FOREWORD

The *Final Budget Outcome 2004-05* has been prepared in a manner consistent with the *Charter of Budget Honesty Act 1998*. The Charter requires that, *inter alia*, the Government provide a final budget outcome report no later than three months after the end of the financial year. Consistent with these requirements, this report encompasses Australian Government general government sector fiscal outcomes for the 2004-05 financial year and is based on external reporting standards.

- **Part 1** provides the general government sector budget aggregates for 2004-05 together with an analysis of the 2004-05 final budget outcome. This includes summary analysis of revenue, expenses, net capital investment, cash flows and the balance sheet (net debt and net worth).
- **Part 2** presents the Australian Government financial statements for 2004-05 in accordance with the Australian Bureau of Statistics (ABS) Government Finance Statistics (GFS) framework. This data covers the general government sector as well as the Australian Government public corporations sectors.
- **Part 3** presents the 2004-05 Australian Government general government sector financial statements in accordance with Australian Accounting Standards (AAS).
- **Part 4** provides details for 2004-05 on Federal Financial Relations, updated from that contained in the 2005-06 Budget Paper No. 3.
- **Appendix A** contains details of budget concepts and reporting standards. **Appendix B** contains expenses data on a functional and sub-functional basis. Historical fiscal data are presented in **Appendix C**.

Notes

- (a) The following definitions are used in this paper:
- 'real' means adjusted for the effect of inflation;
 - real growth in expenses is measured by the non-farm Gross Domestic Product deflator; and
 - one billion is equal to one thousand million.
- (b) Figures in tables and generally in the text have been rounded. Discrepancies in tables between totals and sums of components are due to rounding:
- estimates under \$100,000 are rounded to the nearest thousand;
 - estimates \$100,000 and over are generally rounded to the nearest tenth of a million;
 - estimates midway between rounding points are rounded up; and
 - the percentage changes in statistical tables are calculated using unrounded data.
- (c) For the budget balance, a negative sign indicates a deficit while no sign indicates a surplus.
- (d) The following notations are used:

| | |
|---------|---|
| NEC/nec | not elsewhere classified |
| AEST | Australian Eastern Standard Time |
| - | not available |
| .. | not zero, but rounded to zero |
| na | not applicable (unless otherwise specified) |
| nfp | not for publication |
| \$m | \$ million |
| \$b | \$ billion |

- (e) References to the 'States' or 'each State' include the territories. The Australian Capital Territory and the Northern Territory are referred to as 'the Territories'. The following abbreviations are used for the names of the States, where appropriate:

NSW New South Wales

VIC/Vic Victoria

QLD/Qld Queensland

WA Western Australia

SA South Australia

TAS/Tas Tasmania

ACT Australian Capital Territory

NT Northern Territory

PART 1: AUSTRALIAN GOVERNMENT BUDGET OUTCOME

OVERVIEW

In 2004-05, the Australian Government general government sector recorded an underlying cash surplus of \$13.6 billion, or 1.6 per cent of gross domestic product (GDP). The fiscal balance was in surplus by \$10.8 billion (1.2 per cent of GDP).

Table 1: Australian Government general government sector budget aggregates^(a)

| | 2003-04 Outcome | 2004-05 Estimate at 2005-06 Budget | 2004-05 Outcome |
|--------------------------------------|--------------------|---|--------------------|
| Revenue (\$b) | 187.6 | 202.7 | 206.2 |
| Per cent of GDP | 23.1 | 23.5 | 23.9 |
| Expenses (\$b) | 181.2 | 195.0 | 195.3 |
| Per cent of GDP | 22.4 | 22.6 | 22.6 |
| Net operating balance (\$b) | 6.3 | 7.7 | 10.9 |
| Net capital investment (\$b) | 0.7 | 0.7 | 0.1 |
| Fiscal balance (\$b) | 5.6 | 7.0 | 10.8 |
| Per cent of GDP | 0.7 | 0.8 | 1.2 |
| Underlying cash balance (\$b) | 8.0 | 9.2 | 13.6 |
| Per cent of GDP | 1.0 | 1.1 | 1.6 |
| <i>Memorandum item:</i> | | | |
| Headline cash balance (\$b) | 7.6 | 7.9 | 12.5 |

(a) All estimates are based on Government Finance Statistics (GFS) standards, but with goods and services tax (GST) revenue collected on behalf of the States and Territories netted off revenue and expenses.

Australian Government general government sector net worth improved by \$7.6 billion in 2004-05 to around -\$32.0 billion, largely reflecting the strong budget surplus. Net debt also improved, falling by \$11.9 billion in 2004-05 to around \$11.5 billion or 1.3 per cent of GDP which is the lowest level in 28 years.

In cash terms the outcome was \$4.4 billion higher than estimated at the time of the 2005-06 Budget principally because total cash payments were around \$3.5 billion lower than expected at the 2005-06 Budget. This is due mainly to a lower than expected take up of grant and subsidy payments across a range of programmes (\$1.3 billion). Also contributing to the underspends were delays in contract negotiations and delivery of goods and services (\$0.5 billion), lower wages and salary payments (\$0.5 billion), and the rejection by the Tasmanian and South Australian governments of an offer to extinguish state rail superannuation liabilities (\$0.4 billion).

Part 1: Australian Government Budget Outcome

The fiscal balance outcome was \$3.8 billion higher than estimated at Budget time, principally because revenue in accrual terms was around \$3.6 billion higher than expected.

REVENUE

Total accrual revenue in 2004-05 of \$206.2 billion was 1.8 per cent higher than expected at the 2005-06 Budget. The variation reflects:

- company taxation accrual revenue was around \$2.5 billion higher than expected, primarily owing to stronger income growth and profitability in the June quarter 2005;
- other individuals taxation accrual revenue was \$363 million higher than expected, primarily owing to the lagged effect of strong growth in investment income in 2003-04; and
- non-taxation accrual revenue was \$500 million higher than expected.

Table 2: Australian Government general government sector revenue

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |

| /less: Refunds | 13,700 | 13,734 |
| Total individuals and other withholding | 107,930 | 108,519 |
| Companies | 40,610 | 43,106 |
| Superannuation funds | | |
| Contributions and earnings | 5,090 | 5,083 |
| Superannuation surcharge | 1,290 | 1,326 |
| Total superannuation funds | 6,380 | 6,410 |
| Petroleum resource rent tax | 1,460 | 1,465 |
| Total income taxation revenue | 156,380 | 159,499 |
| <i>Excise and customs</i> | | |
| Excise duty | | |
| Petroleum and other fuel products | 13,620 | 13,682 |
| Crude oil | 650 | 668 |
| Alcohol products | 2,460 | 2,394 |
| Tobacco | 5,280 | 5,237 |
| Total excise duty | 22,010 | 21,981 |
| Customs duty | | |
| Textiles, clothing and footwear | 1,000 | 966 |
| Passenger motor vehicles | 1,450 | 1,397 |
| Excise-like goods | 1,680 | 1,697 |
| Other imports | 1,884 | 1,793 |
| /less: Refunds and drawbacks | 300 | 306 |
| Total customs duty | 5,714 | 5,548 |
| Total excise and customs revenue | 27,724 | 27,529 |
| <i>Indirect taxation</i> | | |
| Wine equalisation tax | 690 | 693 |
| Luxury car tax | 300 | 302 |
| Other taxes | 190 | 169 |
| Total indirect taxation revenue | 1,180 | 1,164 |
| <i>Other taxation</i> | | |
| Fringe benefits tax(b) | 3,050 | 3,089 |
| Agricultural levies | 572 | 584 |
| Other taxes | 1,296 | 1,389 |
| Total other taxation revenue | 4,917 | 5,061 |
| Total taxation revenue | 190,201 | 193,252 |
| <i>Non-taxation</i> | | |
| Sales of goods and services | 4,828 | 4,880 |
| Dividends | 3,146 | 3,176 |
| Interest received | 1,562 | 1,621 |
| Other | 2,929 | 3,289 |
| Total non-taxation revenue | 12,465 | 12,965 |
| Total revenue | 202,666 | 206,218 |

(a) Includes Medicare levy revenue of \$6,105 million in 2004-05.

(b) Consistent with GFS reporting standards, excludes fringe benefits tax collected from Australian Government agencies (\$387 million in 2004-05).

EXPENSES

Total accrual expenses were \$195.3 billion in 2004-05, an increase of \$281 million (0.1 per cent) from the estimate provided in the 2005-06 Budget. Expenses increased by:

- \$1.0 billion due to higher than expected write-offs of tax penalties by the Australian Taxation Office, following a review of the collectability of its outstanding penalties;
- \$490 million due to a higher than expected impact of a change in accounting policy adopted in the Budget which recognises certain administered programmes by the Australian Taxation Office in the year of accrual rather than the year of payment;
- \$152 million due to a one-off payment to residential aged care providers for improved information technology infrastructure, financial reporting and training;
- \$131 million in depreciation expenses due mainly to a number of significant revaluations of property by the Department of Defence; and
- \$98 million in nominal superannuation interest expense due to an actuarial revaluation of the Department of Defence's superannuation liabilities.

These increases were partially offset by:

- a decrease in grant expenses of \$796 million including from delays in the finalisation of funding agreements in education and research programmes (\$231 million) and lower than expected take up in a range of programmes, including health (\$383 million) and agriculture (\$94 million);
- a decrease in personal benefit expenses of \$363 million primarily due to a lower than expected impact from the change in accounting policy adopted in the Budget for Family Tax Benefit entitlements; and
- a decrease in wages and salaries expense of \$561 million due to a reduction in accrued leave expenses, largely in the Department of Defence, and lower than anticipated staffing levels across a number of agencies.

Table 3 provides information on Government Finance Statistics (GFS) general government sector expenses by function.

Table 3: Australian Government general government sector expenses by function

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|

| Public debt interest | 3,907 | 3,880 |
| Nominal superannuation interest | 4,882 | 5,005 |
| General purpose intergovernmental transactions | 3,034 | 3,003 |
| Natural disaster relief | 84 | 77 |
| Contingency reserve(a) | 36 | 11 |
| Total expenses | 195,012 | 195,293 |

(a) Asset sale related expenses are treated as a component of the contingency reserve.

NET CAPITAL INVESTMENT

Total net capital investment for 2004-05 was \$147 million, which is \$505 million lower than the estimate provided in the 2005-06 Budget. This primarily reflects a delay in the purchase of non-financial assets of \$280 million including in the portfolios of Foreign Affairs and Trade, Attorney-General's, and Defence; and an increase in depreciation of \$131 million due mainly to a number of significant property revaluations by the Department of Defence.

Table 4: Australian Government general government sector net capital investment by function

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|
| General public services | 245 | 99 |
| Defence | -85 | -115 |
| Public order and safety | 118 | 38 |
| Education | 5 | 5 |
| Health | 157 | 103 |
| Social security and welfare | 59 | -16 |
| Housing and community amenities | 95 | 71 |

| Mining, manufacturing and construction | 5 | 2 |
| Transport and communication | 28 | 12 |
| Other economic affairs | 71 | 42 |
| Other purposes | 3 | 2 |
| Total net capital investment | 652 | 147 |

CASH FLOWS

The 2004-05 underlying cash surplus was \$13.6 billion, \$4.4 billion higher than estimated at the 2005-06 Budget. The higher than anticipated outcome was the result of higher cash receipts of \$0.9 billion and lower cash payments of \$3.5 billion.

Total Australian Government general government sector cash receipts of \$203.6 billion were \$0.9 billion (0.4 per cent) higher than estimated at the 2005-06 Budget. The cash receipts outcome reflects:

- higher than expected company tax receipts of \$804 million;
- higher than expected gross other individuals receipts of \$154 million;
- partially offset by a decrease in non-tax receipts of \$161 million due to delays in collections across a number of agencies, including the Department of Defence and Defence Housing Authority.

