FOREWORD

This Budget Paper presents information on the Commonwealth's financial relations with State, Territory and local governments. This includes an overview of major Australian Government reforms and new developments, as well as information on payments to the States and analysis of fiscal developments in the public sector.

Notes

- (a) The following definitions are used in this Budget Paper:
- ‘Budget year’ refers to 2012-13, while the ‘forward years’ refer to 2013-14, 2014-15 and 2015-16; and
 - one billion is equal to one thousand million.
- (b) Figures in tables and the text have generally been rounded. Discrepancies in tables between totals and sums of components reflect rounding unless otherwise noted.
- estimates of \$100,000 and over are generally rounded to the nearest tenth of a million;
 - estimates midway between rounding points are rounded up; and
 - percentage changes in tables are based on the underlying unrounded amounts.
- (c) Tables use the following notations:
- | | |
|-----|-------------------------------|
| - | nil |
| na | not applicable |
| \$m | millions of dollars |
| \$b | billions of dollars |
| nfp | not for publication |
| 0 | zero |
| * | unquantifiable |
| .. | not zero, but rounded to zero |
| ~ | allocation not yet determined |

(d) This Budget Paper uses the following conventions.

- The Australian Capital Territory and the Northern Territory of Australia are referred to as ‘the Territories’.
- References to the ‘States’ or ‘each State’ include the State governments and Territory governments. The State and local government sector is denoted as the ‘State/local sector’.
- References to the ‘State/local sector’ include the Territory governments unless otherwise stated.
- Local governments are instrumentalities of State governments. Consequently, payments made to the State government sector include payments made to the local government sector unless otherwise specified.
- The following abbreviations are used, where appropriate:

NSW New South Wales

VIC Victoria

QLD Queensland

WA Western Australia

SA South Australia

TAS Tasmania

ACT Australian Capital Territory

NT Northern Territory

GST Goods and services tax

(e) The term ‘Commonwealth’ refers to the Commonwealth of Australia. The term is used when referring to the legal entity of the Commonwealth of Australia.

The term ‘Australian Government’ is used when referring to the Government of, and the decisions and activities made by the Government on behalf of, the Commonwealth of Australia.

Budget Paper No. 3, *Australia’s Federal Relations 2012-13*, is one of a series of Budget Papers that provides information to supplement the Budget Speech. A full list of the series is printed on the inside cover of this paper.

EXECUTIVE SUMMARY

- Within a tight fiscal environment, the Commonwealth is continuing to work in partnership with the States and Territories to implement broad-ranging reforms driven by the overarching goal of enhancing the wellbeing of all Australians. This is seen in an agenda which currently embraces areas such as healthcare, disabilities, skills, education, Indigenous support in the Northern Territory and the adequacy of Australia's economic and social infrastructure.
- The Commonwealth will continue to invest in healthcare across a range of initiatives including major investments to support the implementation of the *National Health Reform Agreement*, contributions to support mental health and funding for regional areas from the Health and Hospitals Fund.
- As part of this Budget, the Commonwealth will provide funding to the States and Territories to provide treatment for those on public dental waiting lists, forming part of the Commonwealth's dental health package.
- To achieve a highly skilled and productive workforce, the Commonwealth, in partnership with the States and Territories, will be implementing key reforms within the vocational and education training system, to enhance training outcomes.
- The Commonwealth will also continue to provide substantial financial support to the States and Territories for improved outcomes in education. This includes support for new initiatives that will reward quality teachers and school leaders in Australia, increase the capacity of schools to make decisions at a local level, and reward jurisdictions for the achievement of nationally significant reforms.
- The Commonwealth is also continuing its commitment to support Indigenous Australians with the announcement of the Stronger Futures in the Northern Territory initiative. As part of this Budget, substantial funding will be provided over ten years to address significant levels of Indigenous disadvantage and drive fundamental change over a sustained period.
- Continuing to invest in critical infrastructure will remain a key priority in this Budget, with substantial contributions from the Commonwealth to the States and Territories, to enhance Australia's future productivity and prosperity, and spread the benefits of the mining boom into regional Australia. Funding to reward jurisdictions for regulatory reforms and support for communities affected by natural disasters in recent years are also priorities in this Budget.
- In 2012-13, the Commonwealth will provide the States with \$90.4 billion in payments for specific purposes and general revenue assistance. This contribution represents approximately 24.0 per cent of total Commonwealth expenditure.

PART 1: AUSTRALIA'S FEDERAL RELATIONS

The financial arrangements between the Commonwealth, States and Territories are a cornerstone of the Australian federation. Within a tight fiscal environment, the Commonwealth is continuing to work in partnership with the States and Territories to implement broad-ranging reforms driven by the overarching goal of enhancing the wellbeing of all Australians.

This is seen in an agenda which currently embraces areas such as healthcare, disabilities, skills, education, Indigenous support in the Northern Territory and the adequacy of Australia's economic and social infrastructure. Funding to reward jurisdictions for regulatory reforms and support for communities affected by natural disasters in recent years are also priorities in this Budget.

The States and Territories receive substantial financial support from the Commonwealth through two broad categories of payments. These payments comprise specific purpose payments targeting key service delivery sectors and areas of nationally significant reform, and general revenue assistance including distribution of the Goods and Services Tax.

In 2012-13, the Commonwealth will provide \$90.4 billion in total payments to the States, representing around 24.0 per cent of total Commonwealth expenditure, with around 80 per cent of this funding currently 'untied'.

In 2012, an independent report will be provided to the Commonwealth examining the current basis for distribution of the Goods and Services Tax to the States and Territories.

OVERVIEW

Commonwealth payments to the States and Territories (the States) are framed by the *Intergovernmental Agreement on Federal Financial Relations* (the Intergovernmental Agreement). In place since 1 January 2009, the Intergovernmental Agreement provides the basis for the Commonwealth to work in partnership with the States to deliver reforms for the benefit of all Australians.

The Government is returning the budget to surplus in 2012-13 and will build growing surpluses over the forward estimates. A return to surplus, ahead of any major advanced economy, sends a strong message to international investors on the Government's commitment to fiscal discipline, and provides a buffer in uncertain global economic times. A return to surplus is also appropriate given domestic economic conditions. The economy is forecast to grow around trend over the next two years, with low unemployment, contained inflation, and record levels of mining investment.

Despite constraints in the current fiscal environment, the Commonwealth will continue to provide substantial funding to the States through both general revenue assistance

and specific purpose payments to assist in the major service delivery sectors, target areas in need of reform, and support delivery of the key social and economic outcomes envisaged under the federal financial relations framework.

Overall, the Commonwealth will provide the States with \$90.4 billion in payments for specific purposes and general revenue assistance in 2012-13. This represents a \$5.8 billion decrease in total financial assistance compared to 2011-12. Total payments to the States as a proportion of Commonwealth expenditure are estimated to be 24.0 per cent in 2012-13.

National Specific Purpose Payments (National SPPs), including National Health Reform equivalent amounts will increase from \$27.9 billion in 2011-12 to \$29.6 billion in 2012-13. This increase, amounting to \$1.8 billion, is provided by the Commonwealth in accordance with the indexation arrangements established under the Intergovernmental Agreement and provides the States with a secure and growing funding base for the delivery of activities across the main service sectors.

General revenue assistance, principally comprising the distribution of the Goods and Services Tax (GST), provides another stable funding base to support the delivery of State services. Notwithstanding that current GST forecasts are below levels projected in last year's Budget, GST is still expected to increase from \$45.6 billion in 2011-12 to \$48.2 billion in 2012-13, an increase of \$2.6 billion.

National Partnership payments are expected to decrease from \$21.6 billion in 2011-12 to \$11.4 billion in 2012-13. This primarily reflects the timing of infrastructure payments, with funding for a number of large infrastructure projects being made available in 2011-12 to assist the States in progressing essential infrastructure projects, thereby supporting future economic growth. Making funding available to the States in 2011-12 increases payments in this year, with a corresponding drop in subsequent years, and results in a more pronounced differential between 2011-12 and 2012-13. Projects affected include the Nation Building Program, the Building Australia Fund and Water for the Future projects. The combined impact of infrastructure payments is over \$5.0 billion.

The reduction in National Partnership payments can also be attributed to the bring-forward of \$1.1 billion in financial assistance grants to support local governments by providing them with additional flexibility and to assist them in responding to the widespread natural disasters and other pressures. Responsibility for the basic community care maintenance and support services component of the *National Partnership on Transitioning Responsibilities for Aged Care and Disability Services* will transition to the Commonwealth for all States excluding Victoria and Western Australia in 2012-13. Given that participating States will no longer be responsible for these payments, this accounts for a \$1.0 billion decrease in payments from 2011-12 to 2012-13.

Expiring National Partnerships account for \$424.3 million, and are attributable to the expiry of completed programs, the majority of which are small-scale agreements and primarily relate to completed infrastructure projects. Part of this funding is attributable to programs that have, or are being, renegotiated, for example Skills Reform and Certain Concessions for Pensioners and Seniors Card Holders. This amount is markedly small in the context of State Government expenditure which is expected to total approximately \$209.0 billion in 2011-12. The remainder of the decrease relates to the winding-down of projects and year-on-year variations of longer-term programs.

In 2008-09, the year in which the federal financial relations framework was introduced, the Commonwealth increased payments to the States by approximately \$7.0 billion over those provided in 2007-08. Since this increase, payments to the States have not fallen below this level and from 2007-08 to 2015-16, total Commonwealth payments are expected to increase at over five per cent per annum on average, after adjusting for the transfer of responsibility for home and community care to the Commonwealth. This growth demonstrates the strong support the Commonwealth is providing for State service delivery and economic and social infrastructure notwithstanding the difficult fiscal environment.

Around 80 per cent of the financial support provided by the Commonwealth to the States is currently 'untied' and therefore can be spent by the States in the manner they choose to support service delivery in key areas of government activity such as health, education and skills, housing, and disabilities. The remaining 20 per cent of funding supports specific projects or reforms that the Commonwealth and States jointly agree should be pursued in the national interests.

The Commonwealth will continue to invest further in healthcare, including reforms under the *National Health Reform Agreement* commencing from 1 July 2012. Following agreement at the Council of Australian Governments (COAG) meeting on 13 April 2012, the Commonwealth will also provide substantial funding to build the skills of Australia's future workforce. This Budget will also see significant developments in education, critical infrastructure and Indigenous support in the Northern Territory. Funding to reward jurisdictions for regulatory reforms and continued provisions for communities affected by natural disasters in recent years will also be provided in this Budget.

In addition, longer term reforms, such as the National Disability Insurance Scheme (NDIS) and schools funding, continue to be progressed through COAG.

MAJOR GOVERNMENT REFORMS AND DEVELOPMENTS

Delivering key outcomes in a tight fiscal environment

Despite Australia's resilience during and in the aftermath of the global financial crisis, Commonwealth revenue is not expected to return to the levels seen before the crisis. Since its pre-crisis level in 2007-08, the tax to GDP ratio fell 3.6 percentage points to

20.1 per cent in 2010-11, the sharpest decline in this ratio since the 1950s. While tax receipts continue to recover from their post-crisis lows, the recovery is weaker than previously expected, and tax receipts remain well below the unsustainable peaks reached in the period leading up to the crisis.

Continued weakness in capital gains receipts, lower than expected company tax collections relating to the 2010-11 income year, and softening retail trade have resulted in a write-down to tax receipts estimates of \$6.1 billion in 2012-13 compared with expectations at the 2011-12 Mid-Year Economic and Fiscal Outlook. Tax receipts are projected to reach 22.9 per cent of GDP in 2015-16. This is around 1 percentage point below the levels reached in the mid-2000s.

GST paid to the States is also forecast to be lower than previous estimates. GST expected to be paid to the States in 2012-13 has been revised down by 5.6 per cent since the 2011-12 Mid-Year Economic and Fiscal Outlook as a result of continued wide-spread caution amongst consumers in the aftermath of the global recession. Further pressures on GST have resulted from households allocating more of their consumption towards goods and services not subject to GST such as education, rent, health and food. Despite these lower forecasts, from 2011-12 onwards, GST is estimated to grow by 5.7 per cent in 2012-13, with average expected growth of around 5.2 per cent over the forward estimates.

Implementing key health reforms

In this Budget, the Commonwealth will continue to invest in healthcare across a range of initiatives aimed at improving the quality of life and wellbeing of all Australians in urban, regional and remote areas of the community.

From 2012-13 and across the forward estimates, States are expected to receive \$67.9 billion in payments to support service delivery, reforms and projects in the healthcare sector.

Major investments include the implementation of the *National Health Reform Agreement*, funding to support mental health, improvements in public dental health, and further funding in regional areas from the Health and Hospitals Fund.

National Health Reform

The reforms under the *National Health Reform Agreement*, as agreed by COAG in August 2011, will commence from 1 July 2012. The new arrangements will deliver major reforms to the funding and delivery of health and hospital services, including for older Australians, by delivering better access to services, improved local accountability and transparency, and a stronger financial basis for the Australian health system through increased Commonwealth funding.

National Health Reform funding

The Commonwealth is committed to providing a strong financial basis for Australia's health system into the future. From 1 July 2012, the Commonwealth will provide National Health Reform funding to meet its increased responsibilities under the *National Health Reform Agreement*. This funding will replace the National Healthcare SPP and will comprise two elements: base funding equivalent to the current National Healthcare SPP; and efficient growth funding to be provided from 1 July 2014.

A national approach to activity based funding (ABF) will make public hospital funding more transparent, and help to drive efficiency in the delivery of hospital services. Through ABF, public hospitals will be funded according to the numbers and types of services they provide. As hospital activity grows and the efficient price changes, the Commonwealth will fund 45 per cent of efficient growth from 1 July 2014, increasing to 50 per cent from 1 July 2017. These arrangements address a fundamental structural problem in hospital funding where the costs of delivering services have been rising faster than the States can raise money to pay for them.

The national efficient price, which will be used in the calculation of efficient growth, will be determined annually by the Independent Hospital Pricing Authority. The Commonwealth has guaranteed that its increased contribution for efficient growth will be at least \$16.4 billion greater than the States would have received from the National Healthcare SPP between 2014-15 and 2019-20. If the amount required to fund the Commonwealth's hospital growth commitments is less than \$16.4 billion based on activity levels, the residual amount will be paid to fund health services that will reduce the growth in demand for hospital services.

National Health Funding Pool

To improve the transparency of public hospital funding, the Commonwealth and the States will each contribute public hospital funding into a single National Health Funding Pool from 1 July 2012. A National Health Funding Pool Administrator will be established by the Commonwealth and the States, and will report on Commonwealth and State funding flowing through the National Health Funding Pool and the services delivered by this funding.

Contributions for ABF services made into the National Health Funding Pool will be disbursed directly to Local Hospital Networks in accordance with levels of hospital activity.

To implement the new funding arrangements by 1 July 2012, the Commonwealth and each State and Territory will pass legislation to establish the Administrator. The Commonwealth's legislation, including amendments to the *Federal Financial Relations Act 2009* to facilitate the new payment arrangements under the *National Health Reform Agreement*, is currently before the Australian Parliament.

Changing roles and responsibilities for aged care and disabilities

Consistent with the *National Health Reform Agreement*, and the *National Partnership on Transitioning Responsibilities for Aged Care and Disability Services*, the Commonwealth will take full policy and funding responsibility for a unified aged care system, and for funding specialist disability services delivered by the States for people aged 65 years and over (50 years and over for Indigenous Australians). As a result of these changes, funding for the Home and Community Care (HACC) program will be paid through Commonwealth Own Purpose Expenses from 1 July 2012 rather than as a payment to the States. The States will be responsible for specialist disability services provided to younger people and for funding services delivered to younger people through Commonwealth aged care programs. These changes do not apply to Victoria and Western Australia, where basic community care services will continue to be jointly funded by the Commonwealth and the States under the HACC program.

Under the new arrangements, the Commonwealth will ensure that changes to roles and responsibilities for the provision of aged care and disability services remain budget neutral for all participating jurisdictions over the period 2011-12 to 2013-14. To achieve this budget neutrality, an adjustment is being made to the National Disability SPP. Estimates for this adjustment are detailed in Part 2 of this Budget Paper.

On 20 April 2012, the Commonwealth also announced a comprehensive, \$3.7 billion *Living Longer, Living Better* package to build a better, fairer, more sustainable and nationally consistent aged care system. This includes the establishment of a national Commonwealth Home Support Program from 1 July 2015, which will bring together under the one program, services currently providing basic home support for older people, including existing HACC services (except in Victoria and Western Australia) and a range of other Commonwealth programs.

Mental health

Investing in programs to assist those affected by mental health issues remains a key priority for the Commonwealth. Up to \$200.0 million will be provided by the Commonwealth from 2011-12 to 2015-16 to fund a new *National Partnership on Supporting National Mental Health Reform*. This National Partnership, agreed by COAG on 13 April 2012, will address service gaps in the mental health system and deliver improved health, social, economic and housing outcomes for people with severe and persistent mental illness.

