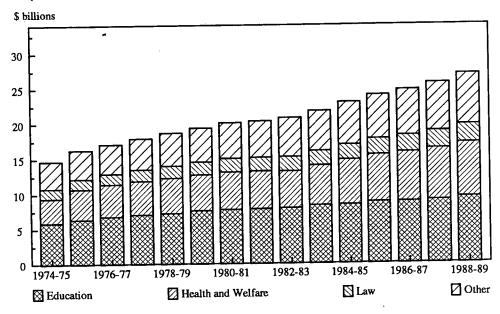

(a) Includes the increase in provisions (including for depreciation and superannuation).

(b) Total outlays are calculated as current plus capital outlays. The main components of current outlays are consumption expenditure (about 65% of current outlays), interest payments (about 20%) and subsidies (about 5%).

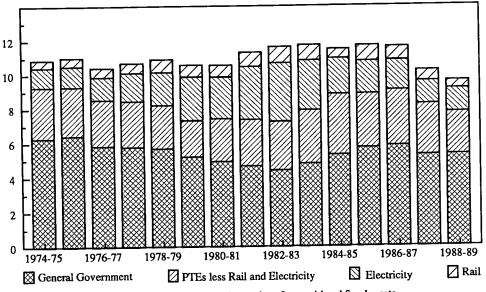

State/local Sector Gross Fixed Capital Expenditure (a)

(a) Includes new fixed capital expenditure and net sales of second-hand fixed assets.

Table 5-Financial Aggregates, State and Local Government Sectors (real change).

(a) State government current, capital and total outlays includes payments to other levels of government.

(b) Includes the increase in provisions (including for depreciation and superannuation).

(c) In 1989-90, net Commonwealth payments to the States and the NT are estimated to decline by 1.8% in real terms, and are estimated to be equivalent to 6.9% of GDP.

Payments to the State sector excludes Commonwealth payments direct to local governments. Payments to the local sector includes direct payments from the Commonwealth and payments from State Governments (including Commonwealth payments passed on to local governments). (d) Figures for 1988-89 relate to the year to March 1989 (the latest available data) and show the per cent change over the same period a year earlier.

• •

Table 6 shows the sector's capital outlays (including both gross fixed capital expenditure and other capital outlays) and their relationship to financing transactions. The sector's deficit financing of capital outlays has declined markedly since 1987–88. In 1988–89, deficit financing is estimated to have been about 16% compared with over 50% in the early 1980s. The reduction in borrowings under the Global Approach (see Table 6, Column 12), in combination with restraint in capital outlays (partly reflecting increased assets sales—see Table 6, Column 2) and firm growth in own-source revenue has contributed to this outcome.

The composition of the sector's deficit financing has changed considerably over time, with net borrowings direct from the private sector becoming relatively more important and net advances from the Commonwealth (primarily comprising the State Governments' Loan Council programs and equivalent general purpose capital funding for the NT) declining markedly. In both 1987–88 and 1988–89, net advances were negative for the first time since at least 1961–62 (because repayments exceeded advances), and direct borrowings by the State/local sector now finance the whole of its deficit.

It is not possible to forecast State/local financial aggregates for 1989–90 prior to the delivery of all State Budgets. However, the restraint in Commonwealth payments (a real fall of 1.8%) and global borrowings (a fall of 18.5%), in conjunction with a possible easing in the recent rapid growth in the sector's own-source revenue, is likely to require continued fiscal adjustment by the State/local sector in 1989–90. On the basis of current information, the sector's net PSBR is *estimated* to be about 0.7% of GDP in 1989–90, the same proportion of GDP as in 1988–89. Statement No. 6 in Budget Paper No. 1 includes a forecast of the total net PSBR in 1989–90.

#### State Sector and Local Government Sector

Changes in financial aggregates and public sector employment in the State Government and the local government sectors for the period 1984–85 to 1987–88 are shown in Table 5. In comparing trends in these sectors it should be noted that the local government sector is much less financially reliant on the other levels of government than the State sector is reliant on the Commonwealth (see Table 4). Consequently, the Commonwealth Government has relatively more impact on State than on local government budgetary policies.

State sector outlays increased more slowly than local government outlays in the four years to 1987–88. In 1987–88, the real growth in outlays slowed more markedly in the State sector, mainly reflecting restraint in capital expenditure.

General purpose payments account for over half of net Commonwealth payments to both State and local governments. As indicated in Table 7, in every year since 1985–86 growth in general purpose payments to local government has been more favourable than comparable payments to the States. (Chapter III provides further details of general purpose payments to local governments in 1989–90.)

Table 6-State/Local Sector Capital Outlays and Financing Transactions

(a) Net asset sales are defined in this table as net sales of second-hand fixed assets and land and intangible assets; excludes the proceeeds of some asset sales which are classified as offsets to capital expenditure under other categories such as advances. A positive level of asset sales leads to a reduction in outlays.

(b) Financing transactions (ie total outlays less total revenue) less increases in provisions as defined in the ABS' Government Financial Estimates. Sum of columns (7) and (9). (c) Estimates of the sector's gross borrowings prior to 1982-83 are not available from Loan Council sources. In 1989-90 the sector's gross borrowing limit will total \$3831 million or 1.0% of GDP.

#### Table 7-Commonwealth General Purpose Payments to State and Local Government

(a) Changes between years have been calculated after adjustment to the base year to eliminate the effects of changes in the classification of certain programs.

# FINANCIAL DEVELOPMENTS IN INDIVIDUAL STATES

Inter-State comparisons of outlays, revenue, borrowing and the financial performance of public trading enterprises (PTEs) can be influenced by differences in the growth of population and gross State product (GSP), the different range of activities undertaken by the various levels of government, and the level and growth in Commonwealth payments to individual States. Variations in the growth and composition of population, for example, can have a strong bearing on the demand for State sector services, such as education, hospitals and law enforcement.

#### Table 8-Population(a) (thousand)

(a) The population series in this table which underlie the per capita figures in this Paper are, with the exception of 1988-89 and 1989-90, the estimated mean resident populations for the financial year as published by the ABS in Australian Demographic Statistics (Catalogue No 3101.0). The ABS' preliminary estimates of population at 31 December 1988 have been used for 1988-89 and Treasury

projections of population at 31 December 1989 have been used for 1989-90.

(b) Preliminary estimate.

(c) Projection.

(a) Preliminary estimate.

(b) Projection.

Changes in the ratio of outlays, revenue and State net borrowing requirements to GSP can be affected by influences on the GSP base that are not directly related to the stance of budgetary policies—for example, fluctuations in commodity prices (the mining and agricultural sectors are relatively much more important in QLD, Western Australia (WA) and the NT than in the other four States).

Table 10-Gross State Product (a) (% nominal change)

(a) 'Gross State Product' (GSP) refers to each State's Gross Domestic Product (GDP) at market prices. Estimates of each State's GDP at factor cost are published by the ABS for the years 1977-78 to 1986-87 in Australian National Accounts, State Accounts, 1987-88 (Catalogue No. 5220.0). In order to obtain estimates at market prices to 1987-88, it has been assumed that gross operating surplus has continued to be distributed in line with past shares (specifically the average share apparent in the last three years for which data are available). Commonwealth indirect taxes less subsidies and differences between the latest estimates of GDP and those published in Australian National Accounts, State Accounts, 1987-88, for all years have been allocated across the States and Territories in line with their estimated shares of GSP before the allocation of these items.
(b) Estimate.

The range of activities undertaken by State and local governments also varies between the States. For example, electricity undertakings in WA, QLD and Tasmania (TAS) are operated exclusively by State Governments, whereas elsewhere both State and local governments are involved. Local government in QLD is involved in the provision of some metropolitan transport, while that is generally handled by State Governments in other States. Railways are also operated exclusively by State Governments in all States except South Australia (SA) and TAS, where the Commonwealth has operated non-metropolitan railways since 1975.

As can be seen in Chart 4, the ratio of State outlays to GSP varies considerably between the States and the NT. This variation mainly reflects substantial differences in the ratio of net Commonwealth payments to GSP. That, in turn, is associated with the distribution of Commonwealth general revenue assistance based on fiscal equalisation principles (see Chapter III) rather than variations in the ratio of State own-source revenue to GSP.

(a) Includes the increase in provisions (including for depreciation and superannuation).

### **Recent Financial Developments in the State Sector**

Recent comparative developments in the States and NT reflect various factors including:

- trends in the level of net Commonwealth payments, which have been reduced most sharply in real terms in recent years for TAS and the NT, declining by 18.4% in TAS between 1985–86 and 1987–88 and by 15.4% in the NT over the same period. By comparison, net Commonwealth payments to the other States declined by 5.0%. The decline in payments to TAS and the NT reflects adjustments in line with the recommendations of the Commonwealth Grants Commission; and
- the fact that these payments are relatively more important for the less populous States—that is, SA but more so for TAS and the NT—so that the restraint in payments in recent years has had a greater impact on those States and the NT.

#### Major Fiscal Aggregates

Table 11 shows changes in the key fiscal aggregates of individual States and the NT from 1984–85 to 1987–88 (the latest available data) in real and real *per capita* terms, and the net PSBR as a share of GSP. Chart 5 shows trends in total outlays, own-source revenue, total revenue and the net PSBR as a proportion of GSP. The main points are discussed below.

#### Outlays

- Total outlays declined in real terms in all States and the NT in 1987–88, with an average decrease of 2.8% in real terms compared with an average increase of 4.4% in 1985–86 and 2.0% in 1986–87. The decline in total outlays in 1987–88 largely reflects a sharp cut in capital outlays.
- Over the four years to 1987–88, current outlays in all the States and the NT increased in real terms while capital outlays have decreased, with average real changes during this period of 3.7% and -5.2% respectively.
- In the four years to 1987–88, total outlays grew most rapidly in New South Wales (NSW) and SA and declined in the NT and TAS. After adjustment for population growth, real *per capita* outlays still increased relatively quickly in SA and NSW and, with the exception of VIC, declined in the other States.

#### **Own-Source Revenue**

- Own-source revenue increased relatively quickly in 1987–88 in the NT, SA, NSW, QLD and WA and relatively slowly in VIC. Taxation revenue increased relatively quickly in QLD, WA and NSW primarily reflecting strong growth in stamp duty receipts.
- Grants Commission estimates provide a guide to the relative importance of changes in revenue raising effort and growth in the revenue base in accounting for trends in own-source revenue. They suggest that the more rapid growth in taxation revenue in 1987–88 in NSW and WA primarily reflected growth in the revenue base rather than relative increases in tax effort, while the slower growth in taxation revenue in VIC primarily reflects comparatively slow growth in the taxation base. In addition, the estimates suggest that tax effort increased relatively quickly in SA, TAS and the NT in 1987–88.

### Net Commonwealth Payments

• The cuts in net Commonwealth payments over the four years to 1987–88 have been relatively less severe for WA, NSW, QLD and VIC. However, adjusted for population growth, the cuts in payments to QLD were above the average over this period.

# Total Revenue

• The growth in total revenue has slowed markedly since 1985-86, primarily reflecting the real decline in Commonwealth payments. In 1987-88 the strong growth in own-source revenue resulted in total revenue growing at about the same rate as in the previous year, despite the sharp real cut in Commonwealth payments. Since 1984-85, total revenue in WA and QLD has grown much faster than in the remainder of the sector although this trend is less marked on a *per capita* basis, particularly in WA.

### Net PSBR

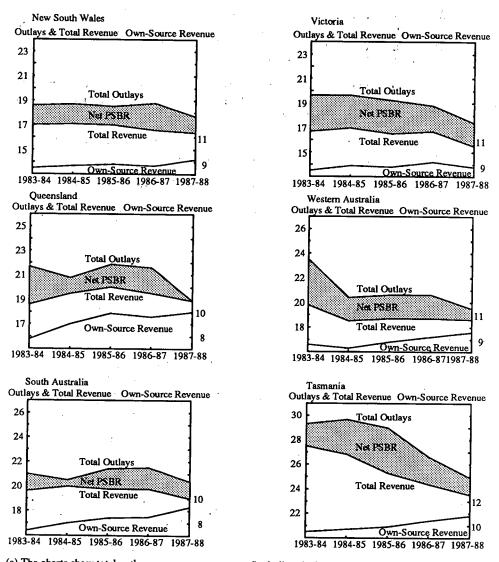

• The net PSBR in the States and the NT has declined from 2.9% of GDP in 1982–83 to 1.2% in 1987–88. Over the period 1983–84 to 1987–88 as a whole, the net PSBR as a proportion of GSP has been highest in VIC and TAS (2.4% of GSP for both compared to an average of below 2.0%).