The higher accrual revenue outcome relative to cash primarily reflects higher tax revenue recognised but not yet received for company tax and gross other individuals heads of revenue.

Total Australian Government general government sector cash payments were \$189.9 billion in 2004-05, \$3.5 billion (1.8 per cent) lower than estimated at the 2005-06 Budget. This is due mainly to a lower than expected take up of grant and subsidy payments across a range of programmes (\$1.3 billion). Also contributing to the underspends were delays in contract negotiations and delivery of goods and services (\$0.5 billion), lower wages and salary payments (\$0.5 billion), and the rejection by the Tasmanian and South Australian governments of an offer to extinguish state rail superannuation liabilities (\$0.4 billion).

Many of these cash variations were also reflected in similar expense and net capital investment variations discussed earlier in this part, with some major differences.

The variations in cash payments that were greater than in accrual expenses include:

- delayed payments of \$454 million across a range of health and veterans' affairs programmes, including the Medicare Services, National Public Health, and Access to Public Hospitals programmes, and contracts for hospital services for veterans;
- a decline in cash payments of \$411 million due to the rejection by the Tasmanian and South Australian governments of an offer to extinguish state rail superannuation liabilities; and
- a decline in cash payments of \$61 million to suppliers reflecting delays in delivery of explosive ordnance orders to the Department of Defence.

Similarly, variations in accrual expenses and net capital investments that do not affect cash payments include:

- an increase of \$1.0 billion from higher than expected write-offs of tax penalties by the Australian Taxation Office following a review of the collectability of outstanding penalties;
- an actuarial revaluation of the Department of Defence's superannuation liabilities, resulting in a \$98 million increase in nominal superannuation interest expense; and
- an increase of \$91 million due to increased use of inventories by the Department of Defence reflecting higher levels of activity.

Table 5: Summary of Australian Government general government sector cash flows^(a)

| | 2004-05 Estimate at 2005-06 Budget \$b | 2004-05 Outcome \$b |
|--|--|---------------------------|
| Cash receipts | | |
| Operating cash receipts | 202.2 | 203.0 |
| Capital cash receipts(b) | 0.4 | 0.5 |
| Total cash receipts | <u>202.7</u> | <u>203.6</u> |
| Cash payments | | |
| Operating cash payments | 190.9 | 187.7 |
| Capital cash payments(c) | 2.6 | 2.2 |
| Total cash payments | <u>193.4</u> | <u>189.9</u> |
| Finance leases and similar arrangements(d) | 0.0 | 0.0 |
| GFS cash surplus(+)/deficit(-) | 9.2 | 13.6 |
| Per cent of GDP | 1.1 | 1.6 |
| <i>less</i> Future Fund earnings | 0.0 | 0.0 |
| Underlying cash balance | 9.2 | 13.6 |
| Per cent of GDP | 1.1 | 1.6 |
| <i>Memorandum items:</i> | | |
| Net cash flows from investments in financial assets for policy purposes(e) | | |
| Major asset sales | 0.0 | 0.0 |
| <i>less</i> Other net advances paid | -1.3 | -1.1 |
| <i>plus</i> Future Fund earnings | 0.0 | 0.0 |
| Headline cash balance | 7.9 | 12.5 |

(a) Cash flows are derived from the accrual GFS framework excluding GST.

(b) Equivalent to cash receipts from the sale of non-financial assets in the GFS cash flow statement.

(c) Equivalent to cash payments for purchases of new and second-hand non-financial assets in the GFS cash flow statement.

(d) The acquisition of assets under finance leases decreases the underlying cash balance. The disposal of assets previously held under finance leases increases the underlying cash balance.

(e) Under the cash budgeting framework, these cash flows were referred to as net advances.

NET DEBT AND NET WORTH

In 2004-05, the level of Australian Government net debt continued to fall from a peak of 19.1 per cent of GDP in 1995-96 to 1.3 per cent of GDP in 2004-05. Since 1996-97, net debt has fallen by \$84.7 billion. The fall in net debt was \$4.8 billion greater than estimated at the 2005-06 Budget, largely reflecting the higher than expected underlying cash surplus outcome.

Net interest payments in 2004-05 were around similar levels anticipated at the 2005-06 Budget. Having peaked at \$8.4 billion in 1996-97, net interest payments have declined to \$2.5 billion in 2004-05, representing annual savings in interest payments of \$6.0 billion.

Australian Government general government sector net worth increased from -\$39.6 billion in 2003-04 to -\$32.0 billion at the end of 2004-05. The \$7.6 billion improvement largely reflects a strong net operating surplus of \$10.9 billion and a \$3.4 billion revaluation of assets, including a \$1.2 billion revaluation of land by the Department of Defence. These improvements are partially offset by:

- a net writedown of assets of \$5.2 billion, largely due to provisioning for bad and doubtful debts by the Australian Taxation Office; and
- actuarial revaluations of \$1.1 billion relating mainly to the unfunded superannuation liability.

Table 6: Australian Government general government sector net worth, net debt and net interest payments

| | 2004-05 Estimate at 2005-06 Budget \$b | 2004-05 Outcome \$b |
|---------------------------------|--|---------------------------|
| Financial assets | 119.4 | 124.0 |
| Non-financial assets | 41.3 | 42.4 |
| Total assets | 160.6 | 166.4 |
| Total liabilities | 194.7 | 198.3 |
| Net worth | -34.1 | -32.0 |
| Net debt(a) | 16.3 | 11.5 |
| Per cent of GDP | 1.9 | 1.3 |
| Net interest payments(b) | 2.4 | 2.5 |
| Per cent of GDP | 0.3 | 0.3 |

(a) Net debt equals the sum of deposits held, advances received, government securities, loans and other borrowing, minus the sum of cash and deposits, advances paid and investments, loans and placements.

(b) Australian Government cash interest payments less cash interest receipts.

REPORTING STANDARDS

The *Charter of Budget Honesty Act 1998* requires that the final budget outcome be based on external reporting standards and that departures from applicable external reporting standards be identified.

The major external standards used for final budget outcome reporting purposes are:

- the Australian Bureau of Statistics' (ABS) Government Finance Statistics (GFS) publication, *Australian System of Government Finance Statistics: Concepts, Sources and Methods* Cat. No. 5514.0, which in turn is based on the International Monetary Fund (IMF) accrual GFS framework; and
- Australian Accounting Standards (AAS), including AAS 31 *Financial Reporting by Governments*.

The Australian Equivalents to International Financial Reporting Standards (AEIFRS) reporting requirements apply to reporting periods starting on or after 1 January 2005. The 2005-06 AAS financial statements will be prepared in accordance with these standards and the impact of applying these new standards has been outlined in Note 2 of Part 3.

Final Budget Outcome tables, with the exception of tables in Part 2, do not include goods and services tax (GST) collections and equivalent payments to the States and Territories (the States). However, under the *Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations*, all GST receipts are appropriated to the States and thus are not available for expenditure by the Australian Government. Because the Australian Taxation Office collects GST as an agent for the states, GST receipts are not shown as Australian Government revenue. Estimates of GST receipts are provided in Table A2 of Appendix A.

ABS GFS requires that provisions for bad and doubtful debts be excluded from the balance sheet. This treatment has not been adopted because excluding such provisions would overstate the value of Australian Government assets in the balance sheet (and would, therefore, be inconsistent with the market valuation principle).

The AAS financial statements currently record IMF Special Drawing Rights (SDRs) as a liability. This is consistent with AAS. The GFS statements also record SDRs as a liability. However, in accordance with the IMF's GFS manual, IMF SDRs are not treated as a liability in ABS GFS although they are treated this way in other IMF documentation. In view of these differences, the current approach will remain in place pending further consultation with the ABS and IMF, and developments in train to harmonise GFS and AAS.

Similarly, the GFS financial statements currently adopt the AAS treatment for circulating coins. Under this treatment revenue is recognised upon the issue of coins and no liability is recorded, as there is no legal obligation requiring coins on issue to be repurchased by the Australian Government. However, in ABS GFS, coins on issue are treated as a liability and no revenue is recognised. The current accounting treatment will remain in place pending further consultation with the IMF, and developments in train to harmonise GFS and AAS.

ABS GFS also requires defence weapons be treated as expenses. Defence weapons inventories are recorded as capital investment rather than expenses until such inventories can be reliably identified and measured. This treatment does not affect the underlying cash and fiscal balances.

In order to ensure the reporting of reliable GFS and AAS budget estimates and outcomes, taxation revenue is recognised the earlier of when an assessment of a tax liability is made or cash payment is received by the Australian Taxation Office or the Australian Customs Service. This method is permitted under both GFS and AAS when there is an inability to reliably measure taxation revenues at the time the underlying transactions or events occur. Accordingly, for most categories of taxation revenue, there is a short lag between the time at which the underlying economic activity giving rise to the tax liability occurs and when the revenue is recognised. Longer lags of up to a year occur for some elements of company and superannuation funds taxation.

Additional information on the reporting standards and budget concepts is provided in Appendix A.

BUDGET FINANCIAL STATEMENTS

The budget financial statements consist of an operating statement, balance sheet, cash flow statement and statement of other economic flows (reconciliation of net worth) for the Australian Government general government sector. The budget financial statements are based on GFS standards with the exception of the divergences discussed in Attachment A.

Table 7: Australian Government general government sector operating statement

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|
| Revenue | | |
| Taxation revenue | 190,201 | 193,252 |
| Current grants and subsidies | 0 | 0 |
| Sales of goods and services | 4,828 | 4,880 |
| Interest income | 1,562 | 1,621 |
| Dividend income | 3,146 | 3,176 |
| Other | 2,929 | 3,289 |

| Gross operating expenses | | |
| Depreciation | 1,892 | 2,023 |
| Superannuation | 2,487 | 2,386 |
| Salaries and wages | 11,922 | 11,361 |
| Payment for supply of goods and services | 45,246 | 45,330 |
| Other operating expenses | 2,814 | 2,971 |
| <i>Total gross operating expenses</i> | <i>64,362</i> | <i>64,071</i> |
| Nominal superannuation interest expense | 4,882 | 5,005 |
| Other interest expenses | 4,131 | 4,145 |
| Other property expenses | 0 | 0 |
| Current transfers | | |
| Grant expenses | 37,203 | 36,407 |
| Subsidy expenses | 6,470 | 7,221 |
| Personal benefit payments in cash | 74,478 | 74,115 |
| Other current transfers | 0 | 0 |
| <i>Total current transfers</i> | <i>118,151</i> | <i>117,743</i> |
| Capital transfers | 3,486 | 4,328 |
| Total expenses | 195,012 | 195,293 |
| Net operating balance | 7,655 | 10,925 |
| Net acquisition of non-financial assets | | |
| Purchases of non-financial assets | 2,487 | 2,207 |
| /less Sales of non-financial assets | 364 | 490 |
| /less Depreciation | 1,892 | 2,023 |
| plus Change in inventories | 374 | 508 |
| plus Other movements in non-financial assets | 47 | -55 |
| Total net acquisition of non-financial assets | 652 | 147 |
| Net lending/fiscal balance(a) | 7,003 | 10,778 |

(a) The term fiscal balance is not used by the ABS.