The Commonwealth will also invest \$228.8 million from 2012-13 to 2015-16 towards the expansion of the Early Psychosis Prevention and Intervention Centre model. Under this program, up to 16 new centres will be established across Australia. The new centres will provide an integrated and comprehensive psychiatric service to help address the needs of young people aged 15-24 with emerging psychotic disorders.

Improvements in public dental health

Dental health is an important part of general health. Dental health varies across the population according to income. For some people, the potentially significant cost of dental treatment limits, or even prevents, access to services.

In this Budget, the Commonwealth will make a significant financial contribution to improve public dental health services, through the provision of \$345.9 million over three years from 2012-13 to 2014-15. This funding will provide treatment for those on public dental waiting lists in the States, including ensuring support for Indigenous Australians. This is part of the Commonwealth's \$515.3 million dental health package, which also includes funding for an expansion of the voluntary dental graduate year program, a new oral health therapist graduate year program, rural and remote relocation grants for dentists, funding for national health promotion activities, and support for the delivery of *pro bono* dental services. Commonwealth funding to the States will be provided through a new National Partnership.

The Government will redirect currently unallocated Commonwealth Dental Health Program funding towards this Budget's dental health package. This funding was intended to replace the Chronic Disease Dental Scheme (CDDS) but has been redirected to boost dental services before the CDDS is closed and any new scheme commences. It still remains Government policy to close the CDDS.

Health and Hospitals Fund round four: 2011 Regional Priority Round

As part of the \$475.0 million 2011 Regional Priority Round of the Health and Hospitals Fund, the Commonwealth will provide funding of \$251.5 million to the States over six years from 2012-13. This forms part of the Commonwealth's \$1.8 billion commitment for a Regional Priority Round under the Health and Hospitals Fund.

Through this initiative, the Commonwealth will continue to work in partnership with the States to expand and modernise key health infrastructure, including hospitals, across Australia to improve health care. This will improve health services across a range of areas including acute care, primary care, e-Health, integrated health facilities, Indigenous health and workforce and training.

Investing in skills and education

Continuing to invest in skills and education will be instrumental in increasing the productive capacity of the nation and supporting sustained economic growth for the future. From 2012-13 to 2015-16, the States are expected to receive \$65.8 billion in payments to support projects and service delivery in the skills and education sectors. This significant contribution will be used to increase productivity in Australia and enhance the nation's future workforce in order to deliver a high-skill, high-wage economy.

The Commonwealth has undertaken a *Review of Funding for Schooling* (the Gonski Review) with the objectives of improving school performance and ensuring equity in

resourcing. COAG discussed the Gonski Review at its meeting on 13 April 2012 and invited the participation of the States in developing advice for COAG on options for funding reform.

Skills reform

To achieve a highly skilled and productive workforce, the Commonwealth, in partnership with the States, will be implementing key reforms to the vocational education and training (VET) sector through a new *National Partnership on Skills Reform*. The Commonwealth has committed funding of \$1.7 billion over five years to achieve higher quality training and increased transparency of information to students, employers and governments, enhanced access to training opportunities, and improved efficiency and responsiveness of the VET system.

States will receive funding under this initiative through payments linked to structural reforms and training outcomes to enable all working-age Australians to develop the skills and qualifications needed to participate effectively in the labour market.

Additionally, at its meeting on 13 April 2012, COAG agreed to a revised *National Agreement for Skills and Workforce Development* which outlines the long-term objectives and targets that underpin skills reform and reaffirms the commitment of all Governments to work in partnership to ensure the skills of Australian workers are developed and utilised in the economy.

The revised National Agreement will contribute to increasing the skill level of the working age population to meet the changing needs of the economy. This will provide all working age Australians with the opportunity to develop skills, ensure that training delivers the skills needed for improved economic participation, and meet the needs of Australian industry.

The revised National Agreement also commits all Governments to reforms aimed at creating an accessible, responsive and equitable national training system that provides all working age Australians with the opportunity to develop the skills needed to participate effectively in the labour market.

Education

In this Budget, the Commonwealth is investing \$29.6 billion in education in 2012-13, an increase of \$312.8 million compared to 2011-12. This includes funding of \$13.9 billion in payments to the States.

As part of this contribution, funding is expected to be provided under a new *National Partnership on Rewards for Great Teachers* to reward quality teachers and school leaders in Australia. This initiative will be implemented through a reward-type payment scheme linked to the National Professional Standards for Teachers, to improve the quality and effectiveness of all teachers by ensuring they have access to constructive performance and development processes, which as a result, contribute to improved

learning outcomes for students. Funding of \$1.1 billion will be provided to both government and non-government schools from 2011-12 to 2018-19 under the National Partnership to be negotiated with the States.

In addition, a new *National Partnership on Empowering Local Schools* has been agreed between the Commonwealth and the States. Through this National Partnership, the Commonwealth will provide funding towards increasing the capacity of both government and non-government schools to make decisions at a local level. This will enable schools to respond better to local school community needs and provide services designed to deliver the best possible education.

The Commonwealth will also provide substantial reward payments to the States in recognition of nationally significant reforms achieved through the Smarter Schools package. Under this package, the Commonwealth will provide inaugural reward payments under the *National Partnership on Improving Teacher Quality* in two instalments totalling up to \$350.0 million over two years from 2011-12 to 2012-13. These payments will be provided to the States as a financial reward for achieving key reforms focused on improving the quality of teachers, principals and school leaders, and rewarding excellence in teaching.

As part of this package, the Commonwealth will also provide up to \$211.5 million in 2011-12 for the second and final reward payment instalment under the *National Partnership on Literacy and Numeracy*. Implementation of this initiative over the last four years has focused on key areas of teaching, leadership and the effective use of student performance information to deliver sustained improvement in literacy and numeracy outcomes for students, particularly those most in need.

Stronger Futures in the Northern Territory

In this Budget, the Australian Government is continuing its commitment to Closing the Gap in the Northern Territory by providing a ten-year, Stronger Futures in the Northern Territory package that will invest around \$3.4 billion to address significant levels of Indigenous disadvantage.

This commitment contributes to building quality education, improving health and wellbeing, supporting children, youth and families in their communities, providing decent housing and keeping communities safe. This commitment also builds upon several measures announced in the *2011-12 Mid-Year Economic and Fiscal Outlook* to help get children to school, tackle alcohol abuse, improve food security and increase job opportunities.

The ten-year funding package, combined with the proposed supporting legislation that is currently before the Australian Parliament, will drive fundamental change over a sustained period. The legislation will repeal the *Northern Territory National Emergency Response Act 2007*. A new National Partnership to support this initiative is currently being negotiated with the Northern Territory Government.

Funding for 2012-13 is reported in this Budget, with future funding to be held in the contingency reserve, and subject to negotiations with the Northern Territory.

The Commonwealth is also continuing to provide funding for a range of other specific Indigenous reforms, including in the areas of healthcare, education, skills and infrastructure. Further details of Indigenous funding provided to the States are provided in Part 2 of this Budget Paper.

Infrastructure

The Commonwealth is continuing to invest in critical infrastructure by contributing a total of \$16.4 billion over four years from 2012-13 in payments to the States to enhance Australia's future productivity and prosperity.

Following the passage of the Minerals Resources Rent Tax (MRRT) legislation, the Commonwealth remains committed to providing \$6.0 billion in regional infrastructure investment under the Regional Infrastructure Fund (RIF) that will spread the benefits of the mining boom into regional Australia. The Commonwealth will ensure that RIF funding to the States will have regard to their share of total mining production over time.

The RIF will be delivered in three streams. Stream 1 will provide funding to support projects committed to in the 2010 election. Stream 2 will provide funding over nine years to support ongoing investment in economic infrastructure. Funding under Stream 3 will be provided through the Regional Development Australia Fund for local projects identified by Regional Development Australia committees. This funding is now reported under the Department of Regional Australia, Local Government, Arts and Sport portfolio.

Investing in national transport infrastructure plays a critical role in uniting the nation by enabling increased accessibility of urban centres to areas of regional and remote Australia. Reflecting this initiative, the Commonwealth is investing \$13.8 billion from 2012-13 to 2015-16 for infrastructure projects through the Nation Building Program and the Building Australia Fund. Continued investment in these initiatives will not only fund road and rail projects but will assist economic and social development at regional and national levels by providing funding to improve the performance of existing land transport infrastructure.

In this Budget, the Commonwealth is making \$3.6 billion available as part of the Investment component of the Nation Building Program to complete the duplication of the Pacific Highway by 2016. This funding represents 50 per cent of the total funding required and is conditional upon the New South Wales Government agreeing to meet the remaining 50 per cent of the costs.

Further, the Commonwealth is providing \$232.1 million in 2015-16 to fund 50 per cent of the Torrens and Goodwood Junctions project in South Australia from the Building

Australia Fund. This project will ease congestion on Adelaide's suburban rail network and on the East-West freight network.

Deregulation reforms to deliver a seamless national economy

The Commonwealth will provide the first instalment of reward payments under the *National Partnership to Deliver a Seamless National Economy* in 2011-12. These payments, totalling up to \$200.0 million, will reward those jurisdictions that have delivered upon the objectives of the reform by reducing the level of unnecessary and inconsistent regulation and delivering agreed COAG deregulation priorities across a wide variety of areas including consumer law, environmental assessments and product safety regulation.

Potential reward payments to be delivered to jurisdictions for achieving these reforms total up to \$450 million and will be distributed in accordance with the National Partnership, with the second instalment to be delivered in 2012-13.

Reducing the impact of regulation to lower costs for business and improve competition and productivity remains a Government priority and was discussed at COAG's meeting on 13 April 2012, and ahead of that, at a meeting with the Business Advisory Forum. COAG agreed to progress six priority areas for major reform to lower costs for business and improve competition and productivity.

Providing continued support to communities affected by natural disasters

In recent years, Australia has witnessed the considerable impact on communities of severe natural disasters. This Budget again reflects the substantial commitment the Commonwealth makes to providing ongoing support to affected communities that have dealt, and continue to deal with, the devastating impact of these disasters.

In 2012-13, the Commonwealth will continue to provide substantial funding to the States under the Natural Disaster Relief and Recovery Arrangements (NDRRA) to support the rebuilding of communities affected by natural disasters.

National Disability Insurance Scheme

The Government has committed \$1.0 billion over four years for the first stage of a National Disability Insurance Scheme (NDIS). This is an historic undertaking which will involve fundamental changes to the way disability care and support is provided in Australia. An NDIS will ensure that Australians with severe and permanent disability have access to the services they need to fulfil their goals for social and economic participation.

From mid-2013, assessments will begin in launch locations to provide an initial 10,000 individuals who suffer significant and permanent disability, with reasonable and necessary care and support. This will be expanded to 20,000 participants from

2014-15. This first stage will test key design features and inform the scale and pace of the expansion to a full scheme.

Governments have been working together to build the foundations for an NDIS, with its development being led by COAG. At its meeting on 13 April 2012, COAG reaffirmed its commitment to an NDIS, recognising the growing need to support the most needy and vulnerable people in the community.

Currently, the States have primary responsibility for funding and delivering disability services. Approximately 70 per cent of disability care and support services are funded by State Governments. To develop a national scheme, it is recognised that the level and share of Commonwealth funding will need to increase.

The Commonwealth Government is committed to working in partnership with the States in designing, funding and implementing the first stage of the scheme. Following this Budget announcement, the Government will commence discussions with the States to determine the launch locations.

REVIEWS RELATING TO COMMONWEALTH-STATE RELATIONS

Several reviews have been completed, or are being implemented, to bolster the reform agenda and strengthen federal financial relations.

Review of the distribution of the GST

On 30 March 2011, the Commonwealth announced a review of the basis on which GST is distributed to the States. The Review, being conducted by the Hon Nick Greiner AC, the Hon John Brumby and Mr Bruce Carter, seeks to ensure that the future basis for GST distribution ensures that Australia is best placed to deal with the long term economic, environmental, demographic and social challenges that are transforming our economy.

The Review will examine whether improvements to the current form of horizontal fiscal equalisation, which determines the distribution of GST revenue to the States, can be identified to improve the efficiency, equity, simplicity and predictability of the current arrangements in light of these challenges.

The Review's interim report was released on 23 April 2012 and outlines the Review Panel's current thinking on proposals, seeking further submissions from the States and other interested parties on the information and concepts outlined in this report.

A second interim report on issues relating to state taxes and mineral royalties is due to be released in mid-2012. The Review's final report will be provided to the Treasurer later in 2012 and will be considered by COAG, with a final decision to be made on the new arrangements before the end of 2013.

Implementation of the Heads of Treasuries review of National Agreements, National Partnerships, and Implementation Plans under the Intergovernmental Agreement

In 2010, Heads of Treasuries, in consultation with Senior Officials, undertook a review of agreements under the federal financial relations framework. The review focused on the consistency of agreements with the Intergovernmental Agreement, and their effectiveness in enabling the achievement of the policy objectives agreed by COAG. The review was endorsed by COAG at its February 2011 meeting.

Implementation of the review occurred primarily in 2011. As part of this, the performance reporting frameworks in each of the six overarching National Agreements that cover the major service sectors have been reviewed to ensure that progress in the respective areas can be appropriately measured and clearly understood. Remaining reviews are expected to be completed in 2012.

Further details on the federal financial relations framework are available online at: www.federalfinancialrelations.gov.au.

Australia's Future Tax System Review and the Tax Forum

In early October 2011, the Commonwealth hosted a Tax Forum to continue the debate started by the release of the Australia's Future Tax System Review, bringing together community, business, union and government representatives, academics and other tax experts, to discuss priorities and directions for further tax reform.

At the Tax Forum, the Treasurer of New South Wales, the Hon Mike Baird, and the then Treasurer of Queensland, the Hon Andrew Fraser, agreed to work with the Council for the Australian Federation to develop a state tax reform plan, for further discussion with the Commonwealth. This work is continuing, with the Treasurer of South Australia, the Hon Jack Snelling, participating following the recent Queensland election.

TOTAL PAYMENTS TO THE STATES

The Commonwealth is committed to the provision of ongoing financial support to the States' service delivery efforts, through two broad categories of payments – payments for specific purposes and general revenue assistance, including the distribution of GST.

The States receive significant financial support from the Commonwealth. In 2012-13, the Commonwealth will provide the States with payments totalling \$90.4 billion, comprising payments for specific purposes of \$41.0 billion and general revenue assistance of \$49.4 billion, as shown in Table 1.1. This represents a \$5.8 billion decrease in total financial assistance compared to 2011-12. Total payments to the States as a proportion of Commonwealth expenditure are estimated to be 24.0 per cent in 2012-13.

As part of this Budget, the Commonwealth will provide substantial support to the States including:

- \$345.9 million to improve dental health outcomes for Australians;
- \$251.5 million allocated for round four of the Health and Hospitals Fund: 2011 Regional Priority Round; and
- \$129.1 million in 2012-13, as part of the Stronger Futures in the Northern Territory package that will total around \$3.4 billion over ten years.

Payments for specific purposes

In 2012-13, the Commonwealth will provide the States with \$41.0 billion in payments for specific purposes, a decrease of \$8.5 billion compared with the \$49.4 billion the States will receive in 2011-12. National SPPs and National Health Reform funding will total \$29.6 billion in 2012-13, representing a \$1.8 billion increase in National SPPs from 2011-12, with the remaining \$11.4 billion to be distributed through National Partnership payments. Payments for specific purposes as a proportion of Commonwealth expenditure are estimated to be 10.9 per cent in 2012-13.

Part 2 of this Budget Paper provides further information on payments for specific purposes to the States.

General revenue assistance

In 2012-13, the States will receive \$49.4 billion in general revenue assistance, comprising GST payments of \$48.2 billion and \$1.2 billion in other general revenue assistance. This is an increase of \$2.7 billion compared with the \$46.7 billion the States are expected to receive in total general revenue assistance in 2011-12. Payments for general revenue assistance as a proportion of Commonwealth expenditure are estimated to be 13.1 per cent in 2012-13.

Part 3 of this Budget Paper provides further information on GST and other general revenue assistance to the States.

PART 2: PAYMENTS FOR SPECIFIC PURPOSES

The Commonwealth provides substantial financial support to the States to assist in specific state services through National Specific Purpose Payments, National Partnership payments and, from 1 July 2012, National Health Reform payments. This Part provides an outline of these payments across the forward estimates.

OVERVIEW OF PAYMENTS

The Commonwealth provides payments to the States for specific purposes to pursue important national policy objectives in areas administered by the States. These payments cover most functional areas of state and local government activity including: health; education; skills and workforce development; community services; housing; Indigenous reform; infrastructure; and environment.

The Commonwealth provides the following types of specific purpose payments to the States:

- National Specific Purpose Payments (National SPPs) in respect of key service delivery sectors;
- National Health Reform funding from 1 July 2012; and
- National Partnership payments – facilitation payments, project payments and reward payments.