Table 11-State Financial Aggregates, (% real change and real per capita change)

(a) Includes the increase in provisions (including for depreciation and superannuation).

# Chart 5: Outlays, Revenue and Net PSBR as a Percentage of GSP (a)

(a) The charts show total outlays, own-source revenue (including the increase in provisions), total revenue and the net PSBR as a share of GSP. The net PSBR is the shaded area shown as the vertical difference between the outlays and total revenue lines. The scales in each chart are the same, the levels, however differ between States. For example, outlays in 1987-88 as a proportion of GSP were around 17.5% in NSW and VIC and around 25% in TAS. Such differences in large part reflect the impact of fiscal equalisation, which is discussed in Chapter III. The change in the ratios for individual States provide the best guide to the stance of State financial policies.

The level of net Commonwealth payments is not represented by the vertical difference between the total revenue (plotted on the left hand scale) and own-source revenue (plotted on the right hand scale) lines. However, because the two scales are identical the slope of the revenue lines shows the relative trends in the components of total revenue as a proportion of GSP (for example, in TAS the total revenue line declined by 0.9 percentage points of GSP between 1986-87 and 1987-88 while the own-source revenue line increased by 0.4 percentage points of GSP in this period. Therefore, net Commonwealth payments declined by 1.3 percentage points of GSP).

#### **Public Sector Employment**

Table 12 shows annual changes in public sector employment in the period 1984–85 to 1988–89 on a State-by-State basis for both the State and local government sectors. The table also provides details of public sector employment by institutional sector in the March quarter 1989 (the extent of available data):

- The growth in State sector employment slowed in 1986–87 and has subsequently declined. Since 1984–85, growth in State sector public employment has been slowest in QLD and the NT and most rapid in VIC.
- The rate of growth in local government employment has also been much slower since 1986–87 and more recently has begun to decline.

Table 12-Public Sector Employment: State and Local Government Sectors (% change)

(a) Figures for 1988-89 relate to the year to March 1989 (the latest available data) and show the per cent change over the same period a year earlier.

(b) February 1989 (only available data). Figures for PTE and PFE sectors in QLD and the NT are not available for separate publication.

• Almost 80% of State sector employees are in the general government sector, mainly providing education, health and police services. PTEs, which usually recover a significant proportion of their operating costs through charges for their goods and services, employ about 18% of State sector employees, with the balance employed by public financial enterprises.

#### **Operating Performance of PTEs**

The financial performance of PTEs has an important impact on State/local sector finances and the economy in general. In 1988–89, the operating revenue and expenditure (which is treated as an offset to operating revenue in determining net operating surplus) of State/local sector PTEs were equivalent to about 8.7% and 6.9% of GDP respectively. By comparison, State/local sector general government own purpose outlays were equivalent to 14.5% of GDP in 1988–89.

Statement No. 6 in Budget Paper No. 1 provides an overview of the main financial aggregates of PTEs, including *operating results* and *cost recovery ratios* of State/local sector PTEs. This section focuses on the operating performance of *State sector PTEs* for individual States.

Inter-State comparisons of PTEs' operating performance are heavily influenced by the following factors:

- the relative importance of metropolitan transport systems in NSW and VIC which have low levels of cost recovery, in part reflecting community service obligations of those organisations;
- electricity generation in VIC is more capital intensive than in NSW and some other States because the primary source of fuel for VIC's operations is brown coal rather than black coal (the former requires relatively more processing prior to the electricity generation process);
- the operating performance of PTEs in QLD is related to the strong revenue performance of its railway coal transport operations (with freight charges including a component akin to general government royalty revenue) and the operation of some metropolitan transport by local government; and
- that non-metropolitan railways in SA and TAS are operated by the Commonwealth.

Table 13 shows the operating results (net operating surplus less subsidies and net interest paid) for State sector PTEs. The table shows that State sector PTEs operate at a substantial loss (equivalent to 0.6% of GDP in 1987–88), mainly as a result of losses on rail operations.

Table 13-Operating Result of State Sector Public Trading Enterprises (a)

(a) Net operating surplus (ie operating revenue less operating expenditure) less subsidies received plus interest received less interest paid. In terms of the ABS Government Financial Statistics Economic Transactions Framework (ETF): ETF 321 - ETF 322 - ETF 3213 + ETF 333 - ETF 121

Table 14 shows cost recovery ratios (ratio of operating revenue, excluding subsidies, to operating expenditure exclusive and inclusive of net interest outlays) for State sector PTEs. The ratio inclusive of net interest outlays shows the extent to which PTEs are able to cover both operating costs and debt servicing obligations. These cost recovery ratios do not provide a comprehensive measure of the financial performance of PTEs for various reasons:

- no account is taken of the returns on capital resources employed by PTEs;
- a high rate of cost recovery may reflect the extent of PTEs' monopoly power rather than a high level of efficiency; and
- levels of cost recovery may be affected by requirements to perform community service obligations, which often involve the provision of subsidised/unprofitable services.

(a) General government subsidies to PTEs as a proportion of general government current plus capital outlays. (ETF 1311) / (ETF 1 + ETF 2)) X 100

The main points from Table 14 are that:

- over the past decade, State PTEs in aggregate have recovered their operating costs, but have recovered only around 90% of their total costs, including interest obligations. In other words, in aggregate State PTEs do not earn enough from their own operations to service their debts. However, the situation varies significantly among States depending, among other things, on the nature of PTEs in that State;
- the cost recovery ratio including net interest payments has increased in most States and the NT in recent years, with the average level in 1987-88 similar to that of a decade earlier (although the ratios remain below the levels of the late 1970s in NSW and especially in VIC); and
- railway operations generally achieve very low levels of cost recovery, reflecting both the community service obligations undertaken by metropolitan transport operations and inefficiencies in rail operations (which some State Governments)

are addressing), while electricity authorities achieve much higher levels of cost recovery.

Data available for 1988–89 indicate that the State/local sector's PTE's cost recovery ratio after net interest payments increased to 94.6%, compared to 93.6% in 1987–88.

Subsidies paid by the State general government sector to PTEs (\$2.4 billion in 1987–88) account for around 5% of general government outlays and provide a measure of the potential for improved PTE efficiency to benefit the financial position of the public sector. Table 15 shows that the ratio of State general government subsidies for PTEs to both GSP and general government outlays declined somewhat in 1987–88 compared with the previous year. The table also shows that subsidies to railway operations are equivalent to 0.5% of GDP and account for about two-thirds of total subsidies paid to State sector PTEs.

Data available for subsidies paid to State/local sector PTEs in 1988-89 indicate that these subsidies fell to 0.7% of GDP, compared to 0.8% of GDP in 1987-88.

### Gross and Net Debt

Estimates of the gross and net indebtedness of the State/local sector as at 30 June 1987 are shown in Table 16. Net debt is defined as gross debt less financial assets (including investments, cash and deposits and advances or loans made). The concept excludes non-financial assets (including land, buildings, plant and equipment) and certain liabilities, such as employee related liabilities. Contingent liabilities are also excluded.

The level of public indebtedness is assuming greater significance in financial market and other analyses of a State's overall economic position. The liquidity and generally fixed return on financial assets enables the servicing of a corresponding amount of debt in a timely manner, so it is the net measure that provides a better guide to the burden of debt obligations and which is conventionally used in assessing creditworthiness. In addition, because advances paid from one government to another are recorded only in the net debt of the recipient (but influence the gross debt of both), the net measure provides the more appropriate basis for comparisons between governments. Similarly, the net measure is most appropriate for comparisons on the basis of institutional sectors because of advances between general government and PTEs; in particular, comparisons of gross debt between States at an institutional level are influenced by the extent to which States' borrowing operations are undertaken by central borrowing authorities.

Even on a net basis, however, comparisons of indebtedness between governments can be influenced by the differing functions undertaken by the three levels of government. In comparing States therefore, it is more appropriate to examine data at the State/local level, as comparisons at the disaggregated State or local levels may be affected to some extent by activities being undertaken by the local sector in some States but by the State sector in others.

Table 17 provides details of net interest outlays as a proportion of GSP and as a share of State sector revenue less interest received. The level of indebtedness and net interest payments are related, although a number of other factors also influence this relationship, including the average interest rate paid by a particular State and differences in institutional arrangements.

Table 17-Net Interest Outlays (a)

(a) Interest paid less interest received. (ETF 121 - ETF 333)

(b) Revenue (including PTEs NOS which is calculated as operating revenue less operating expenditure and the increase in provisions) less interest received. ((ETF 121 - ETF 333) / (ETF 3 - EFT 333)) X 100

The main points to note regarding debt at 30 June 1987 and interest burdens are:

- State sector net indebtedness as a whole was equivalent to 23% of GDP, with net indebtedness of the local government sector equivalent to 1.5% of GDP;
- State/local net debt as a share of GSP was higher in TAS and VIC and lowest in QLD;
- State sector gross indebtedness was equivalent to 29% of GDP. This comprises borrowing undertaken from the private sector (64% of the total), advances from the Commonwealth under the State Governments' Loan Council programs and analogous arrangements for the NT (24% of the total), specific purpose advances (10% of the total), and deposits (for example non-superannuation trust fund balances and security deposits) held (2% of the total);
- State sector financial assets were equivalent to 5.6% of GDP. The level of State/local sector financial assets as a proportion of GSP varied widely, and were most substantial in QLD and SA. To a significant extent the stock of financial assets in QLD reflects holdings in respect of the government contribution to the State's fully funded superannuation scheme (while other States operate schemes on an emerging cost basis). ABS estimates indicate that the stock of State/local financial assets increased by around \$900 million in 1987–88; and
- broadly reflecting the distribution of net debt among the States, net interest payments as a proportion of GSP are highest in TAS and lowest in QLD. Table 17 also shows net interest payments as a proportion of State sector revenue less interest received, which provides an indication of the burden of net interest payments on the State's resources; on this basis, net interest outlays are particularly significant in VIC and TAS.

At present, no comprehensive details of public sector net indebtedness are available for the period after 30 June 1987. However, estimates of State/local sector financing transactions as a proportion of GDP in 1987–88 and 1988–89 suggest that the State sector's net indebtedness at 30 June 1989 as a proportion of GDP would have declined from the level two years earlier.

## CHAPTER III—GENERAL REVENUE ASSISTANCE

This chapter outlines arrangements for the payment of general revenue assistance to the States, the NT, the ACT and local government authorities in 1989–90.

## GENERAL REVENUE ASSISTANCE TO THE STATES AND THE TERRITORIES IN 1989–90

General revenue assistance has been paid by the Commonwealth to the States in one form or another since Federation, to the NT since 1979–80 and to the ACT since 1988–89.<sup>(1)</sup> These grants are untied and assist in financing the outlays of the States and the Territories in line with their own budgetary priorities. In 1989–90, general revenue assistance is estimated to account for around 50% of total net Commonwealth payments to the State/local sector.

Table 18 shows payments of general revenue assistance since 1985–86. The large decline in grants in 1988–89 reflected the termination of the identified health grants which, from that year, were absorbed into a new specific purpose program for funding hospitals. In 1989–90, general revenue assistance to the States and NT is expected to increase in nominal terms by 2.2% but to fall by 3.8% in real terms.

## Level of Financial Assistance Grants

The level of financial assistance grants is determined each year at the Premiers' Conference. Table 19 shows the derivation of the level of financial assistance grants in 1988–89 and 1989–90.

The level of financial assistance grants paid in 1988–89 was considerably higher than the base level of grants agreed at the 1988 Premiers' Conference, largely reflecting the agreed adjustment for the difference between the actual outcome of the CPI (for the four quarters to the March quarter 1989) and the initial CPI forecast. The actual level of grants also reflected the recoupment of the amount estimated to be 90% of the additional revenue accruing to State and Territory Governments in 1988–89 as a result of the decision to remove payroll tax exemptions for a range of Commonwealth government business enterprises (GBEs) from 1 July 1988. (An adjustment will also be made to 1989–90 payments of financial assistance grants to ensure greater accuracy in the amount effectively recouped.)