Table 8: Australian Government general government sector balance sheet

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|
| Assets | | |
| Financial assets | | |
| Cash and deposits | 927 | 1,808 |
| Advances paid | 19,314 | 20,199 |
| Investments, loans and placements | 31,066 | 35,022 |
| Other non-equity assets | 17,147 | 16,772 |
| Equity(a) | 50,895 | 50,183 |
| <i>Total financial assets</i> | <i>119,351</i> | <i>123,984</i> |
| Non-financial assets | | |
| Land | 4,863 | 6,140 |
| Buildings | 13,894 | 14,195 |
| Plant, equipment and infrastructure | 8,411 | 8,209 |
| Inventories | 5,299 | 4,524 |
| Heritage and cultural assets | 6,698 | 7,275 |
| Other non-financial assets | 2,085 | 2,032 |
| <i>Total non-financial assets</i> | <i>41,250</i> | <i>42,374</i> |
| Total assets | 160,601 | 166,358 |
| Liabilities | | |
| Deposits held | 365 | 403 |
| Advances received | 0 | 0 |
| Government securities | 61,452 | 62,331 |
| Loans | 5,595 | 5,648 |
| Other borrowing | 224 | 182 |
| Superannuation liability | 91,071 | 91,172 |
| Other employee entitlements and provisions | 7,605 | 8,178 |
| Other non-equity liabilities | 28,416 | 30,423 |
| Total liabilities | 194,727 | 198,337 |
| Net worth(b) | -34,126 | -31,979 |
| Net debt(c) | 16,328 | 11,534 |

(a) The 2004-05 equity and net worth outcomes include the Telstra shareholding valued at the closing share price on 30 June 2005.

(b) Net worth is calculated as total assets minus total liabilities.

(c) Net debt equals the sum of deposits held, advances received, government securities, loans and other borrowing, minus the sum of cash and deposits, advances paid and investments, loans and placements.

Table 9: Australian Government general government sector cash flow statement^(a)

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|---|--|---------------------------|
| Cash receipts from operating activities | | |
| Taxes received | 186,205 | 187,279 |
| Receipts from sales of goods and services | 5,015 | 4,865 |
| Grants and subsidies received | 0 | 0 |
| Interest receipts | 1,460 | 1,400 |
| Dividends | 3,808 | 3,838 |
| GST input credits received by general government | 2,908 | 2,883 |
| Other receipts | 2,849 | 2,763 |
| Total operating receipts | 202,246 | 203,027 |
| Cash payments for operating activities | | |
| Payments for goods and services | -48,518 | -48,040 |
| Grants and subsidies paid | -45,200 | -43,937 |
| Interest paid | -3,856 | -3,863 |
| Personal benefit payments | -73,664 | -73,206 |
| Salaries, wages and other entitlements | -16,508 | -15,990 |
| GST payments by general government to taxation authority | -120 | -60 |
| Other payments for operating activities | -2,988 | -2,638 |
| Total operating payments | -190,855 | -187,735 |
| Net cash flows from operating activities | 11,391 | 15,293 |

| Net cash flows from investments in non-financial assets | -2,163 | -1,664 |
| Net cash flows from investments in financial assets for policy purposes | -1,317 | -1,139 |
| Cash flows from investments in financial assets for liquidity purposes | | |
| Increase in investments | -7,456 | -11,024 |
| Net cash flows from investments in financial assets for liquidity purposes | -7,456 | -11,024 |
| Cash flows from financing activities | | |
| Advances received (net) | 0 | 0 |
| Borrowing (net) | 188 | 136 |
| Deposits received (net) | 0 | 39 |
| Other financing (net) | -1,306 | -1,422 |
| Net cash flows from financing activities | -1,118 | -1,247 |
| Net increase/decrease in cash held | -663 | 218 |

Table 9: Australian Government general government sector cash flow statement^(a) (continued)

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|---|--|---------------------------|
| Net cash from operating activities and investments in non-financial assets | 9,227 | 13,629 |
| Finance leases and similar arrangements(b) | -7 | -13 |
| GFS cash surplus(+) / deficit(-) | 9,221 | 13,616 |
| /less Future Fund earnings | 0 | 0 |
| Equals underlying cash balance(c) | 9,221 | 13,616 |
| <i>plus</i> net cash flows from investments in financial assets for policy purposes | -1,317 | -1,139 |
| <i>plus</i> Future Fund earnings | 0 | 0 |
| Equals headline cash balance | 7,904 | 12,477 |

(a) A positive number denotes a cash inflow; a negative sign denotes a cash outflow.

(b) The acquisition of assets under finance leases decreases the underlying cash balance. The disposal of assets previously held under finance leases increases the underlying cash balance.

(c) The term underlying cash balance is not used by the ABS.

Table 10: Australian Government general government sector statement of other economic flows (reconciliation of net worth)

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|
| Opening net worth | -37,803 | -37,803 |
| Opening net worth adjustments(a) | -1,741 | -1,792 |
| Adjusted opening net worth | -39,544 | -39,595 |
| Change in net worth from operating transactions | 7,655 | 10,925 |
| Change in net worth from other economic flows | | |
| Revaluation of equity(b) | 1,301 | 698 |
| Net writedowns of assets | | |
| (including bad and doubtful debts) | -2,226 | -5,233 |
| Assets recognised for the first time | 23 | 631 |
| Liabilities recognised for the first time | 0 | 0 |
| Actuarial revaluations | -937 | -1,108 |
| Net foreign exchange gains | -384 | -423 |
| Net swap interest received | 180 | 181 |
| Market valuation of debt | -195 | -708 |
| Other economic revaluations(c) | 2 | 2,653 |
| Total other economic flows | -2,236 | -3,309 |
| Closing net worth | -34,126 | -31,979 |

- (a) Decrease in net worth arising from a change in recognition of family tax benefits and other expenses from a cash to an accrual basis.
- (b) The 2004-05 equity and net worth outcomes include the change in the value of Telstra shareholding between the closing share price on 30 June 2004 and 30 June 2005.
- (c) Largely reflects revaluation of assets and liabilities mainly by the Department of Defence.

PART 2: GOVERNMENT FINANCE STATISTICS STATEMENTS

Financial tables presented in this part are prepared in accordance with the Australian Bureau of Statistics (ABS) accrual Government Finance Statistics (GFS) framework.

The tables include an operating statement, balance sheet and cash flow statement for the Australian Government general government, public non-financial corporations, total non-financial public and public financial corporations sectors. A statement of other economic flows is also included for the Australian Government general government sector.

The Australian, state and territory governments have an agreed framework — the *Accrual Uniform Presentation Framework* — for the presentation of government financial information on a basis consistent with the ABS GFS publication. This part presents Australian Government data on an ABS GFS basis, as required by the *Accrual Uniform Presentation Framework*, except for the departures (other than in relation to the treatment of goods and services tax (GST)) detailed in Attachment A to Part 1.

The only difference between the Australian Government general government sector statements in Part 1 and this part is the treatment of the GST. The clear policy intent of the *Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations* is that GST is collected by the Australian Taxation Office, as an agent for the States and Territories (the States), and appropriated to the States. Consequently, it is not shown as Australian Government revenue in other parts of this document. However, the tables in this part show GST as taxation revenue and payments to the states as grant expenses.

As a result of the different treatments of GST related transactions, fiscal balance, net operating balance and net worth estimates in this part differ from those reported elsewhere in this document. This difference represents the effect of GST revenue accrued but not yet received and, therefore, not yet paid or payable to the States (as GST obligations to the States are on a cash basis). The GFS cash surplus/deficit is not affected and provides identical results under both treatments of GST receipts.

Transactions between the Australian Government general government sector, public financial corporations sector and the public non-financial corporations sectors are included in the relevant tables, but removed from the total non-financial public sector tables as they are transactions internal to that sector.

Public access communication assets, computer software and other intangibles are recorded at historic cost, as market value information, or suitable proxies for market value, are not readily observable. This affects the public non-financial corporations sector balance sheet, but does not affect the general government sector balance sheet.

Part 2: Government Finance Statistics Statements

Table A2 of Appendix A provides reconciliations between key GFS aggregates and their Australian Accounting Standards counterparts.

In accordance with *Accrual Uniform Presentation Framework* requirements, this part also contains an update of the Australian Government's Loan Council Allocation.

Table 11: Australian Government general government sector operating statement

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|
| GFS revenue | | |
| Taxation revenue | 226,501 | 228,726 |
| Current grants and subsidies | 0 | 0 |
| Sales of goods and services | 4,828 | 4,880 |
| Interest income | 1,562 | 1,621 |
| Dividend income | 3,146 | 3,176 |
| Other | 2,929 | 3,289 |
| Total GFS revenue | 238,966 | 241,691 |
| GFS expenses | | |
| Gross operating expenses | | |
| Depreciation | 1,892 | 2,023 |
| Superannuation | 2,487 | 2,386 |
| Salaries and wages | 11,922 | 11,361 |
| Payment for supply of goods and services | 45,246 | 45,330 |
| Other operating expenses | 2,814 | 2,971 |
| <i>Total gross operating expenses</i> | <i>64,362</i> | <i>64,071</i> |
| Nominal superannuation interest expense | 4,882 | 5,005 |
| Other interest expenses | 4,131 | 4,154 |
| Other property expenses | 0 | 0 |
| Current transfers | | |
| Grant expenses | 72,753 | 71,470 |
| Subsidy expenses | 6,470 | 7,221 |
| Personal benefit payments in cash | 74,478 | 74,115 |
| Other current transfers | 0 | 0 |
| <i>Total current transfers</i> | <i>153,701</i> | <i>152,805</i> |
| Capital transfers | 3,591 | 4,448 |
| Total GFS expenses | 230,667 | 230,483 |
| Net operating balance(a) | 8,300 | 11,207 |
| Net acquisition of non-financial assets | | |
| Purchases of non-financial assets | 2,487 | 2,207 |
| <i>less</i> Sales of non-financial assets | 364 | 490 |
| <i>less</i> Depreciation | 1,892 | 2,023 |
| <i>plus</i> Change in inventories | 374 | 508 |
| <i>plus</i> Other movements in non-financial assets | 47 | -55 |
| Total net acquisition of non-financial assets | 652 | 147 |
| Net lending/fiscal balance(a/b) | 7,648 | 11,061 |

(a) The fiscal balance and net operating balance outcomes in this table differ from those presented elsewhere in the Final Budget Outcome reflecting the treatment of the GST as an Australian Government tax.

(b) The term fiscal balance is not used by the ABS.

Table 12: Australian Government general government sector balance sheet

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|--|--|---------------------------|
| GFS assets | | |

| Other receipts | 2,849 | 2,763 |
| Total operating receipts | 234,727 | 235,002 |
| Cash payments for operating activities | | |
| Payments for goods and services(c) | -45,570 | -45,012 |
| Grants and subsidies paid(d) | -80,750 | -79,000 |
| Interest paid | -3,856 | -3,863 |
| Personal benefit payments | -73,664 | -73,206 |
| Salaries, wages and other entitlements | -16,508 | -15,990 |
| GST payments to taxation authority(c) | 0 | 0 |
| Other payments for operating activities | -2,988 | -2,638 |
| Total operating payments | -223,336 | -219,709 |
| Net cash flows from operating activities | 11,391 | 15,293 |
| Cash flows from investments in non-financial assets | | |
| Sales of non-financial assets | 416 | 546 |
| Purchases of non-financial assets | -2,579 | -2,210 |
| Net cash flows from investments in non-financial assets | -2,163 | -1,664 |
| Net cash flows from investments in financial assets | | |
| for policy purposes | -1,317 | -1,139 |
| Cash flows from investments in financial assets | | |
| for liquidity purposes | | |
| Increase in investments | -7,456 | -11,024 |
| Net cash flows from investments in financial assets | -7,456 | -11,024 |
| Cash flows from financing activities | | |
| Advances received (net) | 0 | 0 |
| Borrowing (net) | 188 | 136 |
| Deposits received (net) | 0 | 39 |
| Other financing (net) | -1,306 | -1,422 |
| Net cash flows from financing activities | -1,118 | -1,247 |
| Net increase/decrease in cash held | -663 | 218 |
| Net cash from operating activities and investments | | |
| in non-financial assets | 9,227 | 13,629 |
| Finance leases and similar arrangements(e) | -7 | -13 |
| Equals surplus(+)/deficit(-) | 9,221 | 13,616 |

(a) A positive number denotes a cash inflow; a negative sign denotes a cash outflow.