The *Intergovernmental Agreement on Federal Financial Relations* (Intergovernmental Agreement) provides that all payments for National SPPs and National Partnerships will be paid by the Commonwealth Treasury to each State Treasury on the 7th day of each month.

From 1 July 2012, a new national funding pool will be established into which the Commonwealth will provide National Health Reform funding as its contribution to public hospital services under the National Health Reform arrangements. Funding within the national funding pool will be administered by a National Administrator through an independent and jointly governed national funding body distinct from Commonwealth and State departments. Further detail on the new National Health Reform arrangements is set out in Part 1 of this Budget Paper.

National SPPs

The Commonwealth supports the States' efforts in delivering services in the major service delivery sectors through National SPPs. The Commonwealth currently makes payments under five National SPPs:

- National Healthcare SPP;
- National Schools SPP;
- National Skills and Workforce Development SPP;
- National Disability Services SPP; and
- National Affordable Housing SPP.

The States are required to spend each National SPP in the relevant sector.

The Intergovernmental Agreement specifies that each National SPP is ongoing and will be indexed on 1 July 2010 and each year thereafter by a growth factor that is specified in the Intergovernmental Agreement.

Payments made throughout the year for National SPPs are made in advance, based on Commonwealth estimates of the growth factors. A balancing adjustment is made after the end of the financial year once outcome data become available.

The National SPPs are distributed among the States in accordance with population shares based on the Australian Statistician's determination of States' population shares as at 31 December of that year. In recognition that an immediate shift to equal per capita shares may have implications for State allocations, an equal per capita distribution is being phased in over five years from 2009-10.

In the case of the government schools component of the National Schools SPP, the relevant population is each State's share of full-time equivalent student enrolments in government schools.

From 1 July 2012, the National Healthcare SPP will be replaced by National Health Reform funding which will comprise base funding equivalent to the National Healthcare SPP and, from 1 July 2014, efficient growth funding.

Further details of the new National Health Reform arrangements are set out in Part 1 of this Budget Paper.

National Partnership payments

The Commonwealth recognises the need to support the States to undertake priority national reforms or collaborative projects.

Under the Intergovernmental Agreement, National Partnership payments to the States are the key vehicle to support the delivery of specified projects, facilitate reforms, or reward those jurisdictions that deliver on nationally significant reforms.

There are three types of National Partnership payments: project; facilitation; and reward.

National Partnership project payments are a financial contribution to the States to deliver specific projects, including to improve the quality or quantity of service delivery, or projects which support national objectives. To the fullest extent possible, project payments are aligned with the achievement of project milestones and are made after the States have achieved the outcomes or outputs specified in the relevant National Partnership.

When a reform is agreed as a national priority, National Partnership facilitation payments may be paid in advance of the States implementing reforms, in recognition of the administrative and other costs associated with undertaking reform.

National Partnership reward payments can be used to reward those States that deliver on nationally significant reform or continuous improvement in service delivery. National Partnership agreements with reward payments set out clear, mutually agreed and ambitious performance benchmarks that encourage the achievement of reforms or continuous improvement in service delivery.

For reward payments, the COAG Reform Council assesses and publicly reports on the achievement of agreed performance benchmarks. The Commonwealth considers the COAG Reform Council assessments when determining reward payments to the States.

National Partnerships are typically entered into for a fixed period of time, reflecting the nature of the project or reform involved.

Some payments for specific purposes under the previous federal financial arrangements have become National Partnership project payments.

National Partnership agreements are publicly available at:
www.federalfinancialrelations.gov.au

Total payments for specific purposes

In 2012-13, payments for specific purposes are estimated to total \$41.0 billion, down from \$49.4 billion in 2011-12 (a decrease of 17.1 per cent). Total payments to the States for specific purposes constitute a significant proportion of Commonwealth expenditure and are estimated to represent 10.9 per cent of total Commonwealth expenditure in 2012-13.

(a) Includes adjustment to the National Disability SPP to achieve budget neutrality under National Health Reform (see footnote to Table 2.7 in this Part for details).

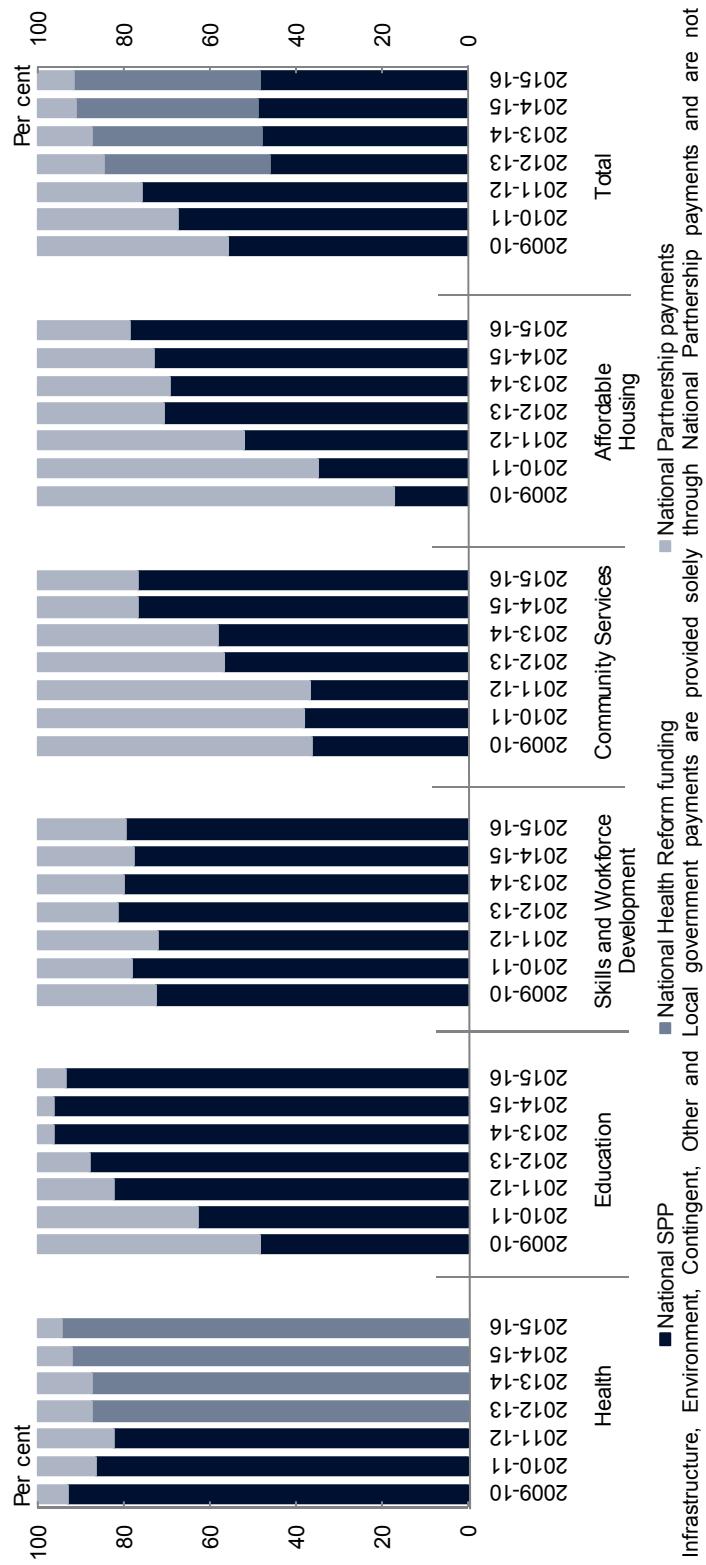

(b) Includes financial assistance grants for local government.

Further information on these payments is in this Part. Total payments for specific purposes categorised by Government Finance Statistics function are set out in Appendix C.

Categories of payments for specific purposes

Chart 2.1 shows the breakdown of payments for specific purposes by category. It illustrates that National SPPs (and National Health Reform funding) are becoming the primary source of specific purpose funding to the States.

HEALTH

In 2012-13, the Commonwealth will provide funding of \$15.5 billion to support state health services.

Under the National Health Reform arrangements, the National Healthcare SPP will be replaced by National Health Reform funding from 1 July 2012.

Table 2.4 provides information on payments to support state health services, including additional investments and reforms under the National Health Reform arrangements.

National Health Reform Agreement

On 2 August 2011, COAG agreed to the *National Health Reform Agreement*.

This Agreement introduces new arrangements for the financing of public hospital services. The Agreement builds on and complements the policy outcomes, progress measures and outputs outlined in the *National Healthcare Agreement*.

Under the *National Health Reform Agreement*, the majority of the Commonwealth's funding for public hospital services will be provided under activity based funding arrangements with the price determined by the Independent Hospital Pricing Authority. Previously public hospital funding had been provided on a block grant basis under the National Healthcare SPP, leaving States to meet the full costs of any increases over and above the indexation provided under the SPP. From 1 July 2014 the Commonwealth will meet 45 per cent of the efficient growth of public hospital services, increasing to 50 per cent from 2017-18.

The *National Health Reform Agreement* also introduces greater transparency in the expenditure of Commonwealth and State and Territory public hospital funding and accountability for the performance of hospitals and health services through the establishment of a National Health Funding Administrator and the National Health Performance Authority. The Administrator and the Authority will report regularly on

payments through the National Health Funding Pool to public hospitals and the performance of public hospitals respectively.

National Healthcare Agreement

The *National Healthcare Agreement* affirms the commitment of the Commonwealth and the States to:

- ensuring that there is a focus on health policy and the prevention of disease and injury and the maintenance of health, not simply the treatment of illness;
- meeting the primary health care needs of all Australians efficiently through timely and quality care;
- ensuring that people with complex care needs can access comprehensive, integrated and coordinated services;
- providing timely and appropriate high quality hospital and hospital-related care to all Australians;
- meeting the needs of older Australians through high quality, affordable, health and aged care services that are appropriate to their needs, as well as enabling choice and seamless, timely transition within and across the different sectors;
- ensuring all Australians experience best practice care that is suited to their needs and circumstances;
- achieving health outcomes for Indigenous Australians (and those living in rural and remote areas) that are comparable to the broader population; and
- a sustainable health system that can respond and adapt to future needs.

National Healthcare SPP funding and National Health Reform funding

The Commonwealth is currently providing National Healthcare SPP funding of \$12.7 billion in 2011-12. From 1 July 2012, the National Healthcare SPP will be replaced with National Health Reform funding.

In 2012-13, National Health Reform funding will be \$13.5 billion, equivalent to the amount that would have been provided under the previous National Healthcare SPP.

(a) The efficient growth funding component of National Health Reform funding in 2014-15 and 2015-16 is indicative only. The distribution of efficient growth funding will be determined by efficient growth in each State.

Growth factor

The Intergovernmental Agreement defines the growth factor for the National Healthcare SPP as the product of:

- a health specific cost index (a five year average of the Australian Institute of Health and Welfare health price index);
- the growth in population estimates weighted for hospital utilisation; and
- a technology factor (the Productivity Commission derived index of technology growth).

In 2012-13 and 2013-14, National Health Reform funding will be equivalent to the National Healthcare SPP indexed by the growth factor defined in the Intergovernmental Agreement. The growth factor for the National Healthcare SPP is currently estimated to be 6.46 per cent in 2012-13.

Under the *National Health Reform Agreement*, a component of the National Health Reform funding will be identified as public health funding, to be paid to State health

departments. The States will have full discretion over the application of public health funding to the outcomes set out in the *National Healthcare Agreement*. This amount represents the sum of amounts identified under the *National Healthcare Agreement* relating to national public health, youth health services and essential vaccines (service delivery) in 2008-09 (\$244.0 million), indexed by the former National Healthcare SPP growth factor.

From 2014-15, the Commonwealth will begin to increase its funding contribution to 50 per cent of the efficient growth in hospital costs. This will be done in two stages: increasing to 45 per cent in 2014-15, and 50 per cent in 2017-18.

Efficient growth funding will comprise:

- for services funded on the basis of activity – the increase in the efficient price of delivering public hospital services, and the increase in service provision; and
- for services funded on the basis of block grants – the increase in the efficient cost of delivering those services.

The efficient price will be determined annually by the Independent Hospital Pricing Authority.

The Commonwealth has guaranteed that its increased contribution will be at least \$16.4 billion greater than the States would have received from the National Healthcare SPP between 2014-15 and 2019-20. If the amount required to fund the Commonwealth's public hospital growth commitment over this period is less than \$16.4 billion, the residual amount will be paid to fund health services that will reduce the growth in demand for hospital services.

Additional information on the National Health Reform arrangements is provided in Part 1 of this Budget Paper.

National Partnership payments for health

In addition to National Health Reform funding, the Commonwealth will provide funding through National Partnerships to alleviate key pressure points to help meet the growing demand for hospital services. Further details on these National Partnerships and their components are provided below.

A total of \$1.9 billion will be provided to the States in 2012-13 under the following health categories:

- National Partnerships supporting National Health Reform arrangements;
- health infrastructure;
- health services;

- Indigenous health;
- mental health;
- preventive health; and
- other health payments.

National Partnership on Improving Public Hospital Services

Several payments are provided under the *National Partnership on Improving Public Hospital Services* which implements the public patient access to elective surgery, emergency department and subacute care services elements of the *National Health Reform Agreement*. This National Partnership follows on from the *National Partnership on the elective surgery waiting list reduction plan* and the *National Partnership on hospital and health workforce reform*.

The Commonwealth is providing funding to increase hospital capacity and improve services to patients through a flexible funding pool. The funding pool gives the States additional capacity to respond to capital and recurrent cost needs in the public hospital system in relation to emergency departments, elective surgery and subacute care.

National emergency access target

The Commonwealth is providing funding to expand capacity in the public hospital system and reduce the time taken to treat, admit or discharge patients in public hospital emergency departments as part of a reform to introduce a four hour national emergency access target for emergency department treatment.

Capital funding component

\$million	NSW	VIC	QLD	WA	SA	TAS	ACT	NT	Total

The Commonwealth is providing funding for the expansion of emergency departments and associated facilities to help achieve the agreed new national emergency access target. This measure allows for the redesign and upgrade of public hospital emergency departments in order to meet the new target and funding will be distributed based on population and need.

Facilitation and reward funding component

2015-16	15.9	12.4	10.4	5.3	3.5	1.1	0.8	0.6	50.0

The Commonwealth is providing funding to introduce a four hour national emergency access target. Under the target, 90 per cent of all patients presenting to a public hospital emergency department will leave the emergency department for admission to hospital or referral to another hospital for treatment or will be discharged within four hours. From its commencement on 1 January 2012, the target applies to all five triage categories and is to be achieved through stepped improvements by 2015.

The Commonwealth will provide reward funding to jurisdictions based on their achievement in meeting the national emergency access target. This will be based on the performance achieved in each of the assessment periods, subject to assessment by the COAG Reform Council.

National elective surgery target

The Commonwealth is providing funding to ensure elective surgery patients are seen within clinically recommended times, and reduce the number of patients waiting beyond the clinically recommended time.

Capital funding component

\$million	NSW	VIC	QLD	WA	SA	TAS	ACT	NT	Total

2014-15	-	-	-	-	-	-	-	-	-
2015-16	-	-	-	-	-	-	-	-	-

The Commonwealth is providing funding for the national elective surgery target to boost elective surgery capacity in public hospitals.

Expanding the capacity to perform elective surgery will help to achieve the Commonwealth's new national elective surgery target. This target seeks to ensure that, by the end of 2016, 100 per cent of elective surgery patients in all urgent categories are treated within the clinically recommended times.

Facilitation and reward funding component

2015-16	15.8	12.3	10.6	5.4	3.4	0.9	0.7	0.5	49.5

The Commonwealth has provided funding to achieve elective surgery targets by expanding elective surgery capacity and improving the delivery of elective surgery. The Commonwealth will provide reward funding to jurisdictions based on their achievement in meeting the national elective surgery target.

The national elective surgery target is comprised of two complementary parts. Part 1 is based on achieving a progressive increase in the proportion of elective surgery procedures undertaken within clinically recommended times so that 100 per cent of patients waiting for surgery are treated within the clinically recommended waiting times by 2016. Part 2 aims to reduce the number of patients who have already waited longer than the clinically recommended time for elective surgery.

2015-16	-	-	-	-	-	-	-	-	-

The Commonwealth is providing funding for over 1,300 additional beds for subacute services.

The States will deliver an agreed number of new subacute beds or bed equivalents each year in public hospitals or in community settings. Funding will provide beds and services for palliative care, rehabilitation, psychogeriatric care and geriatric evaluation and management, and subacute mental health care.

The Commonwealth is providing funding for the *National Partnership on financial assistance for long stay older patients* to assist with the care of long stay older patients in public hospitals.

The funding contribution will assist with the care in public hospitals of older people, aged 65 years or over, who have finished acute and post-acute care and are awaiting Commonwealth aged care placement.