The forward estimates of financial assistance grants for 1989–90 assumed the same real level as in 1988–89 (calculated on the basis of the forecast CPI for the four quarters to the March quarter 1990 over the previous four quarters). It was agreed at the 1989 Premiers' Conference that this base level of financial assistance grants would be reduced by deducting from the latest forward estimates:

- \$550 million in savings; and
  - a further \$45 million used to fund special revenue assistance to the NT.

This implies a net reduction in general revenue grants to the States and the NT (both financial assistance grants and special revenue assistance) of \$550 million. On a

<sup>(1)</sup> A history of arrangements for general revenue assistance to the States since Federation was presented in Budget Paper No. 7 in both 1981-82 and 1982-83.

Table 18-General Revenue Assistance to the States, the NT and the ACT (\$ million)

(a) Consists of financial assistance grants to the States (and the NT since 1988-89), general revenue grants to the NT from 1985-86 to 1987-88 and general revenue grants to the ACT from 1988-89.

(b) Identified health grants were absorbed into the specific purpose payment 'Hospital Funding Grants' in 1988-89. (c) Estimate.

(d) Includes payments for the transfer of the Family Support Program, Vaccination Program, Royal Far West Children's Health Scheme an the Royal Queensland Bush Children's Health Scheme which were absorbed into financial assistance grants from 1989-90; the Miscellaneous Pharmaccutical Benefits Scheme absorbed into hospital funding grants from 1989-90, and Emergency Relief which will continue as a specific purpose payment from 1989-90. Details are included in the 1988-89 Budget Paper No. 4.

(e) Includes a grant of \$26,000 to NSW as a carryover of the transfer of the Family Support Program in 1988-89. The funding is to be absorbed into the pool of financial assistance grants in 1990-91.

(f) Includes a special grant to the NT of -\$14.4 million in 1987-88.

comparable basis this presently implies a nominal increase of 3.2% in general revenue grants to the States and the NT, a real fall of 2.9%. As in 1988–89, the base level of financial assistance grants (and special revenue assistance) will be adjusted to reflect the difference between the actual outcome for the CPI and the estimate of around 6.9% which was adopted at the time of the 1989 Premiers' Conference.

In addition, as with the removal of payroll tax exemptions for certain Commonwealth GBEs in 1988–89, the Commonwealth will be recouping (through reductions in 1989–90 financial assistance grants) 90% of the additional revenue accruing to State and Territory Governments as a result of the removal of exemptions from all 'other' State taxes and charges (ie taxes other than payroll tax, such as land tax and stamp duty) for:

- OTC Limited (OTC) from 1 April 1989; and
- Australia Post and Telecom from 1 July 1989.

These 1989 changes are estimated to add around \$76 million to State and NT revenue in 1989–90. The amount to be recouped represents the estimated collections in 1989–90 plus the estimated sum collected from OTC in the June quarter of 1988–89.

It is also intended that an adjustment to the level of financial assistance grants in 1989–90 will be made to better align the amount of the payroll tax recoupment with actual tax payments in 1988–89. The determination of the amount recouped from 1988–89 payments of financial assistance grants was based on estimates of payroll tax payments before the end of the financial year; on the basis of actual payments, an additional \$0.3 million in aggregate is to be recouped in 1989–90.

Finally, it is intended to include a provision in the States Grants legislation to be introduced in the Budget session which will permit the Treasurer to effect, if necessary, the recovery of debt outstanding under the Commonwealth-State Land Exchange Agreement through a reduction in financial assistance grants paid to NSW in 1989–90. The amount owing to the Commonwealth totals \$18.9 million. This approach is consistent with the arrangements for recovering State contributions for higher education superannuation.

Table 19-Derivation of Financial Assistance Grants Pool (\$ million)

(a) This is the amount specified in the States Grants (General Revenue) Act 1988 as base assistance for 1988-89. The derivation of the amount is detailed in Table 16 of the 1988-89 Budget Paper No. 4.

(b) Based on an index factor of 1.0153, representing the sum of CPI index numbers for the four quarters to the March quarter 1989 divided by the estimate of that sum used at the time of the 1988 Premiers' Conference.

(c) 90% of the amount of extra payroll tax revenue (\$191.4 million) as included in the Treasurer's determination under the States Grants (General Revenue) Act 1988.

(d) This represents the full liability of the Government Business Enterprises to payroll tax for the 1988-89 year.

(c) The forward estimates at the time of the Premiers' Conference assumed an increase in the CPI of 6.9%.

(f) These estimates are revised from those used at the 1989 Premiers' Conference to reflect the final full year adjustment required for recoupment of extra payroll tax.

(g) Includes \$45 million to fund special revenue assistance being provided in 1989-90.

(h) As in 1988-89 (see footnote (b)) the pool is to increase by the sum of the CPI index numbers for the four quarters to the March quarter 1990 over the estimate used at the 1989 Premiers' Conference. This estimate reflects the variation between the Premiers' Conference estimate and the current forecast of the increase in the CPI in the year to the March quarter 1989.

(i) Based upon estimates provided in Table 20, 1989-90 Row (8).

## **Distribution of Financial Assistance Grants**

The distribution of financial assistance grants is based on *per capita* relativities determined by the Commonwealth Grants Commission. At the 1988 Premiers' Conference, it was agreed that triennial reviews of *per capita* relativities by the Commission would be replaced by annual updates on the basis of three-year moving averages (the review period) using existing methodology; comprehensive reviews of methodology were scheduled at five-yearly intervals. The first annual update was presented in the Grants Commission's *Report on General Revenue Grant Relativities 1989 Update*.<sup>(2)</sup> (As detailed below, the update arrangements and the review period are to be the subject of a report by the Grants Commission in 1989.)

## Fiscal Equalisation

The Commission's assessments of *per capita* relativities are determined on the principle of fiscal equalisation.<sup>(3)</sup> This principle requires the Commission to determine a distribution calculated to enable each State, provided a comparable revenue effort is made, to provide services to residents at a standard not appreciably different from that of the other States. The practical application of this principle is complex and requires judgments in some areas, often on the basis of limited statistical information.

In essence, the Commission's approach is to determine the variations from an equal *per capita* distribution of general revenue assistance which would offset differences in State revenue-raising capacities and costs of service delivery judged to be 'largely outside' the control of State Governments, and not met by above-average shares of certain specific purpose payments from the Commonwealth.<sup>(4)</sup> The object of fiscal equalisation is to give each State the *capacity* to provide an average level and pattern of services on the assumption that an average level and pattern of State taxes and charges are also imposed. Each State, however, retains discretion to vary the level and pattern of revenue raising or spending without affecting the level of its equalisation payment. If a State chooses to raise below-average revenue or incur above-average expenditure on services, the budgetary effects of such policy decisions are not compensated for within the equalisation process.

#### Distribution in 1988-89 and 1989-90

In effect, the application of the principle of fiscal equalisation involves a substantial redistribution of grants towards the less populous States. Table 20 shows the distribution and derivation of the pool of financial assistance grants among the States and the NT in 1988–89 and 1989–90.

It was agreed at the 1989 Premiers' Conference that the distribution of financial assistance grants in 1989–90 would be based on the updated *per capita* relativities determined by the Commonwealth Grants Commission in its 1989 Report. The changes in the relativities between 1988 and 1989 primarily reflect the substitution of 1987–88 data for 1984–85 data in the three year review period underlying the Grants

<sup>(2)</sup> The assessments in the Commission's 1989 Report were based on data averaged over three years, 1985-86 to 1987-88.

<sup>(3)</sup> A more detailed discussion of the methodology of fiscal equalisation is included in Chapter II of the 1988-89 Budget Paper No. 4.

<sup>(4)</sup> Further details regarding specific purpose payments and fiscal equalisation are provided in Chapter V.

(c) Based upon preliminary estimates by Commonwealth authorities of the additional State taxes, other than payroll tax payable in 1989-90 and an adjustment to better align the amount of the payroll tax recoupment with the actual tax payments in 1988-89.

Commission's assessments. Resultant variations in the States' relative revenue raising capacities dominated the changed relativities for most States. In turn, these updated relativities are largely responsible for the changes in the distribution of financial assistance grants, although the estimated changes in State populations are also significant.

The updated *per capita* relativities were prepared on the basis that they would be applied to the pool of financial assistance grants and hospital funding grants. As shown in Table 20, a State's share of financial assistance grants in 1989–90 is derived as the difference between:

- its share of financial assistance grants and hospital funding grants combined, based on the updated *per capita* relativities (Table 20, 1989–90, Rows (1) to (5)); and
- its actual share of hospital funding grants (excluding the penalties and incentives package and funding for AIDS) which are distributed in accordance with age-sex weighted populations.

The penalties and incentives package and the AIDS component of funding are omitted so that a State's share of that package is not offset by the distribution of financial assistance grants but is determined on the basis of factors such as the State by State incidence of AIDS cases or States' compliance with certain Commonwealth health objectives. Chapter V provides further detail.

As in 1988–89, the final distribution of financial assistance grants for each State and the NT in 1989–90 will depend on the Statistician's determination of the population as at 31 December 1989. It will be influenced also by the final distribution of hospital grants and the amount of State taxes and charges to be recouped.

## **Special Revenue Assistance Grants**

In 1988–89, special revenue assistance was provided to a number of States and the NT to ease the adjustment to reductions in general revenue assistance and the implementation of the new relativities. The final amounts paid reflected an adjustment for the difference between the outcome of the CPI and the forecast at the time of the 1988 Premiers' Conference. There were no formal commitments to provide continued special revenue assistance in 1989–90, but it was agreed at the 1988 Premiers' Conference.

Although the updated relativities and population estimates did imply an increased share of *financial assistance grants* to the NT for 1989–90, if special revenue assistance to the NT had been terminated after 1988–89 it would have experienced a substantial fall in its *general revenue grants*. Accordingly, it was agreed at the 1989 Premiers' Conference that the NT would be provided with special revenue assistance of \$45 million in 1989–90, funded from a reduction in the total pool of general revenue grants to the States and the NT. The continued provision of special revenue assistance to the NT was consistent with the conclusions of a working party of Commonwealth and NT officials which was commissioned to report on the NT's special fiscal disabilities. The Government nonetheless remains committed to gradually moving the NT to a financial basis fully comparable with that of the States.

As with financial assistance grants, special revenue assistance to the NT will be adjusted for the difference between the forecast CPI at the time of the Premiers' Conference and the actual outcome. The current estimate of assistance is \$45.3 million.

## General Revenue Assistance to the ACT

As noted in Chapter I, general purpose funding for the ACT (including general revenue grants) was to be maintained in real terms until 1990–91 and moved to a basis similar to the States in the following two years. The funding arrangements for the ACT agreed at the 1989 Premiers' Conference include provision for the earlier funding guarantee to be maintained.

However, the amounts of general purpose assistance to be paid to the ACT in 1989–90 will be based on equivalent State treatment. The difference between the forward estimates (based on the real terms guarantee) and the amounts to be paid, will be paid into a Commonwealth Trust Account with the principal and accrued interest used to assist the ACT during transition to State-like funding arrangements. It was also agreed at the Conference that the ACT Government could apply, over the next two years, to use the money held in the Trust Account for projects that assist the ACT in the transition to parity with State funding.

The estimated nominal increase in general revenue grants to be paid to the ACT in 1989–90 (before the recoupment of 'other' taxes and charges and the adjustment for 1988–89 payroll tax recoupment) is therefore fully in line with the increase in those grants for the States and the NT. The current estimate of the amount to be paid into the Commonwealth Trust Account in respect of general revenue grants totals \$16.3 million. The final amounts paid will reflect the difference between the forecast CPI at the time of the Premiers' Conference and the actual outcome. As for the States and the NT, the general revenue grants paid will be reduced for recoupment of 'other' State taxes and charges received from GBEs, and adjusted to better align the amount of the payroll tax recoupment with actual tax payments in 1988–89.