(b) Includes GST cash receipts on an Australian Government tax basis, which are \$75 million higher in 2004-05 than GST cash receipts measured by the Australian Government on a State tax basis (as shown in Part 3, Note 18).

(c) GST flows are excluded from these categories.

(d) Includes GST cash payments on an Australian Government tax basis.

(e) The acquisition of assets under finance leases decreases the surplus or increases the deficit. The disposal of assets previously held under finance leases increases the surplus or decreases the deficit.

Table 14: Australian Government general government sector statement of other economic flows (reconciliation of net worth)

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|---|--|---------------------------|
| Opening net worth | -36,165 | -36,165 |
| Opening net worth adjustments(a) | -1,741 | -1,792 |
| Adjusted opening net worth | -37,906 | -37,957 |
| Change in net worth from operating transactions | 8,300 | 11,207 |
| Change in net worth from other economic flows | | |
| Revaluation of equity(b) | 1,301 | 698 |
| Net writedowns of assets (including bad and doubtful debts) | -2,423 | -5,573 |
| Assets recognised for the first time | 23 | 631 |
| Liabilities recognised for the first time | 0 | 0 |
| Actuarial revaluations | -937 | -1,108 |
| Net foreign exchange gains | -384 | -423 |
| Net swap interest received | 180 | 181 |
| Market valuation of debt | -195 | -708 |
| Other economic revaluations(c) | 2 | 2,653 |
| Total other economic flows | -2,433 | -3,648 |
| Closing net worth | -32,040 | -30,397 |

- (a) Decrease in net worth arising from a change in recognition of family tax benefits and other expenses from a cash to an accrual basis.
- (b) The 2004-05 equity and net worth outcomes include the change in the value of Telstra shareholding between the closing share price on 30 June 2004 and 30 June 2005.
- (c) Largely reflects revaluation of assets and liabilities mainly by the Department of Defence.

Table 15: Supplementary table — Australian Government general government sector revenue (accrual basis)

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |

| Net worth(b) | -50,592 | -49,384 |
| Net financial worth(c) | -79,205 | -78,845 |
| Net debt(d) | 10,546 | 9,725 |

(a) Includes the elimination of commercial taxation adjustments for future income tax benefits and deferred income tax.

(b) Net worth is calculated as total assets minus total liabilities minus shares and other contributed capital. The negative net worth recorded for this sector reflects a higher valuation of listed Australian Government corporations by the sharemarket than the value of net assets recorded by these corporations.

(c) Net financial worth equals total financial assets minus total liabilities minus shares and other contributed capital. That is, it excludes non-financial assets.

(d) Net debt equals the sum of deposits held, advances received and borrowing, minus the sum of cash and deposits, advances paid, and investments, loans and placements.

| Distributions paid(b) | -1,685 | -3,680 |
| Equals surplus(+)/deficit(-) | 1,288 | 1,550 |

(a) A positive number denotes a cash inflow; a negative sign denotes a cash outflow.

(b) Estimates for other payments for operating activities include the cash flow to the general government sector from public financial corporations while for outcomes distributions paid includes all dividends paid to the general government sector.

(c) The acquisition of assets under finance leases decreases the surplus or increases the deficit. The disposal of assets previously held under finance leases increases the surplus or decreases the deficit.

Attachment A**AUSTRALIAN LOAN COUNCIL ALLOCATION**

Under Loan Council arrangements, every year the Australian Government and each State and Territory government nominate a Loan Council Allocation (LCA). A jurisdiction's Loan Council Allocation incorporates:

- the estimated non-financial public sector GFS cash surplus/deficit (made up from the general government and public non-financial corporations (PNFC) sector balances);
- net cash flows from investments in financial assets for policy purposes; and
- memorandum items, which involve transactions that are not formally borrowings but nevertheless have many of the characteristics of borrowings.

LCA nominations are considered by the Loan Council, having regard to each jurisdiction's fiscal position and infrastructure requirements, as well as the macroeconomic implications of the aggregate figure.

As set out in Table 27, the Australian Government's 2004-05 LCA final budget outcome is a \$12,924 million surplus. This compares with the Australian Government's LCA 2004-05 Budget estimate of a \$2,277 million surplus. The LCA outcome exceeds the upper bound of the LCA Budget estimate by more than the 2 per cent tolerance limit. A tolerance limit of 2 per cent of non-financial public sector receipts applies between the LCA Budget estimate and the outcome. Tolerance limits recognise that LCAs are nominated at an early stage of the Budget process and may change as a result of policy and parameter changes.

Table 27: Australian Government Loan Council Allocation

| | 2004-05 Budget Estimate \$m | 2004-05 Outcome \$m |
|--|--------------------------------|------------------------|
| General government sector cash deficit(+)/surplus(-) | -2,391 | -13,616 |
| PNFC sector cash deficit(+)/surplus(-) | -2,212 | -1,550 |
| Non-financial public sector cash deficit(+)/surplus(-) | -4,603 | -15,167 |
| <i>minus</i> Net cash flows from investments | | |
| in financial assets for policy purposes(a) | -1,374 | -1,152 |
| <i>plus</i> Memorandum items(b) | 951 | 1,091 |
| Loan Council Allocation | -2,277 | -12,924 |

- (a) Such transactions involve the transfer or exchange of a financial asset and are not included within the cash deficit/surplus. However, the cash flow from investments in financial assets for policy purposes has implications for a government's call on financial markets.
- (b) For the Australian Government, memorandum items comprise the change in the net present value (NPV) of operating leases (with NPV greater than \$5 million), over-funding of superannuation and an adjustment to exclude the net financing requirements of Telstra from the Loan Council Allocation.

PART 3: AUSTRALIAN ACCOUNTING STANDARDS FINANCIAL STATEMENTS

This part presents financial statements prepared in accordance with applicable Australian Accounting Standards (AAS), including AAS No. 31 *Financial Reporting by Governments*, except where departures from the standard are identified in Note 1. This part also provides notes showing disaggregated information and month of June figures.

A reconciliation between the Australian Government's general government AAS 31 and Government Finance Statistics (GFS) revenue, expenses and operating result is provided in Appendix A.

Notes to the financial statements

Note 1: External reporting standards and accounting policies

The *Charter of Budget Honesty Act 1998* requires that the final budget outcome be based on external reporting standards and that departures from applicable external reporting standards be identified.

The financial statements included in this section of the Final Budget Outcome have been prepared on an accrual basis in accordance with applicable Australian Accounting Standards (AAS), including AAS 31 *Financial Reporting by Governments* (AAS 31).

AAS requires governments to prepare accrual-based general purpose financial reports. This means that assets, liabilities, revenues and expenses are recorded in financial statements when transactions have an economic impact on the government, rather than when the cash flow associated with these transactions occurs. Consistent with AAS, a statement of financial performance, a statement of financial position and a statement of cash flows have been prepared for the year ended 30 June 2005.

The accounting policies in this part are generally consistent with the requirements of AAS. While the scope for financial reporting recommended in AAS 31 is the whole of government (that is, the Australian Government public sector), in accordance with the *Charter of Budget Honesty Act 1998*, the presentation of financial outcomes in Part 3 covers the general government sector only.

AAS would suggest the gross amount of goods and services tax (GST) be included in the Australian Government's financial statements. However, under the *Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations*, GST is collected by the Australian Taxation Office as an agent for the States and Territories (the States), and appropriated to the States. Therefore, accrued GST revenues and associated payments to the States are not recorded in the financial statements.

Note 2: Adoption of Australian Equivalents to International Financial Reporting Standards to apply from the first reporting period beginning on or after 1 January 2005

Under the *Financial Management and Accountability Act 1997* and the *Commonwealth Authorities and Companies Act 1997*, each wholly-owned entity is responsible for ensuring their financial reports comply with Finance Minister's Orders (FMOs), which also require compliance with Australian Accounting Standards. To this end, each entity has undertaken steps to prepare for the adoption of Australian Equivalents to International Financial Reporting Standards (AEIFRS) as applicable to that entity. The transition plan adopted by each entity was disclosed in their 2003-04 and 2004-05 financial reports.

At a whole of government level, the Australian Government (through the Department of Finance and Administration) has provided resources to assess the impacts of AEIFRS, and provided advice to Australian Government entities and the Australian Government on transitional planning issues, the impacts of AEIFRS and policy guidance. This has included:

- the release of a number of *FinanceBriefs* relating to the adoption of international financial reporting standards to assist controlled entities in the implementation of AEIFRS;
- Finance providing regular updates to keep Chief Financial Officers (CFOs) of Australian Government entities informed on progress and issues relating to international adoption. Finance also set up a consultative group of a cross-section of CFOs to discuss practical implementation issues and areas of concern regarding interpretation between the entities and auditors; and
- the preparation of revised accounting policies to take effect from 1 July 2005, with retrospective restatement of comparative information, included as guidance in the 2004-05 FMOs. The accounting policies of controlled entities of the Australian Government have been reviewed, taking into account AEIFRSs and relevant *FinanceBriefs* issued by Finance.

Expected key differences in accounting policies

The Australian Government is required to prepare the first financial report under AEIFRS at 30 June 2006, on the basis that the Australian Government will be a first time adopter under AASB 1, *First time Adoption of Australian Equivalents to International Financial Reporting Standards*.

Changes in accounting policies under AEIFRS are applied retrospectively as if the new policy had always applied, except in relation to the exemptions available and prohibitions under AASB 1. This means that an AEIFRS compliant balance sheet will be prepared as at 1 July 2004. This will enable the 2005-06 financial statements to report

comparatives under AEIFRS. Final decisions on the accounting policies to be applied will be made by the Minister for Finance in the preparation of the FMOs for 2005-06.

The quantitative impacts of AEIFRS represent Australian Government entities' best estimates of the impacts of the changes as at reporting date. The actual effects of the impacts of AEIFRS may differ from these estimates due to:

- continuing review of the impacts of AEIFRS on Australian Government entities' operations;
- ongoing amendments to the AEIFRS and AEIFRS Interpretations;
- the issuing of new Standards and Interpretations; and
- emerging interpretation as to the accepted practice in the application of AEIFRS and the AEIFRS Interpretations.

The anticipated impacts are largely the result of applying AASB 5 *Assets Held for Sale and Discontinued Operations*, AASB 102 *Inventories*, AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors*, AASB 116 *Property, Plant and Equipment*, AASB 119 *Employee Benefits*, AASB 138 *Intangible Assets*, AASB 139 *Financial Instruments: Recognition and Measurement*, and AASB 140 *Investment Properties*.

The following represents the material estimated impacts and movements in these financial statements as if prepared under AEIFRS. It should not be taken as an exhaustive list of all the differences between current AAS and the AEIFRS, but it does represent the major expected changes.¹

Property, plant and equipment

The expected impact of applying AASB 116 *Property, Plant and Equipment* is an increase in the operating result of \$6 million. The expected impact on land and buildings, infrastructure, plant and equipment is \$49 million, and provisions is \$43 million.

The expected impact of applying the AASB 116 requirement for property, plant and equipment assets to be measured at fair value at 1 July 2004 is an increase in the asset revaluation reserve of \$14 million and an increase in land and buildings, infrastructure, plant and equipment of \$14 million.