On 20 April 2012, the Commonwealth announced the \$3.7 billion *Living Longer. Living Better* package to build a better, fairer, more sustainable and nationally consistent aged care system.

The Commonwealth is delivering on the \$1.8 billion commitment to Health and Hospitals Fund investment in Regional Australia, with 76 projects announced in this Budget under the 2011 Regional Priority Round, at a cost of \$475.0 million. \$251.5 million of this funding will be provided to the States. Regional Priority funding will improve access to essential health services for Australians living in rural, regional and remote areas.

The Commonwealth will work in partnership with the States to expand and modernise key health infrastructure, including hospitals, across Australia to improve health care.

This will improve health services across a range of areas including acute care, primary care, e-Health, integrated health facilities, Indigenous health and workforce and training.

A new spending measure associated with the Regional Priority round is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth is providing funding from the Health and Hospitals Fund to support translational medical research infrastructure and workforce training. This translational research funding will provide new medical research infrastructure in the areas of mental health and neurological disorders, child health, Indigenous health and medical bionics. The funding has been targeted at projects that will focus on translating research into clinical practice to deliver better health outcomes for all Australians. The Commonwealth will also provide funding to enhance health workforce capability through investment in new and existing clinical schools, universities and training facilities to support an Australian health workforce for the future.

The Commonwealth is providing funding to better meet the care needs of older patients in public hospitals and improve their access to alternative care. The funding enables the States to provide a range of services relevant to their own service systems, to enhance the care of older people in public hospitals and reduce their risk of hospitalisation.

A measure associated with the COAG Long Stay Older Patients Initiative is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

On 20 April 2012, the Commonwealth announced the \$3.7 billion *Living Longer. Living Better* package to build a better, fairer, more sustainable and nationally consistent aged care system.

The Commonwealth is providing funding for the *National Partnership on Closing the Gap in the Northern Territory – Indigenous health and related services component*. Funding under this component will improve access to effective primary health care services in partnership with the Northern Territory Government, Aboriginal Medical Services Alliance Northern Territory, and through consultation with other key stakeholders. This National Partnership is delivering health improvements through a system wide approach to enhancing quality and access to services across the Northern Territory. It is also complemented by related initiatives in the areas of law and order, community safety, education, food security, and provision of interpreters.

The Commonwealth and Northern Territory Governments are currently negotiating arrangements as part of the Stronger Futures in the Northern Territory initiative, which will replace the *National Partnership on Closing the Gap in the Northern Territory*. See the section on the *National Partnership on Stronger Futures in the Northern Territory* in this Part.

Other payments made as part of the *National Partnership on Closing the Gap* in the Northern Territory are discussed in the Education and Community Services sections of this Part.

National Partnership on Stronger Futures in the Northern Territory

The Commonwealth will provide funding to the Northern Territory Government through the *National Partnership on Stronger Futures in the Northern Territory*.

There are three health components under the *National Partnership on Stronger Futures in the Northern Territory*. The Stronger Futures in the Northern Territory initiative is described further in the Community Services section of this Part.

Funding for the *National Partnership on Stronger Futures in the Northern Territory* is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth will provide funding for the *National Partnership on Expanding the Early Psychosis Prevention and Intervention Centre model* initiative to explore how the model could be used to reform early psychosis management within the Australian mental health system. Under this measure, up to 16 new centres will be established across Australia. The new centres will provide an integrated and comprehensive psychiatric service to help address the needs of people aged 15-24 with emerging psychotic disorders. Services provided include early intervention and clinical treatment.

National Partnership on Preventive health

The Commonwealth is providing funding for the *National Partnership on Preventive health*. This National Partnership has been established to address the rising prevalence of lifestyle related chronic diseases by laying the foundations for healthy behaviours in the daily lives of Australians. The objectives of this National Partnership are being achieved through settings such as: communities; early childhood education and care environments; and schools and workplaces. In addition, these objectives are being supported by national social marketing campaigns. A key feature of this National Partnership is the establishment of infrastructure required to monitor and evaluate the progress of interventions, including the Australian National Preventive Health Agency.

The Commonwealth is providing funding for additional state-based surveillance activities covering nutrition and physical activity measures consistent with national protocols and to enable reporting on performance benchmarks in the National Partnership.

The Commonwealth has established the Australian National Preventive Health Agency, and has provided additional funding to create the Australian Health Survey. The survey will collect representative data on the prevalence of chronic diseases and lifestyle related risk factors amongst Indigenous and non-Indigenous Australians, including nutrition, physical activity and biomedical measures.

Healthy children component

The Commonwealth is providing facilitation and reward funding for the healthy children initiative. Funding will deliver programs for children from birth to 16 years of age to increase levels of physical activity and improve the intake of fruit and vegetables in settings such as child care centres, preschools and schools.

The Commonwealth will provide funding for reward payments to the States upon attainment of agreed performance benchmarks under this National Partnership.

The Commonwealth is providing facilitation and reward funding for the healthy workers initiative. This funding supports workplace health programs that focus on decreasing rates of overweight and obesity, increasing levels of physical activity and intake of fruit and vegetables, smoking cessation and reducing harmful levels of alcohol consumption.

As part of this National Partnership, the Commonwealth has developed a national healthy workplace charter with peak employer and employee representatives (the Joint Statement of Commitment), and is developing a portal to provide supporting

resources and tools to employers. A national quality framework and National Awards Scheme will also be developed.

The Commonwealth will provide funding for reward payments to the States upon attainment of agreed performance benchmarks under this National Partnership.

The Commonwealth is providing funding for the *National Partnership on the East Kimberley Development Package* for health infrastructure projects. Investment priorities under the package include primary and preventive health care, drug and alcohol services, short term patient accommodation, housing for health service providers, improvements to remote clinics, aged care facilities and environmental health measures. Improving primary and preventive health care services in these areas will reduce the incidence of chronic and acute illness in the community as well as reduce the pressure on acute health services in Kununurra and Wyndham.

A description of the East Kimberley Development Package as a whole is provided in the Infrastructure services section of this Part.

The Commonwealth has provided funding for the *National Partnership on the Elective surgery waiting list reduction plan*. Facilitation funding has been provided for systemic improvements such as the construction of additional operating theatres and the purchase of new surgical equipment to improve long-term elective surgery performance. Reward funding has been provided to the States in recognition of reduced elective surgery waiting times and increased surgery throughput.

Funding for elective surgery is now provided under the *National Partnership on Improving Public Hospital Services* discussed earlier in this section.

The Commonwealth is providing funding for the *National Partnership on essential vaccines* to improve the health and wellbeing of Australians through the cost-effective delivery of immunisation programs under the National Immunisation Program. This National Partnership provides funding to the States for the purchase of essential vaccines, which have not yet transitioned to centralised purchasing arrangements, for all eligible individuals under the National Immunisation Program.

Facilitation funding will improve essential vaccine service delivery by assisting the States to invest in activities related to the distribution of vaccines to providers, cold chain management, vaccine storage, analysis of data around the provision of vaccines and to undertake projects to support performance benchmarks. The Commonwealth is providing reward funding to the States for achieving performance benchmarks that maintain or increase vaccine coverage amongst Indigenous Australians and four year olds as well as in low coverage areas, and that maintain or decrease vaccine wastage and leakage.

A proportion of funding from 2012-13 has been brought forward into 2011-12 to assist some States with vaccines purchasing arrangements.

The Commonwealth is providing funding for the *National Partnership on hospital and health workforce reform – activity based funding* to improve the efficiency of public hospital services, enhance health workforce capability and supply, increase the volume and quality of subacute care services, and improve the operations of emergency departments. This National Partnership will support an efficient and effective public hospital system that delivers high quality and safe services to patients.

Under the *National Health Reform Agreement*, the Commonwealth and the States have agreed to introduce a national system of activity based funding from 1 July 2012. This will be based on the efficient price for each service, set by the Independent Hospital Pricing Authority. In some instances, such as payments to smaller regional hospitals, funding will continue to be paid in block grants.

The Commonwealth will provide funding of \$345.9 million through a new National Partnership to assist the States to provide treatment for those on public dental waiting lists, including ensuring support for the Indigenous population. This is part of the Commonwealth's \$515.3 million dental package.

The Government will redirect currently unallocated Commonwealth Dental Health Program funding towards this Budget's dental health package. This funding was intended to replace the Chronic Disease Dental Scheme (CDDS) but has been redirected to boost dental services before the CDDS is closed and any new scheme commences. It still remains Government policy to close the CDDS.

A new spending measure associated with the public dental waiting list program is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

EDUCATION

In 2012-13, the Commonwealth will provide funding of \$13.9 billion to support state education services, as detailed in Table 2.5.

National Education Agreement

The *National Education Agreement* affirms the commitment of the Commonwealth and the States to the objective that all Australian school students acquire the knowledge and skills to participate effectively in employment and society.

This agreement recognises that ensuring all young people have the best possible start in life is vital to the wellbeing of families, communities and the nation. High quality schooling, supported by strong community engagement, is central to Australia's future prosperity.

This agreement is contributing to shared outcomes, including:

- ensuring that all children are engaged in and benefiting from schooling, with a goal of lifting the Year 12 attainment rate to 90 per cent by 2015;
- ensuring children meet basic literacy and numeracy standards; and
- continuing to improve overall literacy and numeracy achievement.

(a) Includes government and non-government schools.

The National Schools SPP is Commonwealth funding associated with the *National Education Agreement* and is provided to the States to support schools.

Growth factor

The Intergovernmental Agreement defines the growth factor for the government schools component of the National Schools SPP as the product of:

- the growth in average government schools recurrent cost; and
- the growth in full-time equivalent enrolment in government schools.

The growth factor for the non-government schools component of the National Schools SPP is determined in accordance with the *Schools Assistance Act 2008*.

The growth factor for the government schools component of the National Schools SPP is currently estimated to be 6.63 per cent in 2012-13.

National Partnership payments for education

In addition to the National Schools SPP, the Commonwealth will provide a total of \$1.7 billion in 2012-13 through National Partnerships to support state education services. Further details on these National Partnerships are provided below.

National Partnership on Closing the Gap in the Northern Territory

The Commonwealth is providing funding for the *National Partnership on Closing the Gap in the Northern Territory* to address the challenges in remote Northern Territory communities. The Commonwealth and Northern Territory Governments are working towards COAG's Closing the Gap targets and resetting the relationship with the Indigenous communities in the Northern Territory.

The Commonwealth and Northern Territory Governments are currently negotiating arrangements as part of the Stronger Futures in the Northern Territory initiative, which will replace the *National Partnership on Closing the Gap in the Northern Territory*. See the section on the *National Partnership on Stronger Futures in the Northern Territory* in this Part.

Other payments made as part of the *National Partnership on Closing the Gap in the Northern Territory* are discussed in the Health and Community Services sections of this Part.

The Commonwealth is providing funding for the *National Partnership on the digital education revolution*. This National Partnership was established to prepare students for education, training and to live and work in a digital world. The National Secondary School Computer Fund (NSSCF) and associated on-costs are the major funding element under this National Partnership. The NSSCF helps schools to provide new computers and other information and communication technology (ICT) equipment for students in Years 9 to 12, as well as the necessary infrastructure to support the installation and maintenance of the additional ICT.

Funding to reach the computer to student ratio of 1:1 is provided biannually to education authorities through this National Partnership with States and Territories and through funding agreements with the non-government sector. The 1:1 ratio has been achieved nationally in Australian schools with Years 9 to 12 for the start of the 2012 school year. On 16 February 2012, it was announced that more than 911,000 computers had been installed under the NSSCF exceeding the national target of 786,000 computers.

(a) Includes government and non-government schools.

(b) The funding for Western Australia in 2011-12 relates only to non-government schools.

(c) Amounts in 2015-16 are indicative.

The Commonwealth is providing funding for the *National Partnership on empowering local schools*. This National Partnership aims to empower participating schools to make decisions at a local level, supporting them to better respond to the needs of students and the local school community and provide services designed to assist their students to achieve their best educational outcomes.

Phase one will be completed by June 2014. Funding for 2015-16 is for phase two of this initiative.

The measure taken in the 2012-13 Budget as part of this program is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth is providing funding for element one of the *National Partnership on Indigenous early childhood development – children and family centres* to improve outcomes for Indigenous children in the early years and to contribute to COAG's Closing the Gap targets for Indigenous Australians. This National Partnership provides for the establishment of 38 children and family centres across Australia by 2014, which will deliver integrated services, including early learning, childcare and family support programs.

Additional elements of this National Partnership provide for increased access to antenatal care and health programs and increased access and use of maternal and child

health services by Indigenous families. These elements are reported in the Health section of this Part.

National Partnership on more support for students with disabilities^(a)

(a) Includes government and non-government schools.

The Commonwealth is providing funding for the *National Partnership on more support for students with disabilities*. This National Partnership was established to provide targeted assistance to teachers and schools to support students with disabilities. This initiative provides education authorities the flexibility to select a range of activities that will best meet the needs of students, teachers and schools in their jurisdiction. Services will be delivered in the 2012 and 2013 school years.

The major focus of this short-term initiative is to build the capacity of Australian schools and teachers to better support students with disabilities, contributing to improved student learning experiences, educational outcomes and transitions to further education or work.

A new spending measure associated with more support for students with disabilities is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth is providing funding for the *National Partnership on literacy and numeracy*. This National Partnership facilitates and rewards a range of reforms to accelerate literacy and numeracy improvements for students with a priority focus on primary school students who are at risk of falling behind, especially Indigenous students. It is contributing towards COAG's target of 'halving the gap' in literacy and numeracy outcomes for Indigenous students.

This National Partnership has three key priority areas for reform:

- strong school leadership and whole of school engagement with literacy and numeracy;
- effective and evidence-based teaching of literacy and numeracy; and

- monitoring of student and school literacy and numeracy performance to identify where support is needed.

From 2012-13, funding for literacy and numeracy programs is detailed in the Department of Education, Employment and Workplace Relations' Portfolio Budget Statement.

(a) Includes government and non-government schools.

The Commonwealth is providing funding for the *National Partnership on low socio-economic status school communities*. These reforms are focusing on teacher quality, principal leadership, school accountability and innovative learning opportunities to equip students better for further education, workforce participation and civic responsibilities. The reforms are contributing to COAG's social inclusion agenda and helping to overcome disadvantage experienced by many Indigenous people.

National Partnership on Stronger Futures in the Northern Territory

The Commonwealth will provide funding to the Northern Territory Government through the *National Partnership on Stronger Futures in the Northern Territory*. There are three education components under the *National Partnership on Stronger Futures in the Northern Territory*. The Stronger Futures in the Northern Territory initiative is described further in the Community Services section of this Part.

Funding for the *National Partnership on Stronger Futures in the Northern Territory* is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

Building a quality school workforce

The Commonwealth will provide funding for building a quality school workforce. The funding supports the urgent improvement of schooling outcomes for Indigenous children and comprises two components – additional teachers and quality teaching.

(b) Estimates from 2013-14 onwards are subject to negotiation of the *National Partnership on Stronger Futures in the Northern Territory*.

The Commonwealth will provide continued funding to the Northern Territory Government for 200 teaching positions in remote Northern Territory schools, to maintain a strong workforce and provide access to quality teaching that directly engages young people in education and supports the aspirations of Aboriginal communities for quality education outcomes for their children.

(b) Estimates from 2013-14 onwards are subject to negotiation of the *National Partnership on Stronger Futures in the Northern Territory*.

This quality teaching component will enhance the capability of the existing education workforce in remote Northern Territory communities and improve teachers' abilities to support students with critical needs. Commonwealth funding will allow Northern Territory education providers to develop career pathways for Indigenous staff members, increase the number of Indigenous staff members with education qualifications and provide professional development, support and programs to enable teachers and students to achieve improved outcomes in literacy and numeracy in targeted remote communities.

Expansion of the school enrolment and attendance measure^(a)

2015-16	-	-	-	-	-	-	-	nfp	nfp

(a) Estimates from 2013-14 onwards are subject to negotiation of the *National Partnership on Stronger Futures in the Northern Territory*.

The Commonwealth will provide funding for the expansion of the school enrolment and attendance measure (SEAM). This measure will use the income support payment system as a way to connect schools and families where children are not enrolled in school, or going to school and encourages dialogue between the school and the family

on factors impacting on school enrolment and attendance. As a last resort, SEAM will use the possible suspension of income support payments to encourage improved school enrolment and attendance behaviours.

This measure will be aligned with the Northern Territory Government's *Every Child, Every Day* attendance strategy and expanded from 6 to 22 communities (including all Northern Territory Remote Service Delivery communities, Alice Springs, Tennant Creek, Alyangula, Nhulunbuy, and the remaining areas of Katherine not already in scope for SEAM) in the Northern Territory.