## ARRANGEMENTS FOR THE STATES AND THE NT BEYOND 1989-90

The Commonwealth did not make any comprehensive commitments to the States and the NT in respect of the level of general revenue assistance to be provided in future years. Funding levels beyond 1989–90 will, however, be affected by a number of decisions which have been taken.

As reform packages are finalised for other GBEs, recoupment arrangements may be required if further exemptions from State taxes and charges are removed. As with the arrangements for collection of 'other' State taxes and charges in prospect for this year, separate adjustments will be made where necessary to effect recoupment. It is envisaged, however, that all such changes will, as soon as possible, be reflected in the relativities so that adjustments can be absorbed into the 'base' levels of financial assistance grants. For example, the 'base' for financial assistance grants in 1989–90 has been reduced on a 'once-off' basis to reflect recoupment for payroll tax paid from 1 July 1988 and from 1989–90 the relativities will account for the effects of this decision on the revenue raising capacities of each State and the NT.

Other decisions taken at the Premiers' Conference that could affect future Commonwealth funding arrangements for the States relate to the procedures adopted by the Commonwealth Grants Commission. In particular, the Grants Commission will be asked to report on:

- the appropriateness of updates of per capita relativities (including their frequency) and the period of review to be used by the Commission in assessing per capita relativities. As noted earlier, the 1988 Premiers' Conference agreed that per capita relativities would be updated annually on the basis of three-year moving averages using existing methodology (with comprehensive reviews of methodology scheduled at five-yearly intervals). However, the 1989 Conference agreed to refer the question of the appropriate update process and review period to the Commission, largely because the 1989 update of per capita relativities had resulted in larger changes in the distribution of financial assistance grants than had been generally anticipated. The Commission's Report is to be available for consideration by the Commonwealth, States and Territories sufficiently early for the outcome of that consideration to be reflected in a Relativities Report, to be considered at the 1990 Premiers' Conference; and
- per capita relativities for the distribution of general purpose assistance for local government among the States and the Territories, with the Report to be available for consideration prior to the 1990 Premiers' Conference. At this stage there is no commitment to change the distribution of local government grants from the present equal per capita shares.

The Commission is also to be asked to inquire into a number of methodological and technical issues as a precursor to the next major methodological review.

# GENERAL PURPOSE ASSISTANCE FOR LOCAL GOVERNMENT IN 1989-90

# General Purpose Assistance for Local Government in the States and the NT

#### Level of Assistance

General purpose financial assistance has been paid to local government authorities since 1974–75. Arrangements since 1986–87 have been embodied in the *Local Government* (*Financial Assistance*) Act 1986, with the NT included with the States under the Act.

The Act provides that, from 1988–89, the amount of assistance to local government should escalate at the same rate as general purpose assistance to the States. However, because of the decision to transfer half of the payments under the State Governments' Loan Council programs to the Commonwealth State Housing Agreement (CSHA) (see Chapter IV), the level of general purpose payments to the States, as defined under the Act, would have declined more sharply than they will in actual fact.

As a consequence, the Act was amended on an interim basis following the 1989 Premiers' Conference to provide for general purpose assistance to local governments in 1989–90 of \$671 million. (An interim adjustment was also required in 1988–89, with assistance fixed at \$652.5 million, because identified health grants to the States were discontinued and absorbed into the new hospital funding grants.) The final amount payable to local government in 1989–90, as with general revenue grants to the States,

will be adjusted for the difference between the forecast CPI at the time of the Premiers' Conference and the actual outcome for the CPI. The current estimate of assistance is \$675.3 million, a nominal increase of 3.5%, or a real decline of 2.6%. The nominal increase for local government grants will be slightly greater than that for comparable assistance to the States (adjusted for the transfer of general purpose capital funding to the CSHA).

Local government will also benefit from the decision announced in April 1989 not to proceed with the planned recoupment of 90% of the additional revenue accruing to local authorities from the removal of the exemption for Telecom and Australia Post from local rates and charges from 1 July 1989. This is estimated to add \$28 million to the financial resources of local government in 1989–90.

## Distribution Among the States and the NT

Under the Local Government (Financial Assistance) Act 1986, the distribution of general purpose assistance to local government among the States and the NT will move fully to equal per capita shares from 1989–90, based on populations as at the previous 31 December. Shares for the years 1986–87 to 1988–89 reflected the phasing-in of the equal per capita distribution. Table 21 shows the actual and percentage distribution of these payments in 1988–89 and 1989–90.

	1988-8	9	1989-9	0
	\$m	% (a)	\$m	%
NSW	229.4	35.1625	236.3	34.9875
VIC	172.7	26.4714	176.6	26.1576

NT	6.2	0.9575	6.4	0.9538
Total	652.5	100.0000	675.3	100.0000
ACT	11.3	na	11.6	na

Table 21-Distribution of General Purpose Financial Assistance for	Local
Government Authorities	,

(a) Percentages as specified in the Local Government (Financial Assistance) Act 1986.

As mentioned above, the Commonwealth Grants Commission will be asked to review the inter-State distribution of local government grants for the States and the Territories prior to the 1990 Premiers' Conference.

#### Distribution within each State and the NT

In accordance with the requirements of the Act, the distribution of grants to local government bodies is based on principles developed in each State. These principles are required to have regard to the objective of horizontal fiscal equalisation. This is defined in the Act as a distribution that:

'ensures that each local governing body in the State is able to function, by reasonable effort, at a standard not lower than the average standard of other local governing bodies in the State, and that takes account of differences in the expenditure required by those local governing bodies in the performance of their functions and in the capacity of those local governing bodies to raise revenue'.

The Act also provides that no local authority is to receive an amount in any year that is less than the amount it would receive if 30% of the State's/Territory's grant were allocated among local authorities on an equal *per capita* basis.

The distributional arrangements are intended to achieve a greater degree of uniformity in distributional methodologies across States. They do, however, leave each State's Local Government Grants Commission with considerable discretion in the detailed assessment of each authority's relative need for assistance.

## General Purpose Assistance for Local Government in the ACT

The ACT Government has both territorial and municipal functions. From 1988–89, the Commonwealth began making payments to the ACT in respect of general purpose assistance for local government functions, analogous to that paid to the States and the NT. The amount paid in 1988–89 was \$11.3 million, determined by maintaining a notional 1987–88 'base' payment in real terms. The 'base' was calculated by assuming that the ACT would have received a *per capita* amount equivalent to the States and the NT in that year.

Assistance for local government functions is one of the general purpose payments subject to the new payment arrangements for the ACT in 1989–90 (described above) which were agreed at the 1989 Premiers' Conference. Accordingly, the level of local government assistance to be provided to the ACT in 1989–90 has been determined on the same basis as for local government in the States and the NT. The amount to be paid into the Commonwealth Trust Account for ACT transitional funding is estimated to be \$0.5 million in 1989–90. As for the States and the NT, these payments are also to be adjusted to reflect the actual outcome for the CPI.

# CHAPTER IV—GENERAL PURPOSE CAPITAL ASSISTANCE AND BORROWINGS BY THE STATE/LOCAL SECTOR

This chapter details those aspects of the financial relations between the Commonwealth and the State/local sector within the purview of Loan Council—in particular, the provision of general purpose capital assistance and the determination of borrowing levels.

General purpose capital assistance to the States is paid from the Commonwealth Budget under the State Governments' Loan Council programs. This assistance originally comprised the proceeds of borrowings by the Commonwealth on behalf of the States under the Financial Agreement of 1927 on which the States met interest and sinking fund obligations. Since 1970–71, these programs have included a component provided as a grant and, since 1982–83, a component provided for public housing at concessional interest rates. From 1989–90 assistance under these programs will be provided entirely by way of grants. Similar assistance is provided to the Territories, which are not subject to the Financial Agreement.

Borrowings by Commonwealth and State authorities are not subject to the Financial Agreement. However, various arrangements agreed to by Commonwealth and State Governments since 1936 have provided for Loan Council approval of annual borrowing programs for semi-government and local authorities. Under the Global Approach to authority borrowings, which has applied since June 1984, authorities are subject to global borrowing limits which are agreed annually by Loan Council.

Trends in State/local sector capital outlays and the level of public sector debt outstanding as a result of borrowings under these arrangements are discussed in Chapter II.

# GENERAL PURPOSE CAPITAL ASSISTANCE

As noted above, general purpose capital assistance to the States has been provided by way of loans under the Financial Agreement of 1927 (with related arrangements applying to the Territories), by concessional loans for public housing and by grants.

Until the early 1970s, loans under the Financial Agreement were the major source of funds available to State Governments to finance capital works. The Financial Agreement severely constrains the State Governments' borrowing powers but the Commonwealth can undertake borrowings on their behalf. The amount of such borrowings is determined each year by Loan Council, which was established under the Financial Agreement to co-ordinate borrowings for the Commonwealth and State Governments; it consists of representatives of the Commonwealth and each State.<sup>(1)</sup>

The importance of loans under the Financial Agreement in assistance provided to the States declined from the early 1970s because:

<sup>(1)</sup> The Territories are not parties to the Financial Agreement. However, general purpose capital assistance is provided to them on the same terms and conditions as for the States, and Territory representatives attend Loan Council meetings as observers.

- the overall level of general purpose capital assistance has declined in both real and nominal terms with States financing an increasing proportion of their capital works from other sources, including other payments from the Commonwealth and borrowings by State authorities; and
  - an increasing proportion of general purpose capital assistance was provided in concessional forms, as grants or as loans for public housing.

From 1987–88, no new loans under the Financial Agreement and related arrangements were advanced to the States or the NT, although outstanding debt under the arrangements continues to be refinanced by Commonwealth borrowings.

From 1982–83 to 1988–89, some general purpose capital assistance was provided to the States and the NT for public housing purposes in addition to the specific purpose assistance through the Commonwealth State Housing Agreement (CSHA) (see Chapter V). During that period, the States and the NT were entitled to nominate portions of the loan component of general purpose capital assistance for public housing purposes. This component was provided as loans from the Commonwealth on concessional terms and conditions (an interest rate of 4.5% and repayable over 53 years). In 1987–88 and 1988–89, all loans were nominated to be received on this concessional basis.

At the 18 May 1989 meeting, Loan Council agreed that general purpose capital assistance for 1989–90 is to be provided entirely by way of grants. The concessional loans for housing are to be replaced by additional grants to the States and the NT under the CSHA. An amount of \$310.5 million is to be provided in 1989–90, the same as in 1988–89 under the concessional portions of the State and NT Governments' loan programs.

General purpose capital assistance also has been provided partly as grants. This began in 1970–71 when about 25% of the program was provided in that form, with the proportion being increased gradually to account for half the program in 1988–89. For 1989–90, general purpose capital grants to the States and the NT will be maintained in nominal terms at \$310.5 million. This implies a real reduction of 5.9%.

The distribution of the State Governments' Loan Council programs among the States was unchanged from 1975–76 to 1986–87 following a pattern dating from 1927–28. The distribution was modified in 1987–88, but it still does not closely relate to the present day capital needs of the States. The 1987–88 distribution will continue to apply in 1989–90 both to the capital grants and to the additional grants for housing under the CSHA. The distribution of the latter amounts will be progressively adjusted over a three year period, so that from 1992–93 they will be distributed on the same basis as other CSHA grants. CSHA grants are distributed on an essentially per capita basis reflecting housing needs, with some allowance for special groups such as Aborigines.

General purpose capital assistance to the Territories represents a significantly larger share of Commonwealth payments to them than is the case for the States. The share of general purpose capital assistance to the NT was determined at self-government on 1 July 1978 and adjusted upward in 1985–86. A further adjustment was made in 1987–88 in conjunction with changes in State shares. As part of the financial

arrangements associated with self-government, the ACT will receive general purpose capital assistance in 1989–90 of \$52.1 million, comprising a grant of \$29.6 million, and non-concessional loans of \$22.5 million. Consistent with arrangements applying to the States and the NT, loans for public housing of \$7.0 million will be replaced by grants. In addition, \$5.0 million is to be paid into the Commonwealth Trust Account for ACT transitional funding (see page 41).