Employee benefits

The expected impacts of applying AASB 119 *Employee Benefits* to superannuation cannot be reliably determined at this point in time due to differences in interpretation in respect to the methodology used to calculate the discount rate.

¹ These impacts do not include those relating to the Department of Defence, as reliable estimates were not available for the preparation of the Final Budget Outcome for 2004-05.

The expected impact on employee provisions of applying AASB 119 to non-current annual leave is a decrease of \$14 million. The expected impact on the operating result is immaterial.

Inventory

The expected impact of adopting AASB 102 *Inventories* is a reduction in inventories of \$5 million.

Change in accounting policy

The impact of applying AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* is an increase in the operating result of \$1,792 million.

Intangible assets

The expected impact of applying AASB 138 *Intangible Assets* is an increase in the operating result of \$15 million, and a reduction in intangible assets of \$60 million and a reduction in the asset revaluation reserve of \$20 million.

Financial instruments

AEIFRS include an option for entities not to restate comparative information in respect of financial instruments in the first AEIFRS report. It is expected that the Australian Government will use this option. Therefore the amounts for financial instruments presented in the 2004-05 *Final Budget Outcome* are not expected to change as a result of the adoption of AASB 139 *Financial Instruments: Recognition and Measurement*.

Investment property

The expected impact of applying AASB 140 *Investment Property* is an increase in the operating result of \$2 million. The impact on assets is to reduce land and buildings by \$21 million and recognise investment properties of \$21 million. The asset revaluation reserve is expected to decrease by \$2 million.

Assets held for sale

The expected impact of applying AASB 5 *Non-Current Assets Held for Sale and Discontinued Operations* is to reduce land and buildings, infrastructure, plant and equipment by \$82 million and recognise assets held for sale of \$82 million.

The following table provides a reconciliation between the current Australian Accounting Standards and the expected impact of adopting AEIFRS.

| | 30 June 2004 \$m | 30 June 2005 \$m |
|---|---------------------|---------------------|
| Reconciliation of equity | | |

| <i>Net cash from/(to) financing activities</i> | -1,178 | -1,220 |
| equals Net (decrease)/increase in cash | -663 | 218 |

Note 3(a): Consolidated Revenue Fund

The cash balance reflected in the statement of financial position for the Australian Government general government sector (Table 29) includes the reported cash balances controlled and administered by Australian Government agencies subject to the *Financial Management and Accountability Act 1997* and the reported cash balances controlled and administered by entities, subject to the *Commonwealth Authorities and Companies Act 1997* (CAC Act), that implement public policy through the provision of primarily non-market services.

Revenues or monies raised by the Executive Government automatically form part of the Consolidated Revenue Fund by force of section 81 of the Australian Constitution. For practical purposes, total Australian Government general government sector cash, less cash controlled and administered by CAC Act entities, plus special public monies, represents the Consolidated Revenue Fund referred to in section 81 of the Australian Constitution. On this basis, the balance of the Consolidated Revenue Fund is shown below.

| | 2004-05 Estimate at 2005-06 Budget | 2004-05 Outcome |
|--|---|--------------------|
| | \$m | \$m |
| Total general government sector cash | 927 | 1,808 |
| <i>less</i> CAC Agency cash balances | 859 | 1,070 |
| <i>plus</i> Special public monies | 81 | 87 |
| Balance of Consolidated Revenue Fund at 30 June | 149 | 825 |

Note 4: Income taxation revenue

| | 2004-05 Estimate at 2005-06 Budget \$m | 2004-05 Outcome \$m |
|---|--|---------------------------|
| Individuals and other withholding | | |

PART 4: FEDERAL FINANCIAL RELATIONS

This part provides information concerning goods and services tax (GST) revenue, general revenue assistance, general purpose assistance to local government and Specific Purpose Payments to the States and Territories (the States) in 2004-05. The information supplements material provided in Budget Paper No. 3, *Federal Financial Relations 2005-06*.

Under *The New Tax System*, which came into effect on 1 July 2000, Commonwealth-State financial relations have been substantially reformed. All GST revenue collected is paid to the States. This provides the States with access to a secure, growing and broad-based revenue source. Subject to the *Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations* (the IGA), the States can spend the GST revenue according to their own budget priorities.

The implementation of *The New Tax System* has also enabled the abolition of a range of narrow and inefficient state taxes. This includes accommodation (bed) taxes, which were abolished on 1 July 2000, financial institutions duty and stamp duty on quoted marketable securities, which were abolished on 1 July 2001, and bank account debits tax, which ceased to be levied in any State on 1 July 2005.

The new system of Commonwealth-State financial relations has also provided for the introduction of the First Home Owners Scheme.

In addition, the Australian Government has made a commitment to provide assistance to the States in the transitional years to ensure that each individual State will be no worse off than it would have been had the reforms not been implemented. To meet this guarantee, the Australian Government pays the States Budget Balancing Assistance (BBA) to cover any shortfall of GST revenue below the Guaranteed Minimum Amount (GMA), which is a calculation of the amount of funding each State would have had available to it under the previous system of financial relations. For the first time, in 2004-05, each State received more revenue from the GST than the amount of revenue it would have received under the previous system of financial arrangements. Hence, the payment of BBA was not required.

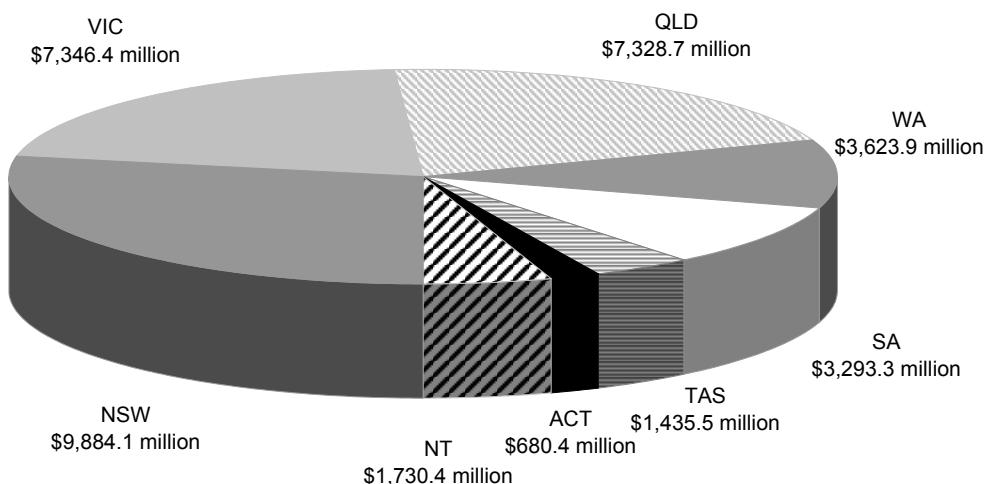

GST REVENUE PROVISION

The *A New Tax System (Commonwealth-State Financial Arrangements) Act 1999* (the Act) provides that the States receive all GST revenue. The GST revenue pool is distributed to the States on the basis of recommendations of the Commonwealth Grants Commission (CGC), which applies the principles of Horizontal Fiscal Equalisation to help determine State revenue shares. Budget Paper No. 3, *Federal Financial Relations 2005-06*, provides more detail on Horizontal Fiscal Equalisation.

Under the Act, the Commissioner of Taxation (the Commissioner) is required to make a determination by 20 June each year of the estimated GST revenue collections for the year. In accordance with the Commissioner's determination of GST revenue on 15 June 2005, a total of \$35,322.7 million in GST revenue was provided to the States in 2004-05. This reflects a GST revenue estimate for 2004-05 of \$35,350 million less a \$27.3 million adjustment for the difference between the Commissioner's determination of 2003-04 GST collections and the 2003-04 GST outcome. The Commissioner's estimate of GST for 2004-05 was broadly consistent with both the estimate at Budget and the final GST revenue outcome as reported in Appendix A and in Note 18 in Part 3.

The final provision of GST revenue to the States in 2004-05 is illustrated in Chart 1.

Chart 1: GST revenue provision to the States and Territories

The calculation of the distribution of GST revenue to the States is shown in Table 31. The distribution differs marginally from estimates shown in Budget Paper No. 3, *Federal Financial Relations 2005-06*, reflecting final determinations made under the Act.

The 2004-05 GST revenue was distributed, in accordance with the Act, using GST relativities recommended by the CGC.

Table 31 shows the per capita relativities applied to the States' populations (as at 31 December 2004) in order to arrive at a weighted population share for each State. A State's share of GST revenue is equal to its weighted population share of the combined GST revenue and unquarantined Health Care Grants (HCGs), less the unquarantined HCGs it receives.

Table 31: GST revenue provision to the States and Territories

| | Population as at 31 December 2004 | Per capita relativities | Weighted population (1) x (2) | Share of Weighted Population (%) | GST revenue/HCGs pool according to (4) (\$m) | Unquarantined HCGs (\$m) | Distribution of GST revenue (5) - (6) (\$m) |
|-------|-----------------------------------|-------------------------|-------------------------------|----------------------------------|--|--------------------------|---|
| | (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| NSW | 6,760,031 | 0.86750 | 5,864,327 | 29.0 | 12,418.4 | 2,534.3 | 9,884.1 |

| NT | 200,794 | 4.26538 | 856,463 | 4.2 | 1,813.7 | 83.3 | 1,730.4 |
| Total | 20,227,113 | na | 20,216,723 | 100.0 | 42,811.3 | 7,488.6 | 35,322.7 |

GENERAL REVENUE ASSISTANCE

In 2004-05, general revenue assistance to the States comprised National Competition Policy Payments, Compensation for GST Deferral and Special Revenue Assistance.

Budget Balancing Assistance

As previously noted, the Australian Government has guaranteed that in each of the transitional years following the introduction of tax reform, each State's budgetary position will be no worse off than had the reforms not been implemented. This is given effect to by the payment of transitional assistance in the form of Budget Balancing Assistance (BBA).

In June 2005, it was determined that no State required BBA in 2004-05 as each State's share of GST revenue exceeded its Guaranteed Minimum Amount (GMA). Total GST revenue payments to the States exceeded their combined GMAs by \$2,001.2 million. This is consistent with the Budget estimate, which also showed that no State would require BBA in 2004-05.

The calculation of State GMAs and BBA entitlements for 2004-05 is shown in Table 32.

Table 32: Guaranteed Minimum Amount components, GST revenue provision and Budget Balancing Assistance to the States and Territories

| | NSW \$m | VIC \$m | QLD \$m | WA \$m | SA \$m | TAS \$m | ACT \$m | NT \$m | Total \$m |

(a) Where the difference between the GMA and GST revenue is less than zero, the amount is zero.

National Competition Policy Payments (NCPPs)

NCPPs are distributed between the States on an equal per capita basis. Payment is subject to each State achieving satisfactory progress in implementing specified reforms under the *Agreement to Implement the National Competition Policy and Related Reforms*. Out of a maximum level of payments in 2004-05 of \$777.9 million, the National Competition Council (NCC) recommended permanent deductions of \$26.3 million and suspensions of \$114.1 million. The payments made to the States in 2004-05, as set out in Table 33, reflect that the permanent deductions and suspensions recommended by the NCC were agreed to by the Australian Government and applied accordingly. Actual payments to the States of \$724.4 million also included adjustments finalising 2003-04 competition payments.