This measure will support greater engagement between schools and families and encourage better attendance behaviours and educational outcomes in SEAM communities. SEAM will use attendance conferences and the development of attendance plans that will provide parents with ownership and control of their behaviour towards their children's school attendance. The funding will provide for increased levels of support for families through additional social workers from the Department of Human Services and additional funding for Northern Territory Government Attendance and Engagement Officers.

(a) Includes government and non-government schools.

The Commonwealth is providing funding for the *National Partnership on trade training centres in schools*. Trade training centres are being established to help increase the proportion of students achieving Year 12 or equivalent qualifications by ensuring students have access to high quality, relevant education and training opportunities that engage and encourage them to complete their studies. The trade training centres also aim to address national skills shortages in traditional trades and emerging industries. Under the program, funds are available for major capital works, upgrade or refurbishment of existing facilities and/or industry standard equipment.

Strong partnerships between Commonwealth, State and Territory governments, non-government education authorities and school communities enable the success of the trade training centres in schools program.

Funding for trade training centres commenced in March 2008.

SKILLS AND WORKFORCE DEVELOPMENT

In 2012-13, the Commonwealth will provide funding of \$1.7 billion to support state skills and workforce development related services as detailed in Table 2.6.

National Agreement for Skills and Workforce Development

On 13 April 2012, COAG agreed to a revised *National Agreement for Skills and Workforce Development*. The Agreement identifies the long-term objectives of the Commonwealth and the States in the areas of skills and workforce development, and recognises the interest of all Governments in ensuring the skills of the Australian people are developed and utilised in the economy.

The Agreement seeks to deliver a vocational education and training (VET) system with improved quality and greater transparency for students, employers and governments; greater access to training opportunities and improved outcomes for disadvantaged students; and greater efficiency.

The reforms needed to achieve the objectives and outcomes of this Agreement include reforming training to achieve a more demand-driven and client-focused system, and to help drive the next wave of innovation and productivity.

The National Skills and Workforce Development SPP is the funding associated with the *National Agreement for Skills and Workforce Development* and is provided to work towards increasing the skill levels of all Australians.

Growth factor

The Intergovernmental Agreement defines the growth factor for the National Skills and Workforce Development SPP as the product of:

$$0.85 \times \text{wage cost index } 1 + 0.15 \times \text{wage cost index } 6$$

The growth factor for the National Skills and Workforce Development SPP is currently estimated to be 1.89 per cent in 2012-13.

National Partnership payments for skills and workforce development

In addition to the National Skills and Workforce Development SPP, the Commonwealth will provide funding through National Partnerships as detailed below.

Building Australia's Future Workforce — National Partnership on skills reform^(a)

(a) Since the 2011-12 Budget, the name of this National Partnership has changed from the *National Partnership on vocational education and training*.

The Commonwealth will provide funding for the *National Partnership on skills reform* of \$1.7 billion over five years from 2012-13 (including \$516.3 million in 2016-17). It will support long-term reform in the VET sector, particularly reforms that provide:

- more accessible training for working-age Australians and, in particular, a more equitable training system, which provides greater opportunities for participation in education and training;
- a more transparent VET sector, which enables better understanding of the VET activity that is occurring in each jurisdiction;

- a higher quality VET sector, which delivers learning experiences and qualifications that are relevant to individuals, employers and industry; and
- a more efficient VET sector, which is responsive to the needs of students, employers and industry.

The National Partnership will complement the revised *National Agreement for Skills and Workforce Development*.

The Commonwealth is providing funding for the *National Partnership on youth attainment and transitions*. This National Partnership was established to support the achievement of a national Year 12 or equivalent attainment rate of 90 per cent by 2015 and to halve the gap in Indigenous Year 12 or equivalent attainment by 2020. Measures under this National Partnership aim to increase the educational engagement and attainment of young people and to improve their transition to post-school education, training, and employment through immediate, concerted action supported by broader long-term reform.

COMMUNITY SERVICES

In 2012-13, the Commonwealth will provide funding of \$2.2 billion to support state community services, as detailed in Table 2.7.

As part of the National Health Reform arrangements, the Commonwealth has assumed full policy and funding responsibility for national aged care services and funding responsibility for specialist disability services delivered by the States for people aged 65 years and over (50 years and over for Indigenous Australians). The States have responsibility for funding and regulating disability services for people aged under 65 years (under 50 years for Indigenous Australians). Additional details on the new National Health Reform arrangements are set out in Part 1. The exception to these arrangements is Victoria and Western Australia where existing arrangements will continue.

(a) From 2011-12, the Commonwealth is making an adjustment to the National Disability SPP to ensure that the changes to Commonwealth and State roles and responsibilities for aged care and disability services are budget neutral until 2013-14. From 2014-15 the changed roles and responsibilities in this area will result in additional own purpose expenditure for the Commonwealth. Victoria and Western Australia are not participating in these arrangements and no adjustment will be made to the National Disability SPP for these two jurisdictions.

National Disability Agreement

The *National Disability Agreement* commits the Commonwealth and the States to strive, through the provision of disability support services, to help people with disabilities and their carers achieve an enhanced quality of life and participate as valued members of the community.

To meet these objectives, governments have agreed to reform their services, including to:

- improve the provision of services and opportunities to enhance the capacity of people with disability;
- ensure that services are person-centred and provide timely access to the necessary support needs;
- identify, plan and respond to the development and support needs of people with disability at an early stage and at key life transition points; and
- support the role of carers and families, including through strengthening their informal support networks.

The National Disability SPP is the funding associated with the *National Disability Agreement*. The Commonwealth is providing funding to the States under this National SPP to support disability services.

Growth factor

The Intergovernmental Agreement defines the growth factor for the National Disability SPP as the rolling five year average of year-on-year growth in nominal gross domestic product.

For the purpose of calculating indexation, the Disabilities Assistance Package has been deducted from the base to calculate 2011-12 funding as the package already includes an escalation factor. The package forms part of the base to calculate funding for 2012-13 onwards.

The growth factor for the National Disability SPP is currently estimated to be 5.70 per cent in 2012-13.

(a) From 2011-12, the Commonwealth is making an adjustment to the National Disability SPP to ensure that the changes to Commonwealth and State roles and responsibilities for aged care and disability services are budget neutral through until 2013-14. Victoria and Western Australia are not participating in these arrangements and no adjustment will be made to the National Disability SPP for these two jurisdictions.

Since 1 July 2011, as part of the National Health Reform Agreement agreed with the States in August 2011, the Commonwealth has made an adjustment to ensure that the changes to Commonwealth and State roles and responsibilities for aged care and disability services as part of the National Health Reform arrangements are budget neutral.

National Partnership payments for community services

In addition to the National Disability SPP, the Commonwealth will provide funding through National Partnerships as detailed below.

National Partnership on transitioning responsibilities for aged care and disability services

The *National Partnership on transitioning responsibilities for aged care and disability services* forms part of the National Health Reform arrangements. This agreement implements the first phase of changes to the roles and responsibilities associated with the Commonwealth taking full funding, policy and operational responsibility for basic community care services for people aged 65 years and over (50 years and over for Indigenous Australians), as well as funding responsibility for specialist disability services to people aged 65 years and over (50 years and over for Indigenous Australians) with the exception of Victoria and Western Australia where current arrangements will continue.

As part of these reforms, States will reimburse the Commonwealth for the cost of packaged community care and residential care services delivered to persons under the age of 65 (50 years for Indigenous Australians). Further details of the new National Health Reform arrangements can be found in Part 1 and the Health section of this Part.

(a) Funding in 2012-13 and 2013-14 reflects payments to Victoria and Western Australia under the Home and Community Care Program Review Agreement. Funding is not published past 2013-14. Provision has been made in the Contingency Reserve subject to negotiations with the States.

The Commonwealth will provide funding for the provision of basic community care maintenance and support services such as domestic assistance and personal care to older people. These services will provide support for people aged 65 years and over (50 years and over for Indigenous Australians), and will replace the Home and Community Care program for participating States. From July 2012, funding for these services will be provided by the Commonwealth directly to service providers.

Funding will also be provided to Victoria and Western Australia to continue the current Home and Community Care program as they are not signatories to this element of the National Health Reform arrangements.

The Commonwealth will provide funding for the *National Partnership on Social and Community Services – Queensland pay equity – back pay*. This funding will assist Queensland Social and Community Services sector employers to meet their obligations under the new Australian Government regulation for back pay to employees in the sector who were employed between 27 March 2011 and 29 February 2012.

New spending measures associated with the *National Partnership on Social and Community Services – Queensland pay equity regulation – back pay* are discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

National Partnership on Stronger Futures in the Northern Territory

The Commonwealth will provide funding for the *National Partnership on Stronger Futures in the Northern Territory* that is currently being negotiated with the Northern Territory Government. This new National Partnership is due to commence

on 1 July 2012 as part of the Stronger Futures in the Northern Territory initiative and will build upon the objectives of the *National Partnership on Closing the Gap in the Northern Territory*.

The *Stronger Futures in the Northern Territory* initiative is a ten-year commitment with significant investment in families, education, health, housing, infrastructure, jobs and safety, building on extensive consultations undertaken with Indigenous Australians in the Northern Territory.

The Commonwealth has announced a total funding package of around \$3.4 billion over ten years. Estimates have been allocated in 2012-13 to provide funding certainty. The remainder of funds have been entered in the Contingency Reserve pending negotiation of the new National Partnership.

Funding for the *National Partnership on Stronger Futures in the Northern Territory* is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

Further details of Commonwealth funding being provided for the *National Partnership on Stronger Futures in the Northern Territory* can be found in the Health, Education and Affordable Housing sections of this Part.

National Affordable Housing Agreement

The *National Affordable Housing Agreement* commits the Commonwealth and the States to the objective that all Australians have access to affordable, safe and sustainable housing which will assist them to participate in the labour force and, more broadly, in the community.

The Commonwealth and the States have also committed to reforms that will enhance housing programs and services, including by improving:

- the integration of homelessness services and other mainstream services, such as employment services;
- operational efficiency of public housing and the employment outcomes of public housing tenants; and
- efficiency in the supply of housing through planning reforms.

The National Affordable Housing SPP is the funding associated with the *National Affordable Housing Agreement*. The Commonwealth is providing a financial contribution to support services in the housing sector.

This funding is being used to support a range of measures including social housing, assistance to people in the private rental market, support and accommodation for people who are homeless or at risk of homelessness, and home purchase assistance.

Growth factor

The Intergovernmental Agreement outlines the agreed growth factor for the National Affordable Housing SPP. The growth factor is the wage cost index 1, comprising a safety net wage adjustment weighted by 75 per cent and the all groups Consumer Price Index weighted by 25 per cent.

The growth factor for the National Affordable Housing SPP is currently estimated to be 1.80 per cent in 2012-13.

National Partnership payments for affordable housing

In addition to the National Affordable Housing SPP funding, the Commonwealth will provide a total of \$527.9 million in 2012-13 through National Partnerships to support state affordable housing services. Further details on these National Partnerships are provided below.

The Commonwealth is providing funding to Western Australia for Indigenous housing projects as part of the *National Partnership on the East Kimberley Development Package*. Investment priorities under the package focus on improving the provision of social and transition housing where noticeable gaps exist in the region. Improved housing outcomes, particularly for Indigenous people, will provide the foundation for lasting improvements in living standards, social and economic wellbeing and access to life opportunities, such as employment and education. This project will be completed in 2011-12.

The East Kimberley Development Package as a whole is described in the Infrastructure section of this Part.

As part of the Economic Security Strategy, announced on 14 October 2008, the Commonwealth introduced the First Home Owners Boost to stimulate housing activity, support the construction industry and assist first home buyers to enter the housing market. In response to continued economic uncertainty, the Commonwealth extended the First Home Owners Boost for an additional six months, with the value of grants halving for the three months to 31 December 2009. Eligibility for the First Home Owners Boost has now ceased.

The continuation of the First Home Owners Boost payment in 2011-12 and 2012-13 reflects the 12 month application period and the timeframes allowed for the construction of new homes. Negative total expenditure in 2013-14 reflects an estimate of funds recovered from applicants later found to be ineligible; these funds will be returned to the Commonwealth.

The Commonwealth is providing funding for the *National Partnership on homelessness*. This National Partnership includes the *A Place to Call Home* initiative, a joint initiative by the Commonwealth and the States to build 600 new homes for individuals and families experiencing homelessness. The Commonwealth's contribution to the *A Place to Call Home* initiative is \$150 million over five years to 2012-13, with the States matching this funding.

This National Partnership represents a significant first step to reduce homelessness by 20 per cent by 2013 and 50 per cent by 2020. This National Partnership focuses on three key strategies to reduce homelessness:

- prevention and early intervention to stop people becoming homeless;
- breaking the cycle of homelessness; and
- improving and expanding the service response to homelessness.

There are over 180 new and expanded activities being undertaken across the States to reduce homelessness under this National Partnership.

The Commonwealth is providing funding for the *National Partnership on Remote Indigenous Housing*. This National Partnership was established to facilitate significant reform in the provision of housing for Indigenous people in remote communities and to address overcrowding, homelessness, poor housing conditions and severe housing shortages.

National Partnership on Stronger Futures in the Northern Territory

The Commonwealth will provide funding to the Northern Territory Government through the *National Partnership on Stronger Futures in the Northern Territory*.

There are two affordable housing components under the *National Partnership on Stronger Futures in the Northern Territory*. The Stronger Futures in the Northern Territory initiative is described further in the Community Services section of this Part.

Funding for the *National Partnership on Stronger Futures in the Northern Territory* is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth is providing funding for the *National Partnership on the Adelaide Oval redevelopment and precinct works*. The funding will go towards construction of two underground car parks, as well as the creation of new wetlands and other enhancements around the Riverbank precinct. This is part of the Adelaide Oval upgrade project being undertaken by the South Australian Government. These works are due for completion in 2014-15.

Funding for the Adelaide Oval redevelopment is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth is providing funding for the *National Partnership on the Centenary of Canberra 2013*. A contribution will be provided for the redevelopment of Constitution Avenue, including a dedicated cycle lane and shared commuter paths. A contribution will also be provided for the development of the National Arboretum Canberra.

Further details of Commonwealth funding provided for the Centenary of Canberra 2013 can be found in the Other section of this Part.

(a) All payments are made direct to local governments.

The Commonwealth is providing funding as a contribution to establish a multi-use community hub in Cloncurry, Queensland. The project will establish a library, gallery space for local and touring exhibitions, function rooms with multi-media connections, a commercial grade kitchen and community open space, together with the refurbishment of the existing 1939 Shire Hall.

The project is jointly funded by three levels of government and the private sector and is expected to be completed in 2011-12.

East Kimberley Development Package

The Commonwealth is providing funding to the Western Australian Government through the *National Partnership on the East Kimberley Development Package*, as well as to the Shire of Wyndham East Kimberley and local Indigenous organisations, to support economic development through investment in social and common use infrastructure. The East Kimberley Development Package comprises four streams of projects:

- health related projects;
- education related projects;
- social and transitional housing projects; and
- other infrastructure projects in the transport and community projects sector.

(a) These figures include payments direct to local governments.

The Commonwealth is providing funding to the Western Australian government, the Wyndham Shire and associated Indigenous organisations in the East Kimberley region of Western Australia for transport and community infrastructure projects. Investment in transport and community infrastructure projects will help in building a 'sense of place' within the community, as well as improving liveability and economic growth in the East Kimberley region. This project is expected to be completed in 2011-12.

Further details of Commonwealth funding being provided for the East Kimberley Development Package can be found in the Health, Education and Affordable Housing sections of this Part.

(a) State splits are indicative distributions only and have been allocated to all States on an equal per capita basis. The actual allocation will be subject to a competitive tendering process.

The Commonwealth is providing funding for smart infrastructure technologies to reduce congestion and improve both traffic demand management and the overall efficiency of the transport network in major cities. Managed motorways integrate data collection sensors and control tools to improve real time management of motorways to secure a higher and more consistent level of motorway performance.

National Partnership on the Manuka Oval lighting upgrade

The Commonwealth is providing funding for the *National Partnership on the Manuka Oval lighting upgrade*. The upgrade, which will include the installation of lighting to meet high-definition broadcast standards, will provide Canberra with an appropriate facility to host AFL matches and elite and international cricket matches.

Funding for the Manuka Oval lighting upgrade is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

National Partnership on the Nation Building Plan for the Future

Two components are included in the *National Partnership on the Nation Building Plan for the Future*.

Major cities component

2015-16	-	500.0	-	-	232.1	-	20.0	-	752.1

The major cities and the Building Australia Fund components will support future economic growth by improving the quality and efficiency of Australia's transport networks with the intention of increasing city liveability and sustainability in the context of a growing population.

In the 2012-13 Budget, the Commonwealth is providing \$232.1 million through the Building Australia Fund in 2015-16 to fund 50 per cent of the Torrens and Goodwood Junctions project in South Australia.

A new spending measure associated with the Building Australia Fund component is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

National Partnership on the Nation Building Program

The Commonwealth is providing funding for road and rail infrastructure through the *National Partnership on the Nation Building Program*. The program assists economic and social development regionally and nationally by providing funding to improve the performance of land transport infrastructure.