The provision of general purpose capital assistance in concessional forms provides a significant advantage to the States and the Territories relative to its provision as loans under the Financial Agreement and related arrangements. The Commonwealth also contributes to the cost of debt issued on behalf of the States and the Territories in other ways. Under the Financial Agreement, the Commonwealth makes contributions to the National Debt Sinking Fund in respect of State debt and to the NT Debt Sinking Fund for debt issued on behalf of the NT Government. Similar arrangements are to be made for the ACT. (These sinking fund contributions are discussed in Chapter V.) By an amendment to the Financial Agreement on 5 February 1976, the Commonwealth took over \$1000 million of State debt from 30 June 1975. Interest savings also accrue to the States and the Territories because, by acting as the central borrower and using Commonwealth guaranteed debt instruments, the Commonwealth is able to raise debt on more favourable terms than the States and the Territories.

At the 1989 Loan Council meeting, the Commonwealth undertook to examine proposals from VIC and QLD that would entail providing additional assistance to the States by taking over further amounts of their debt under the Financial Agreement.

Table 22 shows the general purpose capital assistance provided to the States and the NT since 1985–86, and to the ACT since 1988–89, in aggregate terms and the amount of each form of assistance provided. (Chapter V provides details of the arrangements as they affect total Commonwealth assistance for public housing purposes.) It is apparent that, in the context of sustained restraint in the overall level of Commonwealth payments to the States and the Territories, the level of general purpose capital assistance has been reduced substantially over recent years. As Table 23 shows, it is now a relatively small component of Commonwealth payments to the States and is not closely related to, nor a major source of finance for, States' capital requirements. As loan funds for the State/local sector are now obtained almost entirely through authority borrowings, the original purpose of the program in terms of coordination and control of public sector borrowing is now pursued through the Global Approach.

## Financing of General Purpose Capital Assistance

The concessional elements of the State Governments' Loan Council programs and general purpose capital assistance to the NT are financed by the Commonwealth from its own resources. However, under the Financial Agreement, the conversion or redemption of maturing State and NT debt that cannot be financed from the National and NT Debt Sinking Funds respectively is financed from the proceeds of the issue of Treasury Bonds. These issues are allocated to the States and the NT and represent State and NT Government debt. Similar arrangements are to be implemented for the ACT from 1989–90, with the Territory taking over responsibility for financing a notional amount of past debt.

The Commonwealth undertook at the 1989 Loan Council meeting to finance the State Governments' Loan Council programs, subject to the States agreeing to the global limits proposed on Commonwealth and State authority borrowings and the various other requirements of the Global Approach (details of which appear later in this chapter). The Commonwealth further agreed:

- to provide \$310.5 million of the programs as a capital grant;
- to arrange for the redemption and refinancing of maturing State debt that cannot be met from State Sinking Funds; and
- to make pro-rata weekly advances of the programs.

The Financial Agreement also provides that the annual borrowing program of the Commonwealth Government (except defence borrowings, borrowings for temporary purposes and the refinancing of existing debt) is subject to approval by Loan Council. However, given the projected Budget surplus, the Commonwealth did not seek approval for a borrowing program for 1989–90.

## LOAN COUNCIL ARRANGEMENTS APPLYING TO AUTHORITY BORROWINGS

The Gentlemen's Agreement between the Commonwealth and the States provided the framework for Loan Council oversight of borrowings by Commonwealth and State authorities from 1936 to 1984. By the early 1980s, however, the Loan Council was exercising increasingly less influence under the Gentlemen's Agreement over the totality of authority borrowings. This reflected extensive use of non-conventional financing techniques—such as financial leases and similar forms of borrowing—outside the scope of the Agreement. The decision in June 1982 to exclude domestic borrowings by electricity authorities from Loan Council control for a trial period of three years further reduced Loan Council influence on authority borrowings.

Increasing recognition of the implications of these developments for public sector spending and borrowing culminated in the suspension of the Gentlemen's Agreement at the 21 June 1984 Loan Council meeting and the adoption of the Global Approach on a trial basis for 1984–85. The objective of the Global Approach, which was adopted on an on-going basis at the 30 May 1985 Loan Council meeting, was to broaden the scope of Loan Council oversight of authority borrowings by bringing within voluntarily agreed limits all forms of borrowings by Commonwealth and State semi-government and local

authorities, government-owned companies and trusts. The Global Approach also provides for the publication of timely information on total borrowings by Commonwealth and State authorities.

The purpose of the Global Approach is to supplement the powers of Loan Council under the Financial Agreement, allowing for control of the totality of public sector calls on financial markets. To this end, 'borrowings' under the Global Approach are defined broadly to include the whole range of financing arrangements available to authorities, including conventional borrowings, financial leases and related instruments and equity financing by or on behalf of authorities. The coverage of the Global Approach corresponds with that of the Public Sector Borrowing Requirement (PSBR) described in Statement No. 6 in Budget Paper No. 1. The Global Approach has become an important instrument of macroeconomic policy in a strategy directed towards reducing the public sector's call on domestic and foreign savings.

Under the Global Approach, Loan Council does not exercise any control over the terms and conditions of authority borrowings, although individual States and the Commonwealth may do so in respect of their own authorities. State semi-government and local authorities generally borrow at somewhat higher interest rates than the Commonwealth Government, with the margins varying from time to time depending on market conditions. Indicative interest rates for smaller semi-government and local authorities, and the margins applying over Commonwealth securities of similar maturity, as published by Loan Council Secretariat, are shown in Table 24. It has been suggested that the publication of this series could constrain the capacity of some smaller authorities to negotiate more favourable terms for borrowings. Because of this, and with the agreement of the States, the Commonwealth ceased collection and publication of these data on 5 July 1989. Although there will be no direct replacement for this series, various States will be publishing their own series of indicative interest rates.

			Years to	Maturity			
-	2 Y	ears	4 Y	ears	10 Years

Table 24-Indicative Coupon Interest Rates for Borrowings by Smaller Semi-Government and Local Authorities (a)

(a) Rates are as at the end of each month shown and are based on secondary market yields, as assessed by Loan Council Secretariat, on Treasury Bonds of comparable maturities plus a margin for each maturity, which is reviewed monthly.

## The Global Approach

The central feature of the Global Approach is the imposition of aggregate quantitative controls, or 'global limits', on borrowings by Commonwealth and State authorities. It also provides for a ceiling (currently 22% of new money borrowings) within the global limits on overseas borrowings by State authorities, together with arrangements for ensuring orderly access by authorities to overseas public capital markets.

Under the Global Approach, as modified since May 1985, it is agreed that:

- the Commonwealth and each State Government will voluntarily limit the level of new money borrowings each year from all sources by their authorities to global limits agreed by Loan Council. As occurred under the Gentlemen's Agreement, the States and the Commonwealth are free to determine the distribution of the global total among their individual authorities;
- authorities subject to the limits include semi-government and local authorities and all companies and trusts which are wholly-owned, majority owned or partly owned and effectively controlled by the relevant governments. Borrowings by government-owned financial institutions (such as State banks and insurance companies) and statutory marketing authorities are excluded from the global limits except when on-lent to, or used for the purposes of, governments or authorities subject to the limits (except where such borrowings are associated with temporary or unexpected fluctuations in government outlays and receipts);
- new money borrowings within the agreed limits include 'conventional' domestic and overseas loan raisings, deferred payment arrangements, overseas trade credits, financial leases (including leveraged leasing and similar arrangements), sale and leaseback arrangements, instalment purchase by government departments, the net change in temporary purpose borrowings over the financial year and any other form of raising new capital funds (including equity raisings by or on behalf of authorities). New money borrowings exclude operating leases and temporary purpose borrowings within the financial year; and
- bodies subject to global limits are able to refinance maturing debt outside new money borrowing limits, provided there is no net addition to the total level of outstanding debt.

# **Overseas Borrowings within the Global Approach**

Arrangements for overseas borrowings under the Global Approach are:

 new money overseas borrowings by State authorities, including non-conventional financing techniques (such as trade credits and financial leases) and the net change in temporary purpose overseas borrowings over the financial year are subject to an aggregate overseas ceiling. The distribution of the overseas ceiling is determined by agreement among the States;

- new money overseas borrowings (including the net change in temporary purpose borrowings) are not to exceed, for more than a two month period during the financial year, each State's new money overseas borrowing ceiling for that year, with an upper limit at all times during the year of 150% of each State's ceiling;
- while borrowings by statutory marketing authorities are outside global limits, the following limits apply to the amounts which statutory marketing authorities may borrow overseas;
  - not more than the level of their expected foreign currency denominated sales for advance payments to growers (provided this does not exceed their current season's net borrowing requirement); and
  - not more than 50% of their borrowing requirement to finance buffer stocks held in Australia (there are no limits on borrowings to finance buffer stocks held or being shipped abroad).
- Commonwealth and State authorities subject to the global limits, and statutory
  marketing authorities, are allowed to borrow in all private overseas capital
  markets and a range of overseas public issue markets. The permitted public issue
  markets are: the domestic \$US, Eurodollar, Swiss Franc, Euro-sterling, European
  Currency Unit (ECU), Euro-\$A, Yen and non-Yen Tokyo, Deutschemark,
  Euro-yen, Euro-Canadian dollar, Euro-\$NZ, and Hong Kong dollar markets;
- conversion or refinancing of overseas debt is permitted outside the overseas borrowing ceiling;
- since the 21 June 1984 Loan Council meeting, approval of the terms and conditions of overseas borrowings by authorities has been delegated to the individual members of Loan Council. However, specific Loan Council approval of terms and conditions of individual overseas borrowings is still required in the Sterling private placement market (essentially with a view to differentiating such borrowings from public issues by the Commonwealth in the relatively small Sterling market); and
- individual approaches to public markets continue to require prior Loan Council approval, and are subject to orderly queuing arrangements designed to avoid the possibility of clashes between Australian public sector issues in these markets. The queuing arrangements provide for a maximum number of approaches per quarter in each of the permitted markets, as well as a minimum period of time between approaches (two or three weeks in most cases), and are set having regard to conditions in each market. The Commonwealth Government has a prior right of access to all markets but it has, of course, been repaying debt—rather than borrowing—in recent years.

## **Global Borrowing Limits for 1989-90**

At its 18 May 1989 meeting, Loan Council members agreed to an aggregate new money borrowing limit for State authorities of \$3,750 million, which is \$1,000 million, or 23.7%, less than the borrowing limits originally approved for 1988–89. The agreed amount includes a special temporary addition of \$87.2 million for WA.

In recognition of the particular infrastructure needs of VIC, WA and TAS, it was agreed at the 1989 Loan Council meeting that these three States could utilise, as temporary special additions to their global limits in 1988–89, amounts of \$65 million, \$67.1 million and \$30 million respectively of the unused 1988–89 overall global limits. Even with these adjustments, total borrowings by State authorities were \$135 million, or 2.8%, below the aggregate global limit set for 1988–89.

A global borrowing limit of \$81 million was agreed for the NT for 1989–90, compared with actual borrowings of \$85 million in 1988–89, while a global borrowing limit of \$39.5 million was agreed for the ACT. The ACT did not undertake borrowings prior to self-government although some of its authorities did so. As a transitional measure, the Commonwealth offered loans of up to \$50 million in 1988–89 to the ACT on terms and conditions comparable with those applying to borrowings by semi-government authorities. Of this amount, \$25 million was drawn down by the ACT.

Details of the borrowing programs for each of the States and the NT are provided in Table 25, while Table 26 details the agreed conversion/refinancing programs.

Table 25-'Global' New Money Borrowings by Commonwealth, State and Territory Semi-Government and Local Authorities (a)

(a) Includes borrowings by all Commonwealth, State and Territory semi-government and local authorities, government-owned companies and trusts.

(b) Includes 'implicit' borrowings associated with the Commonwealth's instalment purchase of Commonwealth Government offices.

(c) VIC borrowings for 1987-88 exceeded the State's global limit for the year by \$158 million as the sale of the World Trade Centre, proceeds of which are to be used to repay debt, did not proceed. When the sale proceeds, the State's borrowings are expected to be reduced below its global limit by a similar amount.

(d) A Commonwealth authority converted approximately \$1.2 billion of financial leases to operating leases during 1987-88. These transactions are not reflected in reported global borrowings by Commonwealth authorities.