Table 33: National Competition Policy Payments

| | NSW \$m | VIC \$m | QLD \$m | WA \$m | SA \$m | TAS \$m | ACT \$m | NT \$m | Total \$m |
|---------|------------|------------|------------|-----------|-----------|------------|------------|-----------|--------------|
| 2004-05 | 233.5 | 201.9 | 143.2 | 53.6 | 50.4 | 19.8 | 13.6 | 8.5 | 724.4 |

Compensation payments for GST revenue deferred

The Australian Government is compensating the States for the deferral of GST revenue as a result of the Australian Government's decision to allow certain small businesses and non-profit organisations to pay GST annually. As part of these arrangements, \$219.4 million has been paid to the States in 2004-05 as an advance from their 2005-06 GST entitlements.

Consistent with the requirements of the *A New Tax System (Commonwealth-State Financial Arrangements) Act 1999*, the Australian Government will deduct this advance from GST payments to the States in 2005-06. However, the Australian Government will pay a grant in 2005-06 to compensate for the estimated impact of the measure on GST revenue collections in 2004-05 and 2005-06, ensuring that the full financial impact of the measure is felt by the Australian Government and that the measure will have no impact on State budgets.

Table 34: Compensation for GST deferral

| | NSW \$m | VIC \$m | QLD \$m | WA \$m | SA \$m | TAS \$m | ACT \$m | NT \$m | Total \$m |
|---------|------------|------------|------------|-----------|-----------|------------|------------|-----------|--------------|
| 2004-05 | 63.7 | 47.0 | 44.9 | 22.3 | 20.1 | 8.2 | 4.0 | 9.2 | 219.4 |

Special Revenue Assistance

In 2004-05, in accordance with the recommendations of the CGC, Special Revenue Assistance of \$14.2 million was paid to the Australian Capital Territory.

FINANCIAL ASSISTANCE GRANTS TO LOCAL GOVERNMENT

Table 35 provides details of the Australian Government payments to local government authorities in 2004-05 for each of the six States and the Northern Territory, and an analogous payment made to the Australian Capital Territory.

In 2004-05, local government Financial Assistance Grants were increased on the basis of an annual escalation factor determined by the Treasurer. The payments made to the States in 2004-05 and shown in Budget Paper No. 3, *Federal Financial Relations 2005-06*, were based on an estimated escalation factor of 1.0310, estimated in June 2004, and take into account an overpayment of \$7.4 million in 2003-04.

On 29 June 2005, the Treasurer determined the final 2004-05 escalation factor to be 1.0360 on the basis of the Australian Statistician's determination of population and the All Groups Consumer Price Index number. The difference between the estimate and the final escalation factor for 2004-05 has resulted in an underpayment of \$7.5 million in 2004-05 for which there will be an adjustment in 2005-06, as provided for under the *Local Government (Financial Assistance) Act 1995*.

Table 35: Financial Assistance Grants to local government

| | NSW \$m | VIC \$m | QLD \$m | WA \$m | SA \$m | TAS \$m | ACT \$m | NT \$m | Total \$m |
|---|--------------|--------------|--------------|--------------|--------------|-------------|-------------|-------------|----------------|
| General Purpose Assistance | 368.2 | 263.3 | 205.3 | 105.0 | 81.7 | 25.6 | 17.2 | 10.6 | 1,066.8 |
| United local road funding | 137.3 | 97.6 | 88.7 | 72.4 | 26.0 | 25.1 | 15.2 | 11.1 | 473.4 |
| Total Financial Assistance Grants(a) | 495.5 | 360.9 | 293.9 | 177.3 | 107.7 | 50.7 | 32.4 | 21.7 | 1,540.2 |

(a) Total Financial Assistance Grant is the actual cash payment that the State receives on behalf of local government. It is equal to the estimated entitlement for a given year adjusted for an overpayment or underpayment from the previous year. The information presented in this table differs from that in Table 36, which is prepared on an accrual basis.

SPECIFIC PURPOSE PAYMENTS (SPPs)

Tables 36 and 37 provide information on Australian Government SPPs ‘to’ and ‘through’ the States, and direct to local government, respectively.

Table 36 presents SPPs on a functional basis, and includes SPPs for current and capital purposes. Payments are aggregated according to like purposes and are further divided into those paid to the States and those paid through the States to be passed on to local government and other bodies. Payments through the States are indicated in the table with an asterisk and separate totals for payments to the States and payments through the States are presented in the summary at the end of the table.

Australian Government advances (loans) to the States, including new advances, interest on advances and repayments by the States are also detailed in Table 36. The majority of these advances were funded from borrowing made on behalf of the States under previous Australian Loan Council arrangements.

Table 37 presents information on Australian Government SPPs paid direct to local government authorities for both current and capital purposes.

Tables 36 and 37 provide information prepared on an accrual basis.

Table 36: Specific Purpose Payments to and through the States, repayments of advances, advances and interest payments, 2004-05 (\$'000)

APPENDIX A: FINANCIAL REPORTING STANDARDS AND BUDGET CONCEPTS

The *Charter of Budget Honesty Act 1998* requires that the final budget outcome be based on external reporting standards. Accordingly, the major external standards used in the final budget outcome are the Australian Bureau of Statistics (ABS) accrual Government Finance Statistics (GFS) framework and Australian Accounting Standards (AAS), including AAS No. 31 *Financial Reporting by Governments* (AAS 31). The major fiscal aggregates (including the fiscal and underlying cash balances) are based on the accrual GFS framework.

The Charter also requires that departures from applicable external reporting standards be identified. These are disclosed in Attachment A to Part 1 and Note 1 in Part 3.

The next section provides a brief overview of the GFS and AAS reporting frameworks. Further information can be found in Budget Paper No. 1 *Budget Strategy and Outlook 2005-06, Statement 8: Financial Reporting Standards and Budget Concepts*.

ACCRUAL GFS FRAMEWORK

The GFS reporting framework is a specialised financial reporting system designed to support economic analysis of the public sector. It allows comprehensive assessments to be made of the economic impact of government and is consistent with international statistical standards (the *System of National Accounts 1993* (SNA93) and the International Monetary Fund's (IMF) *Government Finance Statistics Manual 2001*).¹

The GFS conceptual framework comprises a number of separate statements, each of which draws out analytical aggregates or balances of particular economic significance. Together, these aggregates provide for a thorough understanding of the financial position of the public sector. The GFS statements reported in the final budget outcome are the operating statement, balance sheet, cash flow statement and statement of other economic flows.

All GFS data is recorded as either stocks (assets and liabilities) or flows (classified as either transactions or other economic flows).

A transaction results from a mutually agreed interaction between economic entities. Despite their compulsory nature, taxes are transactions deemed to occur by mutual agreement between the government and the taxpayer. Transactions that increase or

¹ Additional information on the Australian accrual GFS framework is available in the ABS publication *Australian System of Government Finance Statistics: Concepts, Sources and Methods, 2005* (Cat. No. 5514.0).

Appendix A: Financial Reporting Standards and Budget Concepts

decrease net worth (assets minus liabilities) are reported as revenues and expenses respectively in the operating statement.²

A change to the value or volume of an asset or liability that does not result from a transaction is an other economic flow. This can include changes in values from market prices, most actuarial valuations and exchange rates and changes in volumes from discoveries, depletion and destruction. Other economic flows are reported in the statement of other economic flows.

Under the accrual GFS framework, flows are recorded in the period in which they occurred. As a result, prior period outcomes may be revised where information arises that could reasonably be expected to have been known in the past, is material in at least one of the effected periods and can be reliably assigned to the relevant period(s).

Operating statement

The operating statement presents details of transactions in GFS revenues, GFS expenses and the net acquisition of non-financial assets (net capital investment) for an accounting period.

GFS revenues arise from transactions that increase net worth and GFS expenses arise from transactions that decrease net worth. GFS revenues less GFS expenses gives the GFS net operating balance. The net operating balance is comparable to the National Accounts concept of government saving plus capital transfers.

The net acquisition of non-financial assets (net capital investment) measures the change in the Australian Government's stock of non-financial assets due to transactions. As such, it measures the net effect of purchases, sales and consumption (for example, depreciation of fixed assets and use of inventory) of non-financial assets during an accounting period.

Net acquisition of non-financial assets equals gross fixed capital formation, less depreciation, plus changes (investment) in inventories, plus other transactions in non-financial assets.

Fiscal balance

The fiscal balance (or GFS net lending/borrowing) is the net operating balance less net capital investment. Thus, fiscal balance includes the impact of net expenditure

² Not all transactions impact on net worth. For example, transactions in financial assets and liabilities do not impact on net worth as they represent the swapping of assets and liabilities on the balance sheet.

(effectively purchases less sales) on non-financial assets rather than consumption (depreciation) of non-financial assets.³

The fiscal balance measures the Australian Government's investment-saving balance. It measures in accrual terms the gap between government savings plus net capital transfers, and investment in non-financial assets. As such, it approximates the contribution of the Australian Government general government sector to the balance on the current account in the balance of payments.

Balance sheet

The balance sheet shows stocks of assets, liabilities and GFS net worth. Net debt is also reported in the balance sheet.

Net debt

Net debt is the sum of selected financial liabilities (deposits held, advances received, government securities, loans, and other borrowing) less the sum of selected financial assets (cash and deposits; advances paid; and investments, loans and placements). Net debt does not include superannuation or superannuation related liabilities. Net debt is a common measure of the strength of a government's financial position. High levels of net debt impose a call on future revenue flows to service that debt.

Net worth

The net worth of the general government sector is defined as assets less liabilities. For the public financial corporations and public non-financial corporations sectors, net worth is defined as assets less liabilities less shares and other contributed capital. Net worth is an economic measure of wealth, reflecting the Australian Government's contribution to the wealth of Australia.

Cash flow statement

The cash flow statement identifies how cash is generated and applied in a single accounting period. The cash flow statement reflects a cash basis of recording (rather than an accrual basis) where information is derived indirectly from underlying accrual transactions and movements in balances. This, in effect, means that transactions are captured when cash is received or when cash payments are made. Cash transactions are identified specifically because cash management is considered an integral function of accrual budgeting.

³ The net operating balance includes consumption of non-financial assets because depreciation is a GFS expense. Depreciation also forms part of net capital investment, which (in the calculation of fiscal balance) offsets the inclusion of depreciation in the net operating balance.

Underlying cash balance

The underlying cash balance plus Future Fund earnings (GFS surplus/deficit) is the cash counterpart of the fiscal balance, reflecting the Australian Government's cash investment-saving balance. This measure is conceptually equivalent under the current accrual framework and the previous cash framework. For the general government sector, the underlying cash balance is calculated as shown below.

Net cash flows from operating activities
plus
Net cash flows from investments in non-financial assets
less
Net acquisitions of assets acquired under finance leases and similar arrangements⁴
equals
GFS surplus/deficit
less
Future Fund earnings
equals
Underlying cash balance

For the 2004-05 final budget outcome, the underlying cash balance is equivalent to the GFS surplus/deficit as Future Fund earnings are expected to commence from 2005-06.

Headline cash balance

The headline cash balance is calculated by adding net cash flows from investments in financial assets for policy purposes and Future Fund earnings to the underlying cash balance.

Cash flows from investments in financial assets for policy purposes include equity transactions and net advances.⁵ Equity transactions include equity injections into controlled businesses and privatisations of government businesses. Net advances include net loans to the states, net loans to students under the Higher Education Contribution Scheme (HECS), and contributions to international organisations that increase the Australian Government's financial assets.

4 The underlying cash balance treats the acquisition and disposal of non-financial assets in the same manner regardless of whether they occur by purchase/sale or finance lease – acquisitions reduce the underlying cash balance and disposals increase the underlying cash balance. However, finance leases do not generate cash flows at the time of acquisition or disposal equivalent to the value of the asset. As such, net acquisitions of assets under finance leases are not shown in the body of the cash flow statement but are reported as a supplementary item for the calculation of the underlying cash balance.