The *National Partnership on the Nation Building Program* comprises several components that are detailed in the tables below.

Investment component

\$million	NSW	VIC	QLD	WA	SA	TAS	ACT	NT	Total(a)
2011-12	1,279.3	798.8	1,232.5	318.0	362.5	56.7	0.5	52.6	4,100.9
2012-13	568.8	137.1	643.5	292.1	58.1	48.5	0.5	72.4	1,821.1
2013-14	1,231.8	323.2	690.9	383.4	100.7	42.3	0.5	60.2	3,063.9
2014-15	445.2	198.1	136.3	-	-	-	-	-	1,804.6
2015-16	136.8	20.0	88.4	-	-	-	-	-	1,645.2

(a) These figures include \$3.6 billion made available from the Nation Building Program over the period 2013-14 to 2016-17 (including \$900 million in 2016-17). This funding has been made available for the duplication of the Pacific Highway, conditional upon the New South Wales Government agreeing to a 50:50 shared funding arrangement.

The investment component of the Nation Building Program targets nationally significant projects. These projects will improve the efficiency and safety of the national land transport network. Funding is provided for road and rail construction projects and network maintenance, including transport development, innovation projects and grants to land transport research entities.

In the 2012-13 Budget, the Commonwealth is making available \$3.6 billion to complete the duplication of the Pacific Highway by 2016. The funding represents 50 per cent of the total funding required and is conditional upon the New South Wales Government agreeing to meet the remaining 50 per cent of the costs.

New spending measures associated with the investment component of the Nation Building Program are discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

Black spot projects component

\$million	NSW	VIC	QLD	WA	SA	TAS	ACT	NT	Total
2011-12	27.2	16.6	12.1	10.2	4.7	1.8	1.0	0.8	74.5
2012-13	19.1	13.6	12.1	6.5	4.7	1.6	1.0	1.0	59.5
2013-14	19.1	13.6	12.1	6.5	4.7	1.6	1.0	1.0	59.5
2014-15	19.3	13.7	12.2	6.5	4.7	1.6	1.0	1.0	60.0
2015-16	19.3	13.7	12.2	6.5	4.7	1.6	1.0	1.0	60.0

Black spot projects improve the safety of road sites which have been identified as high risk areas for serious crashes. Most funding goes to projects to treat sites that have a record of at least three accidents involving casualties over a five year period and can demonstrate a robust benefit to cost ratio of at least 2:1.

A new spending measure associated with the black spot projects component of the Nation Building Program is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

Off-network projects component^(a)

\$million	NSW	VIC	QLD	WA	SA	TAS	ACT	NT	Total

2015-16	-	-	59.0	-	-	-	-	-	59.0

(a) These figures include payments direct to local governments.

The off-network projects program is designed to improve rail and road infrastructure not included on the national land transport network. It improves safety, assists industry development and supports job creation in local communities.

(a) Figures in this table represent expenses against prepayments made to the States in 2005-06.

The Commonwealth provided a one-off supplementary payment of \$1.8 billion in 2005-06 to the States to complete major works packages. Works include the Pacific and Hume highways in New South Wales, the Bruce Highway in Queensland, the Eyre, Great Eastern and Great Northern highways in Western Australia, the Sturt Highway in South Australia, the East Tamar Highway in Tasmania and the Victoria Highway in the Northern Territory. The table above provides a profile of State expenditure against this supplementary payment.

(a) State splits for 2012-13 to 2015-16 are indicative distributions only and have been allocated on an equal per capita basis to all States.

The heavy vehicle safety and productivity program addresses the safety of drivers of heavy vehicles through fatigue management and road enhancement projects, such as rest areas and bridge upgrades.

A new spending measure associated with the heavy vehicle safety and productivity component of the Nation Building Program is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

(a) These figures include payments direct to local governments.

(b) Payments to South Australia include funding in each financial year paid to local government through the State.

The Commonwealth is providing funding for the Roads to Recovery program for road construction and maintenance projects at a local level. Decisions on projects to be funded are made locally and reported to the Commonwealth.

A new spending measure associated with the Roads to Recovery component of the Nation Building Program is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth has provided additional funding through the improving local roads program as a supplement to the Roads to Recovery program. Funding of \$307.5 million was advanced in June 2006 as part of the 2006-07 Budget.

National transport regulator reforms

In August 2011, COAG committed to the implementation of national safety regulatory systems through the signing of new Intergovernmental Agreements on heavy vehicles, rail and maritime safety.

New spending measures associated with the national transport regulator reforms are discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

(a) All payments are made direct to local governments.

The Commonwealth is providing funding direct to local governments under the Regional and Local Community Infrastructure Program to build and modernise community infrastructure. These projects are expected to be completed in 2011-12.

Regional Infrastructure Fund

The Commonwealth has committed \$6.0 billion over 11 years to 2020-21 in regional infrastructure investment for the Regional Infrastructure Fund (RIF) that will spread the benefits of the mining boom into regional Australia.

The RIF will:

- promote development and job creation in mining communities, and communities which support the mining sector;
- provide a clear benefit to Australia's economic development, and to investment in Australia's resource and export capacity; and
- address potential capacity constraints arising from export production and resource projects.

The Commonwealth will ensure that RIF funding to the States will have regard to their share of total mining production over time.

Projects from the RIF will be delivered in three streams. Streams 1 and 2 are payments to the States and are reported below. Stream 3 provides funding for the Regional Development Australia Fund, which is made direct to eligible local governments and not-for-profit organisations for local projects identified by Regional Development Australia committees. Funding for Stream 3 was previously reported in Budget Paper No. 3 but is now reported under the Department of Regional Australia, Local Government, Arts and Sport portfolio.

2015-16	~	~	~	~	~	~	~	~	450.0

(a) State allocations have not been finalised for this Stream.

Stream 2 will provide funding over nine years to support ongoing investment in economic infrastructure. Projects that are eligible for consideration for funding include rail, roads, ports, airports, energy, communications, water and other critical infrastructure, as well as project development work. Stream 2 also includes \$10 million for regional infrastructure plans.

The Commonwealth is providing funding for the *National Partnership on the Sydney Cricket Ground redevelopment*. The project to replace the Noble, Bradman and Dally Messenger stands will be jointly funded by the Commonwealth Government, the New South Wales Government and the Sydney Cricket and Sports Ground Trust. These works are due for completion in 2013-14.

Budget Paper No. 3

Funding for the Sydney Cricket Ground redevelopment is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

(a) Funding from 2012-13 is allocated to States based on 2011-12 data and represents indicative estimates only. This funding is conditional on agreed national responses to pest or disease incursions.

The Commonwealth is providing funding for the *National Partnership on animal and plant pest and disease eradication*. Commonwealth funding contributes to programs to eradicate exotic animal and plant pests and diseases, which if allowed to establish and spread, would have serious economic and environmental impacts.

The Commonwealth is involved due to the potential implications for interstate biodiversity, market access issues for agricultural products and the need to protect nationally significant environmental assets.

A new measure associated with animal and plant pest and disease eradication is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

2015-16	6.8	4.2	6.0	3.1	2.1	1.3	1.3	1.3	26.1

The Commonwealth is providing funding for the *National Partnership on natural disaster resilience*. This National Partnership provides funding to the States to strengthen community resilience to natural disasters through the Natural Disaster Resilience Program (NDRP).

The NDRP replaces a number of programs, combining funds to allow the flexibility to address state specific priorities. This National Partnership recognises that the Commonwealth and the States have a mutual interest in reducing the impact of, and increasing resilience to, natural disasters. It formalises their commitment to work together with other parties, such as volunteers, the private and non-government sectors and local government to achieve this outcome.

The Commonwealth is providing funding for the *National Partnership on the implementation of the Tasmanian Forests Intergovernmental Agreement*. The *Tasmanian Forests Intergovernmental Agreement* is designed to support the forest industry to progressively transition to a more sustainable and diversified footing, to protect additional areas of high conservation value native forest, and to build regional economic diversity and community resilience. Funding provided under this National Partnership will support the implementation of the Intergovernmental Agreement as well as the ongoing management of additional native forest reserves.

The Commonwealth is providing funding for the Sustainable Rural Water Use and Infrastructure program. This funding is provided under two arrangements: the *National Partnership on Water for the Future*; and Water Management Partnership Agreements relating to the *Intergovernmental Agreement on Murray-Darling Basin Reform*. The program is improving the efficiency and productivity of rural water management and usage, delivering substantial and lasting water returns to the environment and helping secure a long-term sustainable future for irrigated agriculture. The program is delivering projects such as the State Priority Projects, the Supporting More Efficient Irrigation in Tasmania project, the Orange City Pipeline project and the Gascoyne Irrigation Pipeline project.

CONTINGENT PAYMENTS

Contingent payments arise where the Commonwealth has committed to provide compensation when an event occurs or otherwise guarantees the States' financial position. Payments to the States will only arise if the relevant event occurs.

Table 2.11 provides information on contingent payments.

The Commonwealth is providing funding under the NDRRA to assist the States with relief and recovery assistance following eligible natural disasters. This includes payments to the States in response to recent and past natural disasters including the November 2010 to February 2011 floods and Tropical Cyclone Yasi.

Subsequent to the 2011-12 Budget, the Commonwealth reviewed the accounting treatment of payments made to the States under the NDRRA. The accounting treatment previously applied by the Commonwealth was to recognise grant liabilities under the NDRRA to the extent that (i) the services required to be performed by the State had been performed or (ii) the grant eligibility criteria had been satisfied, but payments due had not been made. The change in accounting treatment has resulted in the Commonwealth recognising a liability equal to the present value of future payments expected to be made to the States under the NDRRA. This is regardless of whether or not a State has completed eligible disaster reconstruction work or submitted an eligible claim under the NDRRA.

The estimated expenses in the table above reflect expected Commonwealth costs associated with disasters that have occurred in 2011-12 and the 'unwinding of the discount' on the provision, which reflects the time value of money.

The estimated cash payments are presented in the table below, illustrating the estimated timing of when the Commonwealth expects to reimburse the States for costs incurred in relation to past disasters.

The Commonwealth is providing a financial contribution through State governments for the provision of local government services to the community. In 2012-13, payments for local government services will total \$1.1 billion, recognising a decision by the Commonwealth for \$1.1 billion to be brought forward from 2012-13 to be paid in 2011-12.

Current arrangements for financial assistance grants are made up of general purpose assistance and untied local roads grants. General purpose assistance is the larger of the two components of the financial assistance grants and is distributed between the States on a per capita basis, while untied local roads grants are paid on the basis of 1991-92 interstate road shares.

The financial assistance grants are adjusted annually, based on an escalation factor that the Treasurer determines with reference to population growth and the consumer price index.

These grants are paid to State governments, after which State grants commissions determine the intrastate distribution of the financial assistance grants between local governments. Both forms of funding are untied and can be spent according to each local government's own priorities.

The Commonwealth will pay the first two quarterly instalments of the expected 2012-13 allocation in 2011-12 so that local governments have immediate use of the funds (since 2008-09, the Commonwealth has bought forward the first quarter payment from the next financial year). This will provide local governments with additional flexibility and assist them in responding to the widespread natural disasters and other pressures. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

The Commonwealth is providing funding for the *National Partnership on the pilot of drought reform measures in Western Australia*. This National Partnership was established to test a package of new measures developed in response to the national review of drought policy, including assistance for farm business planning, on farm projects and capacity building and community activities, as well as support for farm households and communities. The program aims to increase the resilience and capacity of farmers, farming families and their communities to prepare for and self-manage drought, climate variability and reduced water allocation.

The pilot is being conducted in a region of Western Australia that covers a broad range of farming enterprises and climatic conditions. In May 2011, a decision was taken to extend the pilot for one year to 30 June 2012, and expand the pilot region to include the

south west region of Western Australia. Payments under the National Partnership will continue to be made until 2013-14.

The Commonwealth has set aside reward funding for the delivery by the States of regulatory reforms under the *National Partnership to deliver a seamless national economy*, aimed at reducing unnecessary and inconsistent regulation. Final payments to jurisdictions will be dependent on the achievement of agreed reform outcomes as

specified in the National Partnership. Facilitation payments were provided to jurisdictions as part of this National Partnership in 2008-09.

Funding for temporary assistance to Tasmanian exporters is a new spending measure in the 2012-13 Budget. This measure is discussed in Budget Paper No. 2: *Budget Measures 2012-13*.

PART 3: GENERAL REVENUE ASSISTANCE

General revenue assistance is a broad category of payments. This assistance is provided to the States without conditions, to spend according to their own budget priorities. The main form of general revenue assistance is the Goods and Services Tax (GST). Other general revenue assistance includes payments to the Australian Capital Territory for municipal services, royalties, and Snowy Hydro Limited tax compensation. These payments are discussed in this Part.

OVERVIEW OF PAYMENTS

In 2012-13, the States will receive \$49.4 billion from the Commonwealth in total general revenue assistance — \$48.2 billion for GST and \$1.2 billion for other general revenue assistance. This represents a 5.7 per cent increase in GST compared to the \$45.6 billion the States are expected to receive in 2011-12 and a 6.0 per cent increase in other general revenue assistance. In 2012-13, total general revenue assistance to the States will represent 13.1 per cent of total Commonwealth expenditure. Total general revenue assistance the Commonwealth provides to the States is shown in Table 3.1 and in Table 3.2 by State.

GST ENTITLEMENT TO THE STATES

Under the *Intergovernmental Agreement on Federal Financial Relations*, the States are entitled to receive payments from the Commonwealth equivalent to the revenue received from the GST. GST revenue refers to the amount of GST collected by the Australian Taxation Office (ATO), less revenue not recognised as at 30 June of each

financial year, because the revenues will not be remitted to the ATO until the following financial year. GST entitlement refers to the amount of GST which is entitled to be distributed to the States. GST payments reflect the GST entitlement which is distributed to the States adjusted for any balancing amount from the prior financial year.

Table 3.3 provides a reconciliation of the GST revenue estimates since the 2011-12 Budget and 2011-12 MYEFO. The reconciliation accounts for policy decisions and parameter and other variations. GST revenue in 2012-13 has been revised down by \$3.1 billion since the 2011-12 MYEFO, reflecting weakness in current collections as well as the softer outlook for consumption subject to GST and subdued dwelling investment. The weaker outlook for consumption reflects an ongoing trend of households consolidating their balance sheets. Exacerbating this are signs that consumers are spending relatively more of their income on GST exempt goods and services.

Detailed information on policy decisions since the 2011-12 MYEFO are included in Budget Paper No. 2: *Budget Measures 2012-13*.

GST revenue for a financial year varies from the amount of GST paid to the States for that year because of:

- GST revenues which are recognised on a Commonwealth whole of government basis, but not recognised as at 30 June of each financial year, as the revenues will not be remitted to the ATO until the following financial year;
- penalties, other than general interest charge (GIC) penalties, which are not included in the definition in the *Federal Financial Relations Act 2009* of GST to be paid to the States;
- the GST component of sales by Commonwealth agencies which has been collected by those agencies but which, as at 30 June in each year, has not been remitted to the ATO, because it is not due to be paid until the next Business Activity Statement is lodged; and
- adjustments to account for any variation in the previous financial year between the Treasurer's determination, and GST payment advances made during that financial year.

States receive monthly advances of GST throughout the year based on the Commonwealth estimate of the GST entitlement. The Treasurer makes a determination of the amount of GST revenue collected in the financial year upon receipt of the final outcome after the close of the financial year. Any variation between GST advances and the final outcome as determined by the Treasurer is settled in the following financial year.

In 2011-12, an amount of \$437.2 million was added to the States' 2011-12 GST entitlement as a balancing adjustment for the difference between the final amount determined by the Treasurer and advances made during the 2010-11 financial year.

A reconciliation of GST revenue, GST entitlement and GST payments to the States is provided in Table 3.5.

(b) While GST related non-GIC penalties are recognised in the Commonwealth's GST revenue, non-GIC penalties are not defined in the *Federal Financial Relations Act 2009* as being a part of the GST revenue that is paid to the States.

(c) This is the GST component of sales by Commonwealth agencies which has been collected by those agencies but which, as at 30 June in each year, will not have been remitted to the ATO, because it is not due to be paid until the next Business Activity Statement is lodged (typically on 21 July in the following financial year).

(d) Advance GST payments made in 2010-11 were \$437.2 million lower than the final outcome determined by the Treasurer. This amount was added to payments in 2011-12.

Distribution of GST entitlement among the States

The Commonwealth distributes GST among the States in accordance with the principle of horizontal fiscal equalisation and having regard to the recommendations of the Commonwealth Grants Commission (the Commission).

The Commission recommends GST revenue sharing relativities to be used in calculating each State's entitlement of the GST pool. The relativities determine how much GST each State receives compared with an equal per capita share and are determined such that, if each State made the same effort to raise revenue from its own sources and operated at the same level of efficiency, each State would have the capacity to provide services and the associated infrastructure at the same standard.