(c) 'Global' new money limits agreed at the May 1989 Loan Council meeting.

(f) Commonwealth and Total figures are given as a proportion of GDP.

Table 26-Borrowings by Semi-Government and Local Authorities for the Refinancing of Maturing Debt (a) (\$ thousand)

(a) Includes borrowings for the purposes of refinancing or converting the maturing debt of semi-government and local authorities and government-owned companies. Such (a) Instance working not an purpose of humaning boots of the new money borrowings set out in Table 25.
 (b) Amounts advised to Loan Council. Individual members of Loan Council have discretion to amend the approved refinancing programs to account for the refinancing of

debt prior to maturity and, in the case of overseas debt, for movements in exchange rates.

For 1989–90, Loan Council members also agreed to an aggregate overseas borrowing ceiling of \$825 million for State authorities, equal to 22% of aggregate new money borrowings. This compares with overseas borrowings of \$1,071 million in 1988–89. The distribution of the overseas ceiling, which was agreed among the States, is shown in Table 27.

	NSW	VIC	QLD	WA	SA	TAS	Six State Total	Common- wealth (b)	TOTAL

Table 27-New Money Overseas	Borrowings by State Semi-Government
Authorities (a) (\$ million)	

(a) Includes overseas new money borrowings by all semi-government and local authorities, government-owned companies and trusts.

(b) Includes the ACT and the NT, neither of which has borrowed overseas as yet.

(c) A ceiling of 22% of the global limits (\$825 million) on all overseas borrowings by State authorities was agreed at the 18 May 1989 Loan Council meeting by all members.

(d) No overseas ceiling is set for Commonwealth authorities within their global limit.

For 1989–90, Loan Council approved a new money borrowing limit for Commonwealth authorities of \$1,488 million, a decrease of \$589 million on borrowings undertaken in 1988–89. Within this lower limit it is anticipated that some 60% will be applied to meet major fleet re-equipment and expansion requirements for Qantas and Australian Airlines, together with related airport infrastructure.

١

## Local Government Authority Borrowings

As shown in Table 28, local authority borrowings, undertaken within the global limits for State authorities and the NT, totalled \$654 million in 1988–89, or about 14% of all State/local new money borrowings.

Table 28-New Money	/ Borrowings	by Local	Government.	Authorities	(a)	)
--------------------	--------------	----------	-------------	-------------	-----	---

(a) New money borrowings include 'conventional' loan raisings, as well as other borrowings such as domestic deferred payment arrangements, overseas trade credits, financial leases, sale and leaseback and similar arrangements, security deposits and other repayable capital contributions, and net changes in temporary purpose borrowings over the financial year.

(b) Excludes NSW County Councils.

(c) Excludes VIC municipal authorities with electricity distribution functions.

(d) Estimate.

The amount of borrowings by local government authorities varies markedly among States (after adjusting for differences in population). This reflects a number of factors, including differences in demand for local government infrastructure arising from differing rates of population growth among the States and, more importantly, variations among the States in the functions allocated to local government.

## CHAPTER V-SPECIFIC PURPOSE PAYMENTS

This chapter outlines the distribution of specific purpose payments among the States and the Territories. The tables in Appendix III provide a more comprehensive record of such payments. The programs are examined in greater detail in Statement No. 3, 'Outlays', in Budget Paper No. 1.

Since the NT became self-governing in 1977–78, it has received specific purpose payments on the same basis as the States. Similar arrangements have applied since 1988–89 for payments to the ACT, although some specific purpose assistance was phased in during that year, with offsetting adjustments to general purpose assistance.

As in other years the distribution of assistance for 1989–90 under some programs is dependent upon the recipient governments undertaking to participate in programs, or approve particular projects. For a few programs, final decisions on the distribution of payments among the States and the Territories have still to be taken by the Commonwealth; for others, the final distribution for 1989–90 will not be settled until further data become available. In such cases, a provisional or notional estimate of the likely distribution is included. This does not commit the Commonwealth to a particular level of funding or indicate that a State or Territory has agreed to participate in the program.

### **OVERVIEW**

Specific purpose payments are provided for in the Constitution.<sup>(1)</sup> Payments of this kind are estimated to total \$12.5 billion or 49% of net Commonwealth payments to the States and the Territories in 1989–90.

Specific purpose payments are made where the Commonwealth wishes to have some involvement in the direction of expenditure. The extent of such involvement varies significantly from program to program. At one end there are programs, such as assistance for higher education, where the Commonwealth provides the vast majority of public expenditure and the States and Territories effectively act as agents for the Commonwealth in the dispersal of funds. At the other, there are program areas (for instance, current funding for schools and Technical and Further Education (TAFE)) where the Commonwealth provides a relatively small portion of total expenditure. In most cases the States and Territories administer specific purpose assistance under broad guidelines agreed with the Commonwealth. The main condition imposed on the provision of hospital grants, for example, is that State hospitals should not impose fees on Medicare patients.

While there are a large number of specific purpose payments, a few major programs account for the bulk of this assistance. In 1989–90, it is estimated that payments for education, hospitals, housing and roads will account for around 85% of total specific purpose payments.

Table 29 summarises payments to the States and the NT according to the functional classification used in Budget Paper No. 1. This classification is also the basis of the discussion of individual payments in this chapter and the detailed tables in Appendix III.

<sup>(1)</sup> Section 96 provides that the Commonwealth may grant financial assistance to any State on such terms and conditions as it thinks fit.

In some cases, however, specific purpose programs cut across a number of functional categories; the main instances where this occurs are identified below. General purpose assistance to the States and the Territories and for local government, discussed in Chapter III, is included in the table under payments 'Not Allocated to Function'.

(a) Net of repayments of Commonwealth advances and sinking fund contributions on State Governments' Loan Council programs and general purpose capital assistance to the NT. Does not include payments to the ACT Trust Account or to the ACT Government.

(b) Estimate.

(c) Identified health grants payable up to 1987-88 are classified under 'General Revenue Funds'.

(d) Amounts nominated by the States and the NT for public housing from general purpose capital assistance have been classified to 'Housing and Community Amenities'.

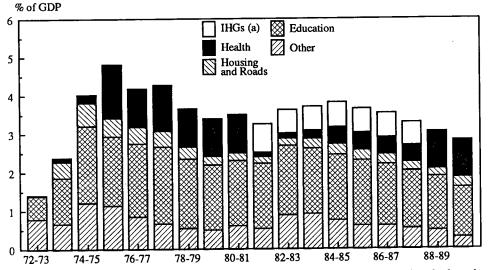

(c) Comprising grants to the States to be passed on to local government authorities as general purpose assistance.

Specific purpose payments can be made as grants or advances (loans), with the former being more common. In 1989–90 grants account for nearly all specific purpose payments. As indicated in Chapter II, the majority of Commonwealth Government advances to State and local governments have been for general purposes under the State Governments' Loan Council programs (and analogous arrangements for the NT), with the balance comprising loans under housing and various other specific purpose programs.

### Level of Specific Purpose Payments

Trends in specific purpose payments over the years mainly reflect changes in Commonwealth policy in relation to major programs. Large increases in specific purpose payments occurred between 1972–73 and 1975–76, primarily as a result of increased Commonwealth involvement in funding for education and health (see Chart 6). Between 1975–76 and 1987–88 Commonwealth assistance to the States and the NT for education (including the Commonwealth's funding of higher education and its contribution to TAFE and schools) has remained relatively stable as a proportion of GDP. In 1988–89, assistance for higher education was, for the first time, supplemented by the Higher Education Contribution Scheme, under which a portion of Commonwealth funding was paid directly to higher education institutions (and therefore is not classified as a payment to the States).

Changes in the level of specific purpose assistance have also been heavily influenced by changes in health funding arrangements. From 1975–76 to 1980–81, Commonwealth assistance for health purposes was provided primarily through hospital cost sharing grants, a specific purpose payment. In 1981–82, these grants for all States except SA and TAS were replaced by identified health grants, a component of general revenue assistance. With the introduction of Medicare in February 1984, SA and TAS joined the identified health grant arrangements. At the same time, new specific purpose payments (Medicare Compensation Grants) were introduced to compensate States for the additional costs imposed on their health systems and the loss of revenue from patients' charges arising from free public patient treatment under Medicare. From 1 July 1988, identified health grants and Medicare compensation grants were absorbed into a single specific purpose payment, hospital funding grants.

## Chart 6: Specific Purpose Payments as a Percentage of GDP

Other major payments to increase in the mid-1970s were for housing, sewerage, local government assistance and disaster relief. In the late 1970s payments for housing and sewerage declined, although the former subsequently expanded in the early to mid-1980s, at the same time as labour market programs (under the Community Employment Program (CEP)) expanded. The CEP was wound down with the recovery in the labour market, and was terminated in 1987-88. This, along with restraint in housing and road grants, has contributed significantly to the decline in specific purpose programs in recent years.

## **Distribution of Specific Purpose Payments**

Table 30 shows the variation for each State from the average per capita level of Commonwealth net payments and its main components. The distribution of specific purpose payments is much more even in *per capita* terms than other forms of assistance. This is because the distribution of most major specific purpose programs is related to population, whereas the distribution of general revenue assistance is based on the principle of fiscal equalisation, and the distribution of general purpose capital assistance reflects a variety of historical factors (see Chapter IV).

Table 30-Payments to the States and the NT, 1988-89 (Per Capita Payments as a Percentage of the Average)

Specific Purpose Payments	95.0	99.3	96.6	101.1	106.0	119.4	243.3	684.16
Total Net Payments	88.9	90.4	100.0	111.6	111.9	136.0	443.7	1,467.33

## Distributional Arrangements for Major Programs

Table 31 shows the variation from the average *per capita* level of specific purpose payments for a number of major programs. Specific purpose capital payments are less evenly distributed on a *per capita* basis than current payments. Important considerations bearing on the distribution of some of the major programs among the States are as follows:

- current grants for higher education are determined on the basis of negotiations with individual institutions which take into account their historical base, levels of enrolment and relative rates of participation and student demand for places in the different States and regions;
- current grants for schools reflect eligible student numbers, the type of institution (government and non-government) and the level of education (primary and secondary) provided. Current funding for TAFE is distributed taking into account relative State and Territory shares of teaching effort and achievements under resource agreements which reflect Commonwealth objectives;
- hospital funding grants, which were introduced in 1988–89 and comprise the bulk of health grants, are distributed on a *per capita* basis weighted according to age and sex;

Table 31-Specific Purpose Payments to the States and the NT, 1988-89 (Per Capita Payments as a Percentage of the Average)

(a) Includes current grants for hospital funding, pathology laboratories, hospital waiting list reduction, nurse education, home and community care, blood transfusion services, drug education campaigns, combatting AIDS, national better health and health programs.

(b) Includes capital grants for higher education, TAFE and schools.

(c) Includes capital grants for pensioner housing, housing assistance for Aboriginals, local government and community housing and public housing.

(d) Includes capital grants for land transport, Bicentennial roads development and Centennial roads development programs.

- general purpose assistance for local government, which is classified as a specific purpose payment to the States because State governments are required to pass on the funds to local authorities, has been progressively moving towards equal *per capita* shares (as discussed in Chapter III, 1988–89 was the last year in the transition);
- capital grants for higher education are distributed primarily for projects which are determined on the basis of factors such as enrolments and relative needs. Capital grants for TAFE colleges are distributed on the basis of teaching effort, relative need between States (participation rates, standard of existing facilities) and for the States with smaller populations, the size of individual building projects. Capital grants for schools are allocated primarily in proportion to enrolments;
- grants for public housing are distributed largely on an equal per capita basis. However, substantial proportions of the program in 1988-89 were distributed on the basis of identified needs, such as for Aboriginals and pensioners (as noted in Chapter IV, the amounts to be transferred from general purpose capital funding to the Commonwealth State Housing Agreement will reflect the historical distribution of that program in 1989-90, and the phasing in of an equal per capita distribution basis by 1992-93); and
- the distribution of roads grants reflect factors such as the length, class and usage of roads in each State.