5 Cash flows from investments in financial assets for policy purposes were called net advances under the cash budgeting framework.

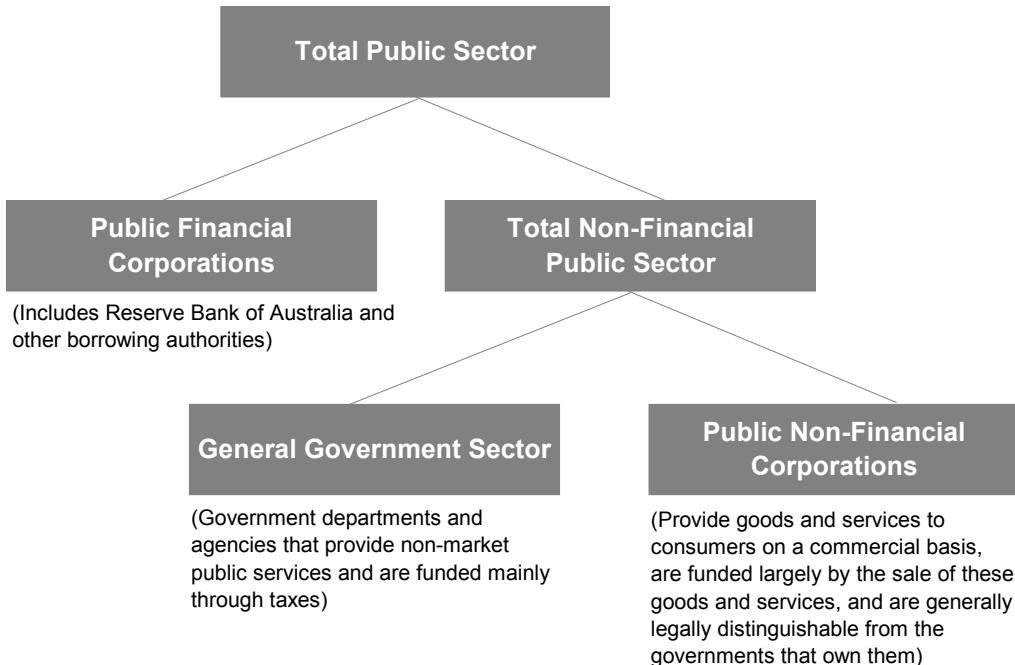

Statement of other economic flows (reconciliation of net worth)

The statement of other economic flows outlines changes in net worth driven by economic flows other than GFS revenues and GFS expenses. GFS revenues, GFS expenses and other economic flows sum to the total change in net worth during a period. The majority of other economic flows for the Australian Government general government sector arise from price movements in its assets and liabilities.

Sectoral classifications

To assist in analysing the public sector, GFS data are presented by institutional sector. GFS distinguishes between the general government sector, the public non-financial corporations sector and the public financial corporations sector, as shown in Figure A1.

Figure A1: Institutional structure of the Public Sector

Budget reporting focuses on the general government sector. The general government sector provides public services that are mainly non-market in nature, and for the collective consumption of the community, or involve the transfer or redistribution of income. These services are largely financed through taxes and other compulsory levies, although user charging and external funding have increased in recent years. This sector comprises all government departments, offices and some other bodies.

In preparing financial statements for the sectors all material transactions and balances between entities within the sectors are eliminated.

AUSTRALIAN ACCOUNTING STANDARDS REPORTING FRAMEWORK, INCLUDING AAS 31

AAS 31 *Financial Reporting by Governments* requires accrual-based general purpose financial reports showing assets, liabilities, revenues, expenses and cash flows, for each government. Reporting under this framework is intended to provide a consolidated overview of the financial performance and financial position of the Government.

There are three main general purpose statements required by AAS 31. These are:

- a statement of financial performance, which includes an operating result;
- a statement of financial position, which shows net assets; and
- a statement of cash flows, which includes net increase/decrease in cash held.

In addition to these financial statements, notes to the financial statements are required. These notes include a summary of accounting policies, disaggregated information and other disclosures required by Australian Accounting Standards.

A full set of AAS financial statements and accompanying notes prepared for the general government sector can be found in Part 3, including a note to disclose the anticipated impacts of the Australian Equivalents to International Financial Reporting Standards for the Australian Government from 2005-06. These statements are derived from audit cleared financial statements for the material agencies within the general government sector, with the exception of the Department of Defence and Indigenous Business Australia, for which audit opinions are pending. The statements also include audit cleared financial statements from the majority of the 100 or so small general government sector agencies. Nevertheless, the financial statements in this report include the financial results for the Department of Defence and Indigenous Business Australia as at the time of publication. Final 2004-05 audit opinions for these two agencies will be included in their respective annual reports and in the Australian Government Consolidated Financial Statements for the year ended 30 June 2005 which will be released at a later time.

RECONCILIATION OF GFS AND AAS AGGREGATES

There is a general consistency of treatment of the elements of financial statements between GFS and AAS. Both frameworks are based on the concept of economic events that give rise to stocks and flows. As a result, the definitions of stocks are broadly similar under the two frameworks and relate to the control of economic benefits, while flows are defined with reference to changes in stocks.

The GFS and AAS definitions of the scope of the public sector agree in almost all cases, with AAS 31 recommending the same disaggregation of the public sector into general

government, public non-financial corporations and public financial corporations sectors.

Transactions are generally treated in a similar manner by GFS and accounting standards; however, where GFS is a framework designed to facilitate macro-economic analysis, AAS is designed for general purpose financial reporting. The different objectives of the two frameworks lead to some variation in the treatment of certain items. This differing treatment relates predominantly to the definitions of revenues and expenses under the two frameworks.

In particular, revaluations of assets and liabilities are classified differently under the AAS and GFS standards. Major revaluations include writedowns of bad and doubtful debts (excluding those that are mutually agreed), changes in the valuation of superannuation liabilities, and gains and losses due to changes in foreign exchange rates and interest rates.

Under AAS reporting, valuation changes generally affect revenues or expenses and therefore the operating result. However, under GFS reporting, revaluations are not considered to be transactions (that is, they are considered to be other economic flows) and accordingly do not form part of revenues or expenses. Therefore, most revaluations are not taken into account in the calculation of the GFS net operating balance or fiscal balance. However, revaluations still impact on GFS assets and liabilities, as can be seen in the statement of other economic flows.

Some of the major differences between the GFS and AAS treatments of transactions are outlined in Table A1. Further information on the differences between the two frameworks is provided in the ABS publication *Australian System of Government Finance Statistics: Concepts, Sources and Methods, 2005* (Cat. No. 5514.0).

Appendix A: Financial Reporting Standards and Budget Concepts

Table A1: Selected differences between AAS and GFS reporting standards

| Issue | AAS Treatment | GFS Treatment |
|---|--|---|
| Asset writedowns | Treated as part of operating expenses. | Treated as revaluations (other economic flows), except for mutually agreed writedowns, and therefore removed from expenses. |
| Gains and losses on assets | Treated as part of operating revenues/expenses. | Treated as revaluations (other economic flows) and therefore removed from revenues/expenses. |
| Provisions for bad and doubtful debts | Treated as part of operating expenses and included in the balance sheet as an offset to assets. | Act of creating provisions is not considered an economic event and is therefore not considered an expense or included in the balance sheet. The Australian Government departs from this latter requirement (see Attachment A to Part 1). |
| Interest flows related to swaps and other financial derivatives | Treated as operating revenues and expenses. | Treated as other economic flows and so not included in revenues and expenses. |
| Acquisition of defence weapons platforms | Treated as capital expenditure. Defence weapons platforms appear as an asset on the balance sheet. Depreciation expense on assets is recorded in the operating statement. | Treated as an expense at the time of acquisition. Defence weapons platforms do not appear as an asset on the balance sheet and no depreciation is recorded in the operating statement. |
| Valuation of assets and liabilities | Classes of assets and liabilities are measured using a range of methods. The predominant methods for valuing different asset classes include historic cost and market value. | Individual assets and liabilities are measured at current market value based on current market prices or a suitable proxy where market prices are not available. |
| Finance leases | Treats finance leases as if an asset were purchased from borrowings. That is, the lease payment is split into an interest component (which is shown as an operating expense) and a principal component. The asset and the liability are recorded on the balance sheet. This convention does not apply to the cash flow statement, which does not record the acquisition of the asset or the liability. | As per the accounting standard, except that the GFS cash flow statement includes the acquisition of the asset as a supplementary item for the calculation of the surplus/deficit and underlying cash balance. |

Following the broad strategic direction of the Financial Reporting Council, the Australian Accounting Standards Board is currently pursuing harmonisation of GFS and AAS. The Australian Accounting Standards Board has released an exposure draft (ED 142 *Financial Reporting of general government sectors by governments*) for comment.

Table A2 reconciles GFS revenue and expenses with their AAS counterparts.

Table A2: Reconciliation of GFS and AAS revenue and expenses

| | 2004-05 Outcome \$m |
|--|---------------------------|
| GFS revenue (Part 2) | 241,691 |
| /less GST revenue for States and Territories | 35,473 |
| GFS revenue (Part 1) | 206,218 |
| <i>plus</i> asset revenue recognised first time | 1,239 |
| <i>plus</i> foreign exchange gains | 20 |
| <i>plus</i> other economic revaluations | 166 |
| <i>plus</i> proceeds from the sale of assets | 1,243 |
| <i>plus</i> swap interest revenue | 2,146 |
| AAS revenue (Part 3) | 211,032 |
| GFS expenses (Part 2) | 230,483 |
| /less GST grants to States and Territories | 35,063 |
| /less GST interest on overpayments | 9 |
| /less GST mutually agreed writedowns | 119 |
| GFS expenses (Part 1) | 195,293 |
| <i>plus</i> actuarial revaluations | 1,167 |
| <i>plus</i> net writedown of assets/bad and doubtful debts | 6,275 |
| <i>plus</i> foreign exchange losses | 444 |
| <i>plus</i> other economic adjustments | 283 |
| <i>plus</i> value of assets sold | 1,097 |
| <i>plus</i> swap interest expense | 1,964 |
| <i>plus</i> defence weapons platforms depreciation | 2,267 |
| <i>less</i> defence weapons platforms investment | 3,154 |
| <i>plus</i> AusAid IDA/ADF expenses | 506 |
| <i>plus</i> ETM adjustment for expenses | 1,792 |
| AAS expenses (Part 3) | 207,932 |

Table A3 reconciles the accounting operating result to the GFS net operating balance and the fiscal balance (GFS net lending).

The AAS net operating result is equal to AAS revenues less expenses. Similarly, GFS revenues less expenses equal the GFS net operating balance. Consequently, the reconciliation between the AAS operating result before extraordinary items and the GFS net operating balance relates directly to differences in the definitions of revenues and expenses which are shown in Table A2.

The second part of the Table A3 reconciliation shows the adjustment for net capital investment required to derive the fiscal balance from the GFS net operating balance.

As discussed previously, fiscal balance is calculated as the net operating balance less net capital investment. This is a useful economic indicator as it represents the gap between government saving (less capital transfers) and investment, and so is included at the end of the GFS operating statement. In AAS there is no equivalent measure to

Appendix A: Financial Reporting Standards and Budget Concepts

the fiscal balance. That is, the AAS statement of financial performance stops at the operating result and includes no information on net capital investment.