This does not necessarily result in the same standard of government services – just the equalisation of each State's capacity to provide the same standard of services. In calculating the GST relativities, the Commission takes into account differences in the State's capacity to raise revenues and differences in the costs the States would incur in

providing the same standard of government services, including through acquiring the infrastructure used to deliver those services.

Horizontal fiscal equalisation provides the necessary budget support so that all States have the capacity to provide services at a comparable standard, while ensuring that the interstate transfers are not so large that they would significantly distort economic behaviour and reduce productivity growth.

The Commonwealth has commissioned a Review into the distribution of GST to the States. Further information on the Review can be found in Part 1 and online at: www.gstdistributionreview.gov.au.

Table 3.6 identifies the relativities recommended by the Commission for 2011-12 and 2012-13, and projected revenue sharing relativities for distributing GST over the forward estimates.

The Commonwealth's projections of GST relativities for 2013-14 to 2015-16 assume that the States' fiscal capacities will be broadly consistent with the assessment of their relative fiscal assessed differences in the Commission's *2012 Update*.

The projections only include adjustments to account for estimated changes in the size of the GST pool, State population shares and the distribution of the National SPPs. Consistent with the Commission's approach, assessed relativities are averaged over the three most recent years. For years where the Commission has not produced an assessed relativity, the assessment for the latest available year, in this case 2010-11, is carried forward.

The adjustment relating to the distribution of the National SPPs ensures the projections reflect the arrangements that will prevail at the time of payment. In accordance with the *Intergovernmental Agreement on Federal Financial Relations*, National SPPs are progressively shifting towards an equal per capita share from the historical shares specified in the Intergovernmental Agreement.

Box 3.1: The effect of horizontal fiscal equalisation

It is usual for individual States within a federation to have different capacities to raise revenue or deliver services. The practice of equalising revenue capacities and/or expenditure capacities between the States in a federation is common. Australia has had various forms of fiscal equalisation since 1901.

Chart A below shows that the proportion of the GST payments being redistributed in 2012-13 is broadly consistent with the average redistribution since the commencement of the GST.

Chart A: GST redistributed as a proportion of the GST payments

A State's GST relativity is not a complete measure of its share of Commonwealth funding. In 2012-13, payments for specific purposes (National Specific Purpose Payments and National Partnership payments) will also provide a substantial source of revenue for the States. There are also other general revenue assistance payments made to the States. Given this, a more accurate measure of relative Commonwealth support for a State would include this funding.

The relative share of total Commonwealth funding is shown in Table A below. That is, all Commonwealth payments have been calculated on a per capita basis for each State and then divided by the per capita figure for Australia. Using this measure, payments to the States are generally closer to an equal per capita share, as shown in Table A.

Table A: Relative share of expected total Commonwealth payments, 2012-13

	NSW	VIC	QLD	WA	SA	TAS	ACT	NT
Relative share of total payments	0.94	0.93	0.98	0.88	1.16	1.33	1.07	3.93
CGC determined GST relativity	0.95	0.92	0.98	0.55	1.28	1.58	1.20	5.53

Note: Unallocated payments have been excluded. Figures for the forward estimates have not been provided as they would need to rely, in part, on future GST relativities which are projections only.

Distribution of the GST entitlement pool

To determine the allocation of GST amongst the States, the GST relativities are applied to estimated state populations in order to determine an adjusted population for each State. Each State will receive its adjusted population share of the GST entitlement. The detailed calculation for the distribution of the GST in 2011-12 and 2012-13 is shown in Table 3.7, Table 3.9 and Chart 3.1 below.

GST administration

States compensate the Commonwealth for the agreed costs incurred by the ATO in administering the GST, including costs incurred by the Australian Customs Service. On 4 April 2012, the Standing Council for Federal Financial Relations endorsed a preliminary GST administration budget for the ATO of \$699.3 million for 2012-13, as shown in Table 3.10.

(b) Further information on the additional GST compliance measure can be found in Budget Paper No. 2.

The amount paid by the States and the prior year adjustment in 2010-11 is \$5.9 million higher than the final audited GST administration cost for 2010-11. This over-payment is offset against the States' administration costs of \$683.2 million for 2011-12.

OTHER GENERAL REVENUE ASSISTANCE

The Commonwealth makes payments of other general revenue assistance to the States, including:

- payments to the Australian Capital Territory for municipal services;
- reduced royalties;
- royalties; and
- Snowy Hydro Ltd tax compensation.

Similar to GST, other general revenue assistance is provided to the States without conditions, to spend according to their own budget priorities.

The Commonwealth provides general revenue assistance to the Australian Capital Territory to:

- assist in meeting the additional municipal costs which arise from Canberra's role as the national capital; and
- compensate the Australian Capital Territory for additional costs resulting from the national capital planning influences on the provision of water and sewerage services.

The level of funding is based upon the findings of the Commonwealth Grants Commission, in its second and third reports on financing for the Australian Capital Territory, prior to the move to self-government in 1989.

Royalty payments to Western Australia

The Commonwealth provides general revenue assistance to Western Australia from royalties collected under the *Offshore Petroleum (Royalty) Act 2006* in respect of the North West Shelf oil and gas project off the coast of Western Australia. The Commonwealth collects these royalties because it has jurisdiction over offshore areas.

These royalties are shared between the Commonwealth (approximately one third) and Western Australia (approximately two thirds). These payment arrangements are in accordance with the revenue sharing arrangements in section 75 of the *Offshore Petroleum and Greenhouse Gas Storage Act 2006*.

Royalty payments to the Northern Territory

The Commonwealth provides general revenue assistance to the Northern Territory in lieu of royalties on uranium mining in the Ranger Project Area due to the Commonwealth's ownership of uranium in the Northern Territory.

General revenue assistance is payable biannually at the royalty rate of 1.25 per cent of the net proceeds of sales. These royalties are paid under a continuing agreement, established under the 1978 Memorandum of Understanding between the Commonwealth and the Northern Territory.

On 28 June 2002, the Snowy Mountains Hydro Electric Authority was corporatised. The assets and business of the Authority were transferred to Snowy Hydro Limited, a company jointly owned by the Commonwealth, New South Wales and Victoria (with 13 per cent, 58 per cent and 29 per cent shareholdings respectively).

The Commonwealth provides compensation payments to New South Wales and Victoria, in the form of general revenue assistance, for Commonwealth taxes paid by Snowy Hydro Limited in proportion to the States' shareholdings.

Payments are made in accordance with the Snowy Hydro Tax Compensation Deed between the Commonwealth, New South Wales and Victoria. These taxes would have previously been payable to the States through tax equivalence regime payments.

MIRROR TAX ARRANGEMENTS

The Commonwealth introduced mirror tax arrangements in 1998 to ensure that the States were not financially disadvantaged by the High Court decision in *Allders International Pty Ltd v Commissioner of State Revenue (Victoria)*, which invalidated state taxes on Commonwealth places. These arrangements mirror certain state taxes, including payroll taxes, land taxes and stamp duties, with respect to Commonwealth places. The States collect these mirror taxes on behalf of the Commonwealth and bear the administrative costs of collection. All mirror tax revenues are credited to the Commonwealth and simultaneously appropriated to the States. Hence, mirror taxes are recorded as both a Commonwealth revenue and expense, with no net impact on the Commonwealth's budget position.

PART 4: DEVELOPMENTS IN THE CONSOLIDATED NON-FINANCIAL PUBLIC SECTOR

The consolidated public sector fiscal position is expected to continue to improve following the effects of the global financial crisis (GFC). Expenses as a proportion of GDP are forecast to fall relative to historical averages, offsetting the effect of revenue as a proportion of GDP being below its pre-GFC level.

The Commonwealth general government fiscal and cash balances are expected to be in surplus from 2012-13. By 2014-15, the Commonwealth position will be sufficient to offset the continuing (albeit narrowing) deficits at the aggregate State level, and result in consolidated fiscal and cash surpluses.

The effects of the patchwork economy are evident in the relative fiscal positions of the States, although State-specific factors also play a role. Some States are anticipating surpluses sooner than others, with Victoria and Western Australia expecting operating surpluses in each of the forecast years.

INTRODUCTION

This Part provides perspective on the financial position of all levels of government in Australia.

It discusses trends in key fiscal indicators including the net operating balance, fiscal balance, cash balance, net debt and net interest payments, at the Commonwealth and State and local level, and at the consolidated level.

The Part focuses on trends in the non-financial public sector (NFPS) which comprises the general government sector and the public non-financial corporations (PNFC) sector. The general government sector provides non-market goods and services such as policing, health and education. The PNFC sector comprises government-controlled corporations engaged in providing market goods such as electricity and public transport, but not financial services.

For further information on the fiscal indicators and the institutional structure of the public sectors see Budget Paper No. 1, Statement 9.

The State estimates in this Part come from 2011-12 mid-year financial reports, with the exception of those for Victoria and the Northern Territory, which are drawn from 2012-13 Budgets. Aggregate State data are only available to 2014-15.

Additional data tables can be found in Appendix D.

NET OPERATING BALANCE

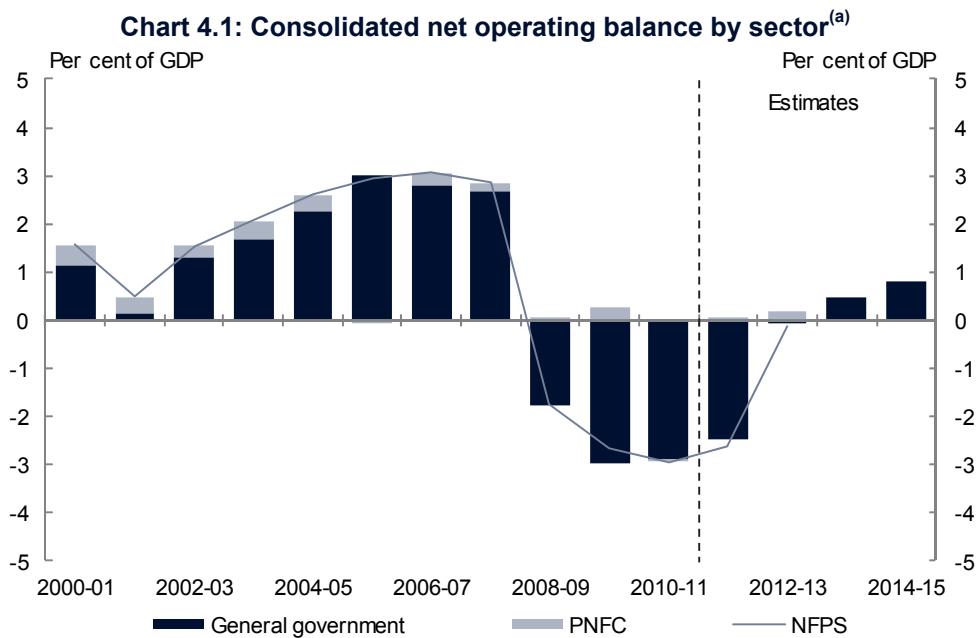

The net operating balance measures in accrual terms the gap between recurrent expenses and revenue for a given period. This is the headline budget measure used by most States to provide an indication of the medium-term sustainability of the existing level of government services. The Commonwealth does not use net operating balance as a headline fiscal indicator.

In aggregate, the States are estimating general government sector operating deficits in 2012-13, improving to operating surpluses by 2014-15. The circumstances in individual States vary.

Victoria and Western Australia are estimating operating surpluses in 2012-13 and each of their forecast years.

All other States are expecting operating deficits in 2012-13, with Queensland and South Australia expecting to reach operating surpluses by 2014-15.

In aggregate, the States are not expecting own-source taxation revenue as a proportion of GDP to return to pre-GFC levels prior to 2014-15. States are also forecasting a decline in their non-tax revenue (as a proportion of GDP).

(a) Data for the PNFC sector (and therefore NFPS) are not available beyond 2012-13.

The expected return by the States, in aggregate, to operating surplus by 2014-15 reflects that the States are forecasting expenses as a proportion of GDP to be below the pre-GFC 10-year average across the forward estimates, but particularly in 2013-14 and 2014-15.

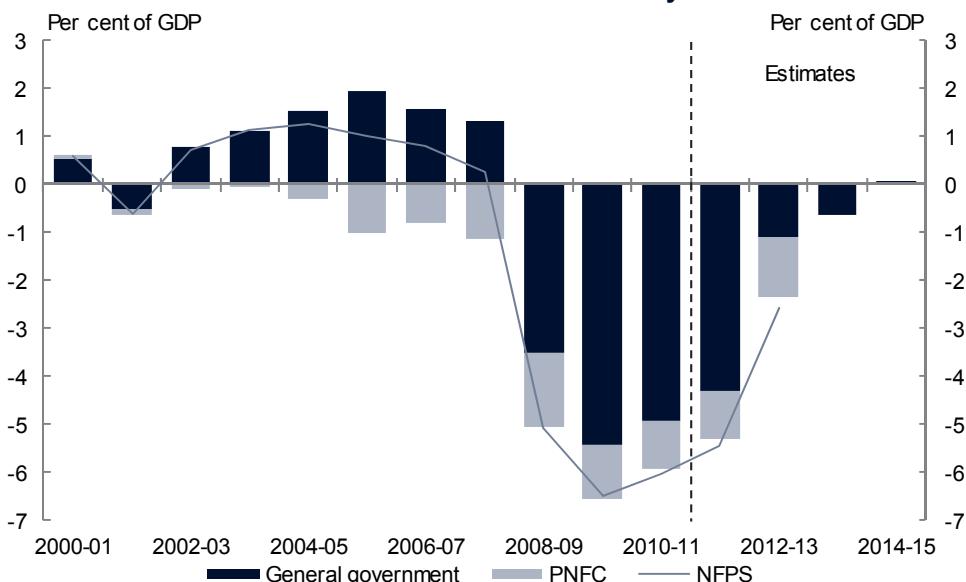

As shown in Chart 4.1, the consolidated general government net operating position is estimated to be in deficit in 2012-13, strengthening to a surplus of 0.8 per cent of GDP in 2014-15.

FISCAL AND CASH BALANCES

A fiscal surplus indicates that a government is saving more than enough to finance all of its investment spending and is therefore not contributing directly to the current account deficit. A fiscal deficit indicates that a government needs to borrow or liquidate financial assets in order to fund its capital and/or recurrent expenditures.

As the fiscal balance includes capital transfers and investment in non-financial assets, which are not included in the net operating balance, the difference between the fiscal balance and the net operating balance is the effect of investment in infrastructure.

Chart 4.2: Consolidated fiscal balance by sector^(a)

(a) Data for the PNFC sector (and therefore the NFPS) are not available beyond 2012-13.

The fiscal balances of both the Commonwealth and State/local general government sectors are expected to improve over the forward years. While the Commonwealth general government sector is expected to return to fiscal surplus in 2012-13, aggregate State deficits delay the return to surplus at the consolidated level until 2014-15.

Aggregate State net capital investment is forecast to decline over the forward estimates period, reaching 0.2 per cent of GDP by 2014-15. This is considerably less than pre-GFC investment levels, which averaged 0.4 per cent of GDP in the 10 years to 2007-08. The reduction in net capital investment and the improving net operating position are

driving an improvement in the aggregate State fiscal position across the forward estimates period.

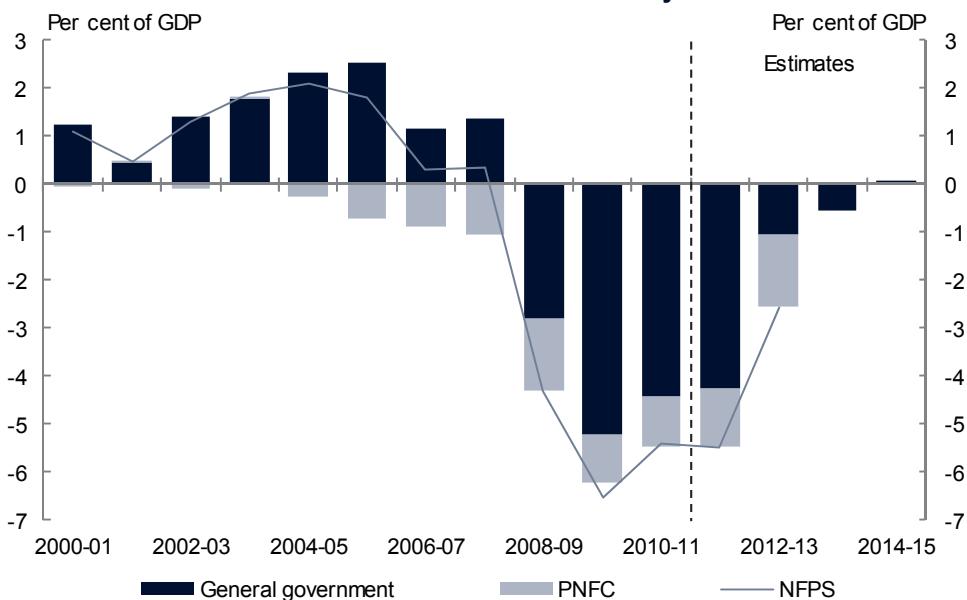

As shown in Chart 4.2, the consolidated general government sector fiscal balance is expected to be a deficit of 4.3 per cent of GDP in 2011-12 and 1.1 per cent of GDP in 2012-13. Fiscal deficits are also expected in the PNFC sector, leading to an NFPS deficit of 5.5 per cent of GDP in 2011-12 and 2.6 per cent of GDP in 2012-13.