#### Fiscal Equalisation and Specific Purpose Payments

The distribution of general revenue grants to the States and the NT is heavily weighted toward the less populous States. This is because the distribution of general revenue grants is based on *per capita* relativities determined in accordance with the principle of fiscal equalisation which, in addition to the revenue raising capacity and the costs of service delivery, also takes account of the distribution of certain specific purpose grants among States.

In determining the distribution of general revenue assistance from the Commonwealth, the Grants Commission only examines the States' relative *current* revenue and expenditure needs. All *capital* specific purpose payments (25% of the total) are, therefore, excluded from the Commission's assessments. Within the Commission's methodology, there are three main approaches to dealing with *current* specific purpose payments received by the States and the NT<sup>(2)</sup>:

- exclusion—where all expenditure in a particular area is excluded from the assessments. Areas in which the Commonwealth has largely accepted financial responsibility (for example, higher education) are treated in this way;
- deduction—where only the State-funded portion of expenditure is included in the assessment of States' expenditure needs. This approach is used where the specific purpose payment is judged to finance expenditure in addition to that which the States would otherwise have undertaken. A number of industry assistance schemes, such as the Rural Adjustment Scheme, are treated in this manner; and
- inclusion—where both Commonwealth and State funded expenditure are taken into account in the assessments. This approach is used for payments which replace the need for funding from the States' own sources—in essence, it is considered that the provision of these specific purpose payments is effectively no different to the provision of general revenue assistance.

About one half of total current specific purpose payments to the States and the NT are treated by the inclusion approach, including grants for schools and TAFE, home and community care, children's services, Aboriginal advancement and legal aid. Hospital funding grants (payable from 1988–89) are also effectively treated by the inclusion approach (see below).

The distribution of payments treated by either the deduction or the exclusion approach have no influence on the *per capita* relativities for distributing general revenue assistance. However, a State receiving a higher share of an 'included' specific purpose payment will be assessed as requiring a commensurately lower share of general revenue assistance and vice versa. This approach is pursued because unless relevant specific purpose payments are treated by the inclusion approach, it will not account for all sources of funds which assist the States in meeting their expenditure needs and the objective of fiscal equalisation would be undermined. Insofar as the purpose of fiscal equalisation is to ensure that each State, subject to making an average revenue raising effort, has the capacity to provide comparable standards of service across a range of

<sup>(2)</sup> See pages 10-12 of the Commonwealth Grants Commission's Report on General Revenue Grant Relativities 1989 Update, which also describes a fourth method of dealing with specific purpose payments (the 'hybrid inclusion' approach, a variant of the 'inclusion' approach).

functions, including education, health, and law, order and public safety, it is appropriate to include all funds generally available to provide such services.

## **EDUCATION**

Since 1974 the Commonwealth has provided nearly all the public funding of higher education, with the States and Territories passing on the funds to higher education institutions for expenditure in accordance with Commonwealth guidelines.

In 1989–90, funding for higher education provided via the States under the *Higher Education Funding Act 1988* is estimated to total \$2.4 billion (an increase of 6.1% over 1988–89). This increase largely reflects the effect of price supplementation (on the basis of expected growth in salaries, administration expenses and equipment and capital costs), changes in the timing of payments and the full-year impact of the reform package announced in the Government's Policy Statement on Higher Education (White Paper, July 1988) and implemented from 1 January 1989. The main elements of this package which have increased State funding are the continued expansion of higher education places and the capital program, and a change in the timing of payments since 1 January 1989.

These increases have been partly offset by the introduction of the Higher Education Contribution Scheme (HECS) from 1 January 1989 under which students will make a contribution towards their tuition costs (for further details see Budget Paper No. 1). The introduction of HECS has meant that a proportion of total operating grants for State and Commonwealth institutions are paid through the Higher Education Trust Fund, and treated as Commonwealth own-purpose outlays rather than as a payment to the States. Under HECS, payments to institutions via States' grants are reduced by up-front payments made directly to institutions by students.

The Commonwealth provides current and capital assistance to the States and Territories to support the operations of their TAFE systems under the *States Grants* (*Technical and Further Education Assistance*) Act 1989, with estimated payments in 1989–90 of \$343 million, an increase of 21.7% over 1988–89. This increase mainly reflects price supplementation, provision of funding for 4% enrolment growth and slippage in the 1988–89 capital program to 1989–90.

The Commonwealth also provides current and capital assistance to the States for expenditure on Government and non-Government schools in the States under the States Grants (Schools Assistance) Act 1988. Estimated funding in 1989–90 is \$2173 million, an increase of 12.9% over 1988–89. This increase mainly reflects real growth in general current (per capita) growth in line with the Government's policy of providing annual real increases until at least 1992, together with increases in price supplementation, enrolment and the full-year effect of supplementation for superannuation.

The ACT does not receive significant payments for higher education because payments to institutions in the ACT, apart from Signadou College, are still treated as Commonwealth own-purpose outlays. Payments to the ACT for higher education, TAFE and schools will decline by 36.1% in 1989–90 to \$45 million.

#### HOSPITAL FUNDING GRANTS

Hospital funding grants are the main form of Commonwealth assistance to the States and the Territories for health purposes. From 1988–89 they replaced identified health grants (which had been a component of general revenue assistance), and Medicare compensation grants. The grants for the States and the NT are estimated to total \$3,298 million in 1989–90, 8.5% higher than in 1988–89. Hospital funding grants are indexed for general cost increases (award wages and CPI) plus an age-sex weighted population factor. This indexation factor is expected to provide significant real growth in hospital funding. (Statement No. 3 in Budget Paper No. 1 provides further information on the prospective growth in these grants.)

The hospital funding grant consists of a base level of funding for each State and the NT (\$3,272 million) and an incentives package (\$42.1 million) offset by a public provision adjustment involving penalties (estimated at \$37.5 million). The totals of the base funding and the incentives package are indexed as described above from 1989–90. In addition, \$21.7 million is being provided to the States for the treatment of AIDS cases (this is indexed by the increase in the number of AIDS patients over the year to 1 November, as well as the general indexation arrangements described above).

The present estimates of the inter-State distribution of hospital grants are indicated in Table 32. These are based on estimates of the distribution of population weighted by age and sex as at May 1989; the actual distribution of base grants in 1989–90 will be based on the population distribution as at December 1989.

The ACT will receive a payment analogous to the hospital grants paid to the States and the NT of \$42.9 million in 1989-90.

As discussed in Chapter III, the distribution of hospital funding grants is taken into account in calculating the distribution of general revenue assistance to the States and the NT. The effect of hospital grants on the distribution of general revenue grants is effectively the same as for other specific purpose payments which the Grants Commission brings into its assessments under the 'inclusion' approach (described earlier). From 1989–90 the AIDS component, the incentives package and the public provision adjustment of the hospital funding grants will be excluded in determining the distribution of general revenue assistance among the States and the NT. In effect, this means that the distribution of general revenue grants will not offset the distribution of each of those components of funding. (In 1988–89, only the AIDS component of the hospital funding grants was not taken into account in determining the distribution of general revenue assistance.)

		1988	-89		1989-90 (a)

#### Table 32-Distribution of Hospital Funding

(a) Estimate.

(b) The 'quarantined amounts', which are excluded when determining the distribution of general revenue assistance, comprised only the AIDS component in 1988-89. From 1989-90, they will also include the incentives package and public provision adjustment.

## COMMUNITY SERVICES PROGRAMS

The major forms of Commonwealth assistance to the States and the Territories for the provision of community services are the Home and Community Care program (HACC) and Supported Accommodation Assistance Program (SAAP). A further area of significant and growing Commonwealth involvement is that of child care services.

The HACC program provides support services to enable frail aged and younger disabled people at risk of inappropriate institutionalisation to remain at home. In 1989–90, \$245 million is to be provided to the States and the Territories, including payments under both the 'Health' function (primarily home nursing) and the 'Social Security and Welfare' function (eg home help, delivered meals and transport).

SAAP provides crisis accommodation and related support services for homeless people. In 1989–90, \$73 million will be provided to the States and the Territories. The Commonwealth has agreed to enter into new agreements with the States to provide funds for SAAP on a cost-shared basis for a further 3 years, including an additional \$30 million in growth funds over the period (\$5 million in 1989–90).

In addition to SAAP funding, and in the context of the Commonwealth's Strategy for Young People, \$17 million will be provided on a matched basis to the States over the next four years (\$2 million in 1989–90) for innovative service development focussed on priorities for homeless youth arising out of the Burdekin Report.

Under both HACC and SAAP, the Commonwealth approves projects to which funds are applied and imposes a variety of matching and maintenance of effort requirements in relation to State expenditure.

Funding to implement the plans announced by the Commonwealth last year for an additional 30,000 child care places will commence in 1989–90. In establishing these places the Commonwealth will build on existing cost-sharing arrangements with the States and local governments.

## ABORIGINAL ADVANCEMENT

The Departments of Aboriginal Affairs and Employment, Education and Training administer a wide range of programs for Aboriginal advancement purposes. Under those programs, payments are made to the States and the Territories where that provides the most effective means of delivering the services concerned. It is estimated that a total of \$28.8 million will be provided to the States, Territories and local government authorities in 1989–90, for both capital and current purposes spread over most functional categories. This represents a decrease of 7.8% over 1988–89 and mainly reflects a change in the method of program delivery from payments to the States towards direct funding of Aboriginal organisations.

## HOUSING

Assistance to the States and the Territories for public housing is provided under the 1984 Commonwealth State Housing Agreement (CSHA).

In 1989–90, the Commonwealth will provide a total of \$1,035.0 million as grants to the States and the NT for public housing under the CSHA, compared with \$700 million in 1988–89. The increase in grants in 1989–90 reflects the replacement of concessional loans for public housing (\$310.5 million), formerly made under the State Governments' Loan Council programs (and analogous payments to the NT), with additional grants made under the CSHA. Chapter IV provides further details. The details of this change are now being considered by Commonwealth and State Housing Ministers.

The total grant includes funds for the Mortgage and Rent Relief Scheme and the Crisis Accommodation Program which are classified to the 'Social Security and Welfare' function. Portions of the assistance available under the CSHA are also earmarked for pensioner housing, Aboriginal housing and the Local Government and Community Housing Program (for the construction of low cost rental housing by local government and community groups). The States are required to match assistance provided under the Mortgage and Rent Relief Scheme and Block Assistance on a dollar for dollar basis.

In 1989–90, the Commonwealth will provide as a one off measure and on an unmatched basis an additional \$14.8 million for mortgage interest relief for those experiencing severe financial hardship. The funds will be distributed under the Mortgage and Rent Relief Scheme eligibility criteria. The Commonwealth will also provide in 1989–90 an additional \$9.8 million to the States for the establishment of medium term supported accommodation for homeless youth. Both of these new programs are classified to the 'Social Security and Welfare' function.

Since 1 July 1987, funding for ACT public housing has been aligned with arrangements applying to the States and the NT under the CSHA. Consistent with these arrangements, the ACT will receive \$18.2 million in 1989–90, including \$7.1 million formerly provided as general purpose capital assistance to the ACT.

The following table shows the distribution of payments under the CSHA in 1989-90.

	NSW	VIC	QLD	WA	SA	TAS	ACT(b)	NT	TOTAL

Table 33-Details of Payments to be made under the Commonwealth State Housing Agreement 1989-90, (a) (\$ thousand)

(a) Estimate.

(b) Although payments to the ACT are not made under the CSHA, payments are made on the same terms and conditions as CSHA payments.

(c) Payments under these programs are classified to the 'Social Security and Welfare' function.

#### ROADS

The Australian Centennial Roads Development (ACRD) Program provides grants to the States and the Territories for the construction and maintenance of roads. The program also provides funds to approved organisations for land transport research and road safety programs. Funds may also be provided under the program for urban public transport projects and mainline capital railway projects. The ACRD Program commenced on 1 January 1989, replacing both the Australian Land Transport Program and the Australian Bicentennial Road Development Program.

The following table shows the distribution of funding from 1987–88 to 1989–90 by category of road.

				0	•	_	-

Table 34-Capital Grants for Road Programs by Road Category (\$ million)

(a) Estimate.

#### FEDERAL WATER RESOURCES ASSISTANCE PROGRAM

For 1989–90, the Budget provides \$49.4 million for payment to the States and the NT under the Federal Water Resources Assistance Program (FWRAP).