Table A3: Reconciliation of AAS net operating result and fiscal balance

| | 2004-05 Outcome \$m |
|---|---------------------------|
| AAS operating result (Part 3) | 3,100 |
| Net differences from revenue and expense definitions | 8,108 |
| GFS net operating balance (Part 2) | 11,207 |
| /less purchase of property, plant and equipment and intangibles | 5,350 |
| /less assets acquired under finance leases | 13 |
| /less other non-financial assets | -1 |
| /less increase in inventories | 508 |
| plus defence weapons platforms investment | 3,154 |
| plus proceeds from sales of property, plant and equipment and intangibles | 545 |
| plus depreciation and amortisation | 4,290 |
| /less weapons depreciation | 2,267 |
| Fiscal balance (GFS net lending) (Part 2)(a) | 11,061 |
| <i>Impact of GST</i> | -283 |
| Fiscal balance (GFS net lending) (Part 1)(a) | 10,778 |

(a) The fiscal balance in Part 2 is higher than the fiscal balance presented in Part 1, as explained in the following section.

ACCOUNTING FOR GST AND BUDGET ASSISTANCE TO STATES AND TERRITORIES (THE STATES)

Under the *Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations* (the IGA), all goods and services tax (GST) receipts are appropriated to the States and Territories and thus are not available for expenditure by the Australian Government. As such, the GST is a State tax, with the Australian Taxation Office acting as the States' agent in the collection of the tax. Consequently, collections of GST from taxpayers and payments of the GST to the States are not recorded as revenues and expenses of the Australian Government in Part 1.

Under the IGA, the Australian Government has guaranteed that the budgetary position of each individual State and Territory will be no worse off than it would have been had the GST reforms not been implemented. Grants to the States to meet this guarantee are titled 'general budget assistance to the States' (GBA) and are recorded as expenses of the Australian Government.⁶ GBA comprises Budget Balancing Assistance (BBA) grants paid in accordance with the provisions of the IGA and any adjustments to account for actual GST cash collections. For States no longer receiving BBA grants, GBA relates to the difference between actual GST cash receipts and the Commissioner of Taxation's mid-June determination of cash GST receipts.

In Part 2, the accounts are presented including GST as Australian Government revenue. In addition to GBA, the Part 2 fiscal balance is adjusted for the accrual GST revenue less actual cash GST receipts, which are payable to the States and Territories. This results in the Part 2 fiscal balance being \$283 million greater than the fiscal balance reported in Part 1 and elsewhere in the Final Budget Outcome. A reconciliation of GFS revenue and GFS expenses in Part 1 and Part 2 is presented in Table A2.

The different accounting approaches also flow through to differences in GFS net worth, resulting in GFS net worth in Part 2 being \$1.6 billion greater than GFS net worth reported in Part 1 and elsewhere. This difference results from the inclusion of GST receivables and payables in the GFS balance sheet in Part 2.

However, the net impact on cash flows is the same regardless of the accounting approach. Therefore the underlying cash balance is the same whether it is calculated on the basis that the GST is a State tax or an Australian Government tax.

Further information on accounting for GST and budget assistance to the States and Territories can be found on page 10 of the *Final Budget Outcome 2000-01*.

⁶ The term 'general budget assistance to the States' explains aggregate changes in Australian Government expenses under a States' agent accounting arrangement and does not appear in the IGA, which governs the actual payments from the Australian Government to the States.

APPENDIX B: EXPENSES BY FUNCTION AND SUB-FUNCTION

Table B1 sets out Australian Government general government sector expenses by function and sub-function for 2004-05. This table has been prepared in accordance with the Government Finance Statistics accounting framework.

| Total expenses | 181,238 | 195,012 | 195,293 |

- (a) There has been some reclassification of expenditure that was misclassified in Budget 2005-06 under the Social Security and Welfare function, that is now being reported in the Other Economic Affairs function.
- (b) Expenses in the Dairy Industry sub-function were overstated at Budget due to a change in accounting policy, which has now been amended.
- (c) Asset Sale related expenses are treated as a component of the Contingency Reserve.

APPENDIX C: HISTORICAL FISCAL DATA

This appendix provides historical data for the Australian Government fiscal aggregates across the general government, public non-financial corporations and non-financial public sectors.

Under the accrual Government Finance Statistics (GFS) framework, flows are recorded in the period in which they occurred. As a result, prior period outcomes may be revised where information arises that could reasonably be expected to have been known in the past, is material in at least one of the affected periods and can be reliably assigned to the relevant period(s).

Estimates up to and including 1998-99 are calculated on cash terms, while estimates from 1999-2000 onwards are derived from an accrual framework. Due to methodological and data-source changes associated with the move to an accrual accounting framework, time series data that include measures derived under both cash and accrual accounting should be used with caution.

There are other structural breaks within the data set, prior to the shift to accrual reporting. Classification differences and revisions, as well as changes to the structure of the budget, can impact on comparisons over such an extended period.

Specific factors that affect the comparability of data between years include:

- classification differences in the data relating to the period prior to 1976-77 (which means that earlier data may not be entirely consistent with data for 1976-77 onwards);
- adjustments in the coverage of agencies included in the accounts of the different sectors. These include the reclassification of Central Banking Authorities from the general government to the public financial corporations sector in 1998-99, and subsequent back-casting to account for this change;
- consistent with the revised GFS treatment announced by the Australian Bureau of Statistics (ABS) (Cat. No. 5501.0, released October 2002), the general government surplus measures in this statement, from 1998-99 onwards, incorporate the interest component of superannuation related payments by the Australian Government general government sector in respect of accumulated public non-financial corporations' superannuation liabilities;
- transfers of taxing powers between the Australian Government and the States;
- other changes in financial arrangements between the Australian Government and the state/local government sector; and

Appendix C: Historical Fiscal Data

- changes in arrangements for transfer payments, where tax concessions or rebates are replaced by payments through the social security system. This has the effect of increasing both cash receipts and payments, as compared with earlier periods, but not changing cash balances. Changes in the opposite direction (tax expenditures replacing payments) reduce both cash payments and receipts.

Occasionally classification changes are made that require revisions to the historic series. Where appropriate, the changes are back-cast to 1999-2000 to ensure that data is consistent across the accrual period. For example, the back-casting to account for the market valuation of net debt as discussed on page 2-12 of the Budget Paper No. 1, *Budget Strategy and Outlook 2003-04*.

While approximate adjustments can be made to identify trends in budget aggregates on a generally consistent basis, the further back the analysis is taken, the more difficult the task becomes.

Table C1: Australian Government general government sector receipts, payments and surplus^(a)

| | Receipts | | | Payments | | | Cash Surplus | |
|----------------|----------------|----------------|--------------------|----------------|----------------|--------------------|---------------|--------------------|
| | Per cent | | Per cent of GDP | Per cent | | Per cent of GDP | \$m | Per cent of GDP |

| 2003-04 | 186,971 | 2.4 | 23.0 | 178,935 | 2.4 | 22.0 | 8,036 | 1.0 |
| 2004-05 | 203,573 | 4.7 | 23.6 | 189,957 | 2.1 | 22.0 | 13,616 | 1.6 |

(a) There is a break in the series between 1998-99 and 1999-2000. Data for the years up to and including 1998-99 are consistent with the cash ABS GFS reporting requirements. From 1999-2000 onwards, data are derived from an accrual ABS GFS reporting framework, with receipts proxied by receipts from operating activities and sales of non-financial assets, and payments proxied by payments for operating activities, purchases of non-financial assets and net acquisition of assets under finance leases. Due to associated methodological and data-source changes, time series data that encompass measures derived under both cash and accrual accounting should be used with caution.

na Not applicable, due to a structural break in the series.

(a) There is a break in the series between 1998-99 and 1999-2000. Data for the years up to and including 1998-99 are consistent with the cash ABS GFS reporting requirements. From 1999-2000 onwards, data are derived from an accrual ABS GFS reporting framework, with receipts proxied by receipts from operating activities and sales of non-financial assets. Due to associated methodological and data-source changes, time series data that encompass measures derived under both cash and accrual accounting should be used with caution.

na Not applicable, due to a structural break in the series.

Table C3: Australian Government general government sector receipts

| | 2003-04 \$m | 2004-05 \$m |
|---|----------------|----------------|
| Taxation receipts | | |
| <i>Income taxation</i> | | |
| Individuals and other withholding(a) | | |
| Gross income tax withholding | 89,638 | 97,304 |
| Gross other individuals | 19,935 | 22,554 |
| less Refunds | 12,325 | 13,734 |
| Total individuals and other withholding | 97,247 | 106,123 |
| Companies | 36,101 | 40,404 |
| Superannuation funds | | |
| Contributions and earnings | 4,502 | 5,014 |
| Superannuation surcharge | 1,050 | 1,233 |
| Total superannuation funds | 5,551 | 6,248 |
| Petroleum resource rent tax | 1,168 | 1,459 |
| Total income taxation | 140,067 | 154,234 |
| <i>Indirect taxation</i> | | |
| Excise duty | | |
| Petroleum and other fuel products | 13,231 | 13,608 |
| Crude oil | 309 | 668 |
| Other excise | 7,539 | 7,612 |
| Total excise duty | 21,079 | 21,888 |
| Customs duty | 5,038 | 5,012 |
| Other indirect taxes | 992 | 1,015 |
| Total indirect taxation | 27,108 | 27,915 |
| <i>Other taxation</i> | | |
| Fringe benefits tax(b) | 3,226 | 3,316 |
| Agricultural levies | 603 | 584 |
| Other taxes | 1,239 | 1,229 |
| Total taxation receipts | 172,243 | 187,279 |
| Non-taxation receipts | 14,729 | 16,294 |
| Total receipts | 186,971 | 203,573 |

(a) Includes Medicare levy receipts (\$5,560 million in 2003-04 and \$6,105 million in 2004-05).

(b) Consistent with GFS reporting standards, excludes fringe benefits tax collected from Australian Government agencies (estimated at \$364 million in 2003-04 and \$387 million in 2004-05).

| 2004-05 | 11,534 | 1.3 | 2,463 | 0.3 |

(a) There is a break in the net debt and net interest series between 1998-99 and 1999-2000 (the first year of accrual budgeting). Up to 1998-99, Australian Government general government debt instruments are valued at historic cost. From 1999-2000 onwards, Australian Government general government debt instruments are valued at market prices, consistent with accrual GFS standards.

(b) Excludes superannuation related interest flows.

Table C5: Australian Government general government sector revenue, expenses, net capital investment, fiscal balance and net worth^(a)

| | Revenue | | Expenses(c) | | Net capital investment | | Fiscal balance(c) | | Net worth(b)(c) | |

| 2004-05 | 206,218 | 23.9 | 195,293 | 22.6 | 147 | 0.0 | 10,778 | 1.2 | -31,979 | -3.7 |

(a) The fiscal balance is equal to revenue less expenses less net capital investment. Net worth is calculated as assets less liabilities.

(b) There is a break in the net worth series between 1998-99 and 1999-2000. Data up to 1998-99 are sourced from the Australian Government's Consolidated Financial Statements based on Australian accounting standards. Data beginning in 1999-2000 are based on the GFS framework. For the general government sector, the major change across the break in the series is an improvement in net worth. This is primarily due to the move from valuing investments in public corporations at historic cost to current market value (which is calculated using the share price for listed corporations). This is partly offset by defence weapons platforms no longer being recorded as assets and valuing debt at current market value.

(c) The increases in expenses and decreases in fiscal balance and net worth arise from a change in recognition of family tax benefits and other expenses from a cash to an accrual basis.

Table C6: Australian Government general government sector accrual taxation revenue, non-taxation revenue and total revenue

| | Taxation revenue | | | Non-taxation revenue | | | Total revenue | | |

(a) The fiscal balance is equal to revenue less expenses less net capital investment. Net capital investment is not shown in this table.
 (b) The increases in expenses and decreases in fiscal balance and net worth arise from a change in recognition of family tax benefits and other expenses from a cash to an accrual basis.