The cash balance is the equivalent of a fiscal balance measured on a non-accrual basis, that is, capturing payments and receipts as they occur. It therefore reflects the extent to which cash is available to a government.

The same trends as discussed above in relation to the fiscal balance are affecting the cash balance of both the Commonwealth and State governments.

As shown in Chart 4.3, the consolidated general government sector cash balance is expected to be a deficit of 4.3 per cent of GDP in 2011-12 and 1.1 per cent of GDP in 2012-13. Cash deficits are also expected in the PNFC sector, leading to an NFPS deficit of 5.5 per cent of GDP in 2011-12 and 2.6 per cent of GDP in 2012-13.

Chart 4.3: Consolidated cash balance by sector^(a)

(a) Data for the PNFC sector (and therefore the NFPS) are not available beyond 2012-13.

NET DEBT

Net debt is the sum of selected financial liabilities (deposits held, advances received, government securities, loans and other borrowing) less the sum of selected financial assets (cash and deposits, advances paid, investments, loans and placements). Net debt does not include superannuation-related liabilities.

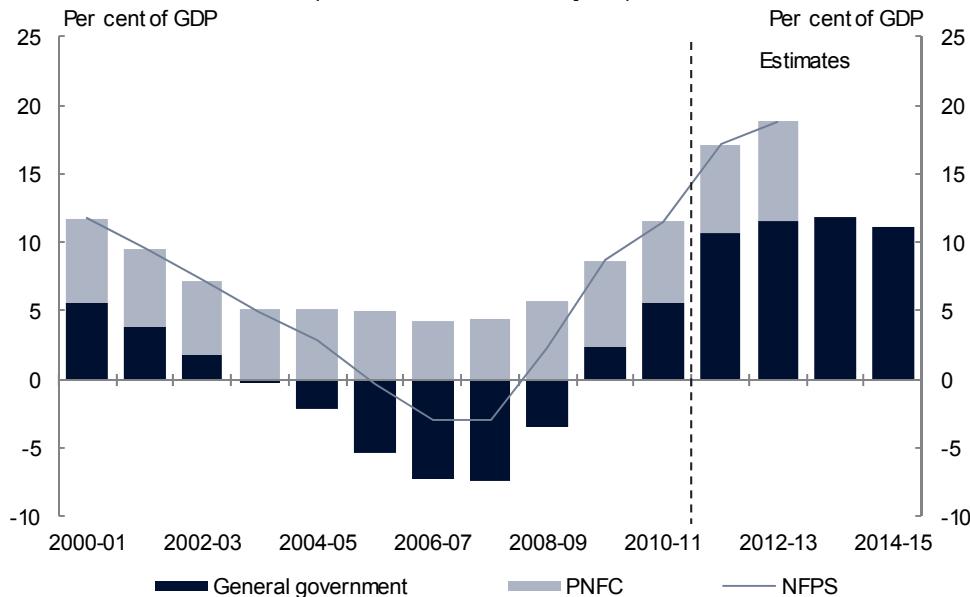

Consolidated general government sector net debt is expected to be 11.6 per cent of GDP in 2012-13.

General government sector net debt as a proportion of GDP for the Commonwealth is forecast to peak in 2011-12, and decline over the forward years as the fiscal surpluses from 2012-13 onwards allow the repayment of debt. State net debt as a proportion of GDP is expected to increase through to 2013-14, and decline marginally in 2014-15, reflecting the aggregate net fiscal deficits of the States.

Commonwealth net debt is expected to continue to make up the bulk of consolidated net debt, although the States' aggregate share is expected to increase over the forward estimates.

As shown in Chart 4.4, consolidated NFPS net debt is expected to be 18.9 per cent of GDP in 2012-13.

Chart 4.4: Consolidated net debt by sector
(as at end of financial year)^(a)

(a) Data for the PNFC sector (and therefore the NFPS) are not available beyond 2012-13.

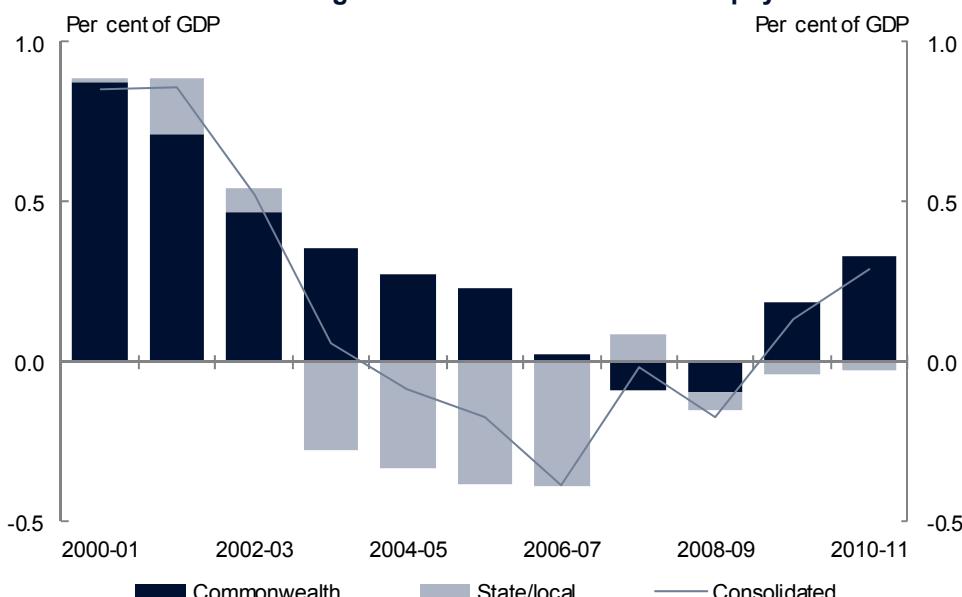

NET INTEREST PAYMENTS

Net interest payments reflect the cost of servicing debt. The higher the net debt of a government, the greater the call that will be imposed on that government's future revenue flows to service the debt.

Consolidated general government sector net interest payments reached a low in 2006-07, as the Commonwealth and State/local general government sectors recorded sustained budget surpluses, which were used, in part, to pay down debt.

Budget deficits and rising net debt associated with the global slowdown have caused net interest payments to rise. In 2010-11, consolidated general government sector net interest payments rose by 0.2 percentage points of GDP.

THE AUSTRALIAN LOAN COUNCIL

The Australian Loan Council is a Commonwealth-State standing council that coordinates public sector borrowing. It consists of the Prime Minister of Australia and the Premier/Chief Minister of each State and Territory. In practice, each member is represented by a nominee, usually the Treasurer of that jurisdiction, with the Commonwealth Treasurer as Chair.

Current Loan Council arrangements operate on a voluntary basis and emphasise transparency of public sector financing rather than adherence to strict borrowing limits. These arrangements are designed to enhance financial market scrutiny of public sector borrowing and facilitate informed judgments about each government's financial performance.

The Loan Council traditionally meets annually around March or April to consider jurisdictions' nominated borrowings for the forthcoming year. As part of the agreed arrangements, the Loan Council considers these nominations, having regard to each jurisdiction's fiscal position and the macroeconomic implications of the aggregate figure.

Since 2009-10, the role of the Loan Council has included reporting on the macroeconomic implications of proposed expenditure from the Building Australia Fund, the Health and Hospitals Fund and the Education Investment Fund.

The Loan Council has also provided an additional level of scrutiny regarding the use of the Guarantee of State and Territory Borrowing (the Guarantee) introduced during the GFC and which closed to new issuance on 31 December 2010.

Outcome of the 2012 Loan Council meeting

The Loan Council met on 4 April 2012 to consider Loan Council Allocation nominations for 2012-13. The Loan Council approved each jurisdiction's nominated allocation. In aggregate, the nominations represent a deficit of \$38.7 billion (Table 4.1). The States nominated a deficit of \$31.7 billion and the Commonwealth nominated a deficit of \$7.0 billion.

The Loan Council considered the macroeconomic implications of infrastructure spending from the three nation-building funds. Given the size and likely timing profile of any spending on new projects, the Loan Council determined that the drawdown of the remaining balances in the funds is not likely to have a material impact on the economy.

The Loan Council agreed to the cessation of reporting on the Guarantee. The final report determined that the Guarantee was being used to support state infrastructure investment and was not being used inappropriately.

Developments since the 2012 Loan Council meeting

As part of the Loan Council arrangements, all jurisdictions are required to update their Loan Council Allocation to reflect their Budget and to provide an explanation to the Loan Council if they are likely to exceed the tolerance limit.

2012-13 Loan Council Allocation budget updates are available in the States' 2012-13 Budgets. Since the Loan Council meeting on 4 April 2012, Victoria and the Northern Territory have released their 2012-13 Budgets. Both States breached the tolerance limits set at the 2012 Loan Council meeting.

The Commonwealth's 2012-13 Loan Council Allocation budget update is available in Budget Paper No. 1, Statement 9, Appendix B.

- (a) Loan Council Allocation (LCA) nominations for 2012-13 reflect best estimates of cash surpluses/deficits. Nominations have been provided on the basis of policies announced up to and including jurisdictions' mid-year financial reports and the Commonwealth's *Mid-Year Economic and Fiscal Outlook 2011-12*. Each jurisdiction will publish an updated LCA estimate as part of its budget documentation.
- (b) The sum of the general government and PNFC sector balances may not equal the non-financial public sector (NFPS) balance due to intersectoral transfers.
- (c) Net cash flows from investments in financial assets for policy purposes comprise net lending by governments with the aim of achieving government policy as well as net equity sales and net lending to other sectors or jurisdictions. Such transactions involve the transfer or exchange of a financial asset and are not included within the cash deficit. However, these flows have implications for a government's call on financial markets. Net cash flows from investments in financial assets for policy purposes are displayed with the same sign as reported in cash flow statements.
- (d) Memorandum items are used to adjust the NFPS surplus/deficit to include in LCAs certain transactions — such as operating leases — that have many of the characteristics of public sector borrowings but do not constitute formal borrowings. They are also used, where appropriate, to deduct from the NFPS surplus/deficit certain transactions that the Loan Council has agreed should not be included in LCAs; for example, the funding of more than employers' emerging costs under public sector superannuation schemes, or borrowings by entities such as statutory marketing authorities. Where relevant, memorandum items include an amount for gross new borrowings of government home finance schemes.
- (e) Tolerance limits are designed, *inter alia*, to accommodate changes to LCAs resulting from changes in policy. Tolerance limits apply between jurisdictions' LCA nominations and budget estimates, and again between budget estimates and outcomes. They are calculated as two per cent of NFPS cash receipts from operating activities in each jurisdiction.

APPENDIX A: PARAMETERS AND FURTHER INFORMATION

This appendix provides information on the parameters used in producing this Budget Paper.

Budget Paper No. 1: *Budget Strategy and Outlook 2012-13*, Statement 2: *Economic Outlook*, provides information on the forecasting approach used in the 2012-13 Budget.

POPULATION

Population data are used to distribute funding between the States and in the calculation of annual growth factors.

(a) Treasury estimates.

The State populations for 2011-12 to 2015-16 are estimates of the population of each State on 31 December in the respective year. They are constructed using the latest demographic data available from the Australian Bureau of Statistics (ABS) and Treasury assumptions. These assumptions are in respect of fertility, mortality, net overseas migration and interstate migration.

Fertility

In the *2010 Intergenerational Report*, it was assumed that the total fertility rate (TFR) would fall to exactly 1.9 by 2013 and stay at that level for the remainder of the projection period. As reported by the ABS in their publication *Births, Australia, 2010* (cat. no. 3301.0) the TFR fell to 1.89 babies per woman in 2010, slightly below the long-term TFR of 1.9 assumed in the *2010 Intergenerational Report*. Based on this evidence, the Treasury's assumption has been altered slightly and now assumes that the TFR will fall to 1.85 babies per woman by 2015 and then stay at that level for the remainder of the projection period.

Mortality

The mortality assumptions remain those used in the 2011-12 Budget. They are based on the medium assumptions used in the ABS *Population Projections, 2006-2101*.

(cat. no. 3222.0). In these assumptions, a continuing decline in mortality rates across Australia, with state differentials persisting, is assumed. Overall, mortality is assumed to decline to the year 2013, at the rate observed over the period 1971-2005, from the level observed in the latest death registration data for 2010-11.

Net overseas migration

Net overseas migration is the difference between permanent and long-term arrivals, and permanent and long-term departures.

Increased volumes of international movements across Australia's borders, changes to the composition of international visitors and their duration of stay behaviour, and international travel patterns of Australian residents (including duration of absence and frequency of travel) make estimates of net overseas migration difficult.

In the 2010 *Intergenerational Report*, net overseas migration was assumed to fall relatively sharply from an average of around 244,000 a year over the three years to June 2009 to 180,000 a year from 2012. As reported in the 2011-12 Budget, the decline in net overseas migration was larger than expected at the time the Intergenerational Report was released. Consequently, net overseas migration was expected to dip below the long-term Intergenerational Report assumption of 180,000 per annum in the years ending December 2010 and 2011, before returning to the long-term assumption. Net overseas migration was 168,800 in 2010 and based on three-quarters of published data, is expected to be 175,000 in 2011. A return to the long-term 2010 *Intergenerational Report* assumption of 180,000 persons per annum in 2012 is assumed.

Table A.2 shows the net overseas migration assumptions used in this Budget Paper.

Table A.2: Net overseas migration

	2011	2012	2013	2014	2015
Net overseas migration, Australia	175,000	180,000	180,000	180,000	180,000

State shares of net overseas migration are estimated by using a weighted average of the three most recent observed years – 2009, 2010 and 2011 – with weights of 1, 2 and 4 respectively.

Interstate migration

Similar to State shares of net overseas migration, the Treasury's estimates of net interstate migration are based on a weighted average of the three most recent observed years – 2009, 2010 and 2011 – with weights of 1, 2 and 4 respectively.

Table A.3: Net interstate migration

AGE/GENDER WEIGHTED POPULATIONS

The Treasury's estimates of State population have been used to calculate the population weighted for hospital utilisation for different age/gender cohorts. The weighted hospital utilisation forms part of the growth factor for the National Healthcare Specific Purpose Payment and from 1 July 2012, the base funding component of National Health Reform funding.

SCHOOL ENROLMENTS

Student enrolment projections are based on a grade progression ratio model, which incorporates student movements between government and non-government sectors. These projections do not take into account future economic, migration or social policy changes, however, do take into account the proposal by Queensland to transfer the Year 7 primary program to their secondary program, starting from 2015.

DATA SOURCES

The information in Part 4, Appendix C and Appendix D of this Budget Paper is consistent with the ABS Government Finance Statistics reporting framework for the public sector.

Commonwealth data are sourced from the Commonwealth Government Final Budget Outcomes, ABS, and Commonwealth Government Consolidated Financial Statements. See Budget Paper No. 1: *Budget Strategy and Outlook 2012-13, Statement 10: Historical Australian Government Data*, for more information.

State data for 2011-12 onwards are sourced from States' 2011-12 mid-year financial reports, with the exception of Victoria and the Northern Territory which are sourced from 2012-13 Budgets.

Commonwealth Government budget aggregates have been backcast to 2000-2001 (where applicable) for recent accounting clarification changes that require revisions to the historic series, ensuring that data are consistent across the period.

The 2012-13 Budget also includes revisions to Commonwealth Government budget aggregates that improve the accuracy and comparability of the data through time. See Budget Paper No. 1: *Budget Strategy and Outlook 2012-13, Statement 10: Historical Australian Government Data*, for more information on these revisions.

APPENDIX B: DEBT TRANSACTIONS

The Commonwealth holds a stock of around \$3.4 billion in loans advanced to the States. The States make interest payments and repayments to the Commonwealth in respect of these loans.

The Commonwealth advances the States loans under a range of agreements. These advances have often been over very long repayment periods (some in excess of 50 years), although the terms of each agreement vary considerably.

Most of the interest payments and repayments relate to housing and infrastructure. Payments are also made against loans under agreements for natural disasters and other purposes administered by various Commonwealth agencies.

Total advances, interest and repayments from the States to the Commonwealth are shown in Table B.1.

From the 2013-14 Budget, this Appendix will only be available online at: www.budget.gov.au.