Expenditure under the FWRAP is classified under three functional headings; 'Industry Assistance and Development' (for water resources development and management), 'Other Economic Services' (for urban water supply) and 'Housing and Community Amenities' (for urban flood mitigation). The States and the NT (and in some cases local government) contribute from their own resources to the cost of individual projects under a variety of expenditure matching arrangements.

An amount of \$30.7 million has been allocated to 'Industry Assistance and Development' in 1989–90 for a range of projects, including payments to QLD in relation to completion of the Burdekin Dam. An amount of \$10.9 million has been allocated to 'Other Economic Services', including provision for water treatment facilities in SA and for the Country Towns Water Supply Improvement Program in all States. An amount of \$7.8 million has been allocated to 'Housing and Community Amenities' for urban flood mitigation projects.

The table below shows details of expenditure in 1988-89.

State	\$*000	Ригрозе
NSW	1,350 (a)	Murray Valley Salinity Mitigation—a coordinated program with NSW, VIC and SA for salinity reduction and drainage control.
	3,364 (b)	Urban Flood Plain Management-approved works and studies in coastal and inland urban centres.
	25 (a)	Rural Flood Management-approved works and studies on coastal and inland rivers.
	1,586 (c)	Urban Water Supply—the Country Towns Water Supply Improvement Program (COWSIP).
	140 (c)	Water Conservation and Efficiency Improvement.
	6,465

#### NATURAL DISASTER RELIEF

Commonwealth payments under Natural Disaster Relief Arrangements (NDRA) assist the States and the Territories to meet the unpredictable and sometimes large costs of providing natural disaster relief and restoration. The arrangements recognise the States' primary responsibility under the Constitution for the administration, provision and financing of relief measures. The arrangements cover bushfires, cyclones, earthquakes, floods and storms. As announced in the April 1989 Economic Statement, with effect from 1 July 1989 drought measures are no longer included under the NDRA.

Under the NDRA the Commonwealth reimburses at least 50% of State expenditure on eligible measures for the relief of personal hardship and distress. The Commonwealth provides financial assistance for other eligible relief and restoration measures when total State expenditure on those measures in a financial year exceeds its assessed financial capacity, as represented by an annual base amount. The base amounts are set at 0.225% of State annual general government sector revenue and grants two years earlier (the latest available data), and are set out in the following table.

	NSW	VIC	QLD	WA	SA	TAS	ACT	NT
1988-89	29.50	22.01	15.44	9.17	8.12	2.94	na	2.39
1989-90	32.75	23.91	15.78	10.31	9.05	3.11	(a)	2.47

Table 36-Base Amounts for Eligibility for Assistance under the Natural Disaster Relief Arrangements (\$ million)

(a) The base amount for the ACT will be calculated after August 1989, when data on general government sector revenue and grants are available on the same basis as for the States.

Commonwealth assistance is on a dollar for dollar basis in respect of expenditure by a State above its base amount for amounts up to 75% above the base amount and three dollars Commonwealth to one dollar State thereafter.

Other major policy changes to apply to the NDRA from 1 July 1989, but with no significant estimated effect on payments, include the introduction of ceilings on the amount of Commonwealth assistance available in respect of single loans (an \$80,000 ceiling), aggregate loans (a \$120,000 ceiling) and grants (a \$5,000 ceiling) made by the States, and the abolition of the early loan repayment arrangements. The ACT was included in the NDRA from 1 July 1989.

The Commonwealth has provided \$15 million in 1989–90 for disaster relief and restoration. This is a substantial reduction on above-average expenditure of \$61.9 million in 1988–89. The estimate takes account of States' estimates of continuing expenditure in 1989–90 in respect of previous disasters. NDRA forward estimates are prepared on the basis of historical experience over the last 11 years.

The following table records, for recent years, payments to each State allocated to particular disasters.

	NSW	VIC	QLD	WA	SA	TAS	NT	TOTAL

Table 37-Payments for Natural Disaster Relief by Type of Disaster (a) (\$ thousand)

(a) Excludes the cost of emergency assistance provided by the Defence Force. Amounts shown are payments made in each financial year less refunds made within the same financial year. Refunds made in subsequent years are deducted in the year in which they are received. Payments are not designed to provide assistance on a disaster-by-disaster basis, but rather to assist a State in meeting the costs of relief measures when they exceed that State's assessed annual financial capacity. This table is derived from States' advice on their expenditures by type of disaster and apportions Commonwealth assistance accordingly. Any payments for other eligible disasters, eg earthquakes, are included in the total for all natural disasters.

(b) Reflects recoveries by Victoria from the State Electricity Commission of Victoria.

(c) Reflects refund to the Commonwealth of amounts overpaid to the Northern Territory in earlier years.

#### ASSISTANCE RELATED TO STATE DEBTS

The Commonwealth and State Governments make contributions to the National Debt Sinking Fund in respect of State debt or debt incurred on behalf of the States under the Financial Agreement of 1927. Each State currently contributes each year an amount of 0.85% of its net public debt as at the preceding 30 June toward the repayment of that debt, while the Commonwealth contributes 0.28%. Further details of sinking fund arrangements are presented in the annual reports of the National Debt Commission. Analogous arrangements apply for the NT, which is not a party to the Financial Agreement, whereby the Commonwealth and the Territory make payments to the NT Debt Sinking Fund. It is intended that similar arrangements be negotiated for the ACT, providing for sinking fund payments on the notional amount of debt attributable to the ACT.

Appendix II provides details of Commonwealth advances and the resulting interest and repayment obligations, including payments to the National and NT Debt Sinking Funds.

### ASSISTANCE TO LOCAL GOVERNMENT AUTHORITIES

In addition to general purpose assistance for local government (described in Chapter III), which is provided by the Commonwealth as a specific purpose payment to the States and the NT on the condition that it is passed on to local governments, there are two other types of Commonwealth assistance to local governments:

- direct grants—payments made direct to local government authorities for specific purposes designated by the Commonwealth. These grants differ from specific purpose payments to the States and the NT in that they are not made in relation to programs designed solely to assist local government. Not all local government authorities necessarily are involved in the activities which are assisted under the various Commonwealth programs (for example the aerodrome local ownership plan); and
- assistance passed on through the States and the NT—some funds provided to the States and the NT for specific purposes are passed on to local government. The amounts passed on are generally at the discretion of the State and the NT Governments, although in certain instances (such as road funding) the amounts passed on are subject to the approval of the Commonwealth. As is the case with direct grants, this assistance is not provided under programs specifically designed to assist local government.

The ACT Government (which has both territorial and municipal responsibilities) is eligible to receive comparable assistance in respect of its local government functions.

Details of these payments, as well as of general purpose assistance for local government, are provided in Appendix I.

#### APPENDIX I—TABLES OF PAYMENTS TO OR FOR LOCAL GOVERNMENT AUTHORITIES, 1985–86 TO 1989–90

This appendix provides details of Commonwealth payments to or for local government authorities in each of the States and the NT. The payments are in three categories:

- general purpose assistance which is initially paid to the States and the NT who are required to pass on the entire amount as untied assistance to local government authorities;
- direct grants paid under a number of specific purpose programs for which local government authorities are eligible and have received assistance; and
- assistance passed on through the States and the NT which is generally passed on at the discretion of the State and the NT governments, although in some instances (such as road funding) Commonwealth approval is required. Elsewhere in this Paper, such assistance is classified as a specific purpose payment to the States and the NT. The amounts shown are those supplied by State Treasuries for the period 1985-86 to 1988-89. In some years, for certain programs, lags can result in amounts passed on by a State to local government exceeding Commonwealth payments to that State. There are no estimates for 1989-90.

### Table 45-Commonwealth Government Payments to or for Local Government Authorities in the States and the Northern Territory (\$ thousand)

(a) The general purpose assistance grant is paid in the first instance to the State Government.
(b) From 1986-87 included in Home and Community Care.
(c) Based on information provided by State Governments. Data for 1989-90 not yet available.

### APPENDIX II—TABLES OF ADVANCES, DEBT CHARGES, NET ADVANCES, AND NET PAYMENTS TO THE STATES AND THE NT, 1985–86 TO 1989–90

This appendix sets out the advances and debt charges on advances (interest and repayments) applicable to each State and the NT. Similar information is provided in Appendix III for the ACT. Provision of this information permits a reconciliation between Commonwealth payments on a gross and net basis. The advances covered take two forms:

- advances of borrowings made on behalf of the States and the NT under the State Governments' Loan Council programs and general purpose capital assistance to the NT. Repayments of these advances take the form of payments to the National and NT Debt Sinking Funds. No new advances in this form have been made since 1986–87 or are expected to be made in 1989–90; and
- advances made by the Commonwealth for specific purposes on terms and conditions determined by the Commonwealth. These include advances from the State Governments' Loan Council programs and general purpose capital assistance to the NT nominated for public housing purposes.

Table 53—Six States and the Northern Territory—Advances, Debt Charges on	
Advances and Net Advances (\$ thousand)—continued	

(a) For purposes of these tables, advances comprise the State Governments' Loan Council and NT Government's borrowing programs and Commonwealth Government loans. See footnote (c) below.

(b) Includes sinking fund contributions on State debt made by the Commonwealth Government, which are included in this Paper as payments for the States.

(c) Derived by subtracting sinking fund payments from Loan Council and NT borrowings and repayments on Commonwealth Government loans from the amounts of those loans each year. National accounting estimates of Commonwealth Government outlays published by the Treasury and the Australian Bureau of Statistics show advances on a net basis. The figures shown here coincide with those shown in the national accounting, estimates. The figures shown in some of the other sections of this Paper are on a gross basis that is, before deducting repayments.

(d) Includes interest on the States' domestic raisings.

#### APPENDIX III—TABLES OF PAYMENTS TO OR FOR THE STATES AND THE NT, 1985–86 TO 1989–90, AND TO THE ACT, 1988–89 TO 1989–90

This appendix provides, for each State and the NT, details of Commonwealth gross payments and total net payments, including advances of borrowings made on behalf of the States and the NT under the State Governments' Loan Council programs and general purpose capital assistance to the NT. A corresponding table of payments to the ACT, which also includes information on advances, debt charges and net advances, is included for 1988–89 and 1989–90.

The payments are classified as follows:

- general purpose
  - revenue (current)
  - capital; and

specific purpose

current

- capital.

Specific purpose payments are classified on the functional basis used in Budget Paper No. 1, which aggregates outlays directed towards like objectives and purposes. The general purpose or 'untied' funds identified in this appendix are classified under the 'Not Allocated to Function' heading in Budget Paper No. 1, except for amounts nominated for public housing purposes from the State Governments' Loan Council programs and general purpose capital assistance to the NT. These amounts, classified in this appendix as general purpose capital funds, are included in Budget Paper No. 1 under the 'Housing and Community Amenities' functional heading.

Detailed discussion on general revenue assistance can be found in Chapter III, general purpose capital assistance in Chapter IV, and specific purpose payments in Chapter V.

(a) Financial transactions with the ACT are reported from the creation of the ACT Trust Account on 1 July 1988 (comparable payments prior to that date are not available). Payments therefore consist of payments to the ACT Trust Account until Self-Government Day on 11 May 1989 and payments after that date to the ACT Government. Of the \$688.9 million included above, \$597.588 million was in the form of payments to the Trust Account and hence are not included in 'Transfers to Other Governments' as defined in Budget Paper No. 1. This is partly offset by the transfer to the ACT Government of the balances held in various Trust Accounts which amounted to \$261.857 million which is classified as a 'Transfer to Other Governments' in Budget Paper No. 1, but is excluded from this table.

(b) Notional specific purpose capital payments for roads and education in the first six months of 1988-89.

(c) Including on notional levels of past debt.

(a) Payments under this heading are recorded in Statement No. 3, Budget Paper No. 1 and in Table 29 above against a number of functional headings.

(b) These payments to the NT were formerly recorded as general purpose payments. No conditions are attached to the use of the funds provided.
(c) In August 1987 administration of this program passed to the Australian Sports Commission. As a result,

these payments are no longer regarded as payments from the Commonwealth to the States, but are considered Commonwealth own-purpose outlays.
